Perceval Gibbon describes a Cossack raid on a Russian village:—"There were a few lights that Sunday night in the village of Pavlov, and those were fitful and moved hither and thither; but there was a murmur of feverish preparation, and in the darkness men passed swiftly from house to house, and now and again there was a cry as some woman realized her despair. It was known that the Cossacks were coming. Spurred by famine and inflamed by the preachers of revolution, the men of Pavlov two days before had flung themselves upon the country house of the prince whose terraced gardens and orderly woods sneered down on their pinched fields, had looted it and killed two of the servants, and then had burned the place to the ground. A shout from somewhere heralded the dawn of the village, and forthwith there were heard the crush of hoofs through the frozen snow of the street, the jingle of the accoutrements, and someone laughing in a strange shrill mirth. Some man, caught out of doors, dashed across to reach his hut; and, forthwith, from the vagueness of the winter night, a Cossack yelling in a kind of glee, galloped down on him, and was seen for an instant clearly as he crossed the streak of light from the one open door.

IN THE VILLAGE.

"His long kaftan, blown back as he rose in his stirrups, his cap of shaggy fur, his curved sword dangling from his belt, leaped into view, and also the plunge of the long lance as he brought the point down and rode on his prey. The end transpired in the deeper blackness beyond the light, one heard only the fall, the high whinnying scream of the victim, and the strange laughter of the Cossack, as he wheeled his horse. Only, later on, passing down the street, I came upon the twisted huddle of what had been a man, with stiff dead hands spread wide, clutching at the snow. Up the street to the middle of the village rode the solnia and well enough I knew what strained eyes watched them from the darkened windows, what chilled hearts thumped at their passage. The Cossacks knew it, too, no doubt; they were laughing among themselves always with that high staccato, high-pitched cackle which had an inhuman note and deepened the horror they inspired. These were true Cossacks of the cattle lands, little men on small horses, tricked out in the finery of their savage state, clanking with metal trinkets, and glaring from under high caps of fur.

CRY OF THE VICTIMS.

"There was not long to wait. The shrieks began almost at once, and soon one scream, a high and desperate cry of agony, a woman's voice, calling where no aid could be, mastered the babel of

THE HEIR OF SANTLEIGH

OR

THE STEWARD'S SON

CHAPTER XXXII.

The two men faced each other, Guildford Berton quivering with rage intensified by its impotence, the man Furlong calm and coolly watchful.

Guildford Berton would have liked to spring upon him, but there was something in the eyes shining from under the bushy brows which warned him that at his first movement its owner would without hesitation put a bullet into him.

"What are you doing here?" he asked, finding his voice at last.

Furlong smiled grimly, and nodded to the desk.

"That's rather an unnecessary question, isn't it? I was looking for—curiosities, when you came in and interrupted me."

"You are an impudent scoundrel! and if you think because I am unarmed you will get off scot-free you are mistaken."

"Talk talk won't count for much, seeing how matters are fixed between us. It's waste of time to threaten me, Mr. Berton. Come, you're a sensible man; just face the music and take things easy. Just try and think I'm a friendly visitor dropped in unexpectedly; it's rather late, it's true—"

"Take yourself off!"

"That you may follow me and raise a hullabaloo?"

"If you think I'm going to let you escape, you are mistaken. Whether you go now, or wait till daylight, and are taken here, red-handed, will make little difference; you appear to have forgotten that, notwithstanding your cool impudence, I have got you as surely as if you were already in the hands of the police. I know you; before you can get out of reach the police will have an exact description of you and—I think the tables will be turned, my friend."

The man eyed him thoughtfully.

"After all, you've got some pluck," he said quietly. "You're a braver man than I took you to be, Mr. Berton. Many a man in my position would take you at your word, and remembering that dead men tell no tales, would put it out of your power to supply the police with a description," and he glanced meaningly at the revolver. "But I don't think we need waste any time in bullying each other. After all there's not much harm done."

"What! I find you here, having broken into my house—"

"Excuse me. Let's have it right and square. In the first place you're wrong. I didn't break into your house. I found the little gate in that high wall open, and I just stepped in."

"And, being in, lost no time in breaking into my property. I'm afraid your excuse won't weigh much with the judge and jury when you are tried for burglary, which you will be, you scoundrel."

"I dare say it wouldn't. But I'm not being tried yet. Look here, hadn't we better get comfortable? You don't ask me to take a seat, so I'll help myself, and if you'll take my advice you'll follow my example."

As he spoke he dropped into the arm-chair, and in a leisurely fashion took out his pipe and pouch.

The master of the cottage glanced toward the door. Should he make a rush for it, and endeavor to reach the garden and raise an alarm? He was sorely tempted, but he saw that the revolver was lying within reach of the man's hand, and felt that the glittering eye was watching him in belike fashion, and stood still.

"May I trouble you for a light?" asked Furlong, blandly. No? Well— He craned forward and lit his pipe at the

"No, it is not a plant, and I'm not going to palm off a pack of lies on you. But I tell you what I'm going to do. I am going to make a bargain with you. Wait. Better not cut in yet a while, for it strikes me that when you've heard what I've got to say you'll be sorry for cutting up rough. Now, Mr. Berton, don't think me impertinent if I ask you a question. Is it a fact that you want to marry the beautiful young lady up at the Court there?"

Guildford Berton started, and the color rushed to his face, but he remained silent.

"Silence gives consent. I give you credit for the best of taste. I've seen a great many of the fair sex in both hemispheres, and I say"—he struck the table with his powerful fist—"that that young lady towers above them all as—as a palm towers above a lilac bush! Whv, sir, if I were as young and good-looking as you are, I should be as much in love with her as you are. From all I hear there isn't a young man within twenty miles who wouldn't give all he's worth, and ten years of his life to boot to lead her to the altar."

Berton rose, as if unable to control himself, but Furlong coolly waved to him.

"Sit down, Mr. Berton. I meant no offense. I wouldn't speak a disrespectful word of her—ay, and what's more, I'd knock down any man that offered to do so in my presence. Sit down and keep your temper. You'll want all your nous presently."

There was something, a subtle significance, in his tone which carried weight, and Guildford Berton sank into the chair again.

"That's right. And now about this bargain I spoke of. Suppose, Mr. Berton, I possess some information which would help you in your suit with that young lady. Suppose I could tell you something, a secret worth its weight in gold to you, something that would make your way straight and plain, and insure your getting that young lady for your wife—what would you say?" and he leaned forward and looked him straight between the eyes.

Berton smiled incredulously.

"I should say, I utterly refuse to believe a word you say," he said, "and if you knew me better, you would know that I am the last man to make terms with a ruffianly burglar. Tell your story, whatever it may be, to the police; I fancy you will find them as incredulous as I am."

"Good. You've said what you ought to say, and you've said it very well. I will give you all credit for your courage. But I'll give you another chance, and I tell you frankly that if you don't come to my terms I shall, very reluctantly, have to tie you in that chair, and gag you while I get clear off. Come, you're dying to ask me what I meant. Just ask me a few questions. For instance, what do I find in the photograph of this lady to interest and startle me so much?"

"I shall ask you something. I want to hear no more from you."

"Then I'll ask you a few questions. First of all, do you know who this is? I don't ask you how you came by it. Perhaps the young lady gave it to you, or you found it, or perhaps you stole it."

Guildford Berton's face flamed, but he swallowed his rage and answered quietly enough: for Furlong had spoken the truth and he was dying to hear what the man had to say.

"You don't deserve an answer," he said.

"But you'll humor me, eh? Just so. Well?"

complained the fond wife. The husband continued to bury his nose in the paper. "You used to tell me I was bird-like," repeated the fond wife; "but now you never act as if you thought so." "You're still bird-like," growled the husband. "One wouldn't think you thought so, to judge by—" "Isn't a parrot a bird?"

Puts You on Your Feet and keeps you there That's what "Ferrovin" does for all those recovering from wasting diseases. It is the best tonic in existence. It stimulates, nourishes and builds up the system.

Mrs. Homebody: "Home is the dearest spot on earth, after all." Mr. H.: "Yes, when you count in the rent and the servants' wages."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

DRESSED UP.

Oratory is merely talk with a frock coat on.

When all other corn preparations fail, try Holloway's Corn Cure. No pain whatever, and no inconvenience in using it.

HIS AIM.

Die when I may, I want it said of me by those who know me best that I always plucked a thistle and planted a flower where I thought a flower would grow.—Abraham Lincoln.

Kidney Search Lights.—Have you backache? Do you feel drowsy? Do your limbs feel heavy? Have you pains in the loins? Have you dizziness? Have you a tired, dragging feeling in the regions of the kidneys? Any and all of these indicate kidney troubles. South American Kidney Cure is a liquid kidney specific and works wonderful cures in most complicated cases.—95.

"Don't cry!" he intreated. Then he perceived that her handkerchief was edged with the most exquisite lace. "Don't weep!" he said, correcting himself.

Everyone Thinks his own cross is the heaviest! When confined to the house with a pain in the side for instance, but it would be quickly forgotten if "The D & L Mouth Plaster" was applied. They only cost a trifle. Why not try them?

Young Skipjack.—"Ah—I should like to cross that field; do you think—ah—that cow would hurt me?" Farmer: "Did you ever hear of a cow hurting a calf?"

A Clear Healthy Skin.—Eruptions of the skin and the blotches which blemish beauty are the result of impure blood caused by unhealthy action of the liver and kidneys. In correcting this unhealthy action and restoring the organs to their normal condition, Parrot's Vegetable Pills will at the same time cleanse the blood, and the blotches and eruptions will disappear without leaving any trace.

SYMPATHY.

The doctor told him he had been exposed to drafts.

"Sure thing," replied the patient. "Maybe you've had a boy away at college yourself."

This happening to be true, so instant and acute was the bond of sympathy set up that the doctor wouldn't take a fee.

There was not long to wait. The shrieks began almost at once, and soon one scream, a high and desperate cry of agony, a woman's voice, calling where no aid could be, mastered the babel of woe, poisoning in a high ecstasy of terror and pain above the groans and cries around, till it sank suddenly and bubbled to a stop. Shouts and cries and the shrill laughter and strange speech of the Cossacks filled the night, and where there had been the quiet of fear now there was the clangor of cruelty; where the streets had been lifeless it was now a crowded Gethsemane echoing with blows, intricate with struggling groups. When it was all over the prisoners were tied together in pairs, and presently they were marched off between the lines of the Cossacks, to be flogged on to Tambov. The sun was painting the sky a pale yellow in the east as they departed, and when they were gone people stood at the doors of the huts, holding to the posts, looking out at the bodies in the street. But none spoke.

BABY'S TONGUE TELLS.

Little tongues that cannot talk tell mothers just as plainly that their own-ers are not well. When Baby's tongue is white, or coated, or yellow, especially toward the root, it is a sign of stomach trouble, indigestion, cold or feverishness. Baby's Own Tablets act like magic in curing these and the other minor ills of babyhood and childhood. They are good for the new-born baby as for the well-grown child. Absolutely safe and absolutely harmless. Mrs. C. F. Kerr, Elgin, Ont., says:—"Baby's Own Tablets are the best medicine I have ever used for stomach and bowel troubles and destroying worms. I could hardly feel safe without the Tablets in the house." Sold by all medicine dealers, or by mail, at 25 cents a box, by writing the Dr. Williams' Medicine Co., Brockville, Ont.

EXECUTING POLITICAL RIVALS.

In the reign of Charles II., the names of "Whig" and "Tory" were used for the two parties which we now call "Liberal" and "Conservative." So strong was the hostility between the parties that when the King summoned his third Parliament (1681) he was afraid for it to meet in London, which was very Whiggish, and he convened it at Oxford, where Toryism was strong. The Whig members, alarmed at this, rode into Oxford armed with pistols. In the reaction which followed, this display of force, prominent Whigs were prosecuted on the evidence of perjured informers, and many of them suffered death. The Earl of Shaftesbury, the Whig leader, was accused of high treason, but was acquitted; in fact, no Tory juries would convict a Tory, and where the Whigs predominated no jury would convict a Whig. At last things reached such a climax that the leading Whigs, in despair, formed a plan to compel the King to summon a free Parliament; but they were accused of high treason, and some of their leaders were executed.

EVEN ON THE DEATH-BED.

The ruling passion of Edward I. of England was undoubtedly the pursuit of his ideal of uniting all the British Islands under one rule. His great obstacle was Scotland, and the conquest of Scotland therefore became a passion with him. Stronger than years, it sent him to the head of the army when he was fit only for a sick-bed, and when he was at last compelled to yield he sought to make this passion spur on his son by ordering that the flesh should be boiled from his bones, and that his skeleton should be carried at the head of the army, and remain unburied until Scotland was conquered. This is the most conspicuous instance of "the ruling passion strong in death" on record, though many others would be worthy of notation. William Pitt's patriotism endured to his last gasp, and inspired his last utterance, as did Nelson's life-long determination to secure the command of the sea, whilst Napoleon's last dream was one of battle.

watching him in satanic fashion, and stood still.

"May I trouble you for a light?" asked Furlong, blandly. No? Well— He craned forward and lit his pipe at the lantern. "Now, then, Mr. Berton, I'm ready to hear anything and everything you've got to say. Chin-music is not much in my line, but I'll allow that you feel anxious to abuse me, and I don't like disappointing you. Just blow off the steam with some of the hardest words you know."

Guidford Berton caught up a chair with a strong impulse to fling it at the man's head, but instead he planted it in front of the door and sat down in it.

"You'll find this the worst night's work you ever did, my friend," he said between his teeth. "I gave you a chance—a poor one—of escaping just now, and you refused it. Now I tell you that you will not leave this room until the police take you unless you pass over my dead body."

Furlong laughed grimly.

"Very nicely put!" he said. "Why, my dear sir, I could lift you up, chair and all, and pitch you out of that window there, and you know it. But I shan't have to do that, I think—that is, if you are a sensible man. Now, Mr. Berton, I suppose you think that we are to sit here until some one comes who can raise an alarm and fetch the police, and that you will have me arrested? Just so. I'm afraid you're going to be disappointed. First of all, let me explain matters. Oh, you needn't sneer; it doesn't give any additional beauty to that handsome face of yours. I'm going to tell the truth, as you'll find if you listen attentively. What I told you just now, for instance, was the truth. I found that door of yours unlocked, and I couldn't resist the temptation of strolling in. You see, I've passed it so often and looked at it so hard, every time asking myself why on earth a young gentleman should choose to live in such a gloomy hole, that my curiosity—and it's my weak point, I'll admit—got the better of me. So I stepped in, and waited in the opposite room—I followed you so closely that if you'd have turned you'd have seen me, by George!—and, being in, I amused myself with watching you—"

Guidford Berton succeeded in suppressing any outward sign of the start the man's words gave him.

"I'd half an idea that you were a—well, a coiner. I beg your pardon I had, indeed. But couldn't see any trace of the work about—and I know it when I see it—and so I concluded that you were just a crank, that you'd got a mental twist somewhere that caused you to take such a grim, forsaken hole as this. Then I thought that I'd wait until you'd go to bed and clear out. But I happened to look in here, and the desk lay handy, and it occurred to me that I might find something in it that might help me to understand your peculiar character."

A sneer that was half a scowl crossed Berton's face.

"Ah, you don't believe me, I see," remarked the man, apparently not at all offended. "But, strange to say, it's the truth. The fact is, among the many trades I've tried my hand at, I've done a bit of the detective. That was in New York. I didn't stick to it long; but that kind of work leaves a mark behind. You can't lose the habit of trying to satisfy your curiosity. And you raised mine, you did, indeed, Mr. Berton."

"You impudent—but go on, my friend; your time is going short."

"Not a bit of it. You think you'll have me arrested, but you won't, and I'll tell you why. Because you and I are tarred with the same brush. We're both curious men. Of the two of us, I should say you're more curious than I am, but you're too cautious to follow a man into his own house and examine his desk, eh?" and he laughed.

"Now you wonder what I'm driving at. Wait a bit; I'm coming to it. I didn't find much in this old desk of yours to enlighten me about the little game you're playing at; but I did find something that gave me a start!"—he stretched out his hand, and let it fall upon the photograph of Catherine Hayes—"and this is it."

The other glanced at the photograph with an incredulous sneer.

man and he was dying to hear what the man had to say.

"You don't deserve an answer," he said.

"But you'll humor me, eh? Just so. Well?"

"It is the portrait of the late Countess of Arrowdale's companion," said Guidford Berton, slowly, and almost sullenly.

"And her name was Catherine. It's written here on the card, and her surname was Hayes. And when the countess left her husband, the earl, this Catherine Hayes, went with her?"

"She did."

"Is she dead?" asked Furlong, very grimly.

"The countess? Yes."

"This woman, the maid, this Catherine?" said Furlong.

"Yes, she is dead, too."

"Dear, dear!" muttered Furlong. "Tell me, now, did she live with her mistress till the countess died?"

"She did."

"And the young lady, Lady Norah, was left in her charge, I suppose?" asked Furlong.

"That is so. Why do you ask? What interest—"

"I ask because I didn't know," replied Furlong. "I know a great deal, but not all."

He gazed at the portrait some moments lost in thought, then he got up and laid it on the table.

"Come and take a good look at it," he said.

Berton hesitated a moment, half suspicious that it was a trap to get him away from his post in front of the door, but Furlong cast a glance of contempt at him.

"Man, can't you see I'm in earnest?" he said, sternly.

"Do you see nothing? Look hard! Does nothing strike you?"

"I do not understand you. I see nothing."

"Shut it—shut the door close."

"You know that there is no one in the house but my servant, an old woman, deaf and dumb, or you would not have trifled with me as you have done," he said.

"Shut the door all the same, for what I've got to say even the deaf and dumb might have ears and tongue to hear and tell. Shut the door I say."

"There," he said, "are you satisfied?"

Furlong beckoned to him to come nearer, and, laying his heavy hand upon the shoulder of the other, whispered a few words in his ear.

Berton started, and turned a white face of amazement and unbelief upon him.

"What!" he exclaimed. "Pshaw! It's impossible!"

"It's not only possible, but it's true!" retorted Furlong, with grim earnestness. "Sit down and listen to me."

As Berton listened drops of sweat came out upon his forehead, and his face changed from red to white.

"If, if this is true—if I can believe it!"

"It is gospel!" retorted Furlong, laconically, "and you do believe it. I can see it by your face, man."

"Prove it—give me proofs," dropped from the white lips.

"Proofs? Yes, conclusive, irrefutable ones. Proofs strong enough for any court of law in the land."

An exclamation difficult to describe burst from Berton, and he rose and paced the room, his face working, his hands clasped tightly behind his back.

Furlong sat himself on the table and watched him coolly.

Suddenly he stopped before the side-board, and took out the brandy decanter.

"Oh, that's it!" muttered Furlong to himself; then aloud:

"Here, steady! Not too much of that! A glass apiece. You want to keep your head cool, you know, if you're going to work this properly. And you are, you know."

Berton poured out a couple of glasses with a shaky hand, and with an uneasy laugh.

"When—when will you let me have the proofs?"

"In three days. Meanwhile keep your mouth shut. Oh, yes, you can do that. I dare say. And now, what do you say to our bargain?"

"You want to know how much—"

"No," he said, quietly. "I ask nothing. I'm not sure I'm asking anything. But, we'll see. It strikes me I'm the honestest man of the two, Mr. Berton. I bargained for my liberty and your silence about this little escapade of mine. Well, you shall give me a hundred or two to take me out of the country, when you've done with me and we'll cry quits."

Berton held out his hand, and Furlong took it, but with an utter absence of alacrity or effusiveness.

"Open the door," he said. Berton opened it, and with a nod and a quiet "In three days—say Friday," his singular specimen of "the genus" burglar went out.

(To be continued.)

HE IS EMPHATIC IN WHAT HE SAYS

DODD'S KIDNEY PILLS CURED ROBT. BOND OF BRIGHT'S DISEASE.

His Doctor Who Said There Was No Hope for Him, Now Pronounces Him Well — He Tells His Own Story.

Mr. Brydges, Ont., Jan. 29.—(Special.)—Among the many people in this neighborhood who tell of the great work Dodd's Kidney Pills are doing, none is more emphatic than that old and respected citizen, Mr. Robert Bond.

"I believe I owe my life to Dodd's Kidney Pills," Mr. Bond says. "My attending physician said I was in the last stages of Bright's Disease and that there was no hope for me. Then I commenced to take Dodd's Kidney Pills and used in all twenty boxes. Now I eat well, sleep well, and my doctor says I am well. Dodd's Kidney Pills and nothing else cured me. Do you wonder I am always ready to say a good word for Dodd's Kidney Pills?"

What will cure Bright's Disease will easily cure any other form of Kidney Disease. Dodd's Kidney Pills will always cure Bright's Disease. They are the only remedy that will cure Bright's Disease. Be sure and get Dodd's.

ALL TWINS IN THIS.

Extraordinary Marriage Will be Celebrated in Paris.

An extraordinary marriage will take place in Paris shortly, when the twin brothers Charneau, both of whom are painters of repute, will marry the twin sisters Renaud, two beautiful girls who are only 18 years of age. The best man at the double wedding will be another pair of twins, who are cousins of the twin bridegrooms.

Alphonso and Gabriel Charneau are so absurdly alike that they have been the victims of ludicrous mistakes all their lives. Their mother is a widow, and on this account one of the twins was excused military service.

Wishing not to be separated from his brother, he went to live in the town where his twin was quartered. He was arrested four times during the first week, and accused of appearing in public without uniform. He had the greatest difficulty in convincing the authorities that he was not the conscript.

The brothers are so fond of each other that they had resolved never to marry. But they both fell in love almost simultaneously. Their sweethearts were also almost undistinguishable, and mistakes occurred so frequently that each twin began to dress for the first time in a different costume.

A LETTER AND A PROMISE.

"You are quite right," said a very well-known criminal barrister recently. "We do get some very queer letters from clients—or would-be clients—sometimes. What do you think of this?"

A STAGGERING PROBLEM

ENGLISH SAVANTS FEAR LACK OF WATER IN FUTURE.

Many Watersheds Disappeared—Legislation to Regulate Flow of Rivers Proposed.

Is Great Britain coming face to face with a great water famine? "Owing to the tremendous industrial activity and the needs of the teeming population, England may find herself one of these days face to face with a problem of staggering magnitude—namely, a scarcity of fresh water," said President Bentley, of the Royal Meteorological Society, at its annual meeting in London the other night.

FEAR A FAMINE.

"So enormous is the drain upon the water supplies, and so much has the growth of the cities caused a disappearance of our forest areas," he continued, "that there is good reason to fear a water famine in the future. The diversion of rivers and lakes and other fresh water reservoirs from their natural function of irrigating distributors of all essential moisture to the land has interfered in England so greatly with Nature's arrangements that the English engineers and meteorologists at no distant date may find a task of almost insuperable difficulty awaiting their endeavors."

Dr. Mill, the rainfall expert, on being consulted regarding this alarming statement, said he was of the opinion that the question would require an early consideration.

"Legislation will be needed in the immediate future for the regulation of rivers," he stated. "The great question is how to store water which at present runs waste on the coasts. The planting of trees on high watersheds is one of the first solutions of the problem, but the chief difficulty lies in the scarcity of suitable land available for building large reservoirs."

REFORM IS NEEDED.

"I believe that at some future date the services of engineers will be required in this reform, as the present arrangement of reservoirs is unsatisfactory. In Austria the Government issues an annual report on the condition of the Danube River, and also detailed statistics of the rainfall with the view of storing all available water supplies. This work done by the Austrian Government I am now doing in regard to the British Isles on my own responsibility, but the rainfall and river conditions are only a portion of the much larger problem."

PINCHES ALL ROUND.

She—My gown is just lovely; it's a perfect fit.

He—Satisfied on that point, eh? She—Yes, I know it's a good fit because it pinches me so—

He—Well, it doesn't pinch you half as much as it does my pocketbook.

NEGLECTED.

"Why are you here, my poor man?" asked the prison visitor. "Through no fault of mine, sir," replied the convict. "No?" "No! I ain't had a single chance to break out."

These two desirable qualifications, pleasant to the taste and at the same time medicinal, are to be found in Mother Graves' Worm Exterminator. Children like it.

SHE KNEW HIM.

"Mr. Grouch went to a masquerade the other evening disguised as a bear."

"Did any one recognize him?"

"Only his wife."

Do not give up in despair, you who suffer from obstinate disfigurement of the skin. Ann that the ore up to Weaver's Ointment and purify the blood with Weaver's Syrup. All druggists.

"Well, that all depends," was the response. "If you be a-doctoring of the patient I goes right on."

Bickle's Anti-Consumptive Syrup is the result of expert chemical experiments undertaken to discover a preventive of inflammation of the lungs and consumption, by destroying the germs that develop these diseases, and all the world with pitiable subjects hopelessly stricken. The use of this Syrup will prevent the dire consequence of neglected Colds. A trial, which costs only 25 cents, will convince you that this is correct.

The earliest public trial of a passenger boat driven by an electric motor was that conducted by Professor Jacobbi, of St. Petersburg, in the year 1833, although for four years previously he had successfully experimented with electric traction in the privacy of his own grounds. The trial of Jacobbi's vessel took place on the Neva, and was witnessed by a vast crowd of people. The boat was 28 feet long, 10 feet wide, and carried fourteen persons. It was not until four years later that we find any record of a passenger carriage driven by electricity on land, and in this case the inventor was Alexander Davidson, of Edinburgh. The carriage was 16 feet long by 7 feet wide, and was propelled for a mile and a half at the rate of four miles an hour on the Edinburgh and Glasgow Railway.

This remedy should be in every household

WHICH WAY WILL YOU GO?

The Wisdom of Noted Men Shown in Manner of Death.

And how dieth the wise man? As the fool.—Ecclesiastes ii. 16.

Within the last month four men, whose careers well illustrate some of the more striking phases of American life and character, have passed through the grave and gate of death to whatsoever reward there may be for all their labors under the sun.

The life of the first was a complete and total failure from every point of view; a betrayer of trust, a dishonest administrator, an iniquitous speculator, a thief and a robber, his defalcations were suddenly found out and he ended his life by suicide. His firm failed for some three millions of dollars and dragged down in irretrievable ruin many smaller firms and innocent investors.

The second man was a success from one point of view, the material. He amassed a fortune of over fifteen millions of dollars and kept most of it to the end. He flourished like the proverbial green bay tree and died in possession of his ill-gotten gains. For every dollar had a blood mark or a slime mark on it. Yet he was one of the most colossal failures life has produced.

He failed as a husband, and his wife left him; he failed as a citizen and went to jail; he failed as a business man and was blackballed by the leading clubs of the world. Realizing all this, he made what amends he could by leaving his fortune to charity and the people.

WHOM HE HAD ROBBED.

The third man died in possession of one of the three or four greatest fortunes in the world. Not one dollar of this sum was tainted money. It was all gained by business methods that were not only legally correct, legitimate, but that are approved by honorable, high-minded, right thinking men. He was a constructive, but not a destructive force. He did not make his way to success over other men's failures, through other men's sorrows. His pathway was not blazed by the ruin of his competitors. He crushed no one.

He helped man. He was a living illus-

tration of the fact that a man can be an honorable, high-souled Christian gentleman and citizen and succeed. His death evoked a spontaneous and universal tribute to his character and worth. If he leaves no dollar to charity his life will have been of vastly greater value than the man who made the biblical atonement by giving away the millions he could not take with him.

The last man was a student, but a student of the word of God. A Christian preacher he, sometimes referred to as "an impractical schoolmaster." Men gave him money without practically any stint or limit and told him to build a great institution of learning. But money alone cannot create a university, though it may provide the grounds and buildings and their equipment and

ENDOW PROFESSORSHIPS.

Roots, trees and branches,
Singly perfect may be;
Clapt hodge-podge together,
They don't make a tree.

That schoolmaster put the soul into the attempt. He gave it the life principle, his own. It is his personal monument rather than that of the money givers. This last man was a servant of Christ indeed, and one who, as he says, gave his best thought to the expounding of God's holy word rather than to the great university. He died poor in riches, but rich in poverty. The world rises to do honor to his simple and abiding faith, his sublime courage, his noble, uncompromising resignation.

These four men lived yesterday and died to-day. Wise or foolish alike, they came to an end. Yet there are between them great differences. The suicide, the successful failure, the upright Christian business man, the great thinker and educator constituted a remarkable quartet, preaching a gospel which it needs no words of mine to elucidate. Yes, the wise and the foolish come to the same end, but afterward the wise will go one way, the foolish another.

Which way will you go, friend?

CYRUS TOWNSEND BRADY.

THE S. S. LESSON

INTERNATIONAL LESSON,

FEB. 11.

Lesson VII. Jesus Calling Fisherman. Golden Text, Eph. 5. 1.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Preceding Events in Galilee and Judea.—Soon after his temptation in the wilderness Jesus seems to have returned to the place where John was still baptizing, somewhere on the banks of the Jordan or one of its tributaries. It was at this time that John's testimony concerning Jesus the Lamb of God (John 1. 29-34) was given. Andrew, Simon Peter's brother, and John, son of Zebedee, being among those who heard this wonderful testimony of the Baptist. These two men, prompted by what they had heard, followed Jesus, and, together with Simon, Philip, Nathanael, and probably James, they accompanied him into Galilee (John 1. 35-51), witnessed the performance of the first miracle at Cana (John 2. 1-11), and remained a short time with him at Capernaum (John 2. 12). From Capernaum Jesus returned to Jerusalem to attend the passover feast, cleansed the temple, conversed with Nicodemus, preached and baptized, though some himself baptized, not but

short handle with which each net was snarled to break. The nets were pear-shaped and of a size such that each man could ordinarily well handle one net. But on this occasion every net was so full that the attempt to lift it from the water in the usual way proved too great a strain, and each man was compelled to hold his own net in the water until help arrived.

7. Their partners—James and John, sons of Zebedee (comp. verse 10).

Filled both the boats, so that they began to sink.—The weight of the two boat-loads of fishes was evident from the depth to which the boats sank in the water. Thus the weight of a cargo of a great ocean vessel, even, may be estimated by the height to which the water rises on its sides, an empty vessel being easily distinguished from a heavily laden one by its appearing to "stand up high out of the water."

8. Amazed.—The amazement of this experienced fisherman indicates how miraculous was the draught of fishes.

10. Thou shalt—Jesus addresses Simon as the representative or spokesman of the group. The words which Jesus spoke were intended for all who were present (comp. Matt. 4. 19; Mark 1. 17).

Catch.—Literally, take alive, as with a net. They were to take men captive for the kingdom of heaven.

11. Left all, and followed him.—The sacrifice was a willing one. Peter alludes to it at a later time (comp. Luke 18. 28-30; Mark 10. 29, 30), when he reminds his Master of the fact that the disciples had forsaken all and followed him, upon which Jesus gives the promise of hundredfold returns, both in this pre-

The Queen's fund for the unemployed now amounts to £120,000.

Sheffield is the only town where the notification of cases of consumption is compulsory.

It is calculated that the total cost of the Cabinet in salaries will be over £70,000.

Princess Christian has received an anonymous gift of £26,000 for the Royal School of Art Needlework.

More than £600,000 has been subscribed, says the Jewish Chronicle, for the relief of the Jews in Russia.

In 1894 England imported from Boston alone 530,015 pairs of boots; Scotland, 59,334; Ireland, 82,549 pairs.

At Billingsgate, London, the fog was so dense the other day that a drunken man lurched into a coffee-tavern.

Parliament has met on Sunday 11 times, the first in the reign of Edward III., the last at the death of George III.

Mr. John Fletcher Moulton, M.P., has been appointed lord justice of appeal in place of Justice Mathew, who recently resigned.

Mr. Howard Paul, the journalist and entertainer, has left nearly all his fortune, £46,000 in Britain and £7,000 in America, to charities.

It is computed that the money spent on drink in Leeds in a single year would provide 5,000 families with 30s. a week all the year round.

The throwing of confetti and rice at weddings in the Wigton, Cumberland, Parish Church has been prohibited by the church wardens.

In Woolwich Arsenal is being erected a new "danger" building, with walls 3 feet thick, to "stifle" the effects of an explosion that may occur.

Penny postage between the United Kingdom and Egypt, which came into force on Dec. 15, has already led to an increase in the number of letters sent.

During Christmas week the postoffices in London dealt with 113,000,000 letters, of which about 24,000,000 are delivered, and the rest forwarded to other offices.

Sir Herbert de Stern, a Jewish banker in London, and is a son of Baron Hermann de Stern, whose title was Potuguese.

It is not generally known that there is a memorial in London to the horses which fell in the South African war. It takes the appropriate form of a drinking trough.

Last year 48,000,000 tons of cargo were carried from all the seaports of the world, and out of that total 31,000,000 tons were carried by the ships of Great Britain.

The members of the Otley (Suffolk) District Sparrow Club have killed 3,680 sparrows and destroyed 2,250 eggs during the first six months of the club's existence.

Charing Cross station will be re-opened early in March and traffic will be resumed as soon as the temporary roof, or which work will begin next week, has completed.

Miss Arthur, the daughter and heiress of the late Fred. Archer, the famous English jockey, has come of age, and enters into possession of her fortune of about \$600,000.

Charles Beswick, a member of the Macclesfield Town Council, and a sub-postmaster, was committed for trial on a charge of embezzling £384 belonging to the Postmaster-General.

John Gaunt, who lives near Ambergate, Derbyshire, and is the official rat-catcher to the Midland Railway, has trained a fox to be as expert and reliable a rat-catcher as any of his dogs.

The King's footmen wear wings which have eight rows of curls, whereas those of the Prince of Wales have seven rows.

YOUNG FOLKS

THE FLAME AND THE FIRE DOG.

Tools must have fallen fast asleep. Babiola had sat her down beside the big fireplace in the front room, and turned around for just a minute to look out of the window at the snowflakes tumbling down, when all at once she heard Toots tumble, too. And when she looked, Toots was lying in the fireplace, so close to the big logs, that the red and yellow flames were fairly creeping around her.

It was terrible. If it hadn't been for the fire dog, there's no telling what might have happened, but he did show wonderful presence of mind. Just as Toots was almost on fire, he jumped from his place at the side of the fireplace, and caught her dress in his iron teeth, and dragged her back to safety.

"Now, don't leave her so close to the fire again," he scolded. "A great, big girl like you. What are you trying to do? Make a flame-fairy out of her? Don't you know they're just on the look-out to grab and gobble up anything at all."

Babiola was petting Toots, and waiting for the wax to harden on her precious nose, where it had scorched a little.

"Who are they?" she asked. "I thought she would be all right."

The fire dog strutted back to its place, and knocked over the shovel and tongs.

"If I didn't watch things all the time, there'd be something burning, sure," it said. "And of all aggravating, stupid, silly things, a doll is the worst—next to a girl. That's why they always dress dolls, like girls, because they act so silly."

"I've seen dolls dressed like boys, lots of them."

"I just won't argue," said the fire dog. "It isn't polite in the first place, and in the second, it makes me red hot to be contradicted. I say that dolls are silly, and it's silly of you to try and argue with me. Why, if you'd been asleep on that stool yourself, you would have tumbled just the same as that doll did, and maybe turned into a flame-fairy, too."

"What's a flame-fairy?" asked Babiola. "A flame-fairy," said the fire dog, "is lots of different things. It's the fairy of a flame, a fire-fairy, don't you know, and some are good, and some are bad. I've known lots and lots of them. I like to stand and watch them as they come and go up and down the chimney. Didn't you ever see them?"

"No, I didn't. Are they pretty?"

"They think they are," said the fire dog. "But they're not nearly so pretty as I am. Why, you see, there can never be a flame-fairy unless something has burned up first. Things don't burn up and leave nothing behind but ashes. There's always the flame-fairy that belongs to it, and it dances, and it leaps, and plays around until there are only dying embers left, and then it wraps a smoke cloak around it, and flies up the chimney to join the spark people."

"And where do they go to?"

"I've never been up the chimney myself," answered the fire dog. "And I never talked to a flame-fairy that came back, but I have been told by stray sparks that they just keep on going and going up through the sky until they meet a strolling comet, or a friendly star, or anything that they can tag on to, and then that's the end of them until next time."

"What next time?" asked Babiola. "I don't know," the fire dog shook its head mysteriously. "You'd have to ask a spark to find out that. It's a good deal like rain. It falls in lots of little drops, you know, but it's only one big lot of water, after all. So, I guess the flame-fairies are drops, don't you see?"

Babiola was staring at the fire. There are two big logs in the grate, and the flames leaped, and danced about and under them. There was one very large flame that spread higher than the

him at Capernaum (John 2, 12). From Capernaum Jesus returned to Jerusalem to attend the passover feast, cleansed the temple, conversed with Nicodemus, preached and baptized, "though Jesus himself baptized not, but his disciples" (John 2, 13 to 4, 2).

Departing again from Judea, Jesus passed through Samaria, spoke with the Samaritan woman at Jacob's well, near Sychar, tarried at the request of the Samaritans two days in their city, and then proceeded again into Galilee (John 4, 2-43). A second miracle, the healing of the nobleman's son at Cana, the rejection of Jesus at Nazareth, and his removal from Nazareth to Capernaum are three important events which in this second and longer ministry of Jesus in Galilee precede the formal call of the twelve (John 4, 43-54; Luke 4, 14-31). Parallel accounts of the call of the four mentioned in to-day's lesson are found in Matt. 4, 18-22 and Mark 1, 16-20. These accounts do not, however, mention the miracle which preceded the call of the fishermen to discipleship.

Verse 1. Now—That is, on one special occasion about to be mentioned.

Pressed upon him—Thronged about him so that he was crowded for standing room.

The lake of Gennesaret—Known also as the "Sea of Galilee," or the "Sea of Tiberias." It is thirteen miles long and a little less than seven miles wide in its widest part. The body of water is pear-shaped, with the narrow end toward the south. Its surface is seven hundred feet below the sea level, and its greatest depth measures a little over two hundred feet. On the east and west sides the lake is bordered by hills and low mountains, on the north by gentle slopes rising gradually toward Mount Hermon, and on the south by the low plain of the Jordan valley. In the time of Jesus its northern and western shores were a continuous garden thickly dotted with towns and villages. Its waters still abound in choice fresh-water fish.

2. Standing by—Floating and moored near the shore.

The fishermen—Simon and Andrew, James and John, and their helpers or hired servants.

Washing their nets—It is of interest to note that three distinct Greek words, *diktikon*, *amphibleston*, and *singene* are in the New Testament translated net. *Diktikon*, the word used in our lesson text, seems to have been the general name for nets of all kinds, while the other two designated more especially nets used for fishing. Of these two, *amphibleston* denotes a casting net, being thrown with the hand, the *singene* was a seine or drag net. From the parallel passage in Matthew we learn by consulting the Greek original that it was a casting net, *amphibleston*, which Peter was using (Matt. 4, 18), and indeed this would be the only kind that could be used in deep water, since, though smaller, it entirely inclosed the fishes caught. A seine, on the contrary, can be used only in shallow water.

3. Sat down—The customary attitude of a Jewish rabbi while delivering a discourse on religion.

Taught—Continued the teaching which he had begun on shore, as the Greek imperfect indicates.

4. Had left—Had ceased.

He said unto Simon—Simon being the master of the craft, which had served him as a pupil.

Let down your nets—These same casting nets.

5. All night—Night being the more favorable time for fishing.

But at this word I will—This readiness of Peter as an experienced fisherman to act contrary to his own best judgment in response to the suggestion of Jesus presupposes a nearer acquaintance. Peter had indeed been a believer in and a follower of Jesus ever since he, with the others, had witnessed that first miracle at Cana, months before. Up to this time, however, he had not been asked to give up his business as a fisherman and devote his whole time to his discipleship. Possibly he was not before this prepared to make so complete a surrender.

6. Their nets were breaking—Either the meshes were beginning to tear or the

judes to it at a later time (comp. Luke 18, 28-30; Mark 10, 29, 30), when he reminds his Master of the fact that the disciples had forsaken all and followed him, upon which Jesus gives the promise of hundredfold returns, both in this present life and the life to come.

TO PROTECT THE EMPIRE

GREAT BRITAIN'S NAVAL MANOEUVRES OF 1906.

To Test the Distribution of Fleets—The New Policy of Concentration.

The current year will witness the new policy of naval redistribution subjected to searching practical tests in February, June and September, says the London Daily Telegraph. The manoeuvres will be on an unexampled scale, and are expected to be most instructive in settling important points on naval strategy. This new policy has involved the withdrawal of the naval establishments from Canada's Atlantic and Pacific coasts.

CONCENTRATION AND MOBILITY.

It has been determined by the tenor of the late war in the far east, i. e., the necessity of massing British naval power so that it can be handled in time of war in skilful combination with irresistible effect for the protection of the home and over-sea dominions and for guarding the British mercantile marine in every sea. Canadians will watch the result with interest.

The year's manoeuvres will be as follows:—

February—The Channel, Atlantic and Mediterranean fleets, with the three associated squadrons of armored cruisers will concentrate at Lagos, a magnificent bay off the Portuguese coast, and then take part in joint operations.

June—The same naval forces reinforced by the ships of several divisions in commission in reverse at the home ports, and all the torpedo craft, will combine for the "grand manoeuvres," it will be the greatest naval assembly ever called together, and fourteen British admirals will fly their flags. Every efficient man-of-war in the British fleet in home waters will participate, and the co-operation of the ship-owners has been promised, so that the conditions during the period of the mimic war may resemble those of actual hostilities in all essential respects. The squadrons in distant seas will co-operate as though war had been declared.

September—The China, East Indies and Australian squadrons will concentrate at Singapore for joint manoeuvres, specially intended to illustrate the best methods of safeguarding British interests in far eastern and southern seas.

For the first time in modern times the whole of the British fleet will be placed on a veritable war footing, and carry out its duties as if the fate of the Empire depended on the issues.

Sir Arthur K. Wilson, our greatest naval tactician and strategist, will be throughout in general control of the Admiralty's plans, and the assembled fleets in June. The most important manoeuvres will be under his supreme orders.

The squadrons in the far east, East Indian waters, and the Antioches and in the Atlantic will co-operate.

TO DOMINATE THE NEAR SEAS.

Naval power that may clash with British interests is situated in Europe. If, then as the results will prove, British naval powers can dominate the Channel, the North Sea and the Mediterranean, i. e., the "near seas," it dominates all seas.

Backed by Japan (in the far east, and with the United States in the west, British naval power sets aside the seas which lie between Esquimaux, Hong Kong, Sydney, Cape Town, Jamaica, Halifax and London.

Words of a silent man are never repeated in court.

catcher to the Midland Railway, has trained a fox to be as expert and reliable a rat-catcher as any of his dogs.

The King's footmen wear wigs which have eight rows of curls, whereas those of the Prince of Wales have seven rows, and those of the Lord Mayor of London six only.

A serious fire occurred at Yarmouth on the 25th ult., destroying a large block of riverside warehouses, the property of R. & W. Paul, grain merchants, together with hundreds of tons of grain and a new grain elevator.

In London you can now have your boots made while you wait. Some thirty machines are employed on each boot, and a completely finished article can be turned out in fifteen minutes.

The Cardiff City Council has passed a resolution requesting the King to visit Cardiff next year and open the new town hall and law courts and the docks of the Cardiff Railway Company.

The formal opening of the Acme Spinning Mill at Pendlebury, Manchester, has just taken place. It is the first electrically equipped and chimneyless spinning mill built in England.

Sir A. Jones says that no man who eats a lot of fruit can drink a lot of intoxicants, and £100,000 worth of bananas spread over England every week would do more to keep down the drink bill than legislation or temperance lectures.

Sir Henry Campbell-Bannerman is one of six members of the House of Commons—five Conservatives and one Liberal—who began their Parliamentary career in 1868, and have sat continuously ever since.

Birkenhead enjoys the distinction, so far as Great Britain is concerned, being the place where the first tram-car was started, a line being opened there on Aug. 30th, 1869. The next was in Bays water, in March, 1861.

The Corporation of Nottingham have decided to spend £10,000 in restoring Nottingham Castle. The fortress is associated with many outstanding events of English history, and it is to be preserved as a national monument.

The London Metropolitan Police have a collection of seventy thousand sets of finger prints of criminals. It has been completely established that the thin capillary ridges on the tips of the fingers undergo no natural change of characteristics from the cradle to the grave.

In the east end of London there is a haggis club, according to a Fleet street scribe, the members of which are "Blither Scots," but in circumstances the reverse of affluent. At New Year they have a patriotic hankering after the toothsome dainty. The worthy Caledonians, therefore, contribute each twopenny a week for some time, and make certain of their annual treat.

It is a far cry to that famous fight on "Culloden's bloody heath," where the hopes of the Young Pretender, Charles Stuart, were irretrievably shattered, but Mr. John Smith, of Ainderby Myers, Yorkshire, who is verging on his ninety-fourth year, talked in his young days with a survivor of the battle. In 1827, at a wedding feast, he met Mr. George Chapman, 105 years old, who, as the son of a loyal supporter of the claims of the Stuarts to the English throne, had fought at Culloden with a troop of volunteers.

FATHER'S GRACE.

Teacher: "Now, boys, why do we say grace before and after meals?" No reply.

Teacher: "Come, come; surely one of you can answer me! Tell me what grace is?" Still no answer.

Teacher: "This is really terrible! Now, Jenkins, tell me what your father does after a meal?"

Johnny: "Please, miss, he rubs his waistcoat."

Teacher: "That is not what I meant. I want to know what he says?"

Johnny: "Please, miss, he says, 'Ha! ha! Richard is himself again.'"

FAR-SIGHTED.

Mrs. Knicker—"Mrs. Jones is very economical."

Mrs. Bocker—"She doesn't stamp the letters she gives her husband to mail because she knows they will never reach the box."

fairies are drops, don't you see."

Babiola was staring at the fire. There are two big logs in the grate, and the flames leaped, and danced about and under them. There was one very large flame that spread higher than the others, and as it rose and fell and danced around, Babiola all at once saw that it was a flame-fairy, because there, just as plain as could be, was a face smiling at her every time the flame leaped up towards the chimney.

"Yes, that's one of them," said the fire dog. "He's a good one. It's no use trying to talk to them. They can't speak a single word. All they can do is dance, and burn things. Pretty soon he'll fly up the chimney as soon as his log burns up."

"I wish I could go up, too," said Babiola.

"Suppose you go up on the roof and sit on the edge of the chimney until one comes out," suggested the fire dog, hopefully. "Or say a spell. Don't you know any spells? I used to know lots of them, but they're real dangerous, because sometimes you're liable to say the wrong one, and then goodness only knows what you'll turn yourself into. Say a smoke spell and see what happens."

"I don't know any spells."

"Well, maybe I can remember it. I'll try, and say, if you should go up with the flame fairies and the sparks, please do find out what becomes of them. I want to know. Now say after me just as fast as you can:

"Smoke up, smoke up, smoke up, smoke up, smoke up, smoke up—"

"How many times?"

"Seven hundred and seventy-seven times, and then you have to say it backward, like this:

"Up smoke, up smoke, up smoke, up smoke, up smoke;"

"I don't believe that's a spell," said Babiola. "It sounds as if you'd made it up yourself."

"Well, it is a spell. Oh, I won't argue. Just say it, and see what will happen. Then say:

"Blither, blither,
Whither, whither,
Fly the sparks up in the sky,
With smoke for a cloak,
Dear me, what a joke,
Babiola wants to try."

"Say that one. That's poetry. Girls always want their spells to be in poetry." But Babiola laid tools down behind the stool carefully and smiled up at the flame-fairy.

"I'll meet you up on the edge of the chimney," she said, and then she shut her eyes, an began to say over and over and over, "Smoke up, smoke up, smoke up, smoke up, smoke up smoke up—"

The fire dog kept count, but just as she reached the seventy-fifth count she felt herself changed and opened her eyes. It was the queerest thing. Instead of finding herself up on the edge of the chimney outdoors, there she was hanging on a hook above the fire dog.

"Well, for goodness sakes, will you look at that!" cried the fire dog. "You're the wind-jammer, aren't you? I was afraid that spell was a little mixed up."

"Am I flying like a spark?" asked Babiola.

"Flying fiddlesticks!" cried the fire dog. "That's the bellows spell, and I got it mixed with the smoke spell. Isn't that too bad. It's really a burning shame, isn't it. Even the poker would have been better. The flames never like the bellows a bit. Wait till I ask the flame-fairy what we can do."

He moved over into the midst of the fire, and the flame-fairy danced about him, while he asked it what could be done.

"He says to say it backward and untwist yourself," said the fire dog at last. "Try it."

So Babiola began saying "Up smoke, over and over, when all at once she heard Bobolink's whistle out in the hall.

"All spells off," called the fire dog, getting back into its place, and the flame-fairy gave one last whirl and flew up the chimney.

"I don't believe fire dogs can talk at all," said Bobolink, when she told him what had happened.

THE "SEALS OF OFFICE" OCEAN ROAD TERRORS

THE PHRASE HAS A SOMEWHAT VAGUE MEANING.

Dummy Seals are Received and Given Up by Succeeding Cabinet Ministers.

Everyone has heard of the "Seals of office," those symbols of power which departing Ministers surrender; but how they are surrendered and their precise value in the State economy is often a mystery even to politicians of high rank. One such politician confessed to the present writer that, apart from the Great Seal—which he irreverently described as being about the size of a small warning-pan, with two halves that fold together to form a mould—he had never seen the seals of office.

Until all the seals have been given up to the King the holders are still technically in office. Much discussion was caused on this point about ten years ago when Lord Salisbury, disregarding precedent, sent his secretary to Sir H. Campbell-Bannerman to ask for the War Office seals before the latter had delivered them to the Sovereign.

A Prime Minister has no seals. He signifies his acceptance of office by kissing the Sovereign's hand.

But in the Cabinet are some most important personages who possess seals, and the Privy Council has to be summoned that they may be endowed from his Majesty's hand with their insignia. On this solemn occasion the Privy Council meets twice on the same day. At the first meeting the members of the outgoing Cabinet surrender into the King's hand the trust they have received, and at the second the trust is taken over by the members of the new Cabinet.

KING HOLDS THEM FOR A TIME.

During this interval the seals lie peacefully upon the table, under the King's hand, and the business of the State should be at a standstill.

The resignation of the seals is, indeed, a most solemn ceremony. From the Home Office, the War Office, the India Office, wherever there is a secretary of State to have seals, his charge has been disinterred from the safe where it has lain since the last occasion. Perhaps an Under Secretary has furtively polished them, for, though each Secretary possesses three, only the smallest is ever used, and that but rarely. The Great Seal is, of course, the largest and most important, being the only one that is still to any extent used. The Lord Chancellor and Lord Keeper of the Seal receives it from the Messenger to the Seal, whose duty it is always to wait upon it, and resign it to King Edward.

SEALS THAT ARE DREAMS.

Considered as seals, merely with the idea of sealing documents, the smaller Seals of State are figments, dreams; but as emblems of what a Secretary could do if he liked they are impressive. Imagine Mr. Akers-Douglas at the Home Office writing a reprieve, and then calling for the seals. A long and solemn silence reigns while they are being fetched from the safe, and then publicly and impressively he selects the largest and seals the reprieve. Then the waiting hansom gallops off to the scaffold. In reality a reprieve is written out by an Under Secretary, and not "officially" sealed at all.

GREAT SEAL STILL A POWER.

Important State documents that deal with the making of treaties or the institution of Royal Commissions are sealed with the Great Seal. Indeed, the Great Seal is still a power in the land, though it does not still exercise a rivalry with the Sovereign, as it did in the days when the Lord Chancellor ran always to Charles I. with the Great Seal. It is reported that the Parliamentarians were quite nonplussed until it occurred to them to make a duplicate, when they

ROCK THAT COST FIVE HUNDRED AND SIXTY LIVES.

It is the Safest, But Not the Kindest, to Go Full Steam Ahead in a Fog.

It might seem at first sight that the liner, with her accurate steering, her independence of wind and tide, and her ability to regulate her speed to a yard, would reduce the dangers of fog to a minimum, and yet the facts are exactly the reverse, for the number of liners injured or lost in fog is not only relatively greater, but, as may be understood, the loss of property and life is infinitely greater.

Now and then we hear of a small trading vessel cut in two by a big steamer, which passes on, perhaps never having felt the shock; but it would take many such accidents as this to equal even one of the terrible disasters in which the fog spectre has lured the liner to destruction.

FIVE HUNDRED AND SIXTY LIVES.

In 1873 the Atlantic, a record-breaker in her day, hit the Nova Scotian rocks in the fog, and five hundred and sixty lives paid the penalty for the error in the course. In '78 the Grosser Kurfurst, a German warship, feeling her way through a channel fog, was struck by a homeward bound steamer and went down, taking three hundred men with her. In '91 the Eutopia, a ship full of Italian emigrants, was lost in the same way in the Mediterranean, and the bill here was five hundred and seventy-four lives. In '95 the North German Lloyd liner Elbe, running down in a fog towards the Straits of Dover, was struck almost without a moment's warning and sank, taking down with her three hundred and thirty-five lives.

These, of course, are just a few instances taken almost at random to illustrate the perils of the ocean road. Every device that human ingenuity could suggest has been tried to make it less, but so far with very little avail. The chief reason is that fog deprives the sailor of his two most necessary senses—sight and hearing. You see a light glimmering through a fog; it may be fifty yards or a quarter of a mile away, according to the conditions, and hitting or missing it is merely a matter of chance.

THE SOUND OF THE FOG-HORN.

So, too, in a fog, you may hear fog-horns braying and sirens screaming all about you, but you haven't a notion where they come from or how far they are off until you hit something or something hits you. Of the horrors that must happen on a crowded liner sinking in a dense fog the less said the better.

For many years there has been an interesting controversy among seamen which is worth mentioning briefly. Is it safer to go full speed ahead, or dead slow, through a fog?

On the one hand it is argued: Given a fog area fifty miles across, go through it at twenty knots, and you reduce the possible collision time to two hours and a half; at ten knots you are five hours in it, and double your chances of hitting or being hit; while at five knots you would have ten hours' fog and four times the risk of collision.

This is perfectly sound as far as it goes, though it must be confessed there is a certain amount of selfishness in the argument. A liner rushing through a fog at twenty knots an hour may be a danger to other craft, but she is practically safe herself unless she hit an iceberg or some other big ship.

Happily, in recent times, the genius of Marconi has brought the conquest of the fog fiend within apparently measurable distance. For a vessel fitted with his apparatus can hold constant communication with all similarly-fitted vessels a range of

HUNDREDS OF MILES.

Why did the Drummond Castle run on the rocks near Ushant on a clear night and send two hundred and fifty of her crew and passengers into Eternity? Why did the Paris get forty miles out of her course on the best-known ocean highway in the world, and hit the Manacles within a few yards of where the Mohegan had done the same thing a few weeks before? Why did the P. & O. liner China, in clear weather, on a perfectly clear evening, run full tilt on to the rocks of Perim as though she hadn't a look-out on board of her?

These form only three instances out of many that furnish puzzles which perhaps will never be solved until that improbable day when the perfect man commands a perfect ship.—Pearson's Weekly.

THE GREATER GERMANY

TREMENDOUS GROWTH IN POPULATION OF TEUTONIC EMPIRE.

The German People Will Have a Commanding Place in World Politics.

There is great rejoicing in Germany over the results of the quinquennial census taken in the first week of December, writes F. W. Will in a Berlin letter to the Chicago Daily News. At this writing returns are available only for the towns and cities, which universally register handsome increases, and indicate that the fatherland will end the fifth year of the new century with a total of something more than 60,000,000 souls, an increase of about 4,000,000 since the census of 1900.

The Kaiser's capital, with 2,034,000, has grown 145,000 in that period, but the total of "Greater Berlin"—the capital proper and the numerous suburbs, like Charlottenburg, Schoenberg, Wilmersdorf and Rixdorf, which are separated from it by only imaginary dividing lines—counts up 2,735,000, which is 21,000 greater than the last published census of Paris, and puts the German metropolis for the time being in the proud position of Europe's second biggest city and the first on the continent.

TWENTY-EIGHT GREAT CITIES.

The census reveals 28 German cities with a population of over 130,000, as follows:—

	1905.	1900.
Berlin	2,034,000	1,887,845
Hamburg	800,582	705,738
Munich	537,800	498,724
Dresden	514,283	480,559
Leipzig	502,605	455,132
Breslau	487,000	422,700
Cologne	425,944	372,290
Frankfurt	336,985	288,500
Nuremberg	293,668	261,031
Dusseldorf	262,630	213,711
Hanover	249,619	235,649
Stuttgart	245,998	176,699
Chemnitz	243,964	206,913
Charlottenburg	236,634	189,390
Stettin	230,578	210,702
Essen	229,270	118,893
Koenigsberg	220,212	189,482
Bremen	214,553	182,918
Halle	168,640	156,600
Elberfeld	167,710	156,963
Strassburg	167,342	151,041
Kiel	163,351	107,900
Danzig	159,088	147,301
Barmen	155,974	141,944
Rixdorf	152,858	90,422
Aachen	144,110	135,245
Schoenberg	140,932	95,998
Brunswick	136,423	128,211

In 1875 Germany had only twelve cities with more than 100,000 inhabitants, and but four with more than 200,000. In 1905 there are thirty-four with over 100,000 and eighteen with more than 200,000. That population is centring in the cities in about the same ratio as in the United States is manifested by the fact that Germany contains exactly the same number of municipalities, with more than 130,000 inhabitants, that the United States does—twenty-

HEALTH

THE CARE OF THE SKIN.

To most persons the skin represents simply the organ of touch, and because it is customary to keep nearly all of its surface concealed, its relation to the welfare of the body is overlooked. It has, however, most important functions, such as the casting out of waste matter and the maintenance of an even body temperature, disregard of which may lead to serious disturbances of health.

But aside from its purely physiological purposes, the skin is an important influence for or against personal appearance, and its proper is therefore worthy of consideration from this point of view alone.

Cleanliness is the greatest essential in the care of the skin. For the cleansing bath, water as hot as can be borne is best, and a good soap should be freely applied with a moderately stiff bath brush. If the water is at all hard it is well to soften it by the addition of a little ammonia or borax. A quick sponging of the entire body with cold water should follow, in order to cause the pores relaxed by the heat to contract and the drying should be accomplished by brisk rubbing with a coarse towel.

Although the habitual use of hot water on the face is sometimes condemned on the ground that it tends to favor the relaxation of the skin and produces wrinkles, there is no danger of this if the washing be concluded with cold water.

The sponge is a thing to be avoided as it is difficult to keep clean, and forms a beautiful lurking place for germs. One wash-cloth should be kept for the face alone, and this should be boiled frequently.

At night it is a good plan to rub a little pure cold cream into the skin of the face and then wipe it off with a piece of soft linen. It is surprising how black the latter will appear when the operation is finished. Cold cream and talcum powder and some of the cosmetics are safe and useful, but other cosmetics do more harm than good.

The development of wrinkles can be retarded, and if present they may be lessened by gentle massage with the finger-tips anointed with cold cream. A good general rule is to let the direction of the rubbing be upward and outward.

Above all, it should be remembered that cleanliness, exercise, fresh air, simple food and attention to the digestion are the most important considerations in the care of the skin.—Youth's Companion.

HEALTH HINTS.

In the treatment of contusion, where there is extensive discoloration of the skin, if olive oil be freely applied, without rubbing, the discoloration will quickly disappear. Absorbent cotton may be soaked in the oil and applied.

Everybody knows the tonic value of apples upon the system. Of all the ordinary fruits, apples, if eaten regularly, are the most generally beneficial, and many a man or woman noted for his or her good health ascribes it to the plentiful eating of apples.

For external use, in sore throat, take a piece of lint doubled (8 inches by 2 inches.) Wring it out of hot water; sprinkle over it a teaspoonful of eau-de-Cologne, and wrap it round the throat; cover it with oiled silk of the same size, and tie it all on with a light silk handkerchief.

That anyone afflicted with a bad cough can cease coughing at will seems on the face of it an absurd idea. Yet if the sufferer, when tempted to cough, will draw a long breath, holding it until it warms, and so soothe every air cell, he will find that the cough will soon be considerably relieved.

To Straighten the Shoulders. — The following is an excellent exercise. Stand with your feet apart and your arms out

the Sovereign, as it did in the days when the Lord Chancellor ran always to Charles I. with the Great Seal. It is reported that the Parliamentarians were quite nonplussed until it occurred to them to make a duplicate, when they dispensed with the King altogether.

Later Kings of England have regarded it in a curious, quizzical manner; as a rival of whom it was too foolish to be jealous. How can a King be jealous of his own seal? Yet it is almost an air of triumph with which King William IV. makes game of the broken seal of his predecessor. Greville relates the story. Lord Chancellor Brougham and ex-Chancellor Lyndhurst were wrangling for the pieces of the defaced seal. King William gravely separated the halves, and decided by the toss of a coin. "The King is a queer fellow," added Greville, but he does not say which half went to each. The Great Seal, it is well known, must never leave the Lord Chancellor's possession, nor must it be taken from the countess. Mr. Michael MacDonagh, in his classic book on Parliament, relates how Brougham took it with him to Scotland, and excited the great indignation of his royal master. He had arrived at Rothiemarchus, and as a great privilege disclosed his treasure to the ladies of the party gathered there by the Duchess of Bedford. These playful people hid it in a tea chest, and Lord Brougham was really thrown into considerable distress searching for it. At last he found it, and to celebrate its recovery he allowed them to make pancakes in it. Not satisfied with this experiment he subsequently repeated it at Tavmouth, and for the second time in its existence the Great Seal of England was used as a frying-pan.

ONCE IT WAS STOLEN.

Once, indeed the Great Seal has been stolen. In 1784 it vanished from the house of Lord Chancellor Thurlow in Great Ormond street. Pitt, who had just been appointed Prime Minister, vowed that the Whigs had stolen it to avert a general election, as Parliament could not be dissolved without. The difficulty, however, was overcome by the production of a new one in the record time of thirty-six hours.

About thirty years later, the Great Seal was lost under rather amusing circumstances. Eldon, the Lord Chancellor, was so nervous over his trust that he always slept with it in his room. One night there was a fire. Jumping from his bed he snatched up the box, rushed down into the garden and buried it in one of the flower beds. Then in his excitement he forgot the place. "You never saw anything so ridiculous," he wrote—afterwards—"as seeing the whole family down the walks dithering with bits of stick until we found it."

Such care is taken of the Great Seal that, although the "Purse-bearer" always accompanies the Lord Chancellor into the House of Lords, the Great Seal is not in the satchel. It is left in a Morocco-covered box in a strong safe at the residence of the Lord Chancellor.

NO CAUSE FOR FEAR.

Husband: "That's a foolish habit you women have of carrying your purses in your hands when in the street."

Wife: "Why is it?"

Husband: "Because a thief could easily snatch them and get away."

Wife: "Well, if the husbands of other women don't give them any more to put in their purses than you give me to put in mine, the thief would starve to death."

WOMAN'S RIGHTS.

Mamie—I believe in woman's rights. Gertie—Then you think every woman should have a vote?

Mamie—No, but I think every woman should have a voter.

THE PROFESSOR'S CHANCE.

"You sketch with a free hand, Miss Brownsmith," remarked the professor, who had been critically examining her portfolio.

"Entirely free," said the young lady, as she cast down her eyes in soft confusion and waited for the professor to follow up the opening.

fog tend within apparently measurable distance. For a vessel fitted with his apparatus can hold constant communication with all similarly-fitted vessels a range of

HUNDREDS OF MILES.

and also with lighthouses, however dense the fog may be. Therefore, if only the carrying of this apparatus were made compulsory, as it certainly should be, each vessel could at once learn how many vessels there were about her, how fast they were going, and what course they were steering, as well as getting a fairly accurate idea of their positions from last observation dead reckoning, and so on.

This system is such an immense protection against what is, after all, by far the greatest peril of the ocean road that insurance companies are already discriminating in favor of those ships which carry the apparatus. It is to be hoped that some day it will be illegal for a passenger or great cargo steamer to go to sea without.

Next in importance of the dangers that lie in the path of the ocean liner is the ever present possibility of breakdown. A sailing-ship may get dismasted and crippled for a time, but if her hull is sound she can always rig jury masts and stagger home somehow; but let the mightiest liner that ever broke a record break a screw-shaft or lose her propeller, and she is as helpless as an empty barrel on the water.

To quote only two recent incidents. Everyone will remember the intense anxiety which people in England and Germany felt day after day they opened their papers and found that the Cunarder Pavonia and the German liner Bavaria were still missing. They were saved, thanks to splendid seamanship and devotion; but how many steamers have broken down in mid-ocean and drifted away into the unknown, to be ground to pieces in the northern or southern seas, or smashed into scrap-iron on the rocks of some desolate coast, is one of the secrets of the sea.

A DOUBLE CHANCE.

This, by the way, raises a point of great importance to the ocean traveller. Always travel by a twin-screw steamer if you can. In the single screw everything depends upon one piece of steel casting, and the best screw-shaft ever turned out is not quite perfect. If that should break, it is just a question of being picked up by another steamer or drifting away to destruction.

Take, for instance, the passage from Yokohama to Vancouver across the North Pacific; it is a little over six thousand miles, it is one of the loneliest parts of the ocean, and but for the Canadian Pacific steamers it would be practically deserted. All these vessels are twin-screw, and so could always get somewhere even if one shaft broke; but a single-screw vessel with a broken shaft might drift about for years and no one be the wiser.

It is the same with that other frequent peril—a smashed rudder or a disabled steering-gear. The twin-screw can steer with her propellers; the other is unmanoeuvrable and has to stop.

The iceberg is a peril almost peculiar to the Atlantic highway, but it is never dangerous save in fog, and is a sharp eye kept on the thermometer its presence will always be shown by a sharp fall in temperature.

THE MOST APPALLING TERROR.

Fire, that most appalling of all ocean dangers, is, of course, common to sailing ships and steamers alike, but it has been very much reduced on the modern liner. All the lights are electric, and the crews are strong and well drilled, and every conceivable appliance for fighting the flames is in use; in fact, figures go to show that this is the smallest of the dangers which the liner has to fear.

The last of the great perils of the ocean road is at once the most incomprehensible and the most difficult to guard against. This is what may be called the personal danger. The captains and officers of the modern liner are the very pick and flower of their profession, and as men it would be very hard to find their superiors in any other sphere of life; yet, after all, they are only human, and now and then the time comes when even their skill fails them.

more than 200,000. That population is centring in the cities in about the same ratio as in the United States is manifested by the fact that Germany contains exactly the same number of municipalities, with more than 130,000 inhabitants, that the United States does—twenty-eight. The new census indicates that the traditional excess of males over females in Germany continues to exist.

POLITICAL ECONOMISTS HAPPY.

The returns bring particular gratification to German political economists, whose hopes and prophecies for the fatherland's future place in the world are intimately concerned with an unceasing growth of population. Prof. Schmoller of the University of Berlin finds that the census justifies his prediction that the German Empire will number 104,000,000 by 1965, and 208,000,000 in the year 2135—a trifling 230 years hence. Hubbe-Schleiden, another German population prophet, outdoors Schmoller, and reckons on 150,000,000 Germans by 1980, and M. Leroy Beaulieu, the French statistician, is on record as believing that the Hohenzollern who sways Germania's destinies in the year 2000 will rule over 200,000,000 subjects.

The only disturbing feature of these figures indicating the fatherland's solid growth is the fact that it is necessary for Germany to expand. They are numerical evidence which can not be explained away that Germany must find room for her multiplying millions or lose them as citizens and soldiers. If the Kaiser's colonies were productive, like Australia, South Africa and Canada, where young Teutons could settle, prosper and continue to owe allegiance to their Emperor, the situation would present nothing disquieting. But Germany's overseas possessions offer no attractions to emigrants, and have proved thus far nothing but graveyards for subsidies.

BRITONS ARE ALARMED.

It is precisely this state of affairs that fills Englishmen with alarm when they contemplate Germany's future. They are persuaded that it is toward British colonial possessions that the Teutons will cast covetous eyes when the life-and-death struggle for more room for Germans impels them to act. This is the "German danger," which makes Britons believe they must keep armed to the teeth for the time when young Germany will burst the bounds European political geography forces upon her. Germans scout such a theory. They point to Asia Minor and southern Brazil, where they are gradually acquiring economic supremacy, and explain that it is markets, not territory, that the fatherland is after, and that German policy is aimed at developing them. If enough of them can be developed and kept open to German enterprise the increase of industry at home, it is calculated, will keep pace with increase of population.

PLAITED.

McJigger—"Oh, she's a peach. Her hair is positively pure gold, and—"

Thingumbob—"So they say, and I can't understand it. I knew her when she was a little girl."

McJigger—"Well?"

Thingumbob—"Well, it was merely plaited then."

EASY MONEY.

Jagsby—"What shall I take to remove the redness from my nose, doctor?"

Doctor—"Take nothing for three months. Two dollars, please."

TRUE ENOUGH.

It is about as easy to drown trouble in drink as it is to put out a fire with kerosene.

THEIR BAD MEMORIES.

How often it happens that the cream of society is made up of people who have money but are unable to remember how they got it.

He: "I'd just as lief be hung for a sheep as a lamb." She: "Well, you'll be hung for neither; you'll be hung for a calf or nothing."

a long breath, holding it until it warms, and so soothe every air cell, he will find that the cough will soon be considerably relieved.

To Straighten the Shoulders. — The following is an excellent exercise. Stand quite upright and raise your arms till they are in straight line with your shoulders. Still keeping your elbows in the same position, touch your shoulders with the finger-tips. Lower the arms to the sides. Repeat, but don't go on, long after the muscles begin to get tired. Take a rest and try again later.

Superfluous Hair.—That most distressing of all blemishes to a woman, can be entirely removed by a piece of toilet pumice-stone. It must be passed firmly but lightly over the skin, care being taken not to chafe it. It is better to do this at bed-time, afterwards applying to the parts (without rubbing) a little cream which should be left on all night.

When cleaning your teeth always brush them with an up and down movement, and not sideways only, and the lack of the teeth should be brushed even more carefully than the front, for it is there that tartar is most likely to accumulate.

If soap doesn't agree with your skin, try glycerine. Wring a piece of flannel out of lukewarm water, pour a very little glycerine on it, and with this wash your face, after first bathing it in warm or cold water. Well rinse and dry afterwards, and your face will be beautifully soft and smooth.

If only people could be induced never to sit or sleep in a room in which all the windows are closed there would be far fewer colds caught. The idea is not so much that you will grow used to the air, but that through constantly breathing fresh air your lungs will grow stronger and healthier, and your body will therefore be in a more fit condition to withstand disease of any kind—colds among the rest.

Turkish baths should play a leading part in the cure of corpulence. If it is not possible for you to get these, make a practice of taking a lukewarm bath every morning, afterwards getting someone to rub, knead, and pound all the fleshy parts of your body with the hands. Before dressing you can also indulge in a few simple dumb-bell exercises with advantage.

PENCILS AND CONTAGION.

Doctors Condemn Habit of Children Exchanging Lead Pencils.

Doctors in England are taking a great deal of interest in the reports received from America to the effect that half a hundred cases of diphtheria in one of the public schools have been traced to the practice of children exchanging lead-pencils and putting the lead-pencils in their mouths while at study in the schools. This system of collecting the pencils at the close of the school-day, and distributing them the next morning has been in vogue in England, and several of the most prominent physicians in London have started a campaign against the practice.

"It does not follow that the pencils were the only medium of contagion," said one of the doctors, "but it is quite possible. There is no doubt but that the practice of distributing pencils is responsible for many unpleasant ailments."

"Nine children out of ten suck the ends of their pencils, and, in my opinion, there could be no more potent way of spreading the germs of tuberculosis and other diseases. The simplest way to overcome the difficulty would be to have a small drawer fitted to each school desk, so that each child could keep its own pencil. It is perfectly hopeless to try to teach them not to suck the end."

HE NEVER TOLD A LIE.

"Tommy," said a father to his son, "have you been at those six apples I put in the cupboard?"

"Father," said Tommy, looking into his eyes, "I have not touched one."

"Then how is it your mother found five apple cores in your bedroom, and there is only one left on the plate?"

"That," said Tommy, as he dashed wildly for the door, "is the one I didn't touch."

OUT THEY GO!

We are clearing the balance of the **KING SHOE SAMPLES** at the following prices. This is a rare chance for you.

Ladies' \$3.00 and 3.50 Sample Shoes, clearing at.....	\$2.25

\$5 00 For Your Thoughts.

To the first lady or gentleman who will fill in the words, of which the capital letters running down this column on this page are the beginning, and mail or hand same to us: we will give a pair of Stevens Gold Filled Spectacles Frames, guaranteed for fifteen years containing properly fitted lenses, valued at five to seven dollars—according to lenses required. The above offer is good for the month of February only, and in the last issue of this paper for this month the words will appear in full. Watch this issue and see if you are correct.—F. L. Hooper.

I — V —

Caesar's Appearance.

Julius Caesar was a thin man, tall and with a very wrinkled, seamy countenance. His forehead was broad and full of wrinkles. His eyes were not large, but described as exceedingly bright and quick. His nose was of more than usual size and his chin full and prominent. He walked with a slight, scholarly stoop in his shoulders. His ears stood out well from his head, and his hair was always cut close. Early in life he became bald.

Quite the Contrary.

Tess—I certainly was surprised to hear that Maud was married. I

Curling.

Two rinks of The Napanee Curling Club played in Brockville, on Wednesday.

The Belleville Curlers played a match with the Napanee Curlers, at the Napanee rink on Thursday evening. The Brockville Curlers played the Napanee Curlers at Napanee on Thursday afternoon.

The Neilson-Robinson Chemical Co.

On Wednesday afternoon the Neilson-Robinson Chemical Co., made an assignment for the benefit of their creditors. A meeting of the creditors is called for, on Friday, Feb. 10th. It is probable that arrangements will be made whereby the business will be re-organized and continued. It would be a pity indeed to have the business, which furnishes a lot of employment closed up.

A. S. Kimmerly is selling Bran 85c per 100 lbs. Bread made from Five Roses Flour won First prize at several Fall Fairs. Try a bag at \$2.45. Try our Tea, 2 lbs 25c our 25c Tea beats the world. We sell sugars cheaper than all dealers.

A Poor House.

The Poor and Sanitary Committee of the town council made a move in the right direction when they proposed to circulate a petition to have a House of Refuge established in this County near Napanee. Most of the other Counties of the Province have built or are building Houses of Refuge and County should not be behind hand in providing a place where the poor of the County could be housed and taken care of instead of the present haphazard way in which the poor are taken care of by Township village and town council and charitable organizations.

All Doubts Settled.

No vague question need now haunt the minds of up-to-date women when home dyeing is necessary.

DY-O-LA does the thing—and does it better. Quick, easy and economical.

The one package can be used for every sort of cloth—wool, silk, cotton and mixed.

Gives beautiful, even, fast colours.

DY-O-LA is better than any other dye I ever used," says Mrs. G. D. Murray, Newcastle, N.B. Write to her, and she'll tell you more.

to honor to the post and warrant. Mr. M. C. Bogart. A splendid supper was served and the usual after dinner speeches were exceedingly interesting. A large number of speakers giving short addresses. Warden Bogart is to be congratulated on the success of his supper.

Carson-Graham.

A quiet wedding was celebrated in South Napanee, on Wednesday evening at 9 p. m., when Miss Ella Jennie Carson, only daughter of the late John Carson, was united in marriage to Mr. Mark P. Graham, eldest son of Councilor C. A. Graham. The ceremony was performed by Rev. Emsley, in the presence of a number of the relatives of the contracting parties. Miss Euphemia Coates, cousin of the bride was a charming bridesmaid while Mr. Jas. Graham, brother of the groom assisted him. The bride was given away by her brother, Mr. F. H. Carson. After a sumptuous wedding supper the young couple left on a trip to Toronto, Buffalo and other points. Among the numerous handsome presents received by the bride was a beautiful full length fur-lined coat, the gift of the groom, \$100 from her brother, Mr. F. H. Carson, and a cheque for \$25.00 from her brother, Mr. W. F. Carson, Killarney, Man. The young couple start their wedded life with the well wishes of a host of friends.

COUNTY COUNCIL.

Continued from 5th page

THURSDAY—THIRD DAY.

Council met at 10 a.m., the Warden presiding. Minutes of yesterday's session read and confirmed.

An account, Bell Telephone, \$12.00, was ordered paid, and one from the Napanee Express, was referred to Finance committee.

Mr. Paul introduced a by-law to provide for assisting in maintenance of certain roads, which was read first time.

The resolution of Messrs. Martin and Hall, of yesterday, relating to election of Mr. W. S. Herrington as High School trustee for Napanee, was put to a vote and declared lost.

The motion of Messrs. Creighton and Paul, relating to the election of Mr. J. R. Fraser, as trustee, was also voted on and lost.

A motion of Messrs. Martin and Hall, that Dr. Vrooman be elected trustee was also declared lost.

Another, on the same subject, that Mr. M. S. Madole be elected High School trustee, moved by Messrs. Miller and Martin, was also defeated.

Mr. Martin presented his report as a member of the special committee, re County Roads, which was read. The Warden also presented his report on the same subject, being a member of the same committee. After considerable discussion of the subject, it was moved by Messrs. Bogart and Martin, that the foregoing reports be referred

to Mr. Martin, that Henry Allen be elected High School trustee for Newburgh. Carried.

Mr. Martin presented first report of Roads and Bridges committee, which was adopted.

Moved by Mr. Baker, seconded by Col. Clyde, that the By-law to provide for assisting in maintenance of certain roads be now read a third time, signed, sealed and finally passed. Cd. The By-law was read accordingly, signed, sealed and numbered 207.

Mr. Baker gave notice of the introduction of a By-law for issue of debentures in accordance with report adopted.

Moved by Mr. Paul, seconded by Mr. Creighton, that this Council urgently request through our deputation to the Government, that By-law No. 204 of this Council be ratified and approved without any change whatever. Carried.

Mr. Martin asked for the yeas and nays.

Yeas—Baker, Bryden, Creighton, Clyde, Martin, Paul, Woods—7.

Nays—Bogart, Hall, Miller—3.

Moved by Mr. Bryden, seconded by Mr. Martin, that Messrs. Paul, Hall and Baker, be a delegation to wait on the Government re County Councils Act, as recommended by committee on Legislation, and act with similar deputations from other counties; and that the deputation re County Roads By-law act in conjunction with this deputation if possible. Carried.

Mr. Miller asked for the yeas and nays.

Yeas—Baker, Bogart, Bryden, Clyde, Hall, Martin, Paul, Woods—8.

Nays—Creighton, Miller—2.

Moved by Mr. Paul, seconded by Mr. Baker, that it be left in the hands of the Roads and Bridges committee to purchase a heavier steam roller than ten tons if deemed advisable. Carried.

Mr. Martin gave notice of the introduction next session of a by-law to appoint a superintendent over county roads, and to define his duties.

Moved by Mr. Paul, seconded by Mr. Baker, that we appoint a delegation to wait on the Government to secure help on the colonization roads, deputation to consist of Messrs. Geo. Woods and Jas. Bryden. Carried.

Mr. Miller asked for yeas and nays.

Yeas—Baker, Bogart, Bryden, Hall, Martin, Paul, Woods—7.

Nays—Creighton, Clyde, Miller—3.

Moved by Mr. Martin, seconded by Mr. Woods, that Col. Clyde be added to the deputation re Colonization roads. Carried.

Mr. Miller again asked for the vote.

Yeas—Baker, Bryden, Hall, Martin, Paul, Woods—6.

Nays—Bogart, Creighton, Clyde, Miller—4.

On motion Council adjourned at call of the Warden and Chairman of Roads and Bridges committee.

REPORT OF SPECIAL COMMITTEE.

Your committee appointed to report on the report of the Committee appointed to enquire into the financing, purchasing of road machinery and superintending of the County road system be leave to report and recommend as follows:

1st. That two debentures of \$10,000.00 each be issued and sold as soon as required, the money so raised to be expended as shall be hereafter fixed by By-law, said debentures to be made to mature as follows: The first \$10,000.00 in the year 1911, and the second in the year 1912, the same to bear interest at the rate of four per cent. per annum.

2d. That at the present time we do not see the necessity of making provision for over drafts or short date securities.

3d. We would recommend that the following named machinery be purchased, viz., one rock crusher with three spreader wagons, one grader and the necessary small tools.

4th. We recommend that one superintendent or overseer be appointed over the whole system, he to be subject to the direction of the committee on roads and bridges, under instructions given by the County Council, said superintendent to have the power to employ foreman, men and teams as he deems necessary under the above named direction.

In Committee of the Whole clauses 1, 2 and 4 were adopted, and clause 3 was amended by adding thereto, "One ten ton steam roller with spikes."

H. A. BAKER,

THOS. CLYDE,

GEO. WOODS,

BY-LAW NO. 207;

To provide for assisting in the maintenance of certain roads.

Passed February 28, 1906.

The Council of the Corporation of the County of Lennox and Addington, enacts as follows:

That the Municipalities of Bath, Newburgh, Kaladar, Anglosa and Effingham, Denbigh, Abinger and Ashby shall in each and every year receive a

grant of a sum in the same relative proportion of two-thirds the total expenditure on County Roads as their equalized assessment bears to the total equalized assessment of the County, said grants to be expended on roads hereinafter designated.

2. That the Municipality of Amherst Island shall in each and every year be given a grant for the improvement of their public highways in accordance with the provisions of clause 2 of by-law No. 204.

3. That the Town of Napanee shall in each and every year receive a grant of a sum in the same relative proportion of two-thirds the total expenditure on County Roads as one-half the equalized assessment of the County, said grants to be expended on roads hereinafter designated.

4. That the roads on which the grants provided for in this By-law, shall be as follows:

In the Municipality of Denbigh, Abinger and Ashby—the Addition Road.

In the Municipality of Kaladar, Anglosa and Effingham—the road beginning at Hastings boundary and running through the Village of Flinton to the Addition Road and known as the Bridgewater road.

In the Village of Newburgh—the roads necessary to connect our present County road system.

In the Village of Bath—the road running east and west, known as the Front road, and the road from the Bay shore north to the Ernestown boundary.

In the Town of Napanee—the roads on Centre and Dundas streets.

5. The annual sums payable under this By-law to any town or village shall be expended upon the construction and improvement of the roadway and not upon any sidewalks, and the Council of each corporation receiving grants under this By-law shall make a full and complete report of said expenditure annually to this Council.

The New Spring Goods in Grand Array.

Half the interesting descriptive story of the new season's materials will never be told you. Space will not permit details in regard to the enormity and completeness of our new Spring Stocks, every detail being taken into consideration. Careful study enables us to place before you fabrics of the newest and latest creations—our aim being to please.

The Dress Goods Section.

This, the Department we are proud of, and we hesitate not in saying that you are—with a bright, clean and new stock, such as is carried here—the most particular can be suited. Grey being the predominating shade, we are fully prepared with all the most fashionable weaves, including plain and overcheck effect. Homesuns, the correct weights, built for appearance, style and wear.

The Silk Section.

We fail to give a description of the Silks placed in stock this season, we want you to come and see for yourself. Silks of the highest order. The shades alone will sell these goods, if quality had been forgotten—perfection, nothing short of it. Visit this Department.

The Wash Goods Section.

A waste of time we consider in trying to give you a description of the many, many Washable Fabrics being carried here. With the famous CRUM'S PRINTS as a leader and B. B. B. a good second, we hesitate not in giving a guarantee with every yard as to washing and wearing qualities. The new Fancy Piques, the new silk-effect Kingcot Gingham, the new Vestings, the new Duck and Drill, the new Fancy Dress Muslins—the stock this season is composed of everything that is new and dressy. See the new Dress and Embroidery Linens—a complete range of prices, in fine, medium and heavy weaves.

The Linen Section.

Table Linens and Napkins, 5 o'clock Cloths, Shams, Runners, D'Oylies, Towels and Towellings, etc., etc. New and exclusive designs and first quality only.

CONFERENCE OF ANGLICAN AND METHODIST MINISTERS.

Belleville, on Monday The Conference opened in the Council chamber at 2 p. m., the Very Rev. Dean Smith, of Kingston, presiding.

There were present of Anglican clergy, besides the Dean, Ven. Archdeacon Carey, Canons Jarvis and Bogert, Rural Deans Armstrong, Beamish and Dibb; Reverends C. A. French, Costigan, Radcliffe, R. S. Forneri, Irvine, McTear, Armitage, Williamson, Blagrove, Fleming, Depensier, Clarke, Wright, J. R. Jones, Byers, Frasers, A. L. Geen. The Methodist ministers were Reverends M. E. Wilson, Leitch, McCamus, Metzler, Adams, Martin, Thomas, Maybee, White, McCall.

After prayer by the chairman, Canon Bogert and Rev. Mr. Leitch were elected Secretaries.

The Dean made a very appropriate and impressive opening address, in which he pointed out the wonderful change that had taken place in men's minds, in a very few years regarding the whole question of Christian Unity.

Rev. Mr. Costigan gave a brief history of the movement resulting in this conference.

Rev. M. E. Wilson, of Northport, the prime mover in the matter, then read the first paper, entitled, "The history of the disunity of the church. It was a masterly and exhaustive treatment of the subject, and can hardly be epitomized in a short report like this without destroying the close connection of its different parts. Beginning at the Apostolic period, he took a keen and close survey of the various schisms and "renderings of the Body" with the causes and results of each. His conclusion showed a decided leaning toward the Episcopal form of Church government, with a clear preference for the Greek or Eastern type. The paper was much enjoyed.

Archdeacon Carey, then read a paper on "The necessity and advantages of reunion," prepared by Archdeacon MacMorrine, who could not be present. It was written in the Archdeacon's forcible but gentle style, bewailing the troubles and disadvantages fixed upon the work of Christianity in the world by "our unhappy divisions."

Rev. Mr. McCamus then gave his paper on "Organic union a necessary outcome of Christian Unity." It was an extremely thoughtful and strong exposition of the subject, much on the same lines as those taken by the former paper, and written in the happiest spirit of desire for the union of the severed members of the Body corporate.

Then followed earnest and strong addresses by Rev. Messrs. Leitch, White, and French and the Conference adjourned.

THE EVENING SESSION

The evening session opened at 7.30, the dean again taking the chair. In the unfortunate, but unavoidable absence of Dr. Dyer.

The subject "A Possible Polity for a Reunited Church in Canada," brought out two strong and characteristic papers from Rev. E. Costigan, from the Anglican point of view, and Dr. Metzler from that of the Methodists.

Mr. Costigan sketched the polity of the church in the Apostolic and sub-Apostolic age up to the middle of the middle of the second century—at which time the Episcopal form of govern-

the church in the Apostolic and sub-Apostolic age up to the middle of the middle of the second century—at which time the Episcopal form of government had become universal. It was an interesting and clever paper, and afforded plenty of food for thought.

Dr. Metzler followed with a strongly written and forcibly expressed paper, in which his view seemed to be diametrically opposed to that of Anglicans—or of any who accept Episcopacy in any form. He thought that union of all Godly people in Christ, without any outward unity, was the true polity for Christian people. The logical trend of the paper seemed to lead to the conclusion that the best possible polity for Christian people is to have no polity at all, that is in the form of church government; that it is sufficient if all can work in faith and love for the spread of God's Kingdom and that success in winning soul and doing good generally is all the proof needed, all the credentials required, by one calling himself a messenger of God. It was an original and interesting paper.

Several earnest and hopeful speeches were then made by various members of the conference, each, of course, speaking from his own point of view and the meeting closed at 10.30 by singing the Doxology and the Benediction from the Dean.

The conference will assuredly do good. It was carried on with the best of good fellowship and friendliness. Not a single word was said to cause the least friction, and if nothing further comes of it, the conference will be long remembered by those present, for the harmony and good feeling evinced and for the opportunity it gave for becoming better acquainted with one another and so better understanding one another.

During the conference a message was received from the Peterboro Ministerial Association, wishing the conference every success in the work in which it was engaged.

Canadian and American Coal Oil.
MADOLE & WILSON.

The Extended Popularity Of

Diamond Dyes

Induces Speculators to Introduce Weak And Worthless Imitations.

DIAMOND DYES, true home helpers and money-savers for mothers and wives, are dear to every woman's heart.

Recently, speculators have gone into the package dye trade with the view of gaining a share of the immense and ever-increasing trade held by the manufacturers of the DIAMOND DYES, but all such efforts will, as in the past, result in failures.

The crude and worthless dyes brought out in opposition to the DIAMOND DYES, can never become popular, for the simple reason that they have not one good quality to boast of. The merchants of Canada who were induced to buy these adulterated dyes now find them dead and worthless stock.

The progressive and busy druggists and dealers of Canada sell only the DIAMOND DYES, which have an established reputation of over twenty-five years. The modern merchant has not the time or inclination to encourage the sale of worthless and deceptive goods.

If our Canadian women desire full, brilliant and fast colors, they should at all times ask for the DIAMOND DYES, the only guaranteed package dyes in the world. When buying package dyes see that the words DIAMOND PACKAGE DYES are on each packet handed out by your dealer. WELLS & RICHARDSON CO., LIMITED, MONTREAL P.Q., will send free to any address their New Dye Book, Card of Dyed Samples, and new book in verse entitled "The Longjohns' Trip to the Klondike." This little book is interesting thousands.

Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious.

We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

NEWS IN GENERAL.

E. B. Eddy, the great match manufacturer of Hull, is dead.

Instructions have been given to cancel the Crown Bank bills stolen by Edwin St. George Banwell.

Anthony Blum has a mine at Dinorwic, Algoma, which contains seams of solid gold three inches thick.

Unorganized territory in Ontario will in future be laid out in townships of ten or twelve instead of six square miles.

Police Magistrate Wm. Forbes, of Grimby has been dismissed by the Whitney Government.

President Gomez is said to be plotting a revolution against President Castro in case of a French blockade of Venezuela.

King Edward has launched the great battleship Dreadnought, the largest in the world. It will join the Atlantic fleet within a year.

It is understood that the Government has decided on its policy in regard to the Gillies timber limit in the Cobalt district.

The Government has cancelled the lease of the Blanche River and Pulp & Paper Company of water power at La Cave Rapids, on the Ottawa River.

Thirty of the Laborites in the British Commons will sit on the Opposition side of the House. Mr. J. Kier Hardie is their Chairman.

The Imperial Protestant Federation have petitioned King Edward to withhold his consent to the marriage of Princess Ena to King Alfonso of Spain.

The London Liberal Association has decided not to oppose ex-Premier Balfour's election for the City of London.

There is evidence of turbulence among the Kaffirs of Natal. Friendly natives are warning the whites that trouble is coming.

The Russian Government will shortly make a State purchase of all private lands for sale, and will allot these lands to peasants.

Great Britain has demanded that China compensate her missionaries for losses sustained during the recent rioting.

In a speech last night at a banquet in London Mr. Balfour outlined his policy with unusual definiteness, and succeeded in pleasing all sections of his party.

All the members of the royal family and the court attended the final service over the body of King Christian last night. The body will lie in state two days.

It is understood that the Manitoba Government will introduce a bill this session increasing the sessional indemnity from \$500 to \$1,000, and giving the Ministers a substantial raise.

The funeral of the late E. B. Eddy, at Ottawa Tuesday, was an imposing sight. The remains were placed on a

LAPUMS WEST.

Fine Summer weather and still no snow.

Mr. and Mrs. J. W. Love entertained the members of the Choir on Tuesday night.

Fred Reid of Wilton spent the past week at his home here.

A. Williamson of Adolphustown was renewing acquaintance here on Monday. S. Vandewater proposes moving to Yarker in the near future.

Mr. and Mrs. Walton Davy and little son Glen were visiting at L. Brown's on Sunday.

A party of young people consisting of about twenty, from Maple Avenue, and Odessa, grove out here to Mr. and Mrs. B. Rose's, one night last week, and took possession of their home until the wee sma' hours began to appear, and enjoyed themselves immensely.

Mrs. James Huff, and little daughter Jessie intend spending the week at her brother's, John Reid's new home at Elginburg.

Mr. and Mrs. J. W. Lone were visiting at G. C. Davy's on Saturday night.

Why he is pleased.

When you tell the doctor that you got the prescription filled at The Medical Hall, he will be pleased, because he knows that you got just what he ordered and that it was properly dispensed.—Fred L. Hooper.

SYDENHAM.

Quite a good time was enjoyed at the Sydenham carnival on February 8th. "Major" Blaksley had the ice in excellent shape, on his Imperial rink, and spared no effort to give everybody a good time. A good number turned out in fancy costumes and mingled with the numerous skaters. Good prizes had been offered and were won as follows: Ladies, first, Beatrice Grant; second, Gertrude Laidley; third, Miss Ethel Moore. Girls, Aileen Tovell. Boys, first, Chris. Astley; second, Harry Leitch; third, Wallace Spafford. In the boys' race, G. Joyner won. The judge was Rev. Mr. Astley and Moses Spafford. This carnival is but the beginning and one on a much larger

BOYLE & SON.

Belleville, Feb. 14.—Chief Gurney of Deseronto to-day brought to the county jail David Keller and Mrs. C. Sagar, on the charge of bigamy. They were committed to trial by Magistrate Bedford. Keller is said to have married the woman about a month ago, during Mr. Sagar's absence, and on the latter's return he had both arrested. All the parties are middle aged, and the couple come up for trial in eight days.

Washing Machines and Wringers, all of the new ones at BOYLE & SON.

IN THE HIGH COURT OF JUSTICE

Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A.D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Napanee at his Chambers in the Court House, Napanee, on

FRIDAY THE 9TH DAY OF MARCH, A.D. 1906.

at 2 p.m., the following valuable farm lands, Parcel No. 1.—The Northwest 1/4 of Lot No. 11 in the 5th Concession of the Township of Camden, in the County of Lennox and Addington, containing 10 acres more or less. Parcel No. 2.—The Northwest 1/4 of Lot No. 11 in the 6th concession of the said Township of Camden in the County of Lennox and Addington containing 10 acres more or less. Parcel No. 3 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds.

Parcel No. 2 is pasture land without any buildings and well fenced with a patent fence. The 2 parcels will be sold separate or en bloc at the option of the Master, and subject to an annuity of \$30 a year against the 2 parcels payable to Eleanor McKeown and subject also to a reserve bid fixed by the Master.

The purchaser shall pay down a deposit in the proportion of \$10 for every \$100 of the purchase money, and the balance in one month thereafter without interest.

In all other respects the terms and conditions of sale will be the same as the conditions of sale of this Court.

For further particulars, apply at the law offices of Messrs. Herrington Warner & Grange and Morden & Rutan, Napanee.

Dated the 6th day of February, A.D. 1906.
(Sd) J. S. LAZIER, Master.
Herrington, Warner & Grange,
Pliffs Solicitors.

WANTED, by Chicago wholesale house, special representative (man or woman) for each province in Canada. Salary \$20.00 and expenses paid weekly. Expense money advanced. Business successful, position permanent. No investment required. Previous experience not essential to engaging.
Address Manager, 132 Lake Street,
Chicago, Ill., U.S.A.

The funeral of the late E. B. Eddy, at Ottawa Tuesday, was an imposing sight. The remains were placed on a Grand Trunk car and taken to Bristol, Vermont, for interment.

Since Germany will not recede from her assumption that she has a position of perfect equality with France in Morocco a rupture in the conference appears inevitable.

A thief smashed the plate-glass window of McMillan's jewellery store at Vancouver with a brick and got away with \$15,000 or \$20,000 worth of gems.

Mr. Thomas A. Hastings, formerly license inspector for Toronto, has been appointed inspector of Dominion public buildings for Toronto and western Ontario.

It is reported that the Department of Lands and Mines will be changed to the Department of Lands, Forests and Mines, with Mr. T. M. Gibson and Mr. Aubrey White as Deputy Ministers.

The Venezuelan Government has replied through its representative to Premier Rouvier of France that France is responsible for the rupture unless she can disprove certain statements which are submitted for arbitration.

The Canada Southern Railway Company have applied to the Railway Commission for authority to expropriate certain lands required for terminal for the tunnel being built under the Detroit River at Windsor, and for the right to divert certain streets.

Many a man who thinks advertising would be of little use in business would work himself up to a high pitch of indignation if his name were left out of the telephone book or erased from the sign in front of his store. To be in the swim the merchant must be found where the public looks for him—and it looks first of all in the newspaper.

There have been a number of inquiries as to whether any amendments to the assessment act will be made this session. It is understood that the Government is averse to any action of an important nature in this regard, and that amendments, if any, will be only of a minor character, their attitude being that the revised act of 1902 has not yet been sufficiently tested to warrant sweeping changes.

We are offering heating stoves, horse blankets and mitts at greatly reduced prices.

MADOLE & WILSON.

T. C. Robinette, K. C., received notice Wednesday that the Ottawa Government has granted a pardon to William Boyd, who was sentenced in May, 1905, to a term of one year in the Central Prison for conspiring in a fake foot race at St. Louis, with a view to defraud Alderman Douglas out of \$10,000. Mr. Robinette put in a very strong petition signed by many of the leading citizens of Chatham and Kent Counties, and states that he has been at work on the case for the last four months in his endeavors to get Boyd out.

Always in the Lead.

For "Quality" and "Prices" always right at Wallace's Red Cross Drug Store—Baby's Own Soap, 25c. a box, 6 lbs. Salts, 25c., 12 lbs. ordinary Solphur, 25c., 3 packages any kind Dye, 25c. 2 czs. Genuine Bland's Iron Tonic Pills 25c.

Just received a new lot of fruits such as the bitter marmalade oranges, Valencienas, Navelas and lemons for making genuine marmalade also a fresh line of French Plums, table and cooking figs, dates and table raisins. A nice line of nuts, filberts, walnuts, almonds and brazils. A genuine line of Maple syrup, sealed in glass bottles, a nice lot of breakfast foods, such as rolled wheat, cracked wheat, rolled oats and buckwheat flour for pancakes, all nice and fresh.

THE COXALL CO.

boys race, O. Joyner won. The judges were Rev. Mr. Astley and Moses Spafford. This carnival is but the beginning and one on a much larger scale will occur towards the end of the month.

The Sydenham ice races were run off Thursday, under most favorable weather condition. The ice on Loughboro Lake was in excellent state. In the 2.25 class for the purse of \$80, the following was the result: 1st, "Ellen D," owned by J. McCue, Kingston; 2nd, Mare, owned by Daniel Graves, Harrowsmith; 3rd, Mare owned by D. Lake, Napanee. The following were the winners in the three-minute class for the purse of \$50: 1st, "Queen of Spot," owned by S. Elliott; 2nd, chestnut mare, owned by Samuel Jamieson, Battersea; horse owned by J. Bannister, Portsmouth.

A very sad and distressing case occurred last week near Sydenham where some young people while returning from a party noticed a big fire raging in the distance about midnight. They started out to investigate the cause, and were horrified to find the home of Mr. Michael Patterson, three miles east of Sydenham, burned to the ground with the charred remains of the unfortunate owner in the ruins of his former home. Mr. Patterson had attended the races at Sydenham last week, and left there for his home about eight o'clock. Mr. Patterson had a sister living with him, who was away from home at the time. He was widely known throughout the country, and the news of his terrible death is heard with great sorrow.

Antoine Wendling, Ottawa, has sold Deveras to James Powell, Napanee, for \$1,000.

On Friday evening last fire destroyed the workshops and laundry in connection with the Kingston Asylum. The damage will amount to \$10,000.

A break in the gas main leading from the Retort house to the gas tank caused the gas works to shut down on Saturday night. All the gas was shut off Saturday and Sunday.

The fine Arabian Black Charger of Lord Dundonald was chloroformed at Kingston, on Friday last. This was the animal that carried Lord Dundonald through the Boer War.

ASSIGNEE'S NOTICE TO CREDITORS.

In the matter of the Neilson-Robinson Chemical Company Limited, Insolvent.

Notice is hereby given that the Neilson-Robinson Chemical Company, Limited, of the Town of Napanee, in the County of Lennox and Addington, carrying on business as Manufacturers at the said Town of Napanee, have made an Assignment under R. S. O. 1897, c. 147 of all their estate, credits and effects to Clarence M. Warner of said Town of Napanee, for the general benefit of their creditors.

A meeting of their creditors will be held at the office of Herrington, Warner & Grange, in the Town of Napanee, on

FRIDAY, FEBRUARY 10TH, A. D. 1906, at the hour of 2 o'clock, in the afternoon, to receive a statement of affairs, to appoint inspectors, and fix their remuneration, and for the ordering of the affairs of the estate generally.

Creditors are requested to file their claims, with the Assignee, with the proofs and particulars, thereof required by the said Act, proved by affidavit on or before the day of such meeting.

And notices further given that after the date of the aforesaid meeting the Assignee will proceed to distribute the assets of the debtors amongst the parties entitled thereto, having regard only to the claims of which notices shall then have been given, and that he will not be liable for the assets or any part thereof so distributed to any person or persons of whose claim he shall not then have had notice.

BURNOVOS' LIFE THREATENED

Terrorists' Hand Raised Against Russia's Officialdom.

SHADOW OF TERROR.

A despatch from St. Petersburg says: The hand of the terrorists is now raised against all classes of officialdom, military and civil, which are called upon to curb the revolutionary movement. The shadow of terror hangs over those who are on the list of "enemies of liberty" high on which are the names of Interior Minister Burnovos, Vice-Admiral Doubasoff, Governor-General of Moscow, and General Sollogub, Governor-General of the Baltic provinces. Every precaution has been taken to protect them, but history has shown that the ingenuity of the terrorists is sure to be successful sooner or later. Mme. Doubasoff, who is a sister of M. Spigaguine, the former Minister of the Interior, who was assassinated in 1902, is so alarmed for the Admiral's safety that she is imploring him not to return to Moscow. It is noticeable that a large proportion of the recent terrorists' sentences have been executed by women, who are among the most devoted members of the fighting organization. The number of officers of the police who have been slain on account of their "pernicious activity" is mounting up so rapidly that the reports of such crimes hardly receive comment. Several cases occur daily.

CHOUKNIN WILL RECOVER.

The Admiralty has received a report from the surgeon in charge of Vice-Admiral Chouknin, who was shot by a woman in his office at Sebastopol on Friday, to the effect that his wounds are not dangerous. Rear-Admiral Grigorovich has assumed command of the Black Sea fleet in succession to Chouknin. The attending surgeons are confident that Chouknin will recover. The most severe wound is in his breast, from which the bullet has not been extracted. The other wounds are in the right shoulder and both legs.

The woman who was shot and killed by an orderly who rushed to the Admiral's assistance is believed to have been an emissary of the St. Petersburg group of terrorists, like the murderess of Lieut.-Gen. Sukharoff, the former War Minister, who was shot and killed December 5 at Saratoff, and the assassin of General Shuvaloff, Prefect of Police of Moscow, who was shot and killed at Moscow July 11 last.

A JUVENILE BOMB-THROWER.

A despatch from Warsaw says: A bomb thrown by a boy in Sgoda street on Friday exploded and fatally wounded four gendarmes. All the windows in the neighborhood were broken. The boy escaped.

Assaults on the police throughout the province continue.

TROOPS ON THE MOVE.

The St. Petersburg correspondent of The London Times cables:—The insurrection in the Baltic provinces seeming to be under control, if, indeed, not crushed, an order was given for the withdrawal of some of the troops. It now appears that the withdrawal of the troops has been followed by a recrudescence of the insurrection. General Orloff's column is hurriedly leaving Riga to resume punitive operations.

ARMY SUPPORTS CZAR.

A despatch from St. Petersburg says: A colonel of artillery, who has just arrived from Manchuria, has given details of a meeting held at Har on Dec. 14 last by 400 line and staff officers of the Manchurian army, at which the Czar's manifesto was unanimously endorsed. At the meeting, which was held by

The elections have been fixed for April 7th and the opening of the National Assembly on April 28th. It will meet in the Taundo Palace. The Cabinet on Tuesday decided that it would be premature to abolish martial law at present. The estate of the Minister of Justice, M. Akynoff, was plundered on Monday. The Novoe Vremya states that the radical organizations of Finland are preparing for open war with Russia in support of the next outbreak of the Russian revolutionists.

WAR MEDALS.

A despatch from St. Petersburg says: Medals for all those who participated in the war with Japan have been ordered according to an imperial rescript published in the Russki Invalid on Wednesday. Those who defended Port Arthur are singled out for special distinction. They will be given a silver medal, and light bronze medals will be bestowed on those who were engaged in battles on land and sea. The soldiers who were not under fire will receive dark bronze medals.

FATAL SOOTHING SYRUPS.

Startling Statement by United States Professor of Chemistry.

A despatch from Washington says: That more than a million infants have been sacrificed to the various concoctions known as soothing syrups and pain-killers and over twice that number killed by impure milk, was the declaration made on Wednesday night by Professor H. W. Wiley, chief of the Chemistry Bureau of the United States Department of Agriculture.

"We do not know anything about the milk we have left at our homes, or the condition under which it was produced," he added. "There are a thousand and one possibilities which might have combined to make what nature intended for a food the most virile poison that chemistry can produce."

"I have found that the foods we daily consume are so fraught with germ life of a harmful nature that I am almost afraid to go to the table. The butter is tainted; there is little other to be found anywhere. Canned goods are kept for years and sold for the genuine article. I speak particularly of condensed milk. If we know nothing of the fresh milk we get, surely our knowledge is more limited as to the product that is put in cans. The Lord intended us to resort to cans only to tide us over one season, until green fruits could be had again, but the canneries don't know this. There is no law requiring them to stamp the date upon their goods; if they did it would kill the sale."

DISASTROUS FIRE.

Smith's Falls Factory's Main Building Burned.

A despatch from Smith's Falls says: About 2.30 o'clock on Friday morning fire was discovered in the Frost and Wood Agricultural Implement Works by the night watchman on his visit to the carpenter shop. The alarm was at once sent in, but owing to the inflammable material of the shop the fire spread rapidly, and before it was got under control the main building, in which were situated the machine, carpenter and paint shops, was completely destroyed. The fire company did heroic work, and the new waterworks system was able to

LEADING MARKETS

BREADSTUFFS.

Toronto, Feb. 13.—Wheat—Ontario—No. 2 white 79c to 79½c, red 78½c to 79c, mixed 78c to 78½c, goose and spring 74c to 75c, all at outside points.

Wheat—Manitoba—No. 1 northern 86½c, No. 2 northern 84c, No. 3 northern 82½c at lake ports; all rail quotations 4c more than these prices.

Flour—Ontario—\$3.15 is bid for export, in buyers' bags, outside; high patents at Toronto are quoted at \$4, bags included, and 90 per cent. patents at \$3.60; Manitoba first patents \$4.40, second patents \$4.10, bakers' \$4.

Millfeed—Firm; bran, in bags, outside, \$16.50; shorts, \$17 to \$17.50.

Oats—35½c to 36½c, outside.

Barley—Firm. No. 2 49½c; No. 3, 44c to 45½c; No. 3 extra, 46c to 46½c.

Peas—79c, outside.

Rye—70c, outside.

Corn—Canadian 43c, Chatham freights; American firm, No. 3 yellow, 49½c to 50c; mixed, 49c to 49½c, at Toronto.

Buckwheat—Dull, 52½c to 53c, outside.

COUNTRY PRODUCE.

Butter—Creamery .. 24c to 25c do solids .. 23c to 24c

Dairy h. rolls, good to choice 21c to 22c do large rolls .. 18c to 19c

do medium .. 18c to 19c do tubs .. 20c to 21c

do inferior .. 17c to 18c Cheese—Unchanged, with a firm tone at 13c for large and 13½c for twins.

Eggs—Quotations are unchanged at 24c for new laid, 17c for storage, and 15c for limed.

Poultry—Choice dry picked are quoted: Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c, thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese, 10c to 11c; turkeys, 14c to 15c for choice small lots.

Dressed Hogs—The market is quoted nominally at \$8.50 per cwt. for select car lots on track here.

Potatoes—Prices unchanged. Ontario 65c to 75c per bag on track here, 75c to 85c out of store; eastern, 70c to 80c on track and 80c to 90c out of store.

Baled Hay—No. 1 \$8 per ton, in car lots on track here; No. 2, \$6.

Baled Straw—Car lots on track here unchanged at \$6 per ton.

MONTREAL MARKETS.

Montreal, Feb. 13.—Inquiry by cable for Manitoba wheat was very light.

Oats—No. 2, 41c; No. 3, 40c; No. 4, 39c.

Peas—79c f.o.b. per bushel.

Barley—Manitoba No. 3, 47½c; No. 4, 45½c to 46c.

Corn—American mixed, 53c; No. 3 yellow, 53½c ex-track.

Flour—Manitoba spring wheat patents, \$4.60 to \$1.70; strong bakers', \$4.20, winter wheat patents, \$4.25 to \$4.50, straight rollers, \$4 to \$4.10; in bags, \$1.85 to \$1.95; extras, \$1.65 to \$1.75.

Millfeed—Manitoba bran in bags, \$18.50 to \$19; shorts, \$20 per ton; Ontario bran in bulk, \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolled Oats—Per bag, \$2.10 to \$2.20. Cornmeal—\$1.30 to \$1.40 per bag.

Hay—No. 1, \$8.50 to \$9; No. 2, \$7.25 to \$7.50; clover mixed, \$6 to \$6.50, and pure clover, \$6 per ton in car lots.

Cheese—Asking prices were unchanged at 13c to 13½c.

Butter—Prices generally are about steady at 22c to 23c for choice and 21½c to 22c for second quality.

Eggs—Strictly fresh are selling at 24c, selected fat stock at 20c to 21c, and limed at 16c to 17c.

Provisions—Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clear fat back, \$19 to \$20; compound lard, 6½c to 7½c; Canadian pure lard, 11½c to 12c; kettle rendered, 12½c to 13c; hams 12c to 13½c, according to size; bacon, 14½c; fresh killed abattoir dressed hogs, \$10 to \$10.25; country dressed, \$8.75 to \$9.50; alive, \$7.25 to \$7.40; selects and mixed lots.

POSTAL REGULATIONS.

Transparent Envelopes, With Addresses Inside Barred from Mails.

An Ottawa despatch says: The Post-Office Department publishes notices to the effect that all mail matter enclosed in transparent envelopes, having the address on the enclosure, is to be treated as non-transmissible by mail in Canada, and the same regulation applies to matter in envelopes having a transparent front portion covering the address. Attention is drawn to the fact that the stamps used for prepaying postage on post-cards or unenclosed cards mailed to other countries as printed matter must be placed on the front address side. The postal administration of the Commonwealth of Australia has given notice that the rates of postage on post-cards sent from Australia to Canada have been reduced from one and one-half pence to one penny each for single post-cards and from three pence to two pence for reply post-cards, from Jan. 1st. A reduction has been made in the rates of postage on parcels sent from Canada to Dutch Guiana. The rate varies from 36 cents for one pound to \$1.60 for 11 pounds. A convention has been arranged between the postal administrations of Canada and Trinidad for the direct exchange of parcels by parcel post. The limit of weight for a single parcel is seven pounds. Parcel mails for Trinidad are made up at St. John, N. B.

E. B. EDDY DEAD.

Great Manufacturer of Hull Passed Away on Saturday.

An Ottawa despatch says: Mr. E. B. Eddy, President of the E. B. Eddy Company, a pioneer in the manufacture of matches, lumber and paper in this country, and one of the great captains of industry of Canada, is dead. He passed away on Saturday at 1.50 p.m., at his residence, Standish Hall, Hull, after only about a fortnight's illness, from an affection of the stomach. Mr. Eddy's illness was really of several months' standing. He returned from Halifax about a year and a half ago very much out of sorts, and his condition became so alarming that at the time fears were entertained of a fatal termination. However, he rallied considerably, and eventually was about again, much in his customary health. Two weeks ago Thursday was the last time he appeared in his office. Next day he was confined to the house and had to take to his bed.

A GREAT NAVAL SCRUTINY

Coming Manoeuvres of Combined British Fleets.

A London despatch says: In connection with the great naval manoeuvres of the combined British fleets next June, the Admiralty has decided to request the complete co-operation of all British ship-owners. According to the Admiralty's present tentative plans, the manoeuvres will be directed with a view to determining thoroughly a practical scheme of defense of British commerce in time of war, and will include attack and defense of vessels flying the flag of the British mercantile marine.

The manoeuvres will be the most extensive ever attempted and will extend from the English Channel along the coasts of France and Spain to the Mediterranean. Owners of vessels bound to and from Mediterranean and South Atlantic ports will be asked to permit their captains to place themselves under naval command for a short period. Passenger steamers and live stock carriers will be exempt. Any vessel unduly detained will be reimbursed.

A BARBER'S LUCKY FIND.

Discovered Five Forgotten Stock Shares Now Worth a Fortune.

A Syracuse, N. Y. despatch says: In searching a drawer in his barber shop on Thursday Frank Wood discovered a

of the army of Manchuria, who has given details of a meeting held at Har on Dec. 14 last by 400 line and staff officers of the Manchurian army, at which the Czar's manifesto was unanimously endorsed.

At the meeting, which was held by permission of Gen. Linevitch, a resolution was adopted declaring that the Manchurian army was determined to support with all its energy the realization of the reforms outlined by the Emperor.

The officers represented every regiment and corps in Manchuria, and their action was afterwards ratified by the various commands.

Gen. Nadaroff, commander-in-chief of Harbin, was requested to send a copy of the resolution to the Czar.

The officers of the army decided to establish a permanent union for the proposed reforms. Inasmuch as the majority of the so-called "law and order" party in Russia have become openly reactionary, the officers identify themselves with the "progressive" minority.

75,000 POLITICAL PRISONERS

A despatch from Paris says: The St. Petersburg correspondent of the Petit Parisien says it is estimated 75,000 political prisoners are being detained in the various prisons of Russia at the present time.

FIFTEEN REBELS SHOT.

A despatch from Riga, Livonia, says: A punitive expedition has captured a large band of revolutionists on the Dabine estate in the vicinity of Riga. Fifteen of them have been tried by court-martial and shot. The others were flogged with knouts. The expedition also captured several hundred rifles.

ORDER IN TRANSBAIKALIA.

A despatch from St. Petersburg says: Reports from the Baltic provinces say that Governor-General Zolotarev's plan of sweeping the revolutionists and their leaders from the provinces is rapidly approaching completion. The columns of troops commanded by Gen. Orloff, which have gradually closed in on Riga, are driving the Livonian revolutionists before them. The trap will soon be sprung, and the revolutionary chiefs, who are being gathered by the hundreds into Riga, will be captured. The disorders are now chiefly confined to the northern part of Courland and Riga.

Gen. Linevitch, commander of the Manchurian armies, telegraphed to the Emperor on Tuesday as follows:

"Gen. Rennenkampf entered Chita, Transbaikalia, Feb. 5, without bloodshed. The inhabitants of the town have been disarmed and work has been resumed. Two hundred of the revolutionists have been arrested, but a number of the leaders fled. Gen. Holsheinkoff, the military Governor of Chita, has been relieved of his post for inaction. Gen. Rennenkampf reports that the measures taken assure a speedy pacification of Transbaikalia. All is quiet among the troops at Vladivostok and Harbin."

RAIDED MAGAZINES.

The first act of Gen. Mischeuko on his arrival at Vladivostok was to send the mulinous infantry regiment to the railway barracks outside of Vladivostok.

Advices received by the Minister of the Interior supplement Gen. Linevitch's despatch referring to the hestation of order at Chita. These show that the city was in the hands of the revolutionists for three days. The province of Transbaikalia, where the peasants, under the leadership of the revolutionists, rose and raided the Government ammunition magazines and seized 25,000 rifles and much ammunition, is far from pacified. Many of the rifles have been recovered at Chita in a damaged condition. The captured revolutionary leaders were court-martialed and shot. The telegram to the Minister of the Interior added that a famine is threatening Transbaikalia. The supplies of flour are exhausted, and relief measures must be immediately taken.

ELECTION DATE.

A despatch from St. Petersburg says:

rapidly, and before it was got under control the main building, in which were situated the machine, carpenter and paint shops, was completely destroyed. The fire company did heroic work, and the new waterworks system was able to furnish five streams, and it was owing to this that the large warehouses, the moulding shop, the pattern shop, and other buildings were saved. Senator F. T. Frost, manager, and Mr. R. J. White, assistant manager, state that while it is impossible to properly estimate the loss, the insurance carried by the company will fully cover it. The company had most of the output for the coming season's trade stored or shipped to their agencies, and will not be seriously affected by the fire. In the meantime, they will fit up temporary shops, and rush out the balance of this year's goods. The company will rebuild just as soon as the weather permits on a more modern and more extensive scale. About three hundred hands are temporarily out of employment as a result of the fire.

BURGLAR'S BUSINESS BAD.

So He Broke Into Jail and Robbed a Prisoner.

A New York despatch says: A burglar broke into the North Bergen, N. J., jail on Sunday night, held up George Merg, a prisoner, and robbed him of \$1.05. The burglar had forced open a window and climbed into the cell. In the morning, when Jailer Earle visited the cell, Merg made a formal complaint. He said he would not stay in jail any longer if something wasn't done by the town authorities to prevent burglars from breaking in and robbing the prisoners. Chief of Police Nolan was summoned to the Town Hall to hear Merg's story. He got a description of the burglar and ordered his men to search high and low until they found him. Later in the day Frank Meade was ushered into the Town Hall. He was taken into the basement where the jail is and confronted Merg. Merg said, "That's him," and Meade admitted it. The prisoner tried hard to keep his face straight as he was formally charged with breaking into the jail and robbing a man in his cell. He explained that business was dull in his line and he had to do something. Then he laughed some more and the Recorder held him for the grand jury.

GETTING ALONG NICELY.

F. H. Clergue Says Soo Industries are in Prosperous Shape.

A despatch from Toronto says: F. H. Clergue, of Sault Ste. Marie, in the city on his way to New York, called on Wednesday afternoon at the Parliament buildings. He says the industries are exceedingly prosperous and that the net earnings yearly were now more than twice the amount required to meet the interest on the \$10,000,000 bond issue.

The flourishing condition of the works," said Mr. Clergue, "is a matter of gratification to all concerned. The Government will be relieved of its guarantee of the \$2,000,000 loan, part of the amount raised for the reorganization of the company, on May 1, when the term of the guarantee ceases under the act. Arrangements to that end have already been made by the Canadian Improvement Company, which conducted the re-organization."

The Algoma Central, Mr. Clergue says, will be extended north twenty-five miles this year to connect with the C. P. R. The experiments for the Dominion Government in the electrical smelting of ores will be carried on for some time yet since the result has been so highly satisfactory thus far.

BRITAIN'S TRADE.

January Returns Beat All Records in Exports and Imports.

A despatch from London says: The Board of Trade returns for January easily beat all records, with imports roundly \$267,500,000, and exports \$153,000,000. The respective increases are \$28,500,000 and \$28,900,000.

12c to 13c, according to size; bacon, 14c; fresh killed abattoir dressed hogs, \$10 to \$10.25; country dressed, \$9.75 to \$9.50; alive, \$7.25 to \$7.40; selects and mixed lots.

BUFFALO MARKET.

Buffalo, Feb. 13. — Flour — Steady. Wheat—Spring; dull; No. 1 Northern, 91c; carloads in store; Winter, No. 3 hard, 83c in store. Corn—Dull but firm; No. 2 yellow, 47c; No. 2 corn, 46c. Oats—Strong; No. 2 white, 34c to 34c; No. 2 mixed, 33c. Railed—48c to 56c. Rye—Dull; No. 2 in store, 71c to 72c.

NEW YORK MARKET.

New York, Feb. 13. — Wheat — Spot easy; No. 2 red 90c in elevator and 90c f.o.b. afloat; No. 1 Northern Duluth, 95c f.o.b. afloat.

CATTLE MARKET.

The run of cattle offering at the Western Market was again light, and with a risk demand for all lines prices were again firm, everything being sold out early.

Export Cattle—Choice are quoted at \$4.60 to \$5; good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.50 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle—Picked lots, \$4.40 to \$4.60; good to choice, \$4.10 to \$4.40; fair to good, \$3.50 to \$4; common, \$2.50 to \$3; cows, \$2.50 to \$3.75, bulls, \$1.75 to \$2.25, and canners \$1.75 to \$2.50.

Stockers and Feeders—At \$3.60 to \$4; good feeders at \$3.40 to \$3.65; medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75; good stockers run at \$2.80 to \$3.50, rough to common at \$2 to \$2.70, and bulls at \$1.75 to \$2.50.

Milch Cows—The market is quoted unchanged at a range of \$30 to \$60 each. Calves—Quotations are 3c to 7c per lb.

Sheep and Lambs—Sheep were about steady at \$4.50 to \$5 for export ewes and \$3.75 to \$4.25 for bucks and culls. Lambs are firm, at \$6.50 to \$7.10 per cwt. for grain-fed and \$5.50 to \$6.50 for mixed.

Hogs—Unchanged at \$6.50 per cwt. for selects and \$6.25 for lights and fats.

Do., common	2 00	2 25
Do., bulls	2 25	2 40
Feeders	3 50	3 75
Short-keep	3 75	4 15
Milch cows, choice	40 00	55 00
Do., common	28 00	30 00
Sheep, export ewes	4 50	5 00
Do., bucks	3 75	4 00
Do., culls	3 50	3 75
Lambs, grain-fed ewes	6 50	7 10
Do., bucks	5 50	6 50
Hogs, selects	6 50
Do., lights and fats	6 25

CHINA AWAKE TO HER POWER.

She Will no Longer Tolerate Foreign Aggression.

A despatch from Berlin says: In an interview on Friday with a correspondent regarding the reports that the United States is preparing for armed interference in China Lieut.-Gen. Ying Tchang, the Chinese Minister here, said: "The anti-foreign outbreaks in China are evidence of the awakening of a new national spirit. China will no longer tolerate foreign aggressions, and will not allow the Chinese abroad to be treated as an inferior race. At the same time I do not believe that the American preparations are really directed against China, but are meant to serve some other purpose."

"I think the repulsion of united action on the part of the powers against China is impossible in consequence of the political situation. No power is likely to risk the danger of single-handed action. Moreover, China is not in a position to place in the field a modern army of 200,000 men, and this number is steadily increasing. China will now, at least, try to stand up for her rights."

Japan is now able to construct battleships of any size in her own dockyards without auxiliary machinery.

Discovered Five Forgotten Stock Shares Now Worth a Fortune.

A Syracuse, N. Y. despatch says: In searching a drawer in his barber shop on Thursday Frank Wood discovered a certificate for five shares of stock of the Bell Telephone Company, for which he paid \$5 twenty-two years ago, and which is now worth between \$16,000 and \$20,000. The great value of the certificate is due in a measure to the accumulation of dividends. Communicating with Albany, Mr. Wood found that the stock was registered, and was issued by a Boston company.

TEN DOLLAR PIG IRON.

Success of Dr. Heroult's Electric Smelting.

An Ottawa despatch says: As a result of the experiments in the electric smelting of iron ore that Dr. Heroult, the French expert, has been conducting at the Soo, he has ascertained that pig iron can be procured by the electric process from hematite, at less than ten dollars a ton at that point. The significance of this statement can be appreciated from the fact that before the Tariff Commission on Wednesday, a leading iron and steel manufacturer declared that it cost to-day from \$14 to \$15 a ton to produce pig iron by the old process.

WEALTHY WOMAN IN RAGS

Fined for Appearing on Streets in Garments of Tatters.

A London despatch says: For appearing in the streets of Eastbourne clad in rags, Miss Clara Wilkinson, a woman of independent means, was summoned at the Police Court on Thursday. Miss Wilkinson, who is about 60 years of age, appeared in the court attired in old rags stitched together with string. Rags also served as a hat and muff and she carried what was apparently a home-made umbrella. Evidence was given that on Jan. 19 she was wearing a skirt of rags and exposed her bare knees. The chief constable said she had been fined \$5 for a similar offence in November. The magistrate, remarking that she was able to clothe herself properly, fined her \$15.

G. T. R. ROLLING STOCK.

Three and a Half Million Dollars to be Spent.

A Montreal despatch says: In order to be ready for the grain traffic next season, particularly in view of the impossibility experienced last year of finding sufficient equipment to meet the demands of Georgian Bay ports, the Grand Trunk Railway Company have authorized the expenditure of nearly three and a half million dollars in new rolling stock this year. This is an indication of what the company are doing in the great task just now of keeping abreast of the times. The expenditure in this way between now and midsummer will be the largest in the history of the company for any similar period.

RICHEST HEIRESS IN BRITAIN.

Lady Mary Hamilton to Marry the Marquis of Graham.

A despatch from London says: The announcement of the engagement of Marquis of Graham, eldest son of the Duke of Montrose, to Lady Mary Hamilton, the only daughter of the late Twelfth Duke of Hamilton and Brandon, the richest heiress in the United Kingdom, who only attained her majority recently, is given as much space by the newspapers as they would do royalty itself. The engagement is particularly popular in Scotland, because it will result in the union of two great historic houses. Lady Mary, who is known as the Lady of Arran, is the owner of the island of that name. The Marquis of Graham is himself wealthy. He is a keen yachtsman. In the recent elections he stood as the Unionist candidate for the House of Commons for Sirlingshire, but was defeated.

FLASHES FROM THE WIRE

The Very Latest Items From all Parts of the Globe.

CANADA.

London City Council has ordered a census of the city.

Estimates for the Toronto Fire Department this year aggregate \$300,000.

An outbreak of glanders is reported among the horses at Montreal.

The Inland Revenue returns for London for January total \$34,258.04.

The statue to Queen Victoria in Hamilton will be placed in Gore Park.

A strong English syndicate has been formed to develop Nova Scotia gold mines.

Mrs. Eleanor McMillan, mother of the Lieutenant-Governor of Manitoba, is dead.

The militia camps at Ottawa and Kingston next summer will be held from June 18th to 29th.

Calgary customs receipts are better by \$5,000 for this January than they were for January, 1905.

The Grand Trunk will build a fine new hotel at London in connection with the new railway station.

Unorganized territory in Ontario will in future be laid out in townships of ten or twelve instead of six square miles.

Fire destroyed the fifteen thousand dollar school at Emerson, Man., including all the contents of the valuable library.

In January 512 homestead entries were recorded at Regina, as compared with 301 the same month last year.

A mass meeting of citizens of Fort William voted in favor of spending \$250,000 for a water supply from Loch Lomond.

The Government has cancelled the lease of the Blanche River Pulp & Paper Company of water power at La Caver Rapids, on the Ottawa.

Barrie railway depot will be raised, remodelled and enlarged and a big area of cement platform will be laid.

Canadian goods to the value of \$3,224,217 were shipped into the Yukon for the fiscal year ending June 30, 1905.

Portraits in oils of Premier Whitney and Sir John A. Macdonald have been hung at the entrance to the Legislative chamber, Toronto.

Owing to trouble over the local option by-law the Grimsby Council resigned in a body. Arrangements for a new election have been made.

Judge Ouimet, of Montreal, has resigned from the bench owing to recent law that judges must not be directors of corporations.

It is understood that it is not the intention of the Provincial Government to introduce a teachers' pension measure at the coming session of the Legislature.

That extensions of plant are in contemplation by the Lake Superior Corporation, to employ an additional 500 men, is stated by President C. D. Warren.

A thief smashed the plate-glass window of McMillan's jewellery store at Vancouver with a brick, and got away with \$15,000 worth of gems on Saturday.

The Hudson's Bay Company announce their intention to contest action of Ontario Government in seizing large shipment of company's furs at Ottawa recently.

There has been a phenomenal snow-fall at Glacier, B. C., and for some distance east and west on the C. P. R. in the mountains. In some places the fall amounted to nearly 10 feet in depth.

Sir Thos. Shaughnessy announces that a meeting of shareholders of the C. P. R. will be held in Montreal on March 19 to ratify the issue of forty millions of new stock, making the total issue of the company \$150,000,000.

A tract of 30,000 acres of land in the Vermilion district, east of Edmonton, has sold for a price exceeding \$6 an acre. The land was purchased from a railway company three years ago for

REFUSE MINERS' DEMANDS.

Illinois Coal Operators Take Only a Few Minutes to Decide.

A Chicago despatch says: At a meeting of the Illinois coal operators on Friday it was decided by unanimous vote to refuse the demands made by the United Mine Workers of America. The meeting was attended by 200 coal operators from all parts of the State. The report of the National Scale Committee was read and approved without a dissenting vote. The report covered the conference recently held in Indianapolis between the coal operators and the representatives of the United Mine Workers. The decision to refuse the demands of the miners was reached in a few minutes after the reading of the report had been finished. The question of whether or not the mines would be operated with non-union men in the event of a strike on April 1, was not discussed.

In Illinois there are 55,000 soft coal miners who will be involved in case of a general walk-out, after a wage-scale disagreement. Millions of tons of coal are on hand for the emergency, but the miners admit that the situation is such that industrial trouble will follow within a few months if the strike is ordered.

BUILDING UP THE WEST.

Thirty-two Million Dollars in Sight This Year.

A Winnipeg despatch says: That not only Winnipeg, but the whole of western Canada will show general prosperity during the coming season is exemplified by the Western Builders' Gazette. In the current issue a complete list of over \$15,000,000 worth of contemplated buildings is recorded in Winnipeg alone. Besides this there are \$10,000,000 worth of contracts open throughout the three Provinces, as well as \$7,500,000 in railroad contracts, making a grand total of \$32,500,000 to be expended in construction work at present assured.

ANGLO-FRENCH ENTETE.

Loubet's Views Expressed to London County Council.

A Paris despatch says: President Loubet on Wednesday received at the Elysee Palace the visiting members of the London County Council. He said the efforts of King Edward and himself had always been to cement the entente cordiale between France and her powerful ally, Great Britain. He would continue his efforts in the interests of peace, concord and humanity. He proposed the health of King Edward and Queen Alexandra, and wished unbounded prosperity to the great, glorious and noble British nation.

BLOWN THROUGH THE ROOF

Man Escapes Uninjured After Terrible Experience.

A Geneva, Switzerland, despatch says: A man employed at an embroidery factory at Wil, near St. Gall, was blown through the roof on Thursday by a terrific explosion of acetylene gas. He alighted on a part of the roof which was not injured by the explosion and was found sitting there in a dazed condition by his rescuers. Otherwise he was not hurt. The explosion demolished half the factory and blew a stone staircase out into the street. The windows of neighboring houses were broken. The work-people were away at dinner.

FROZEN TO DEATH.

Terrible Fate of a Settler Near Saskatoon.

A Saskatoon, Sask., despatch says: John H. Humphrey, a settler, living forty miles north of here, was frozen to death on Saturday morning. He was going

BOXER RISING IS FEARED

Warning Issued That a Massacre Is Planned for Feb. 25.

A despatch from London says: Private information from diplomatic sources from Pekin indicates that the gravest view is taken of the situation in China. The present agitation is declared to be a formidable Boxer rising under another name and of far more serious proportions than the one of five years ago.

GREAT MASSACRE IMPENDING.

A despatch from Cincinnati says: Wong Fong, former secretary of the six Companies in San Francisco, who is visiting in this city on Sunday said that he thought the Boxer trouble is about to culminate in the greatest massacre of modern times.

He issued the following warning to several American friends on Sunday night, telegraphing it to Seattle, Los Angeles and San Francisco:—

"The blow is about to fall. Cable warnings to friends to leave China at once. Tell them to seek protection of Germany temporarily and to get out of the country before Feb. 24."

Fong is visiting Ah Loo Wai, the wealthiest of the local Chinese colony, and after the messages were sent explained their purport as follows:—

"I received word on Sunday morning that the order had been sent out to the subordinate circles of the Chinese Reform Association to throw off all the foreign elements in our country, starting Feb. 25.

"The association is ostensibly patriotic."

"PRINCE RUPERT" IS THE NAME.

Selected for Terminal of Grand Trunk Pacific.

A despatch from Montreal says: As a result of the publication by the Grand Trunk Pacific Company throughout Canada of its offer of a prize of \$250 to the person who would suggest the name that would be selected for the city which will be established at the western terminus of the company's transcontinental railway on the Pacific Coast, upwards of twelve thousand names were received, the majority of which complied with the conditions of the contest. It was the desire of the company, as explained in the notice of the competition, that the name chosen should be euphonious, and that it would be approximately significant of Canada, and more particularly of the Northwest and British Columbia, in the future development of which the railway is to take so large a part. With this end in view, therefore, the suggestions submitted have been carefully reviewed and the name "Prince Rupert" has been selected as the name by which will be known the city that will be built at the terminus of the company's new railway on the Pacific Ocean, the name having been suggested by Miss Eleanor M. Macdonald, of Winnipeg.

THREW THE BABY OUT.

Mr. and Mrs. Schwerdfeger Burned to Death.

despatch from Glenboro, Man., says: Mr. and Mrs. Schwerdfeger, living about ten miles north of Glenboro, were burned to death on Thursday night, and a young Englishman about eighteen years of age managed to get out with only his shirt on. Mrs. Schwerdfeger, with great presence of mind, threw their only child, about two years of age, out of the window, and was in the act of getting out herself, when the floor gave way and she and her husband went

VICEROY BLAMED.

A despatch from Canton to Hong Kong states that the anti-foreign feeling there is considered to be due to the passive attitude of the Viceroy in connection with the representations made by the Consular body regarding the recent attacks on missions. It is stated that the Viceroy is determined to create friction with the United States.

A leaflet has been widely circulated in the city of Canton urging the people to co-operate with a view to the expulsion of the Viceroy.

"ASIA FOR ASIATICS."

A despatch from San Francisco says: "Asia for Asiatics." This, says William W. Carmichael, a Shanghai merchant, just arrived here, is the cry that has been taken up in China and spread like wild-fire from province to province, kindling everywhere the slumbering hatred of the Mongolian against all foreigners. The spirit of revolt is rife in the land, young China is rising, and in his opinion trouble is bound to come. He says that the only way to gain the respect of the Chinese is to inspire them with a wholesome fear of foreigners. He adds that the few regiments stationed at Manila will be entirely inadequate to cope with the trouble in case it comes. "It is impossible," he says, "to deal with the Chinese with diplomacy. The only thing to do is to seize their territory, as Germany did in 1899, and thus bring them to their senses."

ON THE FARM.

METHODS IN SPRAYING.

We spray trees for a specific purpose, going over all that part of the orchard where San Jose scale appears, using 30 pounds lime, 20 pounds sulphur and 15 pounds salt in 60 gallons water, writes Edward Van Aalstine. Slake the lime with hot water, when it is boiling freely add the sulphur, previously wetting with hot water; then dilute to 20 or 25 gallons, add the salt and then boil for at least half an hour, add balance of water, stir thoroughly, then apply. I use a steam pipe running from my dairy boiler to do the cooking.

We spray for apple and pear scab just as the leaves begin to start. The trees that were sprayed for scale are skipped at this spraying; use Bordeaux. Put in a sack suspended in the top of a barrel all the vitriol the water will take up. This means each gallon of water will hold three pounds vitriol. We then put in the bottom of the tank two gallons of this water (six pounds vitriol), for each 50 gallons of the mixture. Fill the tank nearly full of water. Don't agitate any. Then put in the water slaked lime. Stir thoroughly. Test by putting in a drop of yellow prussiate of potash, five cents' worth in a pint of water will do a season's testing. If there is not lime enough, a brown spot will appear on top of the mixture. Add more lime until there is no danger.

To catch young tent caterpillars, bud moths and other insects appearing, we use a poison (arsenite of soda) one pound white arsenic, four pounds sal soda in four quarts water. Boil half an hour. Use one quart to each fifty gallons of the mixture, adding a little at a

FROZEN TO DEATH.

March 19 to ratify the issue of forty millions of new stock, making the total issue of the company \$150,000,000.

A tract of 30,000 acres of land in the Vermilion district, east of Edmonton, has sold for a price exceeding \$6 an acre. The land was purchased from a railway company three years ago for less than half this price.

It is reported at Montreal that the United States Steel Corporation have secured a controlling interest in the stock of the Dominion Wire Manufacturing Co., and will endeavor to control other large iron industries in the Dominion.

The Inland Revenue Department has analyzed 108 samples of salad oils, and finds 66 samples of genuine olive oil, 2 doubtful samples, 24 samples of cotton seed oil sold as salad oil, and 16 samples of cotton seed oil sold as olive oil.

GREAT BRITAIN.

On Saturday King Edward launched the great battleship Dreadnought, the largest in the world. It will join the Atlantic fleet within a year.

At the coming manoeuvres of the combined British fleets next June the complete co-operation of all British shipowners will be requested with a view to determining a practical scheme of defence of British commerce in time of war.

In consequence of the Anglo-Japanese alliance, the British Admiralty will in March test how long it will take to transport men to British Columbia from England. Some 10,000 sailors and marines will then be transported from Halifax to Vancouver in special C. P. R. trains.

The engagement of Lady Palmer, daughter of Earl Selborne, to Viscount Howick, son of Earl Grey, is announced.

It is announced that one subject to be discussed at a meeting of the Postal Union in April in London will be a proposal to enable the sender of a letter to prepay its reply.

UNITED STATES.

Ten thousand coal and iron miners in the region of Punxsutawney, Pa., have gone on strike.

The Erie Railroad announces that within two years probably all its suburban lines will be converted into electric roads. Its engineers are studying the project.

It is expected that before the adjournment of the Executive Board of the Mine Workers of America at Indianapolis, a formal strike order for April 1 will be prepared, to prevent re-assembling for that purpose.

The Torrey-Alexander revival services have started at Philadelphia and the halls are crowded. Mr. Alexander has a choir of 6,000 voices to choose from, and has 600 singers at each meeting. The expenses are expected to be \$50,000, popularly subscribed.

Mrs. Drusilla Morrell, 102 years old, of Brooklyn, N. Y., has become a member of the Simpson Methodist Episcopal church. She has always been interested in church work. "Only recently I began to wonder why I was not a member," she said.

Prof. Wiley, chief of the Bureau of Chemistry, examined a lamb chop sent to his house, because of its fine appearance. He appeared before the House and said meat other than lamb had been pressed about the lamb bone, making the fraud difficult to detect.

GENERAL.

German bankers are said to have agreed to take ten million pounds of Russian treasury notes.

The elections to the National Assembly in Russia are fixed for April 7. The opening session will take place on April 28.

The bill for the continuation of war taxes has passed the House of Representatives at Tokio, Japan, by a majority of 97.

Capt. Ejmar Mikkelsen is organizing an Arctic expedition to discover a new continent, which he declares lies between the Parry Islands and Wrangel Island.

Since Germany will not recede from her assumption that she has a position of perfect equality with France in Morocco a rupture in the conference appears inevitable.

Terrible Fate of a Settler Near Saskatoon.

A Saskatoon, Sask., despatch says: John H. Humphrey, a settler, living forty miles north of here, was frozen to death on Saturday morning. He was going home with a load of wood when the sleigh upset, and he was pinned between the load and a tree, where he slowly met his horrible fate. A searching party found the body, frozen stiff. He leaves a wife and three small children.

HURLED DOWN A BANK.

John Lef Killed Near Ostersund on the C. P. R.

A Kewatin despatch says: Another fatal accident occurred in Peterson's construction camp on the C. P. R. near Ostersund on Friday morning, in which a Swede named John Lef was instantly killed by the premature explosion of a blasting shot. He was hurled down a 35-foot embankment, sustaining injuries in falling that caused his death. Allen Hagar who was standing beside him, was thrown down the bank also, but escaped unhurt.

500 STEEL GONDOLAS.

Canadian Pacific Awards Contract to Car Works at Montreal.

A Montreal despatch says: The Canadian Pacific Railway Company on Friday awarded a contract to the Dominion Steel Car Company, whose works are located here, for the construction of 500 steel drop bottom gondolas. The cars are to be completed this summer, and will cost approximately \$750,000. They will be the first steel cars to be constructed in Canada.

FIXED FOR JUNE 2.

Marriage Date of King Alfonso and Princess Ena.

A Madrid despatch says: It has been settled that the marriage of King Alfonso and Princess Ena of Battenberg will take place June 2. The marriage will be in the Church of San Feronimo.

KING CHRISTIAN'S FUNERAL

Kaiser Will Spend Twenty-Four Hours in Copenhagen.

A Copenhagen despatch says: The Kaiser will arrive on the evening of Feb. 17 for the funeral of King Christian, and will probably leave on the evening of the next day.

BIGGER NORTH SEA FLEET.

Mediterranean and Atlantic Squadrons to Be Depleted.

A despatch from Malta says: After the naval manoeuvres four battleships and four armored cruisers will be withdrawn from the British Mediterranean fleet and stationed in the North Sea. Thenceforth the Mediterranean fleet will be commanded by a vice-admiral instead of an admiral. It is reported that Lord Beresford, the present commander of the fleet, will consequently resign. Four battleships will also be withdrawn from the Atlantic fleet for service in the North Sea.

This sudden decision of the Admiralty entails heavy losses upon officers here, who are breaking up their establishments and sending their families home. It also abruptly closes the Malta season. The hotelkeepers and others are grumbling. There will be only four battleships left in the Mediterranean fleet and four in the Atlantic fleet, but since the entente with France there is no motive in keeping two enormous fleets in southern European waters.

The reduction is the first step in the naval evacuation of the Mediterranean. It is believed that the French fleet will also be sent north. The redistribution will place 25 British battleships and ten armored cruisers in the English Channel and the North Sea.

and a young Englishman about eighteen years of age managed to get out with only his shirt on. Mrs. Schwerdfefer, with great presence of mind, threw their only child, about two years of age, out of the window, and was in the act of getting out herself, when the floor gave way and she and her husband went down to their awful death. Seeing that nothing could be done, the young Englishman took the baby and wrapped it in a horse blanket, and placed it in the horse manger, while he rode nearly a mile without any clothing to Mr. Wiggell's, the nearest neighbor. The young fellow was badly frozen, although his hands are burned. Mr. Wiggell drove into town and took out Coroner Reeve and a Provincial constable, who removed the remains from the cellar.

NATAL NATIVES MURDER POLICE.

Armed Resistance to Collection of Poll Tax.

A despatch from Pietermaritzburg, Natal, says: The collection of the poll tax from natives near Richmond has led to trouble, which, it is feared, will spread, and possibly develop into an ugly native uprising. Armed natives have resisted the collection of taxes, and have wounded with spears an inspector of police and a trooper. Fourteen mounted police who were proceeding to the scene have been attacked, and six were stabbed to death. Cavalry and artillery and outlying detachments of police have been called in and are being concentrated to deal with the recalcitrant natives. Martial law has been declared. It is reported that the natives are determined to resist the collection of the poll tax.

OUR PRODUCE IN BRITAIN.

Amounts and Values of Goods Received in British Markets.

A despatch from London says: Following are the amounts and value of Canadian products on British markets during January:

	Amounts.	Value.
Cattle	8,008	£138,952
Sheep	1,054	1,669
Wheat, cwt.	757,100	283,943
Wheat, flour, cwt. .	191,300	97,414
Peas, cwt.	12,470	4,787
Bacon, cwt.	86,431	213,671
Ham, cwt.	8,222	18,851
Butter, cwt.	3,434	18,007
Cheese, cwt.	108,802	324,420
Eggs, gt. hundreds .	3,000	1,342
Horses	37	1,700

ABSINTHE KILLS THOUSANDS.

French Trade Unions Petition for Law Prohibiting Its Sale.

A despatch from Paris says: The trade unions of France, especially of Paris, aided by the leading members of the Left Deputies, are getting up a national petition for the prohibition of the manufacture and sale of absinthe. The petition will be signed by a large number of prominent members of the Academy of Medicine. The petitioners point out that absinthe kills tens of thousands of people annually. More of it is consumed in France than in the rest of the world put together, and it is causing epilepsy tuberculosis madness and crime.

LOOTED THE MISSIONS.

All the Occupants but One Englishman Escaped.

A despatch from Shanghai says: The South China Post's correspondent at Amoy wires that a well-armed band of revolutionists looted and destroyed the mission premises at Changpu, near Amoy. The missionaries escaped, excepting Rev. Mr. Oldham, an English Presbyterian, who is hiding in the Yamen. The revolutionists are marching toward Changchoofo, the port of Amoy, a large city 36 miles to the south-west of Amoy.

German newspapers have adopted a somewhat altered tone respecting the Moroccan conference. Germany's desire to avoid a rupture with France seems undeniable.

more time until there is no danger.

To catch young tent caterpillars, bud moths and other insects appearing, we use a poison (arsenite of soda) one pound white arsenic, four pounds sal soda in four quarts water. Boil half an hour. Use one quart to each fifty gallons of the mixture, adding a little at a time. As soon as the blossoms fall, spray for the codling moth. Use the same mixture as before. The bordeaux will protect new growth.

I find in ordinary seasons on trees that scab and insects have kept out of that two sprayings are enough. If the weather is favorable for the spread of apple scab, or insects are abundant, I have and would use the same mixture again when the fruit was the size of hickory nuts. I use enough to thoroughly cover the tree. I have a large, double cylinder pump, man power, a 250-gallon tank with a 6-foot tower on top with one man on top of the tank or tower and another on the ground. Three men and a team will put out in ten hours from 750 to 1,000 gallons. Time is saved by having a 4-inch pipe running from a large tank over the cow stable. Under this we back the spraying wagon and fill 250 gallons in five minutes. On the whole this has given good satisfaction. The spray should be put out in a fine mist. Human muscles get tired, machinery is costly and often gets out of order. If the gas power sprayer proves durable, I am looking to it for an improvement.

BREEDING POULTRY.

It is always essential to have a clear idea of what is wanted when breeding or ordering poultry. In one's own yard a desired end is easily attained by eliminating from the flock birds which lack qualities sought and to bring together those that most nearly approach a given ideal, be this egg or meat production or show points. But many who desire to improve their flocks by the introduction of new blood have been disappointed in the birds reared from eggs purchased from breeders.

This mistake usually arises from overlooking the difference between show and utility strains of the same breed. Birds bred for one purpose are almost invariably inferior for the other and this with no blame attached to the breeder. It is his point of view or idea which does not coincide with that of the purchaser. Most of our readers raise poultry for eggs or meat, or both, a fact recognized by our poultry advertisers. But even so, it will always be safe in writing to determine as nearly as possible how the advertisers' ideas of poultry breeding approach one's own and thus narrow down as nearly to the right birds as possible. It must be recognized also that while the general purpose fowl is a universal desire, yet it has not been secured. By trying to combine show points, egg laying and meat qualities in the one bird an aspirant is almost sure to be disappointed in each direction. Upon this matter J. H. Drevensdick, the well-known poultry judge and ardent fancier, says:

As to picking out the highest scoring bird as the best layer, I have but one answer: "Don't do it." Nine times out of ten she may prove a poor layer. Exhibition birds are forced for show, not for eggs; and it takes considerable time to get them back into breeding condition. Birds intended for laying eggs and breeding purposes on a large scale, should never enter the show room. Another point is that the highest scoring fowl, if carefully and scientifically bred, is apt to be bred in-and-in for points only.

28 KILLED IN MINE.

Only Eleven Escaped Results of Explosion in Coal Pit.

A despatch from Charleston, W. Va., says: At least 28 men men are supposed to have met death in a terrible explosion in the Parallel mine of the Stewart Collieries Company, near Oakhill, on Thursday. Thirty-nine men were employed in the mine, and only eleven have escaped alive. At midnight six bodies had been recovered near the mouth of the mine, and it is certain that all the others in the mine are dead.

CANADIAN WHEAT BELT

RAPID IMMIGRATION IS NOW FILLING IT UP.

Saskatchewan Promises to be Not Only Populous, but Rich in Productions.

Regina is the capital of the brand-new province of Saskatchewan, writes Frank G. Carpenter from Regina, Saskatchewan, to the Chicago Record-Herald. Until last September all the land between Manitoba and British Columbia, a distance of a thousand miles, and between the boundary of the United States and the Arctic Ocean belonged to the Northwest Territory. It had minor subdivisions, but the country as a whole was governed by territorial officials who lived here at Regina. As the flood of immigrants began to spread over the country the people of the wheat belt concluded they wanted more than a territorial government. They agitated the matter, brought it before the Canadian Parliament and the result is the two new provinces of Saskatchewan and Alberta. There were seven provinces in Canada up to last September. There are now nine, and the two latest additions promise to be the most populous of the whole.

Saskatchewan and Alberta begin on the edge of the United States and run northward 600 or 700 miles. They are about as long as from New York to Wilmington, and are wider than from Philadelphia to Pittsburg. They are about the same size. Saskatchewan lacks only a few thousand square miles of being as big as Texas. It is more than four times the size of Massachusetts, twenty times as big as Maryland, more than six times as big as Ohio and bigger than any country of Europe with the exception of Russia and Austria-Hungary. The upper parts of it is covered with timber, but it has 150,000 square miles of prairie, adapted to ranching and farming. It has some of the best of the wheat belt, which will grow the hard flinty grain, so prized by millers for the whole over, and known as "No. 1 hard."

LANDS ARE WELL WATERED.

I have talked with many of the citizens as to the character of Saskatchewan. John A. Reid, one of the provincial officials, who has travelled all over it tells me that the country is flat. For miles north of the American boundary it is a great plain with no hills to be seen in any direct ion. Farther north the country is rolling and still farther north are patches of forest, which finally end in a strip of dense woods running across the province from east to west.

The province is well watered, except at the southwest. The Saskatchewan River, which has many branches, runs through it, and the soil is such that water can be had almost anywhere in it. In the far north Saskatchewan is made up of a series of lakes, surrounded by timber, and there are lakes in the central and southern portions.

The country has one strip of semi-arid land. This begins with the boundary of the United States and running northward in an irregular curve which includes the most of southern Alberta. This land is now used for ranching. Scores of American cattle owners are there, and cattle are often driven across the boundary from Montana and other States. Some are brought from Texas to be fattened, and there is a large ranching industry in that region, the greater part of which belongs to Americans.

Right here at Regina are some of the best wheat lands of Canada. All the country southward to North Dakota and east to Manitoba is taken up by wheat farmers, a majority of the lands belonging to the United States citizens. That section is cut up by many railroads and it is about as well settled as Dakota itself. Running northward from Regina, the wheat country extends for hundreds of miles. Almost directly north is Prince Albert, which is now reached by two

packed. This has been their condition for the past two or three years, and in the spring and summer it is not uncommon to find the halls filled with coats. As it is, I have to sleep in a room with two beds, and my companion snores so that he shakes the door open night after night. The landlords are sometimes insolent. If you complain they will tell you to go elsewhere, and they know very well there is no elsewhere. All the hotels are full. This is so throughout the new Canada. It is necessary during the summer season to telegraph ahead to get quarters, and one must be content to rough it. The hotel rates are about the same as in the United States, or, if anything, a little cheaper. Outside Winnipeg and Montreal the ordinary rates are from \$2 to \$4 a day for room and board, but the \$2 a day should include a private bath. Very few of the country hotels have baths, and they are not so well managed as our hotels.

Almost every hotel in Canada has a saloon attached to it. According to the law liquor cannot be sold outside hotels, and the result is the hotel and bar go together. This raises the standard of the bar, but it lowers that of the hotel. There is considerable drinking between meals.

I like the hotel waiters. The swallow-tailed negro, with his hungry eye and itching palm has not yet crossed the international border, and the fee-demanding white waiter is absent. The service of the dining-room is through comely girls who do their business rapidly and well.

I find these new Canadian towns decidedly in favor of municipal ownership. Regina owns its electric light plant and it has a good system of street lighting. Two years ago the light was furnished by a private company, which gave a poor service at high rates. The city has reduced the rates, and it is already making money. The reduction has been more than twenty per cent. The waterworks are also owned by the municipality, which is now building a dam across Boggy Creek to furnish water and power. The dam is seven miles away and ninety feet above the level of the city streets. The pressure of the pipes will be such as to furnish

PROTECTION AGAINST FIRE.

and it may be that the water will also generate the electricity.

Regina has now just under 10,000 people. It will probably continue as the capital of the new territory, and it may some day grow to a city of 50,000. It is dependent largely upon its agricultural surroundings, and it will never have the possibilities of places like Edmonton or Calgary, which are destined to be big cities.

As it is now the people have discounted the future. Property is everywhere high and the surrounding country is raising a big crop of "For Sale" signs. The real estate agent is ubiquitous. I met one as I stepped from the car, and another accosted me on the way to my hotel. He asked if I were not interested in real estate and straightway offered me many choice lands. As he did so a Canadian friend who is travelling with me, said: "My friend you need not try to sell land to us. We are in the same business that you are. We are looking for suckers ourselves."

Thereupon the agent's face fell, and with an angry glance out of the tail of his eye he strode away.

Leaving Regina, let us take a flying leap to some of the growing towns of central Saskatchewan. First, look at Prince Albert, on the banks of the Saskatchewan River, more than 300 miles north of the American boundary. The place was a Hudson's Bay post from which the fur lands of the north were supplied. It was a great trading centre, and to-day something like a quarter of a million dollars' worth of furs are brought there every year. The town is a lumber market, and it also is surrounded by wheat fields. It has two railroads and there are ships on the Saskatchewan which give it considerable river trade. I am told coal has been found near by, and the scientists say that the Coal Fall Rapids will give an enormous water power which will lead to the establishment of wood pulp and

THE BRITISH ELECTIONS

SOME HUMOROUS INCIDENTS IN THE GREAT BATTLE.

Quips and Jests Which Varied the Personal and Political Amenities at the Polls.

The Old Country papers to hand by the latest mails contain many humorous incidents, which served to modify the political heat with which the great battle was fought. Herewith are a few of them:

While Mr. Walter Long was referring, in a speech at Bristol, to German bread, a member of the audience produced a piece and tossed it to the platform, where the ex-Chief Secretary for Ireland effected a neat catch.

"If I had a gun I would shoot you; you are a traitor to Ireland, and a disgrace to the King's uniform," howled an enraged Irishman at a meeting at Woolwich, addressed by Major Adams, the Unionist candidate, who is an Irishman.

At one of Mr. Lloyd-George's meetings in Carnarvon Boroughs, according to the Liverpool Post, a heckler, with the view of disparaging the origin of the President of the Board of Trade, asked him if he remembered that his grandfather drove a donkey and cart. "You will have to forgive me, ladies and gentlemen," was the witty reply; "the cart has quite escaped my memory. I see the donkey is still alive."

A population greater than that of many Irish towns dwells within the walls of the South Dublin Workhouse. At a meeting of the guardians a member, calling attention to the fact, suggested that the number of the inmates was now large enough to entitle them to send a representative to the House of Commons.

It has been claimed that Sir Charles Dilke's election address was the shortest issued within recent years. This, however, is not the case. It will be remembered that Sir Elliott Lees, while in South Africa in 1900, went to the elections on these words—"My address, Pretoria."

At a Tariff Reform meeting in East Anglia the candidate was asked by a burly smith's striker: "I swing a sledgehammer six days a week for 17s. Do you call that a fair wage?" "No," answered the candidate. "Will your policy give you a better wage?" "Yes," was the reply. "Then you'll have to get rid of that devil in the chair, 'cos he's the man as pays me!"

Mr. Herbert Whitely, Liberal candidate for Ashlon-under-Lyne, was addressing a meeting of miners at a pit's mouth, when one of the men exclaimed, "It's all very fine for you to speak at the pit's mouth, but you dare not go below!" Mr. Whitely at once accepted the challenge, and in a few minutes was in the workings.

Lord Edmund Talbot, Unionist candidate for Chichester, who was confined to bed by illness, spoke his political convictions into a gramophone. Lady Edmund then made a motor-car tour of the constituency, and carried the precious record to the various meetings.

One Lancashire candidate was paid a rather mixed compliment. He was paying a second visit to the house of a doubtful voter. He scarcely expected to win him over, and consequently he was very pleased, though somewhat surprised, on hearing from the elector that he would support him. "Glad to hear it," said the candidate. "I thought you were against me." "Shure, I was at first," said the free and independent voter. "When the other day ye called here and stood by that pig-stye and talked for half an hour, ye didn't budge me an inch; but after ye had gone away, sir, I got to thinking how ye'd reached your hand over the rail and scratched the pig's back till he lay down with pleasure of it. I made up my mind that that whin a man was so sociable as that wid a poor fellowcatcher I wasn't the bhoys to vote agin him."

Two canvassers in Liverpool have had an amazing, if somewhat grim, experience. Calling at a house on their route

interrupted in the middle of his argument by a man who rose in the body of the hall, flourishing a pan loaf on the end of a walking-stick, and cried, amidst laughter and cheers, "Answer this."

At a meeting in the Dorset division a speaker said "I am pleased to see before me some men who have laid down their lives for their country."

Canvassing an artisan district of Sunderland, a lady, after chattering pleasantly with a housewife, turned her attention to the three little ones. "What sweet little darlings," she exclaimed, kissing each in turn, and then glancing toward a man seated by the kitchen fire, she added, "And how like their father!" But unfortunately for her, he was the lodger. She left without the promise of a vote.

At a Tory meeting in the Spalding division, the chairman, in relating his canvassing experiences, said he called at a house, and saw the voter's wife. He inquired as to the politics of her husband. "Well," she replied, "when he goes to a Liberal meeting he is a Liberal, and when he goes to a Tory meeting he is a Tory." "But," queried the canvasser, "what is he when he is at home?" And the lady gave the unexpected reply, "When he is at home he is a nuisance."

At a Tory meeting at Whitchurch, a speaker, annoyed at a chorus of rejoinders shouted from the audience, exclaimed, "One fool at a time!" "Go on, boss!" was the response from one of the opponents.

"I doubt very much whether any man in England ought to have two places to live in at the same time," declared the Duke of Northumberland to an Isleworth audience.

Rats were let loose in a hall at Peterborough where a Liberal meeting was being held. Some fainting people were carried out, several disturbers were lifted bodily over the heads of the audience and expelled them from the hall.

Mr. Samuel Chapman, Unionist candidate for Perth, endured some lively heckling. At one meeting an old man came forward and, deliberately laying down his coat and stick, handed up several questions. Mr. Chapman replied to the first, but the old Scotsman, gesticulating wildly, exclaimed, "I canna hear, I'm deaf." The heckler, pulling an ear trumpet from his pocket, applied it to his ear, and the candidate shouldered his replies into the instrument.

PERSONAL POINTERS.

Interesting Gossip About Some Prominent People.

President Roosevelt has on several occasions occupied the pulpit as a lay preacher.

Mme. Nordica, like many grand opera singers who are fond of some special dish or drink and enjoy preparing it themselves, always carries about with her a machine for making Vienna coffee, and often treats her friends to a cup of this delicious beverage.

One of the few pleasures to which Mr. John Morley owns is music, and he is passionately fond of going to concerts. Mr. Morley is also partial to cats, and can seldom resist the temptation to stroke and pat any stray kitten that happens to cross his path.

It is a curious circumstance that, although the Victoria Cross is the most coveted distinction that a soldier can hope to achieve, it has nevertheless twice been won by brothers. General Sir Hugh Gough, V. C., is a year older than his equally distinguished brother, General Sir Charles Gough, V. C. It was in India that the Goughs earned all their laurels.

The late Professor R. B. Copeland, Astronomer-Royal for Scotland, began his astronomical studies with a small telescope while sheep-farming in Australia. He subsequently became an assistant at Gottingen Observatory, and mainly to his patient labors we owe the 1st Gottingen Star Catalogue, which contains the places of 3,000 stars in the region of the sky two degrees south of the Equator.

The new Earl Cathcart has two well-known characteristics—the first an extraordinary fondness for London, and

This section is cut up by many railroads and it is about as well settled as Dakota itself. Running northward from Regina, the wheat country extends for hundreds of miles. Almost directly north is Prince Albert, which is now reached by two railroads, with settlements all along the way. The distance between the two places as the crow flies, is over 200 miles. Prince Albert being about 330 miles directly north of the American boundary. More than a hundred miles east of that line is Battleford, on the Saskatchewan River, a town which is now reached by the Canadian Northern Railroad, and through which the Grand Trunk Pacific is to go. This is another wheat centre.

REGINA IN WHEAT FIELDS.

In fact the grain growers are settling here and there all over the central and the eastern parts of the province. The land about Regina is black loam from ten to twenty feet deep in places. In other parts of the province it varies so that there is much choice in locations. The surveyor general of Canada, who has made a careful study of the province, estimates that Saskatchewan contains something like 55,000,000 acres of wheat lands, and that there is also a region about as big as Indiana, which might be irrigated. The wheat lands are more than twice the size of the State of Ohio.

I wish I could show you this new capital of Saskatchewan. Regina is a ragged town of ragged houses, situated on a ragged plain, spotted with wheat fields which now look decidedly ragged. The town has ungainly houses and wide streets with board sidewalks, which run far out into the country. One of the streets is two miles long, extending to the mounted police barracks and the government house. The enthusiastic Regina men speak of those places as a part of the city and the bare prairie between as town lots.

The chief business street runs parallel with the railroad. It has only one side, the stores facing the track. Near the depot are numerous elevators, large wooden buildings which tower over the city, visible for miles. Regina calls itself a wheat city, and these elevators are its landmarks. There are a dozen of them in the town proper, and in the wheat district adjoining, 170, having a combined capacity of 6,000,000 bushels. It took me some time to find the offices of the new province. Saskatchewan is not old enough to have a statehouse or a parliament building. The government is now run in rooms in the second stories of the various buildings throughout the town. The most of the provincial business is done above the Bank of Commerce, a little yellow brick structure with retail stores on the ground floor and government offices above.

The new province already has its different bureaus, and it is rapidly acquiring a good-sized civil service. I spent some time in the agricultural department, and learned that a government farm is in existence near Indian Head where all sorts of experiments as to grains and vegetables are being made with a view of developing the province. The new state has its wood inspectors who go over the country and warn people to cut down their woods. If they do not obey the government will destroy them and the men refusing will be prosecuted and fined. Laws are already being enacted as to clean roads and the state is protecting the farmers in every possible way.

I talked with one of the members of the agricultural department as to the wheat yield of Saskatchewan. He said: "Many of the figures published are extravagant. We know through the threshers' returns just what we get out of the soil, and while we have many farms which yield twenty bushels of wheat and upward per acre, there are very few which yield more than thirty. There may be a patch now and then which will turn out forty bushels, but when it comes to a hundred acres or a thousand acres giving any such yield you must take the statement with considerable salt."

HOTELS ALWAYS CROWDED.

I arrived at Regina to find the hotels

river trade. I am told coal has been found near by, and the scientists say that the Coal Fall Rapids will give an enormous water power which will lead to the establishment of wood mills and other industries. Prince Albert has already an electric light plant which is owned and operated by the municipality, and it is now running in sewers.

ON THE SASKATCHEWAN RIVER.

I talked with Captain Hall of the Hudson Bay Company about the navigability of the Saskatchewan. Said he: "The river is almost as big as the Mississippi and in some places as deep. With a little money it could be made a water highway, which would bring the wheat down to Lake Winnipeg. The chief obstruction now is in some rapids, near the mouth of the river, about three miles from the lake. A canal or wing could be built about these rapids, and by dredging a few shoals along the river 120 miles or more of navigation could be opened up. As it is now, the Saskatchewan will not carry boats which have more than two or three feet of water. I sailed up it for 1,000 miles last year on a boat 100 feet long, which drew twenty-six inches, coming from Edmonton to Prince Albert. I was carrying goods for the Hudson Bay Company, and made the trip very both ways."

SOUTH AFRICAN GHOST.

Awful Spectre that Haunts a House in Durban.

A curious ghost story comes from Durban, a spectre, it is said, haunting a house in a village which was occupied by a lawyer who died about four months ago.

The house was taken by a gentleman who, after seeing "an unearthly shape cross the garden and disappear," invited some friends to stay with him.

The result was that two of them rushed to the Central hotel with the story that a ghost had passed through closed doors and windows, and that a light had been seen in the study used by the previous tenant.

A party of eight decided to play a game of cards in the house. Suddenly one of the players started up with the cry, "What is that?" Looking in the direction in which he was staring, the others saw a horrible looking head protruding through the doorway. The head was like that of a skeleton.

It disappeared. The party went to the door and into an adjoining room, but the spectre was vanished.

The affair, says the Bloemfontein Post, is causing great excitement in the village, but the skeptical believe it to be the work of some practical joker and stens are being taken to lay the ghost by a party armed with revolvers.

COWBOYS CATCH LOCOMOTIVE.

A Casner, Wyoming, correspondent of the Technical World, says that when the engineer of a locomotive in the yards at that town left his engine recently he failed to shut off steam completely, and discovered it moving too late to catch up. The engine was on the main line and ran away. Ten miles east two cowboys gave chase. On rode close to the engine and made a flying leap from his horse into the cab. At first he pulled the throttle the wrong way, and increased the speed, but finally succeeded in stopping it. As he knew nothing of how to fill the water tanks the engine "died" and had to be towed back.

MOST DURABLE WOODS.

Some interesting experiments have been made to ascertain which woods last the longest. It was found that birch and aspen decayed in three years, willow and chestnut in four years, and elm and ash in seven years. Oak, scots fir, and Weymouth pine decayed to the depth of half an inch in seven years; larch and juniper were uninjured at the end of seven years.

thin that when a man was so sociable as that widgeon fellowerathur I wasn't the boy to vote again him."

Two canvassers in Liverpool have had an amazing, if somewhat grim, experience. Calling at a house on their route, they inquired if they could see Mr. Brown, the good mistress of the household answering, "Yes; comin'." On entering the house she struck a light, remarking, "Follow me, please," and started to mount the stairs. At the bedroom door she stopped and said, "There he is." Imagine the amazement and disappointment of the canvassers when they found that the man they had come to canvass was dead. The canvassers had been mistaken for the undertaker and his assistant.

Mr. Foote, the candidate for North Bristol, neatly countered a heckler who exclaimed, "You haven't a leg to stand on!" with the answer, "Anyway, I've got a Foote!"

A Liverpool canvasser had the curious experience of discovering two householders, residing side by side, of the names of Whiting and Haddock. But his mirth was scarcely concealed when he was informed, in reply to his request for a short interview, that "Mr. Haddock was at sea."

A question was submitted to Mr. Helme at Lancaster which had been sent to the meeting by express post—the postage being prepaid—and marked "Urgent!" There was no name, and it was suggested that Mr. Bottomley, the Unionist election agent, was the author. The question was: "Is Mr. Helme in favor of Pancake Tuesday being held on Easter Monday—that being Bank Holiday—so that the unemployed may have the opportunity of celebrating the historic event?" The vast audience shrieked with surprise, and the laughter was tumultuous. Mrs. Helme spoke to her husband, evidently suggesting the answer. "No," replied Mr. Helme, "because I am afraid it will interfere with too many washing days."

At Sunderland an enthusiastic Free Trader announced that "Mr. Chamberlain's red herring is coming home to roost."

A most unusual incident is reported from Cambridge. During the University of Mr. F. K. Piele recorded his vote where his father, the master of Christ's College, was presiding officer. Next day the father voted in the borough election, where Mr. Piele, Jr., was presiding officer.

Some unusual methods were employed in Sunderland. The "Glory Song" of the Alexander-Torrey mission was used to howl down Mr. Haggie Unionist. At one of Professor Stuart's meetings, some person turned the gas off at the meter, and a panic was narrowly averted.

A flowery orator, contesting a county in which his family possessed hereditary acres, implored support on the ground that he had been "personally connected with the district for more than six centuries."

"Enthusiasm is getting very hot when some people are actually on fire," said the chairman of an enthusiastic meeting in support of the Hon. Ivor Guest at Cardiff, when it was discovered that smoke was issuing from the coat-tail of the candidate on the platform.

"Are you in favor of the Deceased Wife's Sister Bill?" Sir Theodore Angier was asked at Gateshead. Sir Theodore waved his hand towards his wife and his sister who were on the platform, and a beatific smile flitted across his face as he replied, "Certainly."

The Conservative candidate at Gateshead claimed that Shakespeare was a Tariff Reformer, because he wrote, "You take my life if you take the means by which I live."

At one of Mr. Henry Norman's meetings in South Wolverhampton he was accompanied by his son, not yet nine years of age. In a clear voice the boy told an audience of a thousand people that he did not know how to make a speech, "but I think that as my father has been such a good father to me, he would make a very good member of Parliament for you."

When Sir A. Conan Doyle was addressing a meeting in Galashiels he was

tains the places of 3,000 stars in the region of the sky two degrees south of the Equator.

The new Earl Cathcart has two well-known characteristics—the first an extraordinary fondness for London, and the second a passion for walking exercise. Lord Greenock (as he was styled for nearly fifty years) has never been seen in a motor-car, and he cares neither for riding nor driving. He walks continually, and at such a rapid pace as to suggest that he is trying to live up to the motto of his ancient house, "I hope to speed." He is also a landscape painter of no little ability.

The Emperor of Austria collects menu cards, and as his stock of these is contributed to by other monarchs it is needless to say that it is a marvellous collection. It includes the cards of nearly every Royal table in the world, but the choicest specimen is the menu card of the dinner given by the Czar to President Faure at the Russian Embassy in Paris. The card—if card it can be called—is a block of the rarest black marble, beautifully painted by a famous French artist, the names of the various dishes being lettered in white ivory.

The Ex-Archduke Leopold of Austria, who married Fraulein Odamovitch and became naturalized as a Swiss citizen under the name of Leopold Wolfing, is now serving as a common soldier in a Swiss regiment at Geneva, in accordance with the law which requires military service from all citizens of the Confederation. The ex-Archduke has to perform all the duties of his new position, helping to scrub the floors of the barracks and to sweep the yard, besides participating in several hours' drill each day. Curiously enough, this new Swiss recruit formerly held the rank of major-general in the Austrian army!

A VALUABLE FOOD.

Wood Sliver Chopped Fine May be Dish of the Future.

Great interest has been aroused by the report that John Maginn, once an inmate of the Mile-End Workhouse, London, England, has found common deal wood to be "a valuable food and medicine, if cut small and eaten."

"Considering that some of our chief tonic medicines are derived from wood," said Dr. Forbes Winslow, "there is no reason why wood should not be used for food."

"I can quite understand the rationality of this. It is worth investigating. Everything that crops up in medicine every new treatment of disease, is looked upon with suspicion. It wants people with common sense and the courage of their convictions to establish something new."

"It is like the case of the man who ate his first oyster. He was regarded with suspicion—and so was the oyster."

"Is it possible to use wood as a food? Certainly it is. My mind is very open, and I believe that everything that is brought forward is worthy of investigation."

"Monkeys eat wood in the forests, and you can often see dogs gnawing it. Animals eat wood. The stomach of an animal is very similar to that of a human being, and if wood satisfies them, why should it not satisfy us?"

"I see no reason why thin wood chopped fine, should not be useful to us." Dr. Winslow concluded. "It is good for the animal world in the forests, it is good for us."

The further development of wood as a satisfying food may possibly lead to the formation of a new sect of free-livers—the wood-eaters or the deal-devourers—and wood, served in various enticing forms, may soon figure on the menus of our restaurants.

CHEER UP.

Don't exaggerate your handicaps. If you have the desire, any handicap may be overcome. John O'Grady of McKeesport, Pa., was born without arms, but when arrested recently for throwing bricks at his wife he whipped the two policemen who arrested him and made his escape. Still he was badly handicapped.

This section is cut up by many railroads and it is about as well settled as Dakota itself. Running northward from Regina, the wheat country extends for hundreds of miles. Almost directly north is Prince Albert, which is now reached by two railroads, with settlements all along the way. The distance between the two places as the crow flies, is over 200 miles. Sunlight Soap

is a perfect cleaner and will not injure anything.

Best for all household purposes, Sunlight Soap's superiority is most conspicuous in the washing of clothes.

Common soaps destroy the painted or varnished surfaces of woodwork and take the color out of clothes.

Even the daintiest linen or lace, or the most delicate colors may be safely washed with Sunlight Soap in the Sunlight way (follow directions).

Equally good with hard or soft water.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

INGOG. IN LONDON TOWN

ROYAL FOLK DELIGHT TO STROLL ABOUT HER STREETS.

London Entertains More of Them Than Any Other City in Europe.

London is not only the biggest thing of its kind on earth, but it is the town that the royal folk of continental Europe love to visit in a wholly unofficial capacity.

To these royal refugees or truants London is perfectly charming, because of its size, its mixed population and that excellent habit its natives have of attending to their business and letting eccentric persons follow their own sweet will in many things. The Pope himself could stroll along Regent street without ever having a head turned. The result is that in winter the streets of this crowded but orderly city may hold many personages who wear crowns and coronets and high titles when they are at home.

In winter they flock to London because then the British royal family and most of the fashionable folk are away from town, but the streets are full of life, the shops full of desirable things for purchase and the theatres full of excellent plays.

Sometimes Scotland Yard is informed and keeps an eye on the royal visitor who is in disguise, but it only keeps an eye out, it does not tell the newspapers of its knowledge. For instance when Emperor William is going to drop over to London for a few days incognito his whereabouts are revealed to Scotland Yard, which, however, takes precautions that in no wise interfere with the absolute freedom of

A CERTAIN HERR BLANK,

who poses, at a small hotel, as a German councillor sojourning in the British capital on account of his legal interests.

Of late years he has come nearly every winter for a couple of days at least to London. On one occasion he went all through the offices and plant of the London Times without being recognized. He brought a card of introduction from a newspaper editor of great influence in Berlin and in the capacity of a master mechanic he was shown by a courteous member of the pressroom staff all over the premises of the Thunderer.

The police of London can boast that their town entertains unknowingly more royal folk than any other in Europe and without an accident befalling any of them. Once upon a time a German Princess did sprain her ankle as she came down from the top of a bus, but that is the most serious casualty that ever befel a personage visiting the town unofficially.

There is really some surprise to be felt over this because one and all the holiday making princes ride on the tops of omnibuses and find those two-horse arks the most delightful chariots in the world. There is a well-known Grand Duchess of North German origin who declares that the top of a London omnibus is the proudest and most comfortable position she ever occupied in all her exalted life.

Several great ladies of her class have rented small flats in London where they can live when they visit the capital incognito, and

THE QUEEN OF ROUMANIA

has even tested the London boarding house. She explains the fancy of her class for making these experiments by saying that many a crowned head confesses to the possession of a very Bohemian heart and that London is the only spot on earth where a royal personage can feel at once free and safe. The Duchess d'Aosta, before her marriage the Princess Helene of Orleans, grew up in England and speaks English like a native, and she comes every year to London as plain Mrs. John Brown, to put up at a nice little exclusive little hotel

THE GREATEST FASTER

GIUSEPPE SACCO, AN ITALIAN, CLAIMS THE TITLE.

He is Now Making It Good in London —Tells About the Pangs of Hunger.

To beat the record of a forty-one days' fast set up some ten years at the Royal Aquarium by Succi, Giuseppe Sacco, his pupil, recently came from the continent, where he has made shorter successful fasts, to London.

On January 18th he started at the Italian Circus, where he is to fast under strict conditions for forty-five days. So that there should be, so to speak, "no deception," he lives all the time in a glass house. "Hungerhaus," it was graphically called in Vienna, where in April last year Sacco went through a twenty-nine days' fast, of which the Emperor of Austria showed his approval by giving him

A FINE GOLD MEDAL.

For another successful fast he had a gold medal from the University of Halle and a third was awarded him in Madgeburg.

Sacco does not look like a hunger man out of "business" hours, when he is eating and living in ordinary fashion. He is a dark, fresh-complexioned fellow, with a neat moustache. He is just short of six feet high, broad-shouldered and intelligent, with a weight to fit his height.

"For the first five days," he said, referring to the effects of a long fast, "it grows worse every hour, till on the fifth day, as though it were a fever, the crisis is reached. Nature, in the beginning is clamoring to do her usual duty; then she gives in, and adapts herself to the altered conditions. Ah! he said, with a grimace, "the fifth day!

"When I start I weigh 190 pounds, and I lose about one and a half pounds a day; that will mean nearly seventy pounds if I succeed in lasting out for forty-five days in London. It has taken me on previous occasions some seven days to recover from a fast. Then, curiously enough, I weigh

SEVERAL POUNDS MORE

than my normal weight of fifteen stone. "I smoke cigarettes all day for something to do. They are my companions; they are not medicated. I drink a little mineral water when I feel I want it."

Sacco's father was a major in the Austrian army, in which he was himself a Lance-Corporal. This would account for his good bearing and physical development. Succi, whose record he hopes to beat, taught him how to fast. He was the present record holder's manager at the Aquarium, and he follows his methods.

The medical men at Vienna and Moscow have testified in his favor, and he hopes for the approval of a convincing number of the 2,000 doctors in London who have been written to and asked to give an opinion on his performance at the Italian Circus.

PRECIOUS SWORDS.

Perhaps the most precious sword in existence is that of the Gaekwar of Baroda. Its hilt and belt are encrusted with diamonds, rubies, and emeralds, and it is valued at £220,000. The Shah of Persia possesses a sword valued at £10,000. His father wore it on his first visit to Europe. There are some costly swords in India, and both the Czar and the Sultan possess jewelled sabres of great price. The most valuable sword in England is the one presented by the Egyptians to Lord Wolseley. The hilt is set with brilliants, and it is valued at £2,000.

VOTING BY COMPULSION.

Compulsion in the discharge of electoral duties has hitherto been nothing more than a theory regarded as Utopian.

GREAT PROCRASTINATOR

PERSIAN LOOKS UPON PROMPTNESS AS A FORM OF LUNACY.

Henry Savage Landon Tells of His Experience in That Country.

There are parts of the world where punctuality is held of no account in the making of successful transactions, and among the Persians it absolutely is unknown.

According to Henry Savage Landon, who has spent much time studying business methods among these people, the Persian hates anything that savors of promptness. He is a dreamer, and although he cannot be called absolutely lazy, as he is usually absorbed in deep thought, still he seldom has little leisure for anything else. The returns for his work, however beneficent, are too small for his expectations.

In marked contrast is his abhorrence for punctuality. There is no country where time counts for less. He thinks nothing of making a business appointment for 10, delaying it until 11, only to explain that he wished he might have come sooner, but it could not be helped; he has just finished his morning meal. However important the business transaction may be, he will not give it his attention until he is ready.

It was only recently an Englishman called on a dealer to buy Persian rugs. The servant brought the word, and the merchant commanded him to tell the stranger to return in a few hours and

HE WOULD SEE HIM.

The word was brought back that the Englishman had to make a train within an hour. "Then let him go," said the dealer. "My meal is as important as his train."

The manana of the Spaniard sinks into perfect insignificance when compared with the habits of the Persian. Punctuality is especially unknown when it comes to payment of debts. He must take time to reflect about everything and will not be hurried. Three months to a creditor, or even six months' seem terribly short in his eyes. A period of twelve, eighteen or twenty months suits him better, but he never is ready to pay unless placed under great pressure.

A Frenchman called on a Persian one day and asked him to pay a debt, but the indifferent debtor made answer: "I will pay you some time." "When is some time?" queried the impatient Frenchman. "Is it twelve months, eighteen, or two years?" "I don't know," answered the bland son of Iran. "I guess we had better say when I am ready."

It must be said to the Persian's credit that they usually pay in the end, but they wonder why people should worry when they have so much time. It is quite beyond them to realize what difference it makes whether payments are made to-day, to-morrow or a year from to-day. They look upon Western haste as

AN ACUTE FORM OF LUNACY,

and believe that our strenuous life is so foolish it is not worth consideration. As a cultured Persian recently told an ambitious young Westerner, "I work a little, enjoy much, and live long, while you work much and will die before you attain the fruits of your labor. We must take time to sleep and enjoy our food."

Business conducted in European and American fashion cannot prosper in Persia. It is hard to say whether this desire simply to act on impulse is due to temperament, conceit or climatic conditions. With conditions such as they are, the economic development of production, distribution and circulation are bound to be hampered.

The currency is another difficulty that limits the making of business success. Gold coin is a mere commodity, and is so scarce it is used chiefly for presents and hoarding.

In spite of these obstacles most Persians

Overboard.

The passenger list of the Kildonan Castle on the voyage which she has just made from the Cape was probably unique.

The liner arrived at Southampton, England the other day and unshipped the following amazing menagerie:—Sixty penguins, 1,000 tortoises, 30 baboons, 70 snakes, 12 monkeys, 10 antelopes, 200 small birds, 6 sea lions, 76 rock rabbits, and 4 blue cranes.

With such a remarkable collection of wild animals and birds on board the Kildonan Castle's voyage was bound to be eventful. The excitement began almost as soon as the steamer left South Africa, and lasted through the storm crossing the Bay of Biscay, when the 10 tuboon passengers got seasick and

NEARLY SUCCUMBED.

The liner was not a day out from Port Elizabeth when one of the deck stewards made a startling discovery. A large snake had found its way to the deck and was basking in the sun. "There's a cobra loose!" the man yelled, making frantic attempts to attract the attention of the animal's attendants. There was a stampede of passengers and crew, one of the officers shouting, "All hands below!" Two or three seamen sought safety in the rigging, but the fears of all were dispelled by John Hamlyn, the purchaser of animals. He approached the snake and, seizing it by the neck, replaced it in its house.

As a matter of fact there had been no real cause for alarm, as the reptile was not a cobra, as the steward thought, but a mole snake—not a dangerous species.

LOSS OF A PET.

The passengers made a great pet of the baby sea lion, a little creature only two feet in length, and they were much upset when he was lost. The circumstances were rather peculiar. He was being given a bath in a canvas tub when he got sight of the ocean. It was too tempting, and though the attendants and sailors strove to hold him he was too slippery for them and jumped overboard.

Five seals and sea lions died on this journey because they could not be induced to eat. At Madeira Mr. Hamlyn went ashore and bought a number of live fish, which saved the lives of the others.

The monkeys gave an immense amount of trouble. They are so vicious that they took to murdering one another on the voyage. They refused to eat the beef provided for them, and the only way to prevent their starvation was to hold their bills open and force food down their gullets with a stick.

FRENCH WIFE ILL-USED.

Sequel to Romance of Noted "White and Yellow" Marriage.

The marriage between a young woman belonging to a well-known family in Paris and a Chinese diplomatist, which attracted so much attention two years ago, has had a somewhat unhappy sequel.

After a short period of happy wedded life in Paris, the couple went to Peking, where the young wife received anything but a friendly welcome from the mandarin's family. The female relatives of her husband quickly made her a butt for their ridicule, her mother-in-law showing herself especially tyrannical. They even induced her husband to marry a young Chinese woman, to whom the young French woman was required to act as a sort of servant.

At last the wretched wife contrived to send a letter to her mother, who went off to China, and recently returned with her daughter to France.

SEPARATION.

"I have called," began Mr. Nervy, "to speak to you about your daughter. Of course, you must have noticed that there is something between us."

"No," interrupted Mr. Roxley, "but I'm sure there will be pretty soon."

"Yes," the Atlantic Ocean. I'm going to send her abroad until she learns a little sense."

spot on earth where a royal personage can feel at once free and safe. The Duchess d'Aosta, before her marriage the Princess Helene of Orleans, grew up in England and speaks English like a native, and she comes every year to London as plain Mrs. John Brown, to put up at a nice little exclusive little hotel and shop. She and one companion, an English woman, stroll about the streets, looking in windows and picking up bargains in a way that would not be tolerated in a princess in Italy.

The cold, foggy air of an English winter braces her up for the more relaxing climate of Italy, and her sister, the Queen of Portugal, strays into London for almost the same purpose.

It was an American woman who saw them together one day on top of an omnibus that jogged along the Bayswater road. One was dressed plainly in brown, the other in blue and their cheeks were like roses, but the American woman had seen them both at great public functions and sat agape with surprise.

PETTY THEFTS IN PRISON.

Convicts Affect Kleptomania to Have Sentence Altered.

Kleptomanias in prison are not common, but prisoners sentenced for a series of petty thefts will sometimes continue their practice in jail in order to lead the authorities to think they ought not to be treated like common felons, but removed to the criminal lunatic asylum. Wormwood Scrubbs prison was once very much troubled by an aggravated case of the kind.

The man had pleaded kleptomania at his trial, but all in vain, and five years was the sentence passed upon him. He had not been long in Wormwood Scrubbs when all sorts of unconsidered trifles began to disappear in the most mysterious manner. For a long time the identity of the thief was unsuspected. But one day a prisoner employed in the printing room lost a button off his trousers, and the thief, who worked in the same department, offered to let him have another. But it proved to be the identical button that had been lost, and thereupon the thief fell under suspicion, which was, of course, the object of his noble offer. On his cell being searched a most extraordinary collection of articles was found in his mattress. The list of items would half fill a column, but the most common things were buttons, nails, scraps of soap, rags and fragments of wood. At one fell swoop, indeed, everything that had been missed during months past was recovered.

The thief, instead of being sent to Broadmoor, was punished, but nevertheless he resumed his practice; and he continued his thefts and secreting them until he was transferred to Portland in the usual course, when he suddenly and completely reformed.

SILENCE IS GOLDEN.

When speech is a barbed arrow that hurts and wounds, silence is golden. But kind words are golden, too, and silence is sometimes the refuge of the coward and the poltroon. When an absent friend needs defence, silence is mean and skulks behind fear, instead of coming boldly to the front. Golden it is when it acts as an impregnable barrier against slander and malicious tongues. It behooves us to discriminate. "By my words thou shalt be justified, and by my words shalt thou be condemned."

A HORRIBLE CUSTOM.

A Swiss traveller, M. Paul Brun, who has just returned from two and one-half years' travels among the savage tribes of the Congo, has just made public accounts of the dreadful burial ceremony of a chief of the man-eating Bakete. The body is set in a chamber hewn into the side of a deep ditch, into which young girls are thrown, their arms and legs broken with a club. In the tomb, with the chief are goats and fowls, together with his weapons, and especially his gun, which is broken to save it from theft. The earth is then filled in and the slaves and slaves of the chief are slain over his grave.

with brilliants, and it is valued at £2,000.

VOTING BY COMPULSION.

Compulsion in the discharge of electoral duties has hitherto been nothing more than a theory regarded as Utopian. Switzerland, however, in its chosen role as the school of social and political experiment, has elected to translate it into practice. A bill just introduced into the Federal Legislature makes it penal for any registered elector to fail to record his vote, either at a cantonal or a federal election, except under circumstances which can be shown to be beyond his control.

31 Boxes of Gold

300 Boxes of Greenbacks

For the most words made up from these letters

Y - I - O - Grape - Nuts

331 people will earn these prizes.

Around the fireside or about the well-lighted family reading table during the winter evenings the children and grown-ups can play with their wits and see how many words can be made.

20 people making the greatest number of words will each receive a little box containing a \$10.00 gold piece.

10 people will each win one box containing a \$5.00 gold piece.

300 people will each win a box containing \$1.00 in paper money and one person who makes the highest number of words over all contestants will receive a box containing \$100.00 in gold.

It is really a most fascinating bit of fun to take up the list evening after evening and see how many words can be added.

A few rules are necessary for absolute fair play.

Any word authorized by Webster's dictionary will be counted, but no name or person. Both the singular and plural can be used, as for instance "grape" and "grapes."

The letters in "Y-I-O-Grape-Nuts" may be repeated in the same word.

Geographical names authorized by Webster will be counted.

Arrange the words in alphabetical classes, all those beginning with A together and those beginning with E to come under E, etc.

When you are writing down the words leave some spaces, in the A, E, and other columns to fill in later as new words come to you, for they will spring into mind every evening.

It is almost certain that some contestants will tie with others. In such cases a prize identical in value and character with that offered in that class shall be awarded to each. Each one will be requested to send with the list of words a plainly written letter describing the advantages of Grape-Nuts, but the contestant is not required to purchase a pkg. These letters are not to contain poetry, or fancy flourishes, but simple, truthful statements of fact. For illustration: A person may have experienced some inconvenient or chronic ailment traceable to unwise selection of food that failed to give the body and brain the energy, health and power desired. Seeking better conditions a change in food is made and Grape-Nuts and cream used in place of former diet. Suppose one quits the meat, fried potatoes, starchy, sticky messes of half-cooked oats or wheat and puts out the coffee. Try, say, for breakfast a bit of fruit, a dish of Grape-Nuts and cream, two soft-boiled eggs, a slice of hard toast and a cup of Postum Food Coffee. Some amateur says: "A man would faint away on that," but my dear

are, the economic development or production, distribution and circulation are bound to be hampered.

The currency is another difficulty that limits the making of business success. Gold coin is a more commodity, and is so scarce it is used chiefly for presents and hoarding.

In spite of these obstacles, most Persians earn a livelihood and often succeed. They are skilled craftsmen, showing a wonderful ability for weaving and the working of metals, but they are seen at their best when making loans of money at high interest on ample security. They often get from 50 per cent. to 80 per cent., sometimes 100 per cent., while 15 per cent. is deemed a modest amount for small private loans.

31 Boxes of Gold

300 Boxes of Greenbacks

For the most words made up from these letters

Y - I - O - Grape - Nuts

331 people will earn these prizes.

friend we will put dollars to your penies that the noon hour will find a man on our breakfast huskier and with a stronger heart-beat and clearer working train than he ever had on the old diet.

Suppose, if you have never really made a move for absolutely clean health that pushes you along each day with a spring in your step and a reserve vigor in muscle and brain that makes the doing of things a pleasure, you join the army of "plain old common sense" and start in now. Then after you have been 2 or 3 weeks on the Grape-Nuts training you write a statement of how you used to be and how you are now. The simple facts will interest others and surprise yourself. We never publish names except on permission, but we often tell the facts in the newspapers and when requested to give the names by private letter.

There is plenty of time to get personal experience with Grape-Nuts and write a sensible, truthful letter to be sent in with the list of words, as the contest does not close until April 30th, 1906. So start in as soon as you like to building words, and start in using Grape-Nuts. Cut this statement out and keep the letters Y-I-O-Grape-Nuts before you and when you write your letter you will have some reason to write on the subject "Why I Owe Grape-Nuts."

Remember 331 persons will win prizes which will be awarded in an exact and just manner as soon as the list can be counted after April 30th, 1906. Every contestant will be sent a printed list of names and addresses of winners on application, in order to have proof that the prizes are sent as agreed. The company is well known all over the world for its absolute fidelity to its agreements and every single one of the 331 winners must depend on receiving the prize won.

Many persons might feel it useless to contest, but when one remembers the great number of prizes—331—the curiosity of seeing how many words can really be made up evening after evening and a good, natural fun and education in the competition, it seems worth the trial; there is no cost, nothing to lose and a fine opportunity to win one of the many boxes of gold or greenbacks.

We make the prediction that some who win a prize of gold or greenbacks, will also win back health and strength worth more to them than a wagon full of money prizes.

There are no preliminaries, cut out this statement and go to it, and send in the list and letter before April 30th, 1906, to Postum Cereal Co., Ltd., Battle Creek, Mich., and let your name and address be plainly written.

We Trust Doctors

If you are suffering from impure blood, thin blood, debility, nervousness, exhaustion, you should begin at once with Ayer's Sarsaparilla, the Sarsaparilla you have known all your life. Your doctor knows it, too. Ask him about it.

Unless there is daily action of the bowels, poisonous products are absorbed, causing headache, biliousness, nausea, dyspepsia, and thus preventing the Sarsaparilla from doing its best work. Ayer's Pills are liver pills. Act gently, all vegetable.

Made by J. C. Ayer & Co., Lowell, Mass.

range. One feature of the Chicago market was the presence of Canadian lamb, one lot selling in November last for \$7.25 per cwt. The past year has also been a profitable one for the wool growers, present prices being abnormally high. With the impetus given to the sheep industry by the active demand for wool and mutton and because of the general prosperity of the country, the opinion prevails among high authorities that the breeding and feeding of sheep will be a profitable business for the next two or three years at least. For breeding purposes, sheep selected from Canadian flocks are particularly popular in the United States and Canadian farmers ought to be in a position to reap a rich harvest through trade with their cousins across the lines. The presence of sheep on the farm moreover assists the farmer wonderfully in keeping his farm free from weeds and in maintaining the fertility of the land. Finally, the prospect of profit in the sheep trade is better now than it has been for years, and the outlook is promising so those who have retained their faith in the sheep as the Farmer's Friend.

CLIMATE AND SPEECH.

Soft Language and Tropical Weather Seem to Go Together.

Gutturals predominate in Norway and Russia, whereas far to the southward in sunny Italy there is a profusion of such euphonious names as Palermo, Verona, Campobello, etc. Even in the British Isles, covering so few degrees of latitude, there is a marked difference between the "bur" of the highlander and the soft speech of the native of southern England.

A theory which may partly account for these climatic effects is based upon the contrast of the stillness which usually pervades southern lands with the stormy inquietude of northern countries. Cloudless skies for months at a time characterize the climates of Italy, while a firmament entirely free from clouds is rare in Norway.

It requires, of course, greater effort to be heard in the regions which are swept by winds and storms than in still southern latitudes, and to be heard distinctly amid the noise and confusion of the elements words must be used which contain many consonants.

Among the inhabitants of more tropical climes the tendency is toward soft and musical cadence, and travelers relate that in regions in South America, such as Peru and Venezuela, where atmospheric disturbances are rare, the natives almost chant the phrases of salutation.—London Saturday Review.

BABIES IN HOLES.

Where Uganda Infants Rest While Their Mothers Hoe.

I have gone into a field in Uganda and there found one of our women at work with a hoe, writes a missionary sister in Donahoe's. I asked her where her baby Maria was, and she pointed to a spot at some distance where the banana trees were thick. I walked under the shade, and in vain I sought the infant. The mother was greatly amused and urged me to search further, assuring me that the little one was not far away and was fast asleep. I had to "give up," so the mother took me by the hand and led me to a bit of bark cloth on the ground. Under this rag was the crown of the baby's head, while the body was in a hole deep enough for the feet to rest on the ground. To my surprise and exposu-

High Constable of Quebec

After Suffering For 10 Years With Pain In The Back He Was Completely Cured By "Fruit-a-tives."

"Fruit-a-tives" cures diseased and irritated kidneys when all other treatment fails.

The proof that "Fruit-a-tives" is the greatest kidney cure known to science is demonstrated by these tablets removing all pain in the back—making the kidneys healthy—and curing chronic constipation.

ST. HYACINTHE, P.Q., June 10th, 1905.

I have much pleasure in testifying to the great good which "Fruit-a-tives" have done me. I was a constant sufferer from severe constipation and severe pain in the back for the last ten years. I tried many kinds of pills and tablets and physician's medicines but the relief was only temporary. Not long ago

I tried "Fruit-a-tives" and now I am entirely well, no pain, no constipation and my stomach and bowels act naturally. I cannot say enough in praise of "Fruit-a-tives"—they are a grand medicine, mild as fruit in their action and easy to take.

(Signed)
H. MARCHESSAULT,
High Constable.

Do you know that every drop of blood in your body goes to the kidneys to get rid of some of the impurities?

When the bowels don't move regularly, the blood takes up poisons in the bowels and carries them to the kidneys. Then the kidneys get overworked—infamed Then comes the pain in the back—headaches—constant desire to urinate—nervousness—sleeplessness.

"Fruit-a-tives acts directly on the Kidneys—cleans, heals and strengthens them—makes the liver give up more bile to move the bowels regularly—and stimulates the glands of the skin to increased action. These rid the system of all poisons and every trace of Kidney Disease disappears.

Fruit-a-tives have cured hundreds of cases of Kidney Disease by stimulating and healing the Kidneys

THE OUTLOOK FOR

SHEEP HUSBANDRY.

by H. S. Arkell, B. S. A., M. A.

The rise and fall of prices, the ebb and flow of the tide of trade is a recognized fact of commercial life. With a finger on the pulse of the market, the ability to relate one's business to the demands of the present and the courage of patience and resourcefulness to prepare for the demands of the future is a talent that should assure success in the life of any man be he farmer, tradesman

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itching of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old foggy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

demand of the present and the courage of patience and resourcefulness to prepare for the demands of the future is a talent that should assure success in the life of any man be he farmer, tradesman or manufacturer. A stockman who takes advantage of a dull year to strengthen or improve his breeding flock and refuses to breathe the atmosphere of discouragement and impatience under which his neighbors are going down to failure, is wise in his day and generation. The sheep owner and breeder who, not despairing of the revival of the sheep industry, has during the past few years by judicious selection and breeding, maintained or increased the quality of his flock, is now reaping the reward of his hopefulness and is in a position to take the largest advantage of the brisk demand and high prices of the present time.

"Record marketing at record prices" is the reporter's summary of the situation at the Union Stock Yards, Chicago, for 1905. In all during the year 4,738,748 sheep were marketed which, in a grand total is 234,000 more than in 1904. The top price for wethers was \$6.25 per cwt. The demand for breeding ewes throughout the states has, during the past year, fully doubled and there were by no means enough feeder sheep to supply the demand in the corn-belt and on the

dark cloth on the ground. Under this rag was the crown of the baby's head, while the body was in a hole deep enough for the feet to rest on the ground. To my surprise and expostulations she said in her own language: "This is a good custom. When a Uganda woman goes to hoe it is not good for her baby to lie asleep on the ground, as it might injure itself by rolling, or, if it awoke, it might crawl away. Therefore we make a hole like this and line it with soft, clean leaves and put our baby safely into it so that it can neither crawl out nor roll away, and we know exactly where to find it when we come from the fields." She said it was perfectly safe from wild beasts, because it was midday.

In the High Sierras.

Coming down from the high Sierras into the Yosemite valley one passes from almost arctic cold to the warmth of the late spring, and the difference in temperature is easily traceable by the character of the foliage. On the high peaks no green thing flourishes. Gradually stunted pines and tamaracks appear, and still lower the maple and laurel are just beginning to unfold their leaves, and then in a half a day's journey the wild flowers come. Hundreds and hundreds of them of all shapes and colors are found here, and as you approach the rim of the wonderful Yosemite the air is heavy laden with the scent of the azaleas, and the trail is lined with wild lilac, wild cherry and dogwood—a perfect riot of flowering shrubbery.—Recreation.

The Reproof.

During the French revolution a priest rode in a tumbrel to the guillotine with two persons—one a marquis, the other a common thief. As the cart jolted through the crowded streets the citizens shouted maledictions on its occupants.

"Down with you, beasts of the aristocracy!"

The marquis smiled proudly, but the criminal was vexed.

"My good friends," he cried, "I am no aristocrat. I am a thief."

Then the priest touched his arm gently, murmuring:

"Ah, my son, this is no time for vanity."

Stone in the Heart.

A Greek woman employed in the American hospital in Caesarea, Turkey, was stirred by a revival. She straightway asked leave to visit a woman whom she had injured and to whom she had not spoken for ten years. When she trudged through the snow three or four miles to ask her "enemy's" forgiveness her relatives were sure she had gone daft, but the next day, when she came back to the hospital, she said, "We made peace, and the stone in my heart is gone."

Not So Resourceful as Most Girls.

Nell—Some of our proverbs are so ridiculous. For instance, "Where ignorance is bliss"—Belle—What's the matter now? Nell—Why, you know, Charlie gave me my engagement ring last week, and I simply can't find out how much it cost him.

Catarrrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrrh Cure is taken internally and acts directly on the blood and mucous surfaces. Hall's Catarrrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tones, pears, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrrh. Send for testimonials free.

Romance of a Song.

"Yes, the Die Is Cast." has a romantic history. It was written by Colonel Paul Pestel of the Russian army, who, with others, conspired against the Russian government in 1826. The plot was discovered, he was arrested, imprisoned, tried and on July 11, 1826, was hanged. During the interval between his trial and execution he composed the words and music of this song and with a bit of iron scratched them on the wall of his cell, where the song was found some years after his death.

Consumption Cured

Never lose heart if you have consumption. Others who have been left to die by the doctors, have been saved by PSYCHINE, and it will save you, too.

Consumption is a powerful disease, but PSYCHINE is a more powerful remedy. It practically puts new life into the system, increases nutrition, purifies blood, tones up the nerves, kills germs and repairs exhausted tissues. Don't waste time and don't lose hope until you have tried

Carried It Too Far.

"Are you satisfied, dear?" asked hubby, And wife replied: "No! I ain't. True, I married you to reform you— Now I've got to put up with a saint."

Thinking of His Mother.

Teacher—Why is a ship called "she"? Bright Boy—Because it has a spunk-er.

Polite.

Though time and tide on no man wait At least 'tis true of these They don't insult him at the gate And yell, "Stop lively, please!" —Puck.

Heart and Lungs.

The action of the heart, lungs and digestive system is involuntary, for the reason that it is indispensable to life and must be carried on under all circumstances. If a man had to think of his heart or had to remember that he

SEED TIME

The experienced farmer has learned that some grains require far different soil than others; some crops need different handling than others. He knows that a great deal depends upon right planting at the right time, and that the soil must be kept enriched. No use of complaining in summer about a mistake made in the spring. Decide before the seed is planted.

The best time to remedy wasting conditions in the human body is before the evil is too deep rooted. At the first evidence of loss of flesh

Scott's Emulsion

should be taken immediately. There is nothing that will repair wasted tissue more quickly or replace lost flesh more abundantly than Scott's Emulsion. It nourishes and builds up the body when ordinary foods absolutely fail.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

WHAT OTHER PAPERS SAY.

Kingston Whig.

The manufacturers have undertaken to tell the government how well the farmers are getting on with a high tariff. Now listen for the Grange?

Toronto World.

Doc. Nesbitt should have insisted on a few of "the boys" receiving the appointment of issuer of marriage licenses before he himself passed to his reward.

Toronto Telegram.

Will the new deputy minister of education abolish home work, and thus give the parents of children attending school a few evenings to themselves?

Goderich Signal.

Those Prince Albert deputy returning officers have hit upon the method of holding elections with the least inconvenience to the electors. Their plan does not even require the attendance of the voters at the polls. For their ingenuity and kindly consideration they should be rewarded with free board and lodging in one of the public institutions of Alaska chieftain.

Toronto Globe.

If the King of the Bigians has derived a hundred million dollars from his "domains" of the crowd in the Congo Free State, he deserves to go into the Rockefeller grade of monopolists. How did the heavyweights of the nation ever allow this lightweight to secure such rich graft?

Galt Reformer.

Because the Postmaster of Cannington was dismissed after the Department discovered that he was conducting a mercantile business, although his salary allowance from the Government was adequate for a livelihood, Postmaster-General Aylesworth is being scolded. How long would a Liberal office-holder under the Whitney Administration, who was carrying on a private enterprise like the Cannington postmaster, retain office? Just about as long as it would take for the department under whose jurisdiction he worked to write: "We regret the necessity of asking for your resignation."

Youth's Companion.

If you do not know, ask the editor, is a rule many people follow. Three travellers on a railroad train that was delayed for fifty-eight hours in Duran, New Mexico, last month, believed it a good rule, for when they could get no information from the railroad employees they telegraphed to a New York newspaper, asking what the matter was. The newspaper, after some inquiries, telegraphed in reply that two other trains ahead of the one at Duran had been stalled in the snow-drifts on the plain round Santa Rosa, New Mexico, and that arrangement had been made to send the waiting train on its way by another route. It seems that if the editor himself does not know he knows how to find out from some one who does know.

ORTON'S
ORDERS

By CHARLES WILSHIN

Copyright, 1905, by J. W. Muller

"I'm Well

Because of Liquozone," is a Tale Told Everywhere.

In almost every hamlet—every neighborhood—there are living examples of what Liquozone can do. Wherever you are, you need not go far to find some one who has been helped by it.

Talk to some of those cured ones; perhaps your own friends are among them. Ask if they advise you to try Liquozone. Or let us buy you a bottle, and learn its power for yourself. If you need help, please don't wait longer; don't stay sick. Let us show to you—as we have to millions—what Liquozone can do.

What Liquozone Is.

The virtues of Liquozone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Liquozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Liquozone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Liquozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Liquozone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Liquozone can do.

Where It Applies.

These are the diseases in which Liquozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison
Bowel Troubles
Coughs—Colds
Consumption
Contagious Diseases
Cancer—Catarrh
Dysentery—Diarrhea

INSURANCE COMPANIES
LOOK ASKANCE

AT A MAN IF HE CANNOT ANSWER THE QUESTION, "HAVE YOU EVER HAD RHEUMATISM?" WITH A GOOD HONEST "NO!"

So you see how it bars happiness and comfort if you neglect the means to prevent and cure—the great

South American Rheumatic Cure

is the effective means, and while lack of provision for your "loved ones" from such a cause may be counted secondary to a life of suffering to oneself, it is one of the many sides in the study of health that we should take in dead earnest. Every disease has its symptoms—every ailment that flesh is heir to has its note of warning, and it's for us to heed or suffer the consequences; and who does not know the signs by experience or observation?—fever, chills, sweating, shooting pains, numbness, aching muscles, stiffened and swelled joints.

The great South American Rheumatic Cure gives ease from the first dose and it gently and effectually eradicates the trouble from the system. It gets at the root of the evil and it gets there quickly—most stubborn cases cured in one to three days. Influential physicians prescribe it as the best and surest cure they know of.

ALL DRUGGISTS AND MEDICINE DEALERS SELL IT.

SOUTH AMERICAN NERVINE makes blood that is poor and pale rich and red—and that means good health.

Cures Coughs

GRAY'S SYRUP does that one thing, and does it well. It's no "cure-all," but a CURE for all throat and lung troubles.

GRAY'S SYRUP OF RED SPRUCE GUM stops the irritating tickle—takes away the soreness—soothes and heals the throat—and CURES COUGHS to stay cured.

It was, of course, a very foolish thing to write a letter of acceptance to the man one intended to refuse, and yet Aline took a childish delight in writing the dainty little note and thinking of the expression that would come to Orton's face if he should read it.

Then she tucked it into the flap of her lap desk and on her last remaining sheet composed the letter in which she sought to make her refusal as easy as possible.

It is no easy thing to make a pen say "no" when the heart cries "yes," and the rest of the party was ready to start for the woods before she had completed it.

Of course she could not say that it was her stepmother's order and that it was obedience to command and not the answer of her heart. She could only hope that he would see how the matter stood and understand that she had not been flirting with him through those long weeks before Marquand and his money had appeared upon the scene and had been pleased to bestow his attentions upon her.

Until then Mrs. Appleton had regarded Jack Orton with favor. He had money, not much, but enough for two, with excellent prospects, but he could not hope to compete with Marquand, and Mrs. Appleton wondered why Aline should be so stubborn as to continue to care more for Orton.

There had been one scene after another, usually terminating in Mrs. Appleton's hysterics, and at last the girl's will had been broken down, and the negative she could not utter was now signed to paper and intrusted to Billy, who promised faithfully to take it to Orton's room and place it on his table.

Billy was perfectly honest in his intentions, but just as he was scamper-

sir?"

Billy dashed down the line of chairs and with a wave of his arm swung on to the train and began collecting and punching tickets already punched al-

most beyond the semblance of paper. So engrossed was he in his occupation that it was several minutes before he noticed that his engineer had stepped off the train and was striding through the rain. He, too, left the flier, with its precious feminine freight, and started off after him.

"Aren't you going to play any more?" he demanded as he caught up with the man. Orton started.

"I declare, Billy," he laughed, "I had forgotten all about being engineer. I want to catch the crowd at the woods. You'll forgive me this time, won't you, old fellow?"

"I guess I can get Grace Arnold to be engineer," said Billy doubtfully. "But, I say, can I have those orders? I want some more tickets."

Orton laughed. "Here's a whole lot of paper," he said, drawing some old letters from his pocket. "I need the one you gave me." And he was off down the road.

The chestnut grove was only a couple of miles away, and he was soon there. He had not been invited to be one of the party. It was Mrs. Appleton's own party, and Orton had not been popular with that lady since the advent of Marquand, but he went in search of the party with a happy heart.

He found Aline and Marquand apart from the group. She flashed him one glance of welcome from her eyes, then dropped the lids on them while the red spread over her face. In the instant of greeting she had forgotten the note, and with recollection of the cold, formal phrasing of her letter she became ashamed to meet his glance.

Marquand regarded the intrusion in no pleasant fashion and began to sulk. He had been assured by Mrs. Appleton that Aline would accept him, and this nutting party had been arranged to make an opportunity for his proposal. Mrs. Appleton had drawn the others deeper into the woods, and he was just about to make formal offer of his hand when Orton came up.

He was just contemplating the possibility of saying something that would give Jack a hint to take himself elsewhere when that young man spoke up.

"I say, Marquand," he began, "I wish you'd look up the others for a bit. I've something very particular to tell Miss Appleton."

Marquand looked at Aline for encouragement in his refusal, but she would not return his glance. He paused irresolute for a moment and then strode off to search for Mrs. Appleton.

Aline looked up with a frightened glance. "I told you not to come," she murmured. "What will they say?"

"I was acting under orders," he insisted, holding out the letter. She seized it and looked at it.

"I wrote you another," she faltered. "Where did you get this?"

"Billy was playing train, and I was the engineer," he explained. "He was looking for train orders for me, and as he had used up a letter he had in his pocket for tickets he had to make a raid on your desk. When I saw this I could not wait for your return. I obeyed orders, like a good engineer."

"I think it was fate," she murmured. "I will obey the orders too."

And Orton never knew how much he owed to Billy.

Needed Watching.

"Yes, I left the baby in charge of his grandparents."

"But who's watching the grandparents?"

Spruce Gum

GUM stops the irritating tickle—takes away the soreness—soothes and heals the throat—and CURES COUGHS to stay cured.

None the less effective because it is pleasant to take.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

HE WAS JUST ABOUT TO MAKE A FORMAL OFFER OF HIS HAND.

ing through the hall the cook called that she had an apple turnover for him, and, tucking the note in his pocket, he turned his attention to the turnover.

It was perhaps an hour after that that Orton, coming back from the post-office, found Billy on the front piazza playing train. He was the conductor and the other children were passengers. Billy had a punch used for progressive eechre games and was collecting tickets with an enjoyment dashed only by the fact that he had no engineer to whom he could signal. Billy was su-

AUDITORS REPORT OF TOWNSHIP RICHMOND, JAN. 18, 1906.

To the Reeve and members of the Municipal Council of the Township of Richmond.

Gentlemen:—We your Auditors of Township accounts for 1905, beg leave to report as follows:

Having carefully examined the books accounts of your Treasurer for the year ending the 31st day of Dec. 1905 and having compared each item of Expenditure with its appropriate voucher we found them correct. The books of your Treasurer we found well kept and to us at least it was a pleasure to audit your accounts.

We herewith submit in duplicate Statement in detail of the Receipts and Expenditure for 1905. Statement of Assets and Liabilities of the Township on the 31st Dec. 1905 and also a Statement of the Principal and Interest of the Municipal Loan Fund and Clergy Reserve Fund which we think is quite necessary to give up to date Dec. 1905.

We examined your Treasurers Security and find no change since last year which we think is quite satisfactory.

FITS CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you.

LEIBIG'S FIT CURE

KEEP OFF ALL CATARRHAL ILLS BY TAKING PE-RU-NA

MR
GUSTAV M. SCHMIDT.

MR. HENRY SCHROEDER.

MR.
GEO. H. THOMPSON

Pe-ru-na a Household Friend.

Had Catarrh Thirty Years.—Pe-ru-na Cured Him.

Mr. Gustav M. Schmidt, Spring Valley, Ill., writes:

"I had catarrh of the head and throat for over thirty years. It became worse every year.

"About three months ago I commenced to take Peruna and Manalin, and now I am entirely cured of that troublesome sickness. Your medicine is surely a blessing to mankind.

"You can truly say that you have not lived in vain, Doctor, and I thank you for the good you have done me. May you enjoy a long life to help suffering humanity."—Gustav M. Schmidt.

Dr. Hartman Makes Personal Use of Pe-ru-na.

In speaking of his own personal use of Peruna, Dr. Hartman says:

"For a number of years my professional duties have compelled me to be much on the road, traveling long distances by rail, night and day, exposed to all kinds of vicissitudes, sleeping and eating in different hotels continually, and through it all I have preserved myself from any derangement of the body resulting from catarrh of the throat.

"At the slightest evidence of a cold, a few doses of Peruna invariably checked it."

Mr. Henry Schroeder, Route 2, Napoleon, O., writes:

"I suffered for almost ten years with catarrh of the stomach and all doctoring was of no avail.

"I took nine bottles of Peruna and two of Manalin and am now entirely cured.

"I recommend the medicine to all who are afflicted with this disease. It is my household friend."—Henry Schroeder.

A Farmer's Talk to Farmers.

Before Dr. Hartman began the study of medicine he was a farmer boy. He was brought up on a farm in Southern Pennsylvania.

He belonged to that industrial, successful class of farmers known as the Pennsylvania Dutch, the best farmers in the world.

It was here that he early learned the lesson of pulling obnoxious things out by the roots.

Dr. Hartman's Method of Treating Catarrh.

Naturally, when he began the study of medicine his mind turned instinctively toward the removing of causes. He could not content himself with doctoring symptoms any more than his enterprising father could have contented himself by pulling off the tops of weeds to eradicate them from the soil.

The Doctor turned his attention early to the science of removing the cause of

diseases, believing that obnoxious symptoms would disappear if the cause of the disease was removed.

In other words, Dr. Hartman applied the common sense of the practical farmer to medicine, and after much experimentation Peruna was compounded.

The sensible farmer does not think of cutting off the tops of weeds to kill them. He pulls them up by the roots.

Dr. Hartman Interested in Farming

Notwithstanding Dr. Hartman's busy professional career, he still continues to be interested in farming. He is the owner and manager of one of the largest farms in the State of Ohio, with several thousand acres of the best tilled land in the Middle West, and with hundreds of the best blooded percheron horses ever imported or raised in this country.

Dr. Hartman relies upon Peruna entirely in case of sickness in his own family.

At Work on the Farm.—Praises Pe-ru-na.

Geo. H. Thompson, Raleigh, Miss., writes:

"I have been cured of catarrh by your medicines, Peruna and Manalin. I had been affected with catarrh of the stomach about all my life, and was taken bad every spring and summer.

"I used several kinds of patent medicines, but they did me no good. I then took a treatment under an M. D., which did me but little good. By this time I had got where I could eat nothing but a little soup. I had severe pains, had lost in weight and could not do anything.

"I began taking your medicines, Peruna and Manalin. I then weighed 125 pounds, but after taking 17 bottles of Peruna and one bottle of Manalin, I weighed 165 pounds.

"I am now at work on the farm and feel well all of the time. I eat all I want to and my friends say that I look better than ever before. I will ever praise Peruna for its healing power."

Geo. H. Thompson.

A reward of \$10,000 has been deposited in the Market Exchange Bank, Columbus, Ohio, as a guarantee that the above testimonials are genuine; that we hold in our possession authentic letters certifying to the same.

SYDENHAM.

Dan Shea fell out of his buggy on Wednesday night and broke his arm. A little girl of O. McFarland's was run over by a horse and cutter on the ice and broke her collarbone.

The Hornerites are holding revival services in the church.

Mr. John McRay and family have moved in Mrs. L. Toll's house.

Miss Anna Collins and Mr. Fred Denison, Hartington, were married at the home of the bride's mother, Mrs. James Collins, Jan. 31, by the Rev. Mr. Binell.

Mrs. H. Stoness and daughter Minnie are visiting friends at Sanbury and Battersea.

"Officer, what is this man charged with?"

"Carryin' congealed weapons, yer honour."

"Carrying what?"

"Congealed weapons. He soaked Murphy in the eye wid a chunk av ice."

An Observing Youngster.

Papa (sternly)—Come here, sir. Your mother and I agree that you deserve a sound whipping. Small Boy (bitterly)—Oh, yes, that's about the only thing that you and mamma ever do agree about.

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST: Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleansing bath room, pipes, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. C.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft

There was a dispute among three ladies as to which had the most beautiful hand. One sat by a stream and dipped her hand into the water and held it up, another plucked strawberries until the ends of her fingers were pink and another gathered violets until her hands were fragrant. An old, haggard woman, passing by, asked, "Who will give me a gift, for I am poor?" All three denied her, but another who sat near, unwashed in the stream, unstained with fruit, unadorned with flowers, gave her a little gift and satisfied the poor woman, and then she asked them what was the dispute, and they told her and lifted up before her their beautiful hands. "Beautiful indeed," said she when she saw them, but when they asked her which was the most beautiful she said, "It is not the hand which is washed clean in the brook, it is not the hand that is tipped with red, it is not the hand that is garlanded with fragrant flowers, but the hand that gives to the poor is the most beautiful." As she said these words her wrinkles fled, her staff was thrown away and she stood before them an angel from heaven, with authority to decide the question in dispute, and that decision has stood the test of all time.

STATE LOTTERIES.

They Were Once Very Common and Very Popular in Europe.

Lotteries were common in ancient Rome, and during the middle ages lotteries were utilized by the Italian merchants for the disposal of their goods. Some of the Italian states then adopted the lottery as a means of raising revenue, and the institution of state lotteries afterward became very common and very popular throughout Europe.

The earliest English state lottery of which there is any record was in 1569, when 40,000 chances were sold at 10

place in the west door of St. Paul's cathedral.

The prizes consisted of articles of plate, and the profits were employed for the repair of certain harbors. Early in the reign of Queen Anne private lotteries were suppressed "as public nuisances," but government lotteries, however, were still maintained, and from 1700 to 1824 considerable sums were annually raised in lotteries authorized by acts of parliament.

The average yearly profit to the government from 1700 to 1824 was over £340,000. On the ground of injury to public morals lotteries of all kinds were abolished in England in 1826.—London Saturday Review.

FORGET YOURSELF.

No One Can Grow While His Thoughts Are Self Centered.

Forget yourself. You will never do anything great until you do. Self-consciousness is a disease with many. No matter what they do, they can never get away from themselves. They become warped upon the subject of self analysis, wondering how they look, how they appear, what others will think of them and how they can enhance their own interests. In other words, every thought and every effort seems to focus upon self; nothing radiates from them.

No one can grow while his thoughts are self centered. The sympathies of the man who thinks only of himself are soon dried up. Self-consciousness acts as a paralysis to all expansion, strangles enlargement, kills aspiration, cripples executive ability. The mind which accomplishes things looks out, not in; it is focused upon its object, not upon itself.

The immortal acts have been unconsciously performed. The greatest prayers have been the silent longings, the secret yearnings of the heart, not those which have been delivered facing a critical audience. The daily desire is the perpetual prayer, the prayer that is heard and answered.—Success.

What the Blind See.

"I can always tell when people are looking at me," said a blind man. "Indeed, nearly all blind persons can tell when people are looking at them. I have always about me a soft golden glow of light. When people whom I like come into my presence this glow becomes paler, lovelier. When those I dislike are about the glow is darkened and besmudged. I can tell what kind of characters people have by the touch of their hands. There is individuality in the touch. A man's touch shows me whether he is alert or sluggish, cold or passionate, kind or cruel."

DESTRUCTIVE ARTISTS.

The Ruin They Wrought While Smarting Under Criticism.

By no means unusual was the destruction of the Borglum angels in the Cathedral of St. John the Divine by the sculptor himself while smarting under the criticism that there were no male angels shown.

Gerome, the famous French sculptor, had been working six weeks on the clay model of a group representing Spring. It had almost reached completion when the artist became convinced that the treatment was wrong, and in a minute he had beaten the entire group into a shapeless mass of damp clay.

Hogarth destroyed a picture which had been somewhat severely criticised by one of his friends, but the most spectacular destruction is related of Chattran, who for a time had a studio in New York. He was visited by the husband of an American woman whose portrait he was painting, \$5,000 being the agreed price. The husband, while admitting it to be a splendid work of art, declared that he could see abso-

ERRORS OF SPEECH.

Common Abuse of the Verbs to Get, to Lay and to Lie.

The verb to get is one of our much misused words. It means to acquire, win, obtain, and primarily it signifies the putting forth of effort to attain something. Consequently it is not only superfluous, but incorrect, to speak of a man as "getting drowned" or "getting sick," and you may unfortunately "have a cold," but it is impossible that you "have got a cold." At this moment no exceptions occur to the writer to the rule that got should never be used in connection with have, which alone sufficiently expresses possession. Say "I have the picture," not "I have got the picture." "The dog has a broken leg," not "The dog has got a broken leg."

The irregular verbs lay and lie are frequently confounded. Lay is an active or transitive verb, and lie is passive or intransitive. We lay things down or have laid them down, but we and things lie at rest. You lie down, have lain down, will lie down or are lying down; she lay down yesterday and is going to lie down this afternoon. A frequent error is to confound the past tenses of these verbs. One should say, "Mary laid the book on the table and lay down herself," but the book lies on the table.

Always on Deck.

When the "unexpected happens," As it's bound to do, you know. It finds somebody waiting To shout, "I told you so."

Honest Confession.

Jack—And do you always speak the truth about your friends?

Lola—Yes, but not until after they are gone.

FROM BIRTH TO OLD AGE

Life is a constant fight against the dangers of disease, and he holds his own the best who keeps his body and its functions in the best working trim.

There are times in every life when Nature gratefully accepts a little aid. She does not want a whipping up for that is inevitably followed by destructive reaction. In most cases a tonic and alterative properly compounded will afford the required help by promoting digestion, assimilation and reconstruction of tissue and reducing waste of vital nerve forces.

It must not be an alcoholic stimulant—just a vegetable tonic. Meeting these needs and conditions Dr. Pierce's Golden Medical Discovery has been as successful as these forty years ago has accumulated a record of cures unequalled in the history of medicine. It is composed of non-alcoholic, glyceric extracts of Golden Seal root, Queen's root, Stone root, Black Cherrybark, Goodroot and Mandarins root, and by special processes perfected by Dr. Pierce, in his own laboratory, so combined in the most exact proportions, and their medicinal properties preserved without the use of alcohol as to render it a safe and effective remedy for use in the family without consulting a doctor. Young or old can take it freely as needed, and now that its composition is published, there is no ground for prejudice against it as a patent medicine or secret medicine. It is better.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pleasant Pellet" is a gentle laxative and two a mild cathartic. Laxatives sell them, and nothing is "just as good."

Dr. Pierce's great thousand-page Illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 31 one-cent stamps, or cloth-bound for 50 stamps.

Beyond Criticism.... "SALADA"

CEYLON NATURAL GREEN TEA

Is a perfectly pure tea of the highest quality.

LEAD PACKETS ONLY. 400, 500 AND 600 PER LB. AT ALL GROCERS.

HIGHEST AWARD ST. LOUIS, 1904

WONDERFUL ENDURANCE.

"There's one thing I will say," remarked Mr. Cumrox, "and that is that my daughter Arabella has a fine disposition!"

"Indeed?"

"Yes, sir. The way she can sit for hours listening to herself play on the piano shows remarkable self-control!"

THE PEOPLE STARED.

Mrs. Spendcash (the possessor of a new Worth costume)—"Did you notice how people stared at us last evening?"

Husband (meekly)—"Yes; I made a mistake and had mended my old dress coat with white thread!"

HE DIDN'T CALL AGAIN.

Mr. Deadgone—If I give you a penny, Tommy, do you think you could manage to get me a lock of your sister's hair?

Tommy—Yes; but not just now; she's wearing it.

DELICATE FROM BIRTH.

In three words—"delicate from birth"—is expressed a world of anxieties suffered by mothers whose babies have had a bad start in life. For babies who are ailing, peevish, cross and unable to digest their food Baby's Own Tablets are invaluable. They act almost like magic and change cross, peevish children into smiling, happy babies. Mrs. J. W. Munroe, Sinaluta, N.W.T., says:—"I have used Baby's Own Tablets for two years and would not like to be without them. They have changed our weak, sickly baby into a fat, healthy little girl. I can warmly recommend the Tablets to other mothers." And mothers have a guarantee that the Tablets contain no poisonous "soothing" stuff, or harmful drug. They are absolutely safe and always do good. Sold by all medicine dealers or by mail at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

He—I am told he has more money than he knows what to do with. She—Has he really? Such ignorance must be bliss.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"A man can be almost anything he's a mind to be," remarked Wiseman. "Yes; in his mind!" murmured Synnick.

Warrior Woes.—Through damp, cold and exposure many a native soldier who left his native hearth as "fit" as man could be to fight for country's honor, has been "invalided home" because of the culture of the battle ground—Rheumatism. South American Rheumatic Cure will absolutely cure every case of Rheumatism in existence. Relief in six hours.—98

Philanthropist—My poor man, you are in trouble, I see. Why do you wring your hands? Hobo—I just washed 'em.

IN THE BALTIC PROVINCES

THE CHARACTER OF THE PEOPLE NOW IN REVOLT.

Race That Is Neither German Nor Russian—Language and Literature.

Russia's Baltic provinces are at the present time busily engaged in making history, so that the following facts may be of interest. Esthonia, Kurland and Livonia are the districts principally involved. In all three the aristocracy is German in language and race, but composes only a small part of the population. In Esthonia the vast majority of the inhabitants are Esths, a Finnish people of Uralo-Altaic stock. Livonia and Kurland are inhabited chiefly by the Letts, closely allied to the Lithuanians. The Russians constitute but a small fraction of the inhabitants of the district. In the thirteenth century the heathen peoples dwelling on the shores of the Baltic were subjugated by the Knights Sword-Bearers and Teutonic knights, who introduced

THE GERMAN CIVILIZATION.

With the Lithuanians the Letts constitute a separate division of the Aryan, or Indo-European family. The old Prussians belonged to the Letto-Lithuanian stock.

These Letto-Lithuanians are physically well built. The face is mostly elongated, the features fine. The very fair hair, blue eyes and delicate skin distinguish them from the Poles and Russians. Their dress is usually plain in comparison with that of the Poles, and grayish colors predominate in it. Their language has great similarity to the Sanskrit. The popular poetry of both the Letts and Lithuanians is rich in both idyllic and lyric songs, imbued with the tenderest love and melancholy and a most poetical feeling for nature, and are remarkable for their absolute chastity. The national character is fully expressed in them—not warlike at all, but melancholy and sociable. In the Lettish songs there is an added characteristic, the hatred which the people feel toward the German landholders.

EARLY RELIGION.

Despite the fact that the people are either Lutherans or Roman or Greek Catholics, the names of their old pagan divinities, very numerous in their former mythology, are continually mentioned in songs and also in common speech. The forests of Livonia and Kurland have played an important part in their history. Their chief priest worshipped in the forests, the people brought their offerings to their divinities at the foot of mighty oaks, and even during the fourteenth century the "zincz," an inextinguishable fire, was maintained. To this day traces of the worship of oak trees may be seen.

A MOTHER'S DUTY.

THE HEIR OF SANDLEIGH

OR THE STEWARD'S SON

CHAPTER XXXIII.

Guildford Berton flung himself into the chair lately occupied by Mr. Furlong, and clasped his forehead with his hands.

The revelation he had heard was so stupendous that he had scarcely realized it, or its effect upon his hopes and ambitions. How long he sat staring before him, and going over and over the pregnant words which Furlong had whispered, he did not know; but suddenly he was aroused by a sound of hammering at the door in the wall.

He started to his feet, white with fear, his over-strained nerves setting him shaking and trembling. Then he took the lantern, and with unsteady feet went down to the gate.

"Who's there?" he demanded.

"Is that you, sir?" came the response. "For God's sake, come up to the Court, Mr. Berton!"

He opened the door, but not fully, and, holding up the lantern, saw one of the grooms standing outside, holding a horse by the bridle.

"What is the matter, Marston?" he asked with dry lips.

"Come at once, sir," replied the groom. "The earl is dying—is dead by this time, I'm afraid."

Guildford Berton went back for his coat and hat, moving like a man in a dream.

"Here, take my horse, sir," said the groom, flurriedly. "I'll run on after you."

"Who sent for me?" asked Guildford Berton, as he sprang into the saddle.

"I don't know—her ladyship, or perhaps Mrs. Harmon. I was to tell you to come without loss of a moment."

Guildford Berton thrust in the spurs and tore off. A groom was in waiting, and took the horse, and the butler received him at the hall door.

"I'm afraid you're too late, sir," he said, in a hushed, awed voice. "The earl was taken worse soon after you went; a kind of fit, from all I can make out, and—"

Guildford Berton moved toward the stairs as Harmon came down. Her eyes were red, and she supported herself by the balustrade, and he had no need to ask the momentous question.

"Yes, sir," she said, with a sob, "his lordship is dead. A quarter of an hour ago—"

He stared up at her. He was not thinking of the earl, but of Norah.

"And—Lady Norah?" he said, almost inaudibly.

"My poor mistress!" was all she could say.

He looked down to hide the sudden flash which shot into his eyes.

"Did he—was he sensible?" he asked, in a hushed voice.

Harmon shook her head.

"I can't tell, sir, and yet I think he was at the last. It was a fit of some kind, and—and—yes, sir, I think he was sensible. He—he tried to speak—"

"Yes," he broke in, with barely concealed eagerness, "well?"

"He did say some words. He knew Lady Norah, and spoke her name, and—he spoke yours. It seemed as if he were trying to say something that was on his mind, but he could not. And—and I think that killed him, he not being able to make my dear lady understand. He—he seemed frightened of something, as if he wanted to warn her. Oh, I can't tell what he meant!"

Guildford Berton drew a breath of relief. It passed very well for a sigh of sympathy and sorrow.

"If I had only stayed!" he murmured, and he turned away, and wiped his eyes.

and hid her face, as if she could not endure even Harman's loving eyes.

Harman went downstairs, and found Guildford Berton pacing up and down the library.

"Will you not see me?" he said, before she could speak. "Yes, yes, I can understand! Will you bring me some sealing wax and a candle, please. And tell Marston to go to the station with this telegram for Mr. Petherick. They will send it before the postoffice people."

Still like a man in a dream, he sealed up the drawers in the bureau and the lock on the deed box, which had been brought from London and placed in its usual position in the library. He paused as he did so with a certain hesitation. Should he make a slight alteration in the will? But this hesitation only lasted a moment, and he affixed the seal without even opening the box with the duplicate key he had made.

Hushed footsteps sounded in ghostly fashion over the vast place, and suddenly a sound smote his ear that made him start and recoil. It was the big bell, which one of the old servants, in accordance with a custom of the house, had set tolling, to announce that the Superfine Earl had passed away. In all probability, of all the people who had known him, of all the great world in which he had been so notable a figure, only two persons shed a tear; the daughter, whose love he had persistently repulsed up to within the last few weeks of his life, and the serving woman, who wept more for Norah than for him. There was not a laborer on the estate, not a groom in the stable, who would not have had more mourners than the Right Honourable the Earl of Arrowdale, Baron of Skeirig, Viscount Normanton, knight of the two orders, and master of vast lands and gold.

No work was done that day in Sandleigh, and knots of villagers gathered in High Street, talking over the great man, who was wept less than the least of all the living.

Before noon two carriages arrived at the Court—one contained Lady Ferndale, who had hastened without a moment's delay to the side of her beloved Norah; the other brought the old lawyer, Mr. Petherick; and the same telegram, which had summoned him, had informed the newspapers of the death of the mighty peer.

"I had intended inserting an advertisement for the viscount—for the Earl of Arrowdale as he is now," said Mr. Petherick, who was a great deal shaken by the news; "but it will not be necessary now; he will read of the announcement of his uncle's death, and his own. Guildford Berton nodded. They were in the library, and he had been giving Mr. Petherick an account of the death—omitting the details Harman had related, and in their place assuring the lawyer accession, in any of the papers." That the earl had died quite calmly and peacefully. "Just passed away, indeed!" he said.

"He was not so old as I am," said Mr. Petherick, in a low voice. "Not nearly so old. And—Lady Norah—dear, dear!" He seemed to think more of her than the departed earl. "Poor girl, poor girl! So entirely alone in the world."

"Ah, yes," murmured Guildford Berton. "Fatherless and motherless; you knew her mother, the countess, Mr. Petherick?"

"Yes, yes, of course, it was sad, very sad! I'm—I'm almost glad she went before the earl! They were very unhappy—poor woman, poor woman! I see you have read up something, Mr. Berton."

case of Rheumatism in existence. Relief in six hours.—98

Philanthropist—My poor man, you are in trouble, I see. Why do you wring your hands? Hobo—I just washed 'em.

Like a bad habit a skin disease grows. Scrofulous humors, eczema and all eruptions may be cured with Weaver's Cerate, assisted internally by Weaver's Syrup. All Druggists.

"Sure, I hear you're a happy father. Pat." "Thin yez haven't heard but half av it. I'm two av thim. Ut's twins."

Do Not Delay—When, through debilitated digestive organs, poison finds its way into the blood, the prime consideration is to get the poison out as rapidly and as thoroughly as possible. Delay may mean disaster. Parmelee's Vegetable Pills will be found a most valuable and effective medicine to assail the intruder with. They never fail. They go at once to the seat of the trouble and work a permanent cure.

Nothing equals the arrogance of some men's so-called humble opinions.

"Hello, Jack!" called out little Harry. "Is Tommy in the house?" "Course he is. Don't you see his shirt on the line?"

Too Many People Daily With Catarrh.—It strikes one like a thunder-clap, develops with a rapidity that no other disease does. Dr. Agnew's Catarrhal Powder is the radical, quick, safe and pleasant cure that the disease demands. Use the means, prevent its deep setting and years of distress. Don't dally with Catarrh. Agnew's gives relief in ten minutes. 50 cents.—97

"He says his wife is largely responsible for his business success." "Well, she has certainly made it absolutely necessary for him to earn more money."

What should be forgotten? Everything that cures. What should not be forgotten? "The D. L. Mental Masters," a positive cure for muscular rheumatism and neuritis.

"But what reason have you for thinking women have no aim in life?" "Well, I've seen several of them try to throw stones."

"By Medicine Life May be Prolonged."—So wrote Shakespeare nearly three hundred years ago. It is so to-day. Medicine will prolong life, but be sure of the qualities of the medicine. Life is prolonged by keeping the body free from disease. Dr. Thomas' Electric Oil used internally will cure coughs and colds, eradicate asthma, overcome croup and give strength to the respiratory organs. Give it a trial.

The man with a dimple in his chin can see no beauty in whiskers.

Only a very lazy man is afraid to earn money because it may be tainted.

It's easier for a society girl to make her debut than it is for her to make her own clothes.

An old farmer went to a cattle show to exhibit a favorite cow, for which he had high hopes of winning first prize. On learning the result, and that his cow had been placed fifth, his anger knew no bounds, and rushing into the ring he attacked the judges. "Why is my cow not first? What are her faults I'd like to know?" At this point one of the judges approached him and answered, "Her faults, my good man, are somewhat akin to your own. She looks good breeding."

trees may be seen.

A MOTHER'S DUTY.

She Should Carefully Guard the Health of Her Growing Daughter—Her Future Happiness Depends on the Change From Girlhood to Womanhood.

Every mother should watch with the greatest care the health of her growing daughter. She is a girl to-day—to-morrow a woman. The happy health of womanhood depends upon this vital change from girlhood. When nature makes new demands upon her blood supply, you must build up her blood with Dr. Williams' Pink Pills. Her system is unequal to that strain if her back aches, if she is pale or thin, dull or languid. Dr. Williams' Pink Pills will give her new, rich, red blood and tide her over the crisis. Dr. Williams' Pink Pills will make her development perfect and regular—they will make her a strong, happy, graceful woman. Miss Emerine Villandre, St. Germain, Que., says: "While attending school my health began to give way. I suffered from headaches and dizziness, my appetite left me and I grew pale as a corpse. As the doctors did not help me, my father got me a supply of Dr. Williams' Pink Pills. Before I had used two boxes there was an improvement, and when I had taken a half a dozen I was again in perfect health. I believe all weak girls will find new health if they take Dr. Williams' Pink Pills."

Thousands of growing girls, and thousands of women owe health and happiness to Dr. Williams' Pink Pills. They keep the blood rich and pure and regular. They banish headaches and dizziness and backaches, and they bring the rosy glow of perfect health to pale and sallow cheeks. But you must get the genuine with the full name "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or sent by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

She delightedly: "Papa says if we want to get married he'll pay half the expenses of furnishing a house for us." He despondently: "But who would pay the other half?"

Prevent disorder.—At the first symptoms of internal disorder, Parmelee's Vegetable Pills should be resorted to immediately. Two or three of these salutary pellets, taken before going to bed, followed by doses of one or two pills for two or three nights in succession, will serve as a preventive of attacks of dyspepsia and all the discomforts which follow in the train of that fell disorder. The means are simple when the way is known.

Cassidy—"My! Of my, but 'tis natural he looks." Casey—"Aye, shure he looks fur all the world loike a boive man layin' there dead."

More Iron Needed in the blood of pale, run down people. "Ferrovin," the best tonic, will put it there. At all general stores and druggists.

Teacher: "Johnny, you may give me a definition of 'hypocrisy.'" "It's when a boy says he loves his teacher."

Holloway's Corn Cure is the medicine to remove all kinds of corns and warts, and only costs the small sum of twenty-five cents.

"Do you believe the old saying, 'There's no place like home?'" "That depends." "Depends upon what?" "Upon whose home you are referring to!"

Mr. Tymid: "I asked your father for his consent over the telephone." Miss Chance: "What did he say?" Mr. Tymid: "He said: 'I don't know who you are, but it's all right!'"

"Oh, Mrs. Binks," said a lodger to his landlady one day, "I wish you could give me a change for breakfast, as I get rather tired of a boiled egg every day." "Certainly, sir, I will do as you ask with pleasure." Next morning he was served with two boiled eggs!

as if he wanted to warn her. Oh, I can't tell what he meant!"

Guildford Berton drew a breath of relief. It passed very well for a sigh of sympathy and sorrow.

"If I had only stayed!" he murmured, and he turned away and wiped his eyes.

Then, a moment afterward, he was cool, self-possessed again.

"Will you tell Lady Norah that I am here, Harman?" he said. "And tell her, please, that I will see to everything that is necessary. If she would like to see me—"

Harman stole upstairs and into the silent room. Norah was kneeling beside the bed, as she had been so often for the last few weeks. Her face, hidden in her hands, her body shaken by her sobs. Harman knelt beside her, and laid her hand tenderly upon her arm.

"Don't—don't cry, dear mistress!" she faltered. "And yet—it's best!"

"If he had only told me what he wanted to tell me!" dropped from Norah's quivering lips. "Oh, what was it? What was it?" and she raised her head and looked with an agonized entreaty at the new placid face.

"I—I sent for Mr. Guildford, my lady," whispered Harman, "and he is downstairs. He will do everything, and he says if you'd like to see him—"

A shudder ran through Norah, and she turned her white face to Harman with a sudden vehemence.

"No!" she panted. "No, no!" and she dropped back into her former attitude

Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

SCOTT'S EMULSION

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

knew her mother, the countless, Mr. Petherick?"

"Yes, yes, of course, it was sad, very sad! I'm—I'm almost glad she went before the earl! They were very unhappy—poor woman, poor woman! I see you have sealed up everything, Mr. Berton. You are always thoughtful."

"I thought it best," said Guildford Berton, gravely. "I suppose you have the will?"

"No," replied Mr. Petherick, shaking his head. "No, I have not. I—I don't even know that there is a will; do you?"

Guildford Berton looked at him with faint surprise.

"How could I possibly know, my dear sir?" he responded.

"I—I thought that perhaps the earl—you were so much in his confidence—might have told you; in fact, I—ahem—expect you will find yourself personally interested in it?"

"Not at all likely," said Guildford Berton. "The earl was the last man to confide in any man on such a subject. There may be no will."

"God bless my soul, I hope so!" exclaimed Mr. Petherick. "It—it would make a vast difference to Lady Norah."

"Then I also hope there may be with all my heart," said Guildford Berton, devoutly.

Later in the day, when they met to discuss the arrangements for the funeral, Mr. Petherick remarked, quietly:

"I have found the will, Mr. Berton," and Guildford Berton bowed.

"I am glad to hear it, very glad," he said; but he asked no questions, and if he had Mr. Petherick would not have applied to them.

Lady Ferndale had hastened to Norah's side, expecting to find her prostrated, but she found her calm and self-possessed, looking as white as a lily, and worn out with weariness; but there was no passionate outburst of grief. That had spent itself beside the dead man, and her tears flowed quietly as she hid her face on Lady Ferndale's bosom.

"My poor darling!" murmured the elder woman. "You must come to us directly after—" she could not bring herself to say the word "funeral," but Norah shook her head.

"No, I must stay here till Lord Santleigh comes," she said. "There must be some one here to receive him, and tell him—tell him everything. Why does he not come, Lady Ferndale?"

"I—I don't know!" was all Lady Ferndale could answer. "But he will be sure to arrive in a day or two; he must hear of it, and then he will come at once."

Everybody said this when the strange delay in the appearance of the new earl was discussed, but it was the topic of conversation throughout the country; but still the young man who had inherited the title and lands of Arrowdale did not arrive to claim his birthright.

No English newspaper reached the wild coast of Brittany where Cyril Burne, the artist, was at work painting drearily, and no tidings of the death of his uncle reached him. If Jack Wesley had been in London he would have known what had happened, and informed Cyril, but Jack was in Brittany with his friend, and as he took care that no letters or papers should be permitted to mar his one holiday in the year, he was as ignorant as Cyril himself.

The days passed rapidly, and that of the funeral was reached, and Mr. Petherick was in despair. He had advertised for the missing viscount, and without any result, and he found himself in the position of an executor acting in utter ignorance whether the heir were alive or dead.

"Perhaps he is dead!" said Guildford Berton, grimly, and Mr. Petherick groaned.

"No," he said. "I don't believe it. We should have heard of it. But to think that the funeral will have to take place without the new earl as chief mourner—" His feelings were too strong to permit him to finish the sentence.

The day arrived, however, and the heir was still absent. There was a vast crowd at the funeral, and the salon was filled with distant connections and friends, who came with varied expectations to hear the will read.

If she could have done so, Norah would have shrunk from this ordeal, but Lady Ferndale gently pointed out to her

that it must be endured, and, amid a dead silence, she led her into the crowded room.

All eyes were fixed on the lovely face, its pailor accentuated by the black dress, and Mr. Petherick rose to get her a chair, but Guildford Berton stepped before him, and placed one in the window recess, so that she sat a little apart from the crowd, and with her face half hidden in the shadow of the curtains.

Norah did not raise her eyes to his face, but took her seat and sat motionless, and holding Lady Ferndale's hand tightly. The crowd of faces swam before her eyes, and the first words Mr. Petherick uttered in his thin voice sounded unintelligible in her ears. She knew that all the eyes, burning with suppressed eagerness and anticipation, were covertly regarding her, and her hand trembled in Lady Ferndale's loving clasp.

Mr. Petherick coughed in his nervous fashion, and fingered the will.

"Before I read the last will and testament of the Earl of Arrowdale," he said, his voice quivering, "I feel it my duty to express my regret at the absence of the—present earl. I have used every means to discover his whereabouts and acquaint him with the melancholy news, but have failed to reach him." There was an intense silence. "Sooner or later—soon, I trust—he will arrive, and—and—believe me, and all connected with the estate, of a serious responsibility, but until he does I must ask you to regard me as executor, as the person in charge."

Then he proceeded to read the will. Many glances of curiosity and envy and suspicion had been cast at Guildford Berton's tall figure as he stood just behind Norah and Lady Ferndale, and when, after reading out the small bequests, Mr. Petherick slowly recited the clause in which the earl bestowed his watch and chain—and nothing else—to his closest friend, Guildford Berton, a suppressed murmur of surprise and relief ran round the room.

Lady Ferndale was as surprised as any one, and her hand closed over Norah's significantly. But Norah made no sign. Mr. Petherick read on in the sing-song, unpunctuated legal voice, and presently he came to the clause relating to her. He read it slowly and impressively, and Norah felt rather than saw the hungry eyes fixed upon her. She heard nothing more until she found Mr. Petherick standing before her, with the will in his hand. All the rest had left the room, excepting Lady Ferndale and Guildford Berton.

"I—you will allow me to express my satisfaction, Lady Norah," said the old lawyer. "If I had drawn the will myself it could not have been more in accordance with the advice I should have given. Very right and—just, indeed."

Lady Norah looked at him vacantly, still holding Lady Ferndale's hand.

"A very just and proper will," said the old man, turning his spectacles on Guildford Berton, who stood with his hands clasped behind him, his eyes fixed on the ground.

"Yes," said Guildford Berton, in a low voice. "But how could the earl have done otherwise?"

At the sound of his voice Norah drew a little closer to Lady Ferndale.

"I—I do not understand," she faltered, almost inaudibly.

"Tell her," said Lady Ferndale, in a whisper, and she looked up at Guildford Berton.

He took a step forward.

"Your father has left you everything, that was his to bequeath, Lady Norah," he said. "Will you let me, too, say how rejoiced I am that it should be so?"

Norah raised her eyes to his face, which expressed a gratification consistent with his words, and not a sign of disappointment or envy.

"I do not understand," she said, almost piteously. "Am I—the viscount, the present earl, is he—?"

"Yes, yes," said Mr. Petherick, in the tone a lawyer adopts when he is enlightening ignorant womankind. "The viscount—that is, the earl—has the estates, the land with the Court, of course; but the rest is yours. It represents a vast sum—vast. The earl, your father, my dear young lady, had for some years saved a large portion of his income, and had been extremely fortunate in his in-

MIDDLE LOUISE BAR CLAIMS
STRANGE GIFT.

French Girl Whose Methods Are to Be Investigated by the Law.

Fair-haired, blue-eyed, pretty, and not yet twenty-two years of age, Middle Louise Bar, of Paris, France, has further been endowed by nature with supernatural powers. When in a trance she "sees through people," in a literal sense her mind's eye, like a Roentgen ray, perceives the organs of the person under observation, notes how they perform their functions, and can detect whether they are in good working order or no. Nor is this all. Young Middle Bar has also been gifted with the power of diving instantly the exact process whereby what she perceives wrong in you can be set perfectly right. These remarkable capabilities have naturally been turned to account by Middle Bar and her father, who seems to be himself a retired magnetizer, and between them they have "cured thousands of sufferers."

THREW BIBLES INTO SEA

THE VOYAGE OF THE STEAM YACHT
PANDORA.

Explorer Charged With Throwing Away
Gifts Sent to Tristan da
Cunha.

Do the Islanders of Tristan da Cunha have? This interesting problem was rounded at the Old Bailey police court, London, by Mr. Justice Grantham, but no one was able to enlighten his lordship.

The question had reference to the charge against a fair-haired, nautical-looking man, who was in the dock, no less a personage than Mr. Thomas Caradoc Kerry, the redoubtable explorer of the South Seas, and captain of the famous steam yacht Pandora.

The details of a certain historic voyage of the Pandora to Tristan da Cunha are already well known. It has been told in the police court how the explorer Kerry obtained the concession to trade in guano at the island, and how in return for the concession he agreed to take out gifts from charitably-minded English people to the poor isolated islanders.

BIBLES OVERBOARD,

Among these gifts were many books from the Duchess of Bedford, being distinguished and edifying books from

Mr. Ignorant womankind. "The viscount—that is, the earl—has the estates, the land with the Court, of course; but the rest is yours. It represents a vast sum—vast. The earl, your father, my dear young lady, had for some years saved a large portion of his income, and had been extremely fortunate in his investments; extremely so. It really seemed as if every... he touched turned to gold. On several occasions I felt it my duty to utter a word of warning respecting some of the speculations in which he embarked, but he always had his way, and I am bound to say that the results proved me wrong and him right. It is impossible at this juncture to give an approximate estimate of the sum he has left you, but it must be very large—very large indeed. I am—as Mr. Berton has said—greatly rejoiced. He looked round to bow to that gentleman, but Guildford Berton had glided from the room.

(To be continued).

THE CAUSE OF WOMAN'S TROUBLE

IS DISEASED KIDNEYS AND THE CURE
IS DODD'S KIDNEY PILLS.

Wonderful Cure of Mrs. James Kinsella,
Who Slept in a Chair for Two Summers—What She Says of It.

St. Malachie, Que., Feby. 5.—(Special).—A cure of great interest to women has attracted the attention of those interested in medical matters in this neighborhood. Mrs. Jas. Kinsella, wife of a well-known citizen, had suffered from a complication of troubles for about two years. She had a pain in the right hip, in the back and was obliged to pass water every fifteen minutes in a burning itching sort of way.

She could not sleep at night and had to sit up in a chair for two summers. Dodd's Kidney Pills cured her.

Mrs. Kinsella, speaking of her cure, says, "After the first box of Dodd's Kidney Pills I felt much better. Then I got more and they did me a world of good. I have never slept in the chair since I used Dodd's Kidney Pills.

Woman's health depends on her kidneys. Nine-tenths of the so-called female complaints are caused by uric acid in the blood. Cure your kidneys with Dodd's Kidney Pills and you can have no uric acid in the blood.

"He's very rich, but very unhappy." "Wealth doesn't always bring happiness." "Still, if one is going to be unhappy, it is better to be unhappy with money than without it."

Itching Piles.—Dr. Agnew's Ointment is proof against the torments of itching Piles. Thousands of testimonials of cures effected by its use. No case too aggravating or too long standing for it to soothe, comfort and cure. It cures in from 3 to 6 nights. 35 cents.—95

Young 'Un: "I've had five thousand left me by an uncle who's never seen me." Old 'Un: "That explains it!"

There is nothing equal to Mother Gray's Worm Exterminator for destroying worms. No article of its kind has given such satisfaction.

"What makes you imagine your husband would make a successful writer of fiction?" "The stories he tells me."

"A Grave yard Cough" is the cry of tortured lungs. For me, or Give them Auen's Lung Balm—which is a useful with good effect even in consumption's early stages.

JONES' CHANCE.

Little Brother—Do you know what I think?
Sister—No; what is it?
Little Brother—I think if I were not in the room Mr. Jones would kiss you.
Sister—You impudent wretch! Leave the room instantly!

capabilities have naturally been turned to account by Middle. Bar and his father, who seems to be himself a retired magnetizer, and between them they have "cured thousands of sufferers."

SEEING THROUGH THE JUDGE.

Unfortunately the law stepped in and prosecuted them, whereupon they had to obtain the services of a certified medical practitioner, whose powers are no supernatural, but merely acquired by study, and who assisted the young lady in writing out the prescriptions.

Nevertheless, the law has come down again, this time upon all three persons. Most indignant, M. Bar, senior, and Middle. Bar went to the courts to prove the young lady's powers in the presence of the examining magistrate. A medical expert put Middle. Bar into a trance and verified by the usual experiments that she was in a genuinely hypnotic condition. To test her clairvoyance, colors were set before her, and she generally mistook one for the other. This could not disprove her gift of healing power. But when it came to testing the latter the medical expert refused. M. Bar, senior, was furious, and Middle. Bar, on coming to, was equally vexed. She insisted on being put into a second trance and "seeing through" the persons present. "I will see through you, monsieur, the judge," she cried to the examining magistrate. "I will, and shall see what is the matter with you and tell you what to do to get better."

WELCOMED BY PATIENTS.

But the magistrate obstinately affirmed that he was quite well, and refused to be seen through. Middle. Bar eventually had to leave without having "sensed" him. Outside the law courts about two dozen former patients, including a policeman and a gendarme, shook hands warmly with the clairvoyant, who had cured them of various diseases. "At my trial," she says, "they will all come in their thousands—the blind, and the halt, whom I have caused to see and to walk straight."

OVER SEA HABIT.

Difference on This Side of the Water.

The persistent effect upon the heart of caffeine in coffee cannot but result in the gravest conditions, in time.

Each attack of the drug (and that means each cup of coffee) weakens the organ a little more, and the end is almost a matter of mathematical demonstration. A lady writes from a Western state:

"I am of German descent and it was natural that I should learn at a very early age to drink coffee. Until I was 25 years old I drank scarcely anything else at my meals.

"A few years ago I began to be affected by a steadily increasing nervousness, which eventually developed into a distressing heart trouble that made me very weak and miserable. Then, some three years ago, was added asthma in its worst form. My sufferings from these things can be better imagined than described.

"During all this time my husband realized more fully than I did that coffee was injurious to me, and made every effort to make me stop.

"Finally it was decided a few months ago, to quit the use of coffee absolutely, and to adopt Postum Food Coffee as our hot table drink. I had but little idea that it would help me, but consented to try it to please my husband. I prepared it very carefully, exactly according to directions, and was delighted with its delicious flavor and refreshing qualities.

"Just as soon as the poison from the coffee had time to get out of my system the nutritive properties of the Postum began to build me up, and I am now fully recovered from all my nervousness, heart trouble and asthma. I gladly acknowledge that now, for the first time in years, I enjoy perfect health, and that I owe it all to Postum." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville" in pkgs. Postum Food Coffee contains no drugs any description whatsoever.

turn for the concession he agreed to take out gifts from charitably-minded English people to the poor isolated islanders.

BIBLES OVERBOARD.

Among these gifts were many books from the Duchess of Bedford, being distinguished and editing books from Woburn Abbey, many Bibles from other benevolent folk, and various further articles that the kind-hearted thought the islanders would find useful.

But Kerry, the explorer, it is alleged, took a different view quite early in the voyage. At Gravesend, on the first day out, he tipped carelessly of Bibles into the river, with the remark, "I do not want that stuff," and other islanders' comforts including 1,000 books and Bibles, he sent down, it is alleged, to Davy Jones near the Equator.

This romance, Mr. Gill, K.C., repeated to Mr. Justice Grantham, charging the explorer with "theft as a bailee."

FIFTEEN VOLUMES APIECE

The judge casting aside all temptation to revel in the romance of it all, immediately examined matters from a utilitarian point of view. There are 100 islanders on Tristan da Cunha, he pointed out, and the Pandora had included in her cargo 1,500 books and Bibles. This would be at the rate of fifteen books and Bibles to each islander.

The judge also inquired about the kind of islander who was to be the recipient of this wealth of literature. He was informed that the inhabitants are the descendants of shipwrecked sailors and a party of seamen which was sent to annex the island in 1885.

So thorough was his Lordship's analysis of the nature of the library that, when it was stated that some of the volumes contained undesirable insects, he said: "Were the insects to be delivered as well?" (Loud laughter.)

THANKS OF ISLANDERS.

Even the island's babies interested his Lordship. Counsel on side said that there were no babies, and counsel on the other side that the place was overrun with them.

It was, when a consignment of cheap razors was mentioned that the judge asked whether the islanders shaved.

During the day Mr. Gill read a letter which Explorer Kerry wrote to the Colonial Institute on his return from the eventful voyage. In it the explorer said: "I found the islanders well and happy, and they were delighted with your presents, which I personally distributed."

To the Duchess of Bedford he wrote: "The islanders particularly requested me to convey to your Grace their most sincere thanks for your Grace's kind present."

Yet, according to Mr. Gill, it had all gone to Davy Jones!

"Here," said the clerk at the Skinnem Hotel, "we have eight hundred servants." "Well," said the departing guest, "I must have overlooked four or five. I'm sure I haven't tipped so many as that."

Old Cashly (giving his son a cheque): "Now, be careful, my boy. Remember, a fool and his money are soon parted." Spendall Cashly: "Yes, sir; and thank you for having obliged me so promptly."

"Spooney told Miss Blondie that she was the light of his life, and now she won't speak to him." "Why not?" "Well you know, she is red-headed."

Though they had never met b-4, What cause had she 2 care? She loved him tenderly because He was a 1,000,000aire!

"You may refuse me now," said the persistent suitor, "but I can wait. 'All things come to him who waits.'" "Yes," replied the dear girl, "and I think the first thing will be father; I hear him on the stairs."

Bacon: "You say your artist friend is industrious?" Egbert: "Very. Why. I've known him to work over four years on one picture." Bacon: "Is that possible?" Egbert: "It is. He was a month painting it and four years trying to sell it!"

Farmers Wanted as Land Agents.

Farmers wanted all over Canada as agents for Western Canada lands; all selected lands; liberal commission. Address "Farm Lands," P. O. Box 528 Winnipeg, Man.

"Good-night," he whispered, passionately, at the front door; "good-night good-night, good-night, goo—" "Excuse me," said an elderly bass voice over the baluster, "but it's been good morning for the last two hours. I thought you'd like to know."

How Dr. Von Stan's Pineapple Tablets Give Instant Relief.—They're handy to carry—take one after eating—or when ever you feel stomach distress coming on—sufferers have proved it the only remedy known that will give instant relief and permanent cure—no long tedious treatments with questionable results—best for all sorts of stomach troubles. 35 cents.—95

They had not been married very long and that complete blissful trust which young husbands and wives have in each other had not yet been broken. But one morning wife meekly remarked: "I mended the hole in your trousers pocket last night after you had gone to bed John, dear. Now, am I not a thoughtful little wife?" Husband (dubiously): "Well—er—ye-es, you are thoughtful enough my dear. But how the mischief did you discover there was a hole in my pocket?"

If you are a sufferer from colds get a bottle of Bickle's Anti-Consumptive Syrup and test its qualities. It will be found that no praise bestowed on it is too high. It does all that is claimed for it, and does it thoroughly. Do not take any substitute for Bickle's Syrup, because it is the best, having stood the test of years. All the best dealers sell it.

Mrs. Wise: "The new girl Mrs. Close keeps has got must be a jewel." Mrs. Young: "Why, she complains about her more than she did about any of her others." "Of course. She wants us all to think that the girl isn't worth enticing away."

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you, it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day. Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:— "I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better, until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

"GOD WITH US"

Sermon By the Emperor William of Germany.

Text:—"The Lord of Hosts is with us."—Psalm xlv., 7.

Once again the kindly hand of God has brought us together, and once again the week shall be hallowed by our earnest worship of the Lord. "Religious services," some one has said, "should be the milestones of the path of man's journey through life and bear the inscription 'Nearer to God.'" These religious services of ours are likewise to be more than a venerable custom or a solemn ceremony—they are to be founts of strength for the human soul that lives most deeply within us.

If to-day the holy day of Trinity is being celebrated throughout Christendom—if the Christmas bells mingle their clear sounds to chime forth the message—"God to us," the Easter bells the announcement, "God for us," and the bells of Pentecost the promise "God in us"—where then could we find in this present hour a more beautiful confession than the word in which the Psalmist reveals the boldness of his faith: "The Lord of hosts is with us," or transposed into the tongue of the Prussian, into the tongue of the soldier, the legend: "God with us?"

"God with us"—only three short words, three syllables only, merely nine small letters—and yet if anyone could tell the story of this legend, it would be a long and

A GLORIOUS TALE.

Who could name the places on which these three words are inscribed? They are engraved on every Prussian thaler, gratefully confessing: "I come from the hand of God—the blessing of God is all a thaler." These words brilliantly embellish Prussian orders, answering to the question: "How hast thou been earned?" with the reply: "With God's help," and thereby proclaiming the concurrent warning: "Give all honor to God! God with us!"

Who can name the men, and name them all, who have armed themselves with this legend? Whether the favorite device of Margrave George was: "If God be with us, who would be against us?" whether the Elector Frederick II. chose the legend: "God forsaketh not him who put their trust in Him!" whether Emperor William the Great acknowledged: "God was with us—all honor to Him!" still in their hearts they bore the flaming watchword: "God with us!"

Who could count all those hours in which this legend has blazed up and shown its wondrous power? I will recall only one: the day of Lutten. What was the password of that sixteenth day of November, 1632. What was the war-cry of the Swedes, as they stormed to the advance? Under what did they battle, shed their blood and conquer? It was the device that consists of those three unflinching words: "God with us." And so they still remain in our days, cast into metal on the soldier's sword-belt, a visible emblem of the truth that

THE SOLDIER'S LOYALTY,

his strength and his discipline are rooted in that legend: "God with us!"

Still, what would it avail to have this device on our orders and coins, on our escutcheons and shields, if it was not inscribed in our hearts? No, the essential point is that it shall become our device, that legend: "God with us!"

Oh, look once into this life with consecrated eye! Is it not then the whole sum of it contained in those words "God with us"? Who gave thee this life? Who has guarded thee by day and night, and placed His angels behind thee in the gravest hour? Who has cared for thee from year to year? Who hath blessed thee with so much joy, and upheld thee

Christian's hope: "God with us. He who has no faith in God soon loses his courage, while faith possesses a heroic force, uplifting man above the cares and burdens, the pains and sufferings, of this life, and enabling him to triumphantly exclaim, even in deepest darkness: "The Lord of hosts is with us! The God of Jacob is our refuge!"

Well then, write thou into thy young heart the watchword of the courageous: "God with us!" Never allow it to be wiped out nor let it be borne away by the winds! Hold it fast with sacred earnestness! Let it be thy guide throughout life! Then go joyfully and undauntedly on thy way, and sing this marching song:

Since God is in His Word revealed
'Gainst devil, world and hell our shield,
And all that fain would wound down us,
Contempt will be their final lot,
God is with us, we are with God,
And victory shall crown us!

THE EMPEROR'S PRAYER.

"Our Father which art in Heaven. Hallowed be thy name. Thy kingdom come. Thy will be done on earth as it is in heaven. Give us this day our daily bread. And forgive us our trespasses as we forgive them that trespass against us. And lead us not into temptation, but deliver us from evil: For thine is the kingdom and the power and the glory, for ever. Amen."

Lord our God, heavenly Father, Thou art our refuge for ever and ever. Thine we are and thine we will remain. Let thine holy eye watch over us. Let thy faithful hand guide us. Never yet hast thou forsaken us. Neither will we evermore forsake thee. Thine will we remain for all time and in eternity. Amen.

"The Lord bless thee and keep thee: The Lord make His face shine upon thee, and be gracious unto thee: The Lord lift up His countenance upon thee, and give thee peace."

THE BALANCE OF POWER

THE ANGLO-GERMAN CLASH HAS BECOME APPARENT.

Great Britain Has Become Stronger in Asia, But Has Lost Caste in Europe.

Nothing has attracted greater attention in the diplomatic world recently than a work just issued by the well-known political writer, Andre Cheradame, on "The World and the Russo-Japanese War."

The author draws up a highly suggestive balance sheet of profit and loss for the great Powers, and his views in regard to a necessary readjustment of the balance of power in Europe are among the soundest yet advanced publicly.

He points out that while England's position has greatly improved in Asia it has become more doubtful in Europe, where she finds her requirements constantly opposed by those of Germany. The latter would wish to see Russia cease to interest herself in European affairs and become victorious in the Pacific. England, on the contrary, needs a Russia which would renounce her preponderance in Asia but would consolidate a powerful position in Europe. England has no interest in provoking war between France and Germany, but if such a war were to break

YOUNG FOLKS

A LITTLE CONFESSION.

It happens when I go to bed
With naughty thoughts within my head,
The room looks dark an' seems to be
All full of shapes that glare at me,
An' point their fingers out, an' say:
"This is the boy that lied to-day!"
I cuddle down an' try to sleep,
But still those voices seem to keep
A sayin' out there in the dark:
"He lied to-day," an' then I hark
To hear if mother's voices there.
A listenin' to those voices there,
I've somethin' in my breast that thumps,
An' makes me turn, with starts an' jumps,
At every tiny little noise—
I wonder if all girls an' boys
Feel that way if they've ever said
A lie before they went to bed.

HER FIRST PARTY.

"Mother, I almost know it's going to be pink silk!" cried Margery, bursting into her mother's room in great excitement. Margery usually began her stories in the middle, and with patience one must gather up the ends.

"There are going to be six—" she continued.

"Six pink silk dresses?" asked her mother. "Now, Margery, dear, this time I am not going to form any opinion until you tell me exactly what it is all about."

"Well, it is about Dorothy's uncle, and he is in Japan, and he is going to send her a box, and Dorothy isn't to open it until the party, and then we are all to stand round and help take out the things; and I almost know you will get my summer dress and it will be pink silk. There!"

"And you don't know the day?"

"Well, she thinks it will be about two weeks, and she is ready to tell us at a minute's notice."

The story was out at last, and Margery sat in a dream for a moment. "I am a little bit afraid," she said at last. "I never went to a party, and I am afraid I don't know the games."

"I think you will get on nicely—if you think of others more than yourself," her mother said, gently.

The family was destined to know all about the party in the next few weeks, for there was no other topic of conversation. The dress was bought, and as it was a simple, washable silk, she was allowed to look forward to wearing it. She stood up patiently to be fitted—it is so much easier to be fitted for a pretty silk than for a plain common one! The box seemed delayed, for days went on and there was no summons to her friend's house. Margery grew more nervous and surer still that she should be "afraid" to play the new games.

One day she thought she would go up and call on Dorothy, and as she came up the walk she was surprised to find three little girl friends at the window. She saw that they were in their best frocks, but that did not trouble her, as she had only come to call. They urged her to come and join a game they were about to play, and when they were planning it out several others came, and then the fun began.

It was nearly dark when Margery came home, running breathlessly into the kitchen, and asking Kitty where the note was that had been left that morning.

"Sure, I forgot, and it's behind the clock."

Margery took it and ran to her mother and father in the library.

"Why are you so late?" asked her father, a little severely.

"Why, I didn't have my pink dress on, and it was the party, and I wasn't afraid!" panted Margery, holding up a bright little handkerchief.

"Partly! Where?" asked her father.

"Why, it was behind the kitchen clock, and the box came, and there were big fans and little fans, and vases, and a wee little clock, and some lanterns."

THE S. S. LESSON

INTERNATIONAL LESSON,
FEB. 18.

Lesson VII. A Day of Miracles in Capernaum. Golden Text,

Mark 1. 34.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Chronology.—The events of to-day's lesson probably followed immediately upon those of last Sunday's lesson, as indicated by the order in which Mark arranges his narrative at this point (comp. Mark 1. 16-21, ff.). Luke reverses the order of events, placing the day of miracles at Capernaum before the calling of the four fishermen (comp. Luke 4. 31 to 5. 1, ff.). Matthew records only, and in another connection, the healing of Peter's mother-in-law and the miracles of healing wrought by Jesus after sunset of the same day (comp. Matt. 8. 14-17).

Verse 21. They go—Jesus together with the four men whom he had just called from their occupation as fishermen to become his disciples.

Into Capernaum—it was doubtless very near to Capernaum that the marvelous draught of fishes had been taken, since this city seems to have been the home of Simon and Andrew, and very probably of James and John, the partners of Simon and Andrew, also (comp. verse 29). Capernaum is mentioned only in the gospel narrative and derives all its interest from its association with incidents in the life of Christ. The ancient city once highly favored has been utterly destroyed (compare the prophecy of Matt. 11. 23 and Luke 10. 15), and even its location is to-day a matter of dispute. From Matt. 4. 13 we know that Capernaum was situated on the shore of the lake, and from John 6. 17-21 that it was in or near the plain of Gennesaret. Two sites, both mounds of ancient ruins, are traditionally connected with Capernaum. These are the modern Khan Minyeh and Tell Hum, both located on the northwestern shore of the lake about two miles apart. Of these the more probable site seems to be Khan Minyeh, situated farthest to the north and east. For incidents in the gospel narrative associated with Capernaum compare Matt. 4. 13-16; 2. 44; 8. 5; 9. 1; 11. 23; 14. 34; Mark 1. 16, 23, 34; 2. 1; 4. 13-16; Luke 4. 33; 5. 18, 27; 7. 1, 5; 10. 15; John 1. 44; 4. 46; 6. 17-21, and other passages.

Straightway.—The Revised Version follows the Greek in using the same word in verses 21, 28, and 29, and in inserting this word also in verse 3 ("And straightway there was"). The phrase "and straightway" is a favorite one with Mark, one characteristic of whose gospel was, as we have already pointed out, terse brevity and rapidity of movement.

Synagogue.—The public meetinghouse of the Jews, where they came together not only for worship, but for more formal instruction in the Scriptures also—the humble prototype of both the modern public school and Christian church.

Taught.—First reading and then expounding a passage of Scripture.

22. As having authority, and not as the scribes.—The scribes were the lawyers of Jesus's day, and to them the interpretation of Mosaic law, especially in its application to daily conduct, afforded ample opportunity for minute discriminations and a pompous display of learning and piety. But in giving his interpretation or exposition of the law every scribe was sure to quote the authority of other learned rabbis and lawyers, an original or new interpretation being a rare exception. Jesus quoted no man's interpretations, but gave his own, and this with such confidence and evident mastery of the real meaning of the Scripture which he was expounding that it gave to his words the ring of original authority. It was his "But I say unto you" which astonished his hearers, who were accustomed rather to the phrase

sum of it contained in those words "God with us?" Who gave thee this life? Who has guarded thee by day and night, and placed His angels behind thee in the gravest hour? Who has cared for thee from year to year? Who hath blessed thee with so much joy, and upheld thee in the days of deepest sorrow? I know but one answer: It was God—God with us.

Who has stood at the baptismal font and consecrated thee as a child of eternity? Who held out his hand to thee in the hour of holy confirmation? Who spoke to thee out of thy old Bible book, met thee among the worshipping congregation, gave thee His greeting in the silent chamber of thy prayers, and refreshed thee when thou gravely partook of the Holy Supper. I know but one answer: It was God—God with us.

And thou—wouldst thou go through life as if there was no Lord in Heaven? Wouldst thou turn thy back on Him, as if He did not concern thee? Wouldst only in a cursory way lift up thine eyes to Him from time to time and thoughtlessly utter His name?

No! If thou carriest thy heart in the right place, if thou canst recognize love and be

GRATEFUL FOR FAITHFULNESS.

then reply to the devoted promise of thy Lord: "Fear not, I am with thee," in those words expressing the fullness of thy faith: "The Lord of hosts is with us."

"God with us." Wherever these three words conquer a human soul and be come the most thorough confession of its faith; wherever a human heart stands on and lives in this conviction "God is with me, His clear parental eye guardeth me during each second of my life; His strong paternal hand upholdeth me on the ways of my life; His faithful paternal heart beateth for me in the joy and pain, the distress and death of this life; God is with me, the omniscient God who knoweth what I need; the Almighty God who hath what I need; the all-gracious God who giveth me what I need;—truly the feet of man rest on granite, and heroic courage enters into his soul, and sunshine into his heart.

"God is with us." This device makes us joyous and faithful in our labors. Be honest! Why dost thou often accomplish thy duty so sullenly and unwillingly? Why art thou, when thy actions are judged in the clear light of day, so often lacking in true faithfulness in small things, in conscientiousness in hidden things in the joyful persistence thou shouldst show even in difficult tasks? That is the fundamental reason why thou lovest sight of thy God. Arm thyself each morning with the device "God with us," begin thy daily labor with thy God, and thou wilt gain the experience that with Him our labors become more congenial and easier, that with Him we accomplish the duties of our service more joyfully and more earnestly, and our duty will appear grander and more sacred.

"God with us." This legend makes us strong and unyielding to temptation. In truth, thou wouldst not bear the marks of so many wounds in thy breast, nor so many painful recollections in thy conscience, nor the shame of so many defeats, had thy device at all times been "God with us." When the passions of the flesh and blood are aroused,

THINK OF THY GOD!

When the dark powers of selfishness, of anger, of frivolity, attempt to overcome thee, look up to Heaven! When thy heart wavers in the intoxication of lust, or under the pressure of care, become conscious of these truths: God looks upon me; God will punish me. Have God in view and in thy heart; that is the steel armor from which the flaming arrows of the Evil One must forever rebound.

"God with us." This device gives us repose and strength amid the sufferings of life. Seventeen years ago we followed the bier of the Emperor Frederick to the silent tomb. What gave him that courage in suffering, the greatness of which only few were able to conceive, that heroic strength which outshone even all the glamor of his victories in battle? It was the Christian's faith, the

faith which made him become victorious in the Pacific. England, on the contrary, needs a Russia which would renounce her preponderance in Asia but would consolidate a powerful position in Europe. England has no interest in provoking war between France and Germany, but if such a war were to break out her vital interests would oblige her to support France as she formerly supported Prussia against Napoleon. She would be

BLIND TO HER OWN INTERESTS

if she did not stake her last man and her last shilling for that purpose.

The writer says that, owing to the preponderance of Germany, England is again forced to concentrate the efforts of her foreign policy upon Europe. France is necessarily the basis of her diplomatic combinations which are intended to restore the equilibrium of the Powers. The Anglo-Japanese alliance completes the Anglo-French entente, as it is practically certain that the marked tendency toward an Anglo-Russian entente will be realized.

M. Cheradame considers that the following combinations, namely the Anglo-Jap alliance, the Anglo-French entente and an Anglo-Russian entente are destined to assure the peace of Asia for another long period and postpone the outbreak of the Chinese peril.

The new equilibrium in Europe, M. Cheradame says, will be due to the fact that the peoples menaced by German preponderance must seek fresh combinations which will guarantee their future. Their efforts are due to that primary necessity and not to a desire to isolate Germany. These new combinations should not be systematically directed against German people, but should simply be a series of precautionary measures against possible ambitions of the Hohenzollerns. For that reason a system of ententes capable, in case of need, of being instantaneously converted into defensive alliances would in M. Cheradame's opinion be preferable to actual alliances.

THE ANGLO-FRENCH ENTENTE

could be amalgamated with a Franco-Russian alliance all the more easily after the realization of an Anglo-Russian entente in Asia. An Anglo-American entente is an accomplished fact and one between France and America virtually exists. There is nothing to prevent France, England and Russia from promoting better relations between Italy and Austria, consolidating the position of the Balkan States and assuming the free development of the Hapsburg dominions.

Would not those well defined ententes and exchanges of mutual services, M. Cheradame asks, create one of the most powerful combinations the world has ever seen, comprising the military strength of France, England and Russia and the financial strength of France, England and the United States?

AIMING UNDERGROUND.

In driving the long Simplon Tunnel under the Alps, a fine test was offered of the accuracy with which engineering science can guide the direction of two parties of workers, starting 12 miles apart, so that they will meet in the heart of a mountain. Three principal elements had to be calculated—the total length, the level, and the direction as to right or left. When the two bores met in the middle, it was found that the length, the least important of the elements, differed only about 31 inches from the calculate value; the difference in level was less than 4 inches; and the error in direction from one end was less than 5 inches, from the other less than 4 inches. The success of the engineers was remarkable, considering that the tunnel is 12½ miles long.

GARDENS OF TREE TOPS.

Brazilian ants make little gardens in the tree tops and sow them with pineapple and other seeds. The gardens are found of all sizes, from a single sprouting seed surrounded by a little earth to a densely overgrown ball as large as a man's head.

and it was the party, and I wasn't afraid!" panted Margery, holding up a bright little handkerchief.

"Party! Where?" asked her father. "Why, it was behind the kitchen clock, and the box came, and there were big fans and little fans, and vases, and a wee little clock, and some lanterns, and a flag and a kite—"

"Wait, wait!" said her mother. "Now, start again. I know there was no party behind our kitchen clock."

"Nor any magician to bring all those things in a box," added her father, laughing.

So Margery began at the beginning, which had to do with Kitty forgetting to deliver the note and the strange accident of her call, and her own surprise when she arrived to find "the party" taking place. They gathered quite a connected story at last. When bedtime came and she was nicely tucked away, she called sleepily to her mother, "It was funny about the silk dress not going to the party, and there it was behind the kitchen clock all the time!"

"No, it was hanging in your closet," said mother. "I wouldn't keep it behind the clock." But Margery was too sleepy to straighten out the tangle.

A MILLHAND'S RISE.

Couldn't Read at Sixteen, But Became a Professor at Oxford.

From a few statements which he made in opening the new Carnegie Library at Shipley, England, the other day, it is clear that Dr. Joseph Wright of Oxford University is one of the men whose careers ought to be put on record on detail to show what determination and ambition can do for their possessors. Not to mention that the authoritative English Dialect Dictionary was compiled by him, Dr. Wright's position as professor of comparative philology at Oxford would make one suppose that most of the avenues to knowledge must have been at his early disposal, and so it is somewhat surprising to learn that at sixteen he was a millhand who did not know how to read, and that he learned to do so largely by accident.

These facts Professor Wright mentioned in urging those who attended the library opening to read books on modern history. He remarked that great changes take place in the facilities for reading since he learned to read thirty-five years ago and said he doubted if he would have learned but for the Franco-German War. It happened, however, that some men at the mill where he then worked seemed deeply interested in reading about the war, and that decided him to learn to read himself. Reference to the Dictionary of National Biography shows that Professor Wright must have been sixteen then, and with what persistence and industry he applied himself to his books can be imagined from his present titles of M. A., Ph. D., and D. C. L.; from the catalogue of his works, which include a primer of the Gothic language, a grammar of the dialect of Wingham, and many translations from the German, not to mention his monumental dictionary of dialect.

Without intention, Professor Wright also revealed himself as one of the great workers of his generation by telling how his magnus opus—which he completed only in last September—was written and published. He said that he began his Dialect Dictionary over twelve years ago, but when it was ready for publication he found only one among the big publishers who would listen to the proposal of issuing such a work, and they would only undertake it on the condition that he would guarantee them against loss. So he thought he might as well combine with his ordinary work that of publishing, and with the assistance of his wife he had issued regularly the thirty parts of which the work consists, and had saved \$3,750 a year in doing so. Professor Wright said that that meant ten days to a fortnight's hard work for him in the evenings for he would not allow his book to interfere with his ordinary duties, and added rather sardonically that he was afraid that people in these days had lost the capacity and inclination for undergoing such hard labor.

interpretations, but gave his own, and this with such confidence and evident mastery of the real meaning of the Scripture which he was expounding that it gave to his words the ring of original authority. It was his "But I say unto you" which astonished his hearers, who were accustomed rather to the phrase, Rabbi Solomon (or some other rabbi) says so and so.

23. A man with an unclean spirit—A demoniac. This is clearly a case of actual demoniac possession, although the evangelists, sharing as they did the prevalent beliefs of their age, psychic and cosmic, were not always careful to distinguish between actual cases of demon possession and other bodily and mental ailments commonly, though mistakenly, attributed to the influence of evil spirits over the sufferer. Thus both Matthew (17, 18, 19) and Luke (9, 39-42) attribute the sickness of the epileptic boy to an indwelling evil spirit, while the father of the boy, according to Matthew, addressing Jesus, says of his son simply, "he is epileptic" (old version, lunatic), "and suffereth grievously; for oftentimes he falleth into the fire, and oftentimes into the water. And I brought him to thy disciples, and they could not cure him" (Matt. 17, 15, 16). But epilepsy was in those days commonly attributed to demon possession, and the fact that the disciples shared this belief accounts for the wording of the rest of the narrative in Matthew and of the whole account of Luke. Luke even seems to attribute the fever with which Simon's mother-in-law was suffering to the influence of an evil spirit (Luke 4, 38, 39), and in like manner dumbness, deafness, and other diseases were, even by the disciples, often attributed to demon influences. Jesus simply does not attempt the psychologically difficult task of correcting their mistaken notions, because as a wise teacher he concentrated his instruction on more important things from which he could not afford to divert his pupil's attention. The Master, doubtless, in his association with his disciples many times had the thought in mind which on one occasion he expressed in the words, "I have yet many things to say unto you, but ye cannot bear them now" (John 16, 12).

But the fact that people generally, and so also the disciples, wrongly attributed some forms of bodily illness to the influence of evil spirits, does not, as some have attempted to show, prove that there was no such thing as demoniac possession at all. Against any such conclusion the case of this man in the synagogue, and at least all similar cases in which the demons, as here, themselves speak, as well as the case of Mary Magdalene (Mark 16, 9), stand out as examples of actual demoniac possession possession which cannot be explained away.

The Holy One of God—The one consecrated or set apart for his service. The phrase indicates the reason why the demon feared Jesus had interfered to punish him as well as to set free the man whom he was so grievously tormenting.

25. Hold thy peace—Literally, be muzzled. The word means both to close the mouth and to reduce to silence. In the latter sense Jesus uses it in calming the storm (Mark 4, 39).

26. Come out of him—The first miracle recorded by Mark and Luke. Matthew mentions first the healing of a leper (Matt. 8, 1-4); John, the changing of water to wine (John 2, 1-11), which was really the first recorded miracle performed by Jesus.

27. What is this? A new teaching! with authority he commandeth—The punctuation of this verse follows the majority of modern critical texts. Since, however, there is no punctuation in the original we cannot be positive that this gives just the meaning intended. It has been suggested that the expression "with authority," belongs more properly with the noun "teaching," thus: "a new teaching with authority! he commandeth even the unclean spirits." It was the authoritative tone of Jesus's teaching as much as the miracle which he wrought which amazed the people (comp. verse 22, above).

29. The house of Simon and Andrew—The word translated "house" may mean either the actual building or the family circle. In this verse it is usually taken to mean the former, the inference being that the building belonged to Simon and

34. Healed many that were sick with divers diseases, and cast out many demons—Mark here clearly distinguishes between those possessed with demons and those who had bodily ailments of whatever sort.

Although the plisse ribbons are in the very height of fashion, and one sees them everywhere, even upon coats of costly fur as well as those equally smart but much less expensive productions, the plain appliques have lost none of their modish charm. There are any number of frocks on display in the show cases of the exclusive modistes where many materials are shown with more than one class of ribbon employed for their trimming design.

WORST OF MILITARY FAULTS

The first sale of Sandringham short-horns realized a modest £34 las. a head, which his Royal Highness considered "most encouraging;" and, indeed, it was the beginning of great things, for not many years later he sold forty-nine cattle for more than £3,430, an average of over £70 each; and every year added to the array of cups won by his short-horns at the principal shows in England. In one year his cattle won no fewer than thirty prizes at different exhibitions, and a single show yielded fourteen of

SANITARY CELLARS.

Andrew. Examples of the other use of the same word are found in Matt. 12, 23; John 4, 53; 1 Cor. 16, 15.

31. Ministered unto them—Served them in the preparation of a meal or higher refreshments.

32. When the sun did set, they brought—The Jewish Sabbath ended with sunset. Before its close it would have been unlawful according to strict rabbinical interpretation of the law to carry the sick through the streets.

33. All the city—People from all parts of the city, a great multitude.

34. Healed many that were sick with divers diseases, and cast out many demons—Mark here clearly distinguishes between those possessed with demons and those who had bodily ailments of whatever sort.

Fashion Hints.

A REVELLING IN RIBBONS.

The ribbon reigns supreme as the feature of current fashion; and there is not a single department of dress that does not display some touch or another of it.

No matter what the material of the gown may be, the ribbon trim is introduced in somewhere. The charming frocks composed entirely of ribbons—cleverly arranged upon either a chiffon or net foundation, occasionally upon a sheer crepe de Chine—have been noted before; their vogue abroad has hardly yet been appreciated upon this side of the Atlantic. For the Riviera season, which will open shortly, and for which the great makers of the mode in Paris make preparations many weeks ahead—they all of them have branch establishments along the Mediterranean coast—ribbon frocks are among the leading features; and there are evening wraps constructed of the same flimsy looking materials.

Like so many other charming features of fashion, we really owe this one to French inspiration, for there seems to be nothing whatsoever that those clever Parisiennes cannot accomplish with a few yards of chiffon and a dozen or so bolts of ribbon. From the dainty little coffee jacket, in which the Parisienne sips her morning coffee which is invariably taken in bed, to the exquisite wrap that envelopes her opera toilette, ribbons are the dominant note.

Speaking of opera wraps brings to mind one that has but lately wended its way to these shores and displayed all its bewitching charms at the first night of the opera in New York. The foundation was of the palest of pale pink double chiffon, banded with graduated widths of velvet ribbon the very same shade, each velvet strand being edged with a Richelieu plaiting of thin taffeta ribbon the very same tint. The lining was of a white satin, brocaded with metallic effects, gold, silver and copper threads mingling on the white grounds in a large and well spread design. Just hints of this metallic glory showed through the sheer chiffon, which was shirred in yoke shape on the shoulders, and could not have measured less than ten yards around the hem. A capuchin hood of the brocaded satin hung over the shoulders, and the edge of palest pink marabout and ostrich feathers proved most becoming when drawn over the wearer's head while awaiting her carriage call.

Although the plisse ribbons are in the very height of fashion, and one sees them everywhere, even upon coats of costly fur as well as those equally smart but much less expensive productions, the plain appliques have lost none of their modish charm. There are any number of frocks on display in the show cases of the exclusive modistes where many materials are shown with more than one class of ribbon employed for their trimming design.

In point of fact, it is the velvet ribbon

LORD KITCHENER'S PLAN

DECLARES ARMY IN INDIA MUST BE RE-ORGANIZED.

Glimpses of the Great Soldier as He is in Headquarters in Calcutta.

A visitor to India gives his impressions of Lord Kitchener as a result of a recent trip to the headquarters at Fort William here, writes a correspondent at Calcutta. The visitor drives through the old fortifications, with its drawbridge, its shallow ditch, its brick embrasures—nearly as low as Plassey—which a modern gun would reduce to powder in half an hour.

Fresh faced English sentries in khaki are at one or two points; an Indian lancer—trim bearded, a red turban above his dark, Jewish features, his steel tipped lance looped to his arm, a perfect image of an Indian light cavalry man, as armed, and drilled, and dressed on the British system—rides swiftly past. The khaki dressed privates represent the practical and conquering west; the lancer with his vivid tints and dark features represents the picturesque, the conqueror east.

Lord Kitchener meets his visitor with outstretched hand and frank smile. He is in civilian dress, and sits at his desk, cigar in mouth, plainly ready for any easy talk. He has the reputation of being saturnine, unapproachable, gloomily inarticulate. The average globe trotter, it is whispered, emerges from an interview with Lord Kitchener in a sorely damaged condition, while the idle "interviewer" is simply gored and trampled upon. But either rumor lies atrociously, or else Lord Kitchener this particular morning is in a specially gracious mood. He plunges at once into the frankest of talks. His speech runs fast, and the hurrying syllables are broken with frequent smiles.

NOT A FIGHTING FACE.

The visitor as he listens, watches with keen interest the face of the great soldier. The Indian sun has reddened the strong features. Every one knows that heavy face, with its large moustache, and mass of black hair above the square forehead; but taken as a whole, and when in conversation, the face has by no means a masterful look. It is not even a fighting face. One has to remember that these are the eyes which watched with such iron steadiness the rush of the dervish lines at Omdurman. Behind this square forehead is the brain that created the Egyptian army, subdued the Soudan, and organized victory for Lord Roberts in South Africa!

But Lord Kitchener, to his interlocutor's astonishment, has plunged almost with the first sentence into a discussion of his much disputed plans for the reconstruction of the Indian army. The Indian commander-in-chief plainly feels that in spite of—perhaps as the result of—the ocean of controversial ink which has been expended on this subject, his plans are not in the least understood. But even the uninstructed layman presently begins to see into the heart of these plans. For they are not clouded in technicalities. They involve no recondite mysteries of strategy. They are matters of the plainest, common sense; and Lord Kitchener with his frank, terse, and business-like speech makes them perfectly luminous. He found the distribution of the army in India, he says, exactly as it has been ever since the mutiny; an accidental and planless thing having no relation to any thinkable emergency. Regiments were scattered here and there on no principle whatever. The size of a barrack or some paltry question of climate might determine the locality of a regiment. Ammunition columns had been ordered before Lord Kitchener's arrival, but they were scattered haphazard without any reference to the service they were supposed to render.

WORST OF MILITARY FAULTS

dynasty, and who, partly by bias of natural genius, and partly for the sake of strengthening his rule and diverting attention from domestic troubles, plunges into foreign war. If the Russian revolution follows this course the world's peace will assuredly be in peril. Much water, of course, must run under the bridge before this happens, but Lord Kitchener thinks that the period during which Russia must remain occupied with its own domestic troubles will not be longer than ten years.

KING AS A PRIZE-WINNER

HIS MAJESTY'S GREAT SUCCESS AS A FARMER.

To-day the Sandringham Shorthorns are Famous the Whole World Over.

When speaking at a meeting of the Royal Agricultural Benevolent Institution some time ago, King Edward said: "I think I must style myself a colleague of many of you present as a farmer on a small scale, and I only hope that I may never have occasion to be a pensioner of this institution. It is impossible for any British gentleman to live at his country place without taking an interest in agriculture, and in all those things which concern the farmers of this great country."

In such modest words did his Majesty refer to his life-long interest in and exceptional experience of farming. It is well known, however, that King Edward is not only a farmer on a large scale, but he is entitled to take a high place among the most skilful and successful of British agriculturists. When, more than thirty years ago, the Sandringham estate was purchased for the Prince of Wales he set gallantly to work to convert it from neglected land into one of

THE MODEL PROPERTIES

of the kingdom, as it is now known to be, and he paid special personal attention to the improvement of the home farms.

Dilapidated and antiquated buildings were pulled down and replaced by handsome structures equipped with every modern convenience; the land was cultivated according to the latest scientific methods, hundreds of acres were reclaimed from the sea, trees were planted for shelter, and so on, until within a few years even Norfolk itself could boast no better-managed farms than those literally created by the Heir to the Throne. And everything was done under the personal supervision of the Prince, who devoted several hours every day to interviewing his bailiffs and others concerned with the management of his estates, and making a tour of his 2,000 acres of farms.

As soon as he had got his farms into good order and suitably equipped, he began to breed Southdowns, and was soon rewarded by carrying off many prizes and by commanding

EXCELLENT PRICES

for his sheep. This success encouraged the Prince to the more ambitious breeding of shorthorns, to which he devoted himself with characteristic enthusiasm. "I began in a very modest way," he says, "and was content to exercise patience. In fact, patience was very necessary, for many years passed before I was at all satisfied with results."

The first sale of Sandringham shorthorns realized a modest £34 15s. a head, which his Royal Highness considered "most encouraging;" and, indeed, it was the beginning of great things, for not many years later he sold forty-nine cattle for more than £3,430, an average of over £70 each; and every year added to the array of cups won by his shorthorns at the principal shows in England. In one year his cattle won no fewer than thirty prizes at different exhibitions, and a single show yielded fourteen of

HEALTH

HEALING POWER OF SUNLIGHT

There have been sun-worshippers through all the ages, and the sun has always been recognized as the source of life and light, of health and happiness on the earth. Yet it is only recently that science has found the explanation of this world-feeding, and has learned how and why the light of the sun is life-giving and lifesaving. It is only within the last quarter of a century that the medical profession has discovered that the cause of the great plagues of mankind—consumption, typhoid fever, pneumonia, cholera, smallpox, yellow fever, and all the infectious and contagious diseases—is due to the presence within the human body of micro-organisms. These organisms constitute the lowest forms of animal or vegetable life—single cells, invisible to the naked eye, which are reproduced with frightful rapidity when sown on a favorable soil.

By itself the knowledge of this fact would cause despair if there were nothing to arrest the increase of the germs. But fortunately it was found at the same time that there are forces in man and in nature warring against the minute enemies, and that one of the most powerful of such protectors is the light of the sun.

It is not known that sunlight is one of the most potent of all destroyers of disease-germs. It kills them more certainly than do the strongest disinfectants. The bacteria that cause pneumonia, for example, are destroyed within less than an hour when exposed to the direct rays of the sun, and live but little longer in the diffused light which fills a room on a bright day.

This knowledge has been turned to practical account in the treatment of many diseases, especially of the skin and superficial parts of the body. In lupus, for example, which is a form of tuberculosis of the skin, a positive cure may result from exposure of the diseased part to the direct rays of the sun.

The healing of wounds is promoted by light; and boils, erysipelas and various inflammations of the skin have been cured by the same means. The curative effect is sometimes obtained by simple exposure to direct sunlight, but the best results are brought about by means of lenses which concentrate the chemical rays and exclude those of heat. The possible dangers to the human organism of such a powerful agent will be discussed in another article.—Youth's Companion.

WHAT HOT WATER WILL DO.

The best toilet preparation in the world is plain hot water. Here are some of the uses to which it may be put. Drink a glass of it every night if you want a good digestion, a good sleep and a clear complexion. Put a bag of it to your feet when you have a cold, to your back when you have a backache, or at the nape of the neck when you have a headache or feel sleepless. Bathe the eyes with it when they are inflamed. Soak the feet in it when they are tired. Soak the hands in it before manicuring. Steam the face with once a week for your complexion. Bathe the cheeks in it when you want them to be rosy.

TO VENTILATE A ROOM.

A good way to ventilate a bedroom or a sitting-room, so as to avoid draught and let in plenty of fresh air, is to open the window at the bottom two or three inches, and place a piece of wood the whole length. This will close the opening and support the window. The air then enters between the sash at the middle of the window, passes upwards, and gradually mixes with the air in the room creating no draught.

SANITARY CELLARS.

ing, the plain applique have none of their modish charm. There are many number of frocks on display in the show cases of the exclusive modistes where many materials are shown with more than one class of ribbon employed for their trimming design.

In point of fact, it is the velvet ribbon that is relied upon by the best makers for their most effective little touches. The use of it as a border to the rich and exquisite Dresden sash widths brings about that piquant touch of color contrast, without which the modern gown need hardly reckon itself among the fashionable effects of the day. It makes charming little ladder bows, cute and quaint-looking cravats that tie collar and sleeve alike, and are even used to draw the sides of fashionable skirt over the tablier or petticoat front.

Even the indispensable dress shield is now fastened in with baby ribbon, this stitched to the sides of the shield at appropriate points and, when in wear, tied to loops on the corset, and with a double tie on the arm. This for the shield that is not stitched into place in sheer lace and lingerie blouses, but is worn as a separate accessory when occasion demands.

LITTLE FASHION HINTS.

Nearly all walking suits have the skirts plaited, in one way or another.

Some of the new bodies have long tails reaching nearly to the bottom of the skirt.

Very high, straight turnover collars of linen are worn with the tailor-made dress.

One of those Japanese tan-and-blue purses is very "in" to carry with a blue suit.

The brilliantly colored little hats of the winter are like jewels set atop of the head.

For a short dancing frock there is no model so pretty as an accordion-plaited skirt.

Gauze with a wide satin stripe, in white or colors, is a new nicety for evening frocks.

Gowns of light-colored broadcloth are among the most pronounced features of the season.

It is said that next summer silk waists with sashes to match will be worn with lace skirts.

A charming bonnet for a gray-haired woman is of dull silver lace, trimmed with silver grapes.

A deep hem of gold or silver in the drop skirt, showing through the filmy outer skirt, is a new idea.

Pure white ermine is fancied by some, as it lends itself less easily to imitation than the black and white fur.

Many exquisite shot taffeta gowns, trimmed with embroidery and rich lace, are worn for dress occasions this winter.

Every wardrobe should include in its contents at least one well-made and perfectly-fitting black stock, to be worn with a touch of white at the neck.

The thin white blouse appears unblushingly on the street on the coldest day, and a good deal of it is left showing, too.

Golden amber splashed with different colors makes some of the most beautiful umbrella handles and hatpin tops shown this year.

A petticoat of ochre-colored taffeta, perforated and embroidered, is one of the smartest for wear with dark cloth street gowns.

Silk stockings in heavy winter weight are something new. They come in changeable shades of green, rose, blue, violet and all the hues of this gay-colored winter.

ORGAN-GRINDER'S EARNINGS.

By turning the handle of his organ the Italian in England obtains nearly eight times as much per week as he can earn in Italy, more than four times as much as the English farm laborer, and nearly three times the pay of the policeman who moves him on when requested. Thousands of skilled artisans who have served apprenticeship as carpenters, painters, and joiners get only half the organ-grinder's pay, for the Italian reckons it a very poor week indeed if he makes less than \$15, and he often gets \$17.50 to \$20 or more.

determine the locality of a regiment. Ammunition columns had been ordered before Lord Kitchener's arrival, but they were scattered haphazard without any reference to the service they were supposed to render.

WORST OF MILITARY FAULTS.

Then, too, says Lord Kitchener, there was the worst of military faults, a division of authority. "I gave one set of instructions to a general upon a certain subject, and the military member of the council gave another set of instructions to the same general on the same subject. What was that unhappy officer to do—except, perhaps, to do nothing! Then," adds Lord Kitchener, "I am responsible for the efficiency of the army in India, but I had no opportunity of explaining my own plans to the supreme authority, the Indian government. They had to be filtered through the lips of another military officer."

"There is no question as to the right of the government of India to decide finally all questions of policy. The civil power, of course, is supreme. All I contend for is that it must be adequately informed as to the plans which I, as the responsible expert it employs, think necessary for the efficiency of the army. There has been much talk of a design on my part to set up a 'military autocracy.' Nothing could be more untrue. The civil government, in the last resort is, and must be supreme. But I must work under conditions which enable me to discharge the trust put in my hands by the civil government, and one of these conditions is that I must be allowed to put adequately and personally my own plans before the government to which I am responsible."

DEMANDS THREE PRINCIPLES.

"There are only three principles for which I contend, and they belong to the alphabet of common sense. The first is unity of authority; a divided command in military affairs is fatal. Next, the army in India must be organized on an intelligent plan, and with some regard to its instant and effective use as an instrument of war. It is totally untrue that I have any design for concentrating the army on the frontier, and so separating the native regiments from their recruiting grounds and their home ties. The forces on my plan are distributed throughout India pretty much as before; only now there is method and intelligible order in their grouping. India is divided into nine territories, with a divisional general in command of each territory. The force under his command is a complete and balanced unit, and the arrangement is such that if war broke out each division would be ready for instant movement, and would find itself with regard to railway communication in a position which made transit easy."

"My third principle," says Lord Kitchener, "is that having a definite and comprehensive plan I should have the right of stating it myself to the government to which I am responsible."

It is easy, as Lord Kitchener talks, repeating and emphasizing each point, to see into what may be called the inside of his brain. He is essentially an organizer. Confusion, disorder, want of intelligible plan, to him are intolerable. He must have the forces under his command arranged and equipped so as to be instantly available, and available on a definite plan and for a definite object.

As to his desire to establish a military autocracy, or to set the military above the civil power, this, says Lord Kitchener, with energy, is "utter nonsense." He knows too well the principles on which the British government moves to dream of any such thing. He only asks, he protests, for the opportunity of doing efficiently the work put by the civil power into his hands, and of explaining without an intermediary what these plans are.

COUNTS OUT RUSSIA.

Incidentally Lord Kitchener gives many quick, interesting judgments on more or less related topics. He thinks that Russia is to be counted out for the present as a menace to England, but not, as his interlocutor suggests, for a generation, but only for ten years. A nation in revolution, as history teaches, usually ends by throwing up a great soldier who is the founder of a new

empire many years later he sold forty-one cattle for more than £3,430, an average of over £70 each; and every year added to the array of cups won by his shorthorns at the principal shows in England. In one year his cattle won no fewer than thirty prizes at different exhibitions, and a single show yielded fourteen of them, a result which must have awarded the Prince for his long years of patient work and waiting.

To-day the Sandringham shorthorns are famous the whole world over, and it is not long since 1,000 guineas were paid for a bull which was sent out to Argentina. "The King's shorthorns are among the finest in the world," a great authority declared a few weeks ago at an agricultural dinner, and no doubt this is the general verdict among experts.

THE PRINCE'S SUCCESS.

With shorthorns induced him to breed Alderneys and Devons, with almost equally gratifying results. Sandringham has won fame too, and many prizes by its Shire horses, which the Prince began to breed in the very early eighties. How successful he has been is proved by the fact that in 1898 he sold fifty-four of these horses for over £12,000—an average of £224 each. Nor, in recording the King's successes in his role of farmer, must we forget that the Sandringham pigs are among the most famous and the finest bred in England.

Since the accession to the throne King Edward has had little opportunity to indulge his love of farming, but in the midst of all his cares and labors he still finds time to keep a watchful eye on his farms, both at Sandringham and Windsor; and his last year's success in carrying off premier honors for shorthorns at Smithfield, beating Lord Rosseter handsomely, gave him the greatest pleasure.—London Tit-Bits.

INVENTOR OF THE TURBINE.

Parsons Brothers Are Clever Lot of Engineers.

It would be difficult to find a more useful trio of citizens than Charles Parsons and his two brothers. The Hon. Richard Parsons, the second of the brothers, is a partner of Sir James Kitson in his famous engineering works at Leeds; while Lord Rosse himself is a practical engineer of such skill that on one occasion, when on going over a manufactory, the manager, who was ignorant of the identity of his visitor, drew him aside and offered him the position of engineer of his establishment, explaining that he was "just the kind of intelligent workman" that the firm required. It must be explained that Lord Rosse is careless indeed about his dress. On another occasion the earl having entered the engine room of a large manufactory, the engineer's attention was attracted by his odd behavior. "Well, what's up now?" he growled at the peer. "What are you shaking your head and pulling out your watch for? What have you got to find fault with anyhow?" "Oh!" replied Lord Rosse, "it is all the same to me. I have no fault to find. I am just waiting till the boiler explodes." "The boiler explodes! Why, you are crazy, man!" exclaimed the engineer angrily, preparing to turn the peer out of the place as a dangerous crank. "Well," retorted the earl, "if you work ten minutes longer with that loose screw there, the boiler will certainly explode." The engineer gazing in the direction indicated by Lord Rosse, paled and jumped to stop the engine. "Why the devil didn't you say so sooner?" he blurted out. "Why should I?" answered Lord Rosse. "I have never yet had an opportunity of seeing a boiler explode."

CITY THAT OWNS EVERYTHING.

The municipality of Freiburg carries on a pawnshop, an insurance business, a theatre, several restaurants, and a newspaper, as well as the schools. A seat can be procured at the opera in this German city for 9 cents, and supper afterwards for 6 cents. The authorities also own a cemetery, in which the citizens can be interred cheaply.

ing and support the window. The air then enters between the sash at the middle of the window, passes upwards, and gradually mixes with the air in the room creating no draught.

SANITARY CELLARS.

Unslaked lime is the best suited for removing mold in cellars. It is blown in the shape of a fine powder, on the walls of the cellar and into the joints and crevices by means of the bellows, or else thrown on with the hand. The walls must be damp; dry walls have to be moistened previously. The lime slakes with the adhering waters and kills all organisms. On the day following the walls are washed off, and, as experience has proved, the cellar will remain free from mold for at least two years.

HOME DENTISTRY.

A good liquid dentifrice is made by dissolving one ounce of powdered castile soap in one pint of water, and then adding three drachms of powdered borax, five drops of oil of nutmeg, and two ounces of honey-water. If gums are spongy an excellent toothpowder is made by combining one ounce each of cinnamon and bicarbonate of soda and two drops of oil of cinnamon. This is also a good tooth-powder for general use.

WHAT FRENCH SOLDIERS KNOW.

Results of an Examination of Recruits Just Held.

Troopers, like schoolboys, have been perpetrating a few pleasing howlers. Recruits, on joining the colors in the autumn, underwent an elementary examination. The papers sent in by a company of sixty-two men, all from Northern France, have been classified as follows. The best question was: What is the present Government of France, and how established. Four men answered correctly. Thirty-four merely wrote "The Republic" on a sheet of paper. Three replied irrelevantly, seventeen did not know how to write—an enormous proportion. The remaining four answered, "The Government of France is the French Government." "The Government of France is the President of the Republic." "The French Government has been established by all the other countries together," and, finally, "The French Government was established by a general assembly of all the couples d'etat." His mind was evidently mixed over coups d'etat and States General.

The recruits were next asked to give the name of some person famous in French history, who appealed particularly to them. Thirty-eight plumped naturally for Napoleon I., fourteen for Louis XIV., twelve for Henri IV., ten for Charlemagne, and four for Gambetta, Carnot, Vercingetorix and Marshal Macmanon each had two votes. So far the answers could pass muster more or less. But among the great Frenchmen who received single votes were Bismarck and Bazaine.

Lastly, they were asked what they would do with a foreign coin having no value in France, but not counterfeit. The replies were most gratifying in one way; not one man suggested trying to pass the coin. Most of them advised taking it to the Bank of France, to a money changer, or to a stockbroker. One man said he would have it made up into a scarf-pin.

JUMBLE OF LANGUAGES.

There are towns in Hungary, and small towns, too, where from seven to ten idioms are constantly being used. On the Galician frontier there is in a lovely valley the old town of Eperjes. The number of its inhabitants does not exceed 12,000. To this day the good people of Eperjes are in the habit of talking or being talked to in six different languages and several dialects. An ordinary household will include a Slovak man-servant, a Hungarian coachman, a German cook, and a Polish chambermaid. What is still more remarkable, each grade of society tenaciously cling to its own language for centuries.

THE BAGGAGE SMASHER

marks a cheap Trunk every time, and seems to enjoy the privilege of making it look like stand the wear and tear of travel. We have a great assortment of

TRUNKS, BAGS and SUIT CASES.

SUIT CASES, made of imitation leather, good strong steel frames, with brass locks and bolts. Prices \$1.25 to \$5.00.

SUIT CASES, in solid leather, with linen or leather lining, in colors brown, russet and olive. Prices \$4.50, \$5.00, \$5.50, \$6.00, \$6.50, and up to \$10.00.

CLUB BAGS, in real grain cowhide, strongly made, with linen or leather linings. Prices \$1.00 to \$7.50.

TRUNKS

OVER ONE HUNDRED TO CHOOSE FROM,

in all styles, shapes and sizes, and at prices that cannot be beaten. Prices \$1.75 to \$10.00.

TELESCOPES,

all sizes Prices 35c to \$1.15.

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCKWHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANE, 16th January, 1906.

EYE EXAMINATION

Eyes should be examined every two years.

The eyes change. Glasses exactly right last year may be injurious now. Whether you wear glasses or not your eyes should be examined at least

The Parting of The Ways.

In presenting "The Parting of the Ways" which comes to The Brisco Opera House on Monday evening, Manager Brisco has an attraction that is certain to please local patrons. The play is novel in construction and differs in theme in anything that has been written in dramatic lines for many moons. Mr. Neil Twomey, the author, whose experience on the stage has given an intimate knowledge of what the public demands, claim that he has written in this his latest effort a play that appeals successfully to all classes of patrons and makes a return engagement a desirable thing for both them and the attraction. Mr. Twomey is well remembered here by reasons of his great success "The Wayward Son"

SPECIAL SALE —OF— BOYS' CLOTHING.

50 Children's Brownie and Russian Blouse Suits, suitable to wear at any season of the year, at 25 and 30 per cent. disc.

150 Boys' 2 and 3-piece Suits to clear at one-third off.

60 Boys' Overcoats and Ulsters, some with velvet others with storm collars, 30 per cent. off.

We always live up to our advertisements. Everything marked in plain figures and sold on their merits, so that every mother knows exactly what she is saving at a glance.

J. L. BOYES,

PERSONALS

Mrs. Wm. Cassidy, Milsap, was a caller at our office on Saturday.

Mr. C. G. Coxall, Tamworth, was in town on Saturday.

Mr. Patrick Donovan, Jr., Forest Mills, was a caller at our office on Friday.

Miss Ethel Bateman, of Deseronto, spent a few days last week, the guest of Miss Alma Morden.

W. S. Herrington, K. C., spent Monday and Tuesday in Toronto, looking after the interests of the town in the Cartwright vs the town suit.

Misses Gussie Perry and Janet Templeton, left for Toronto on Monday.

Messrs. W. A. Carson and Thomas Symington left on Monday for Atlantic City to attend a convention of Canners.

Mrs. J. T. Grange spent a few days last week in Rochester, leaving this week for Jamaica accompanied by her son Mr. Albert Bicknell.

C. P. Coxall left on Monday to take a course at the Central Business College, Toronto.

Mr. Morley Shibley, of Toronto, was in Napanee last Monday.

Mr. H. W. McDonald, Mallorytown, was in town on Wednesday.

Mrs. Jas. Soby and daughter, of Picton are guests of Mr. and Mrs. John Soby.

Miss Gandier, Newburgh, is the guest of Mrs. Matheson, Union street, Kingston.

Mr. Abell has resigned his position as cutter with The Robinson Co., and left for Toronto on Monday.

Miss Wigmore, Orillia, is the guest of Mrs. D. L. Hill.

Messrs. Capt. and D. S. Collier, Picton, were in Napanee on Tuesday.

Mr. Sidney Scott underwent an operation in Kingston General Hospital on Wednesday and at present is doing as well as could be expected.

Mrs. Alf Connolly, Yarker, spent last week the guest of Mr. and Mrs. C. H. Boyes, Kingston.

Miss Helen Caton of Thorp, stopping with Mrs. Warner John St. since last December left for Home Tuesday.

Mrs. Crowley and Mrs. Dr. Whitney, New York spent last week the guests of Mr. Jas. Hayden Camden East.

Messrs Deroche and Deroche have taken over Judge Geo. Deroche's law business in Deseronto. Mr. Hamel Deroche is in charge of the Deseronto office.

Miss Gertrude Snider, Kingston and Mr. P. M. Stover, Deseronto, were

every two years.
The eyes change. Glasses exactly right last year may be injurious now. Whether you wear glasses or not your eyes should be examined at least once every two years. We are eye experts. We can afford you perfect sight.

A. E. PAUL.

The Man From Frisco.
TONIGHT.

The Pauline Hammond Co. will present for the first time to a Napanee audience the great western society drama in five acts "The Man From Frisco."

This is an exceptionally strong play telling a beautiful story of a self-sacrificing young girl who for the sake of her father's honor gave up what was most dear to her.

The specialties of this Company are not equalled by any repertoire Company.

The Perry's, the youngest acrobats on the American stage, a striking feature, the other specialties are new moving pictures, illustrated songs, singing, dancing, etc.

The Company will give a matinee to-morrow afternoon at 2.30 o'clock. "The Power of Gold" in three acts, and will close the engagement here to-morrow night in "A Righted Wrong."

Those who saw the play last night say it is the best repertoire Company that ever appeared before a Napanee audience. Those who have not seen them should not miss the opportunity. Prices 15c 25c and 35c, Matinee 10 and 20c.

The public demands, claim that we have written in this his latest effort a play that appeals successfully to all classes of patrons and makes a return engagement a desirable thing for both them and the attraction. Mr. Twomey is well remembered here by reasons of his great success The "Wayward Son." His company comes highly spoken of and is aided by special scenery and costumes that make up a complete production.

S C

STRATHCONA.

Mrs. John Murphy is seriously ill. A consultation of physicians was held on Saturday and they gave but slight hope of her recovery.

Frank Haycock has pneumonia. Cecil Boyer has recovered sufficiently to be up about the house.

Mrs. Lasher has returned from a visit to her sister, Mrs. Frank Perry, of Cobourg.

Mr. and Mrs. McAvoy attended the C.M.B.A. ball at Newburgh last week.

Mr. and Mrs. R. Richards, of Deseronto spent Monday here. Mr. Richards was formerly superintendent of the cement works here.

The dance in the Orange hall, Thursday evening last passed off very pleasantly under the management of D. Asselstine. About thirty were present.

Mr. and Mrs. E. Lasher visited her parents at Empey Hill Sunday.

Miss Lott at E. Wells, Sunday last.

Mr. Chas. Stevens spent a few days this week in Brockville.

Miss Nellie Casey, Troy, N.Y., is the guest of her mother, Mrs. T. Casey.

Mr. Archie Farbairn, Brandon, Man. is spending a month in this vicinity.

Mr. Richardson, Hamilton, was in town a few days this week.

Mr. G. B. Mills spent last week in Toronto in attendance at the bedside of his sister, who had the misfortune to break her hip some weeks ago.

CLOSING.

Miss Barrett will close her dressmaking rooms February 1st until March 5th when she will reopen with an entirely new stock of spring trimmings, also a full range of samples of dress goods and suitings. Thanking her many customers for their kind patronage in the past and soliciting their further commands for the coming season.

Will not save a diseased tree. Whatever it is that threatens the life of the tree must be discovered and attacked directly. It is the same with rheumatism which has been considered incurable in advanced stages because the ordinary remedy instead of going at the root of the disease simply prunes the branches.

Pruning the same with rheumatism which has been considered incurable in advanced stages because the ordinary remedy instead of going at the root of the disease simply prunes the branches.

Branches ordinary remedy instead of going at the root of the disease simply prunes the branches.

The trouble is in the bone or joint and must be got at there, must be driven out. This is where the pre-eminence of Tuck's Rheumatic Bone Oil comes in over all other remedies. It goes straight at the root of the trouble in the quickest and most direct way, penetrates to the bones and effects a sure, permanent and speedy cure. Here is what one sufferer says of it:—

Dear Sirs—You ask me if Tuck's Bone Oil did me any good I can tell you that it did. It cured me of rheumatism and nothing ever helped me for neuralgia until I got that. I suffered everything for years from rheumatism and at times I thought it was going to my heart and would kill me. All my neighbors know how I suffered and they all know that Tuck's Bone Oil cured me, because I tell everybody I see. I took small doses of it, about four drops in milk, and I had it rubbed into my legs which were both affected. It seemed to penetrate right to where the pain was and even the first application gave me relief, but the grumbling pain came back in a few hours. I kept on using it and before I had fussed all of the fourth bottle I was completely free of rheumatism. During this time I had a terrible attack of neuralgia. I used Tuck's Bone Oil and got almost instant relief, I am willing for you to use this any way you like because I think your Bone Oil should be known of by everyone.

W. H. Dean.
Farnham, Que.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c, a bottle or sent prepaid by The Tuck Bone Oil Co. Limited, Smith's Falls, Ont.

A CHEAP SUIT

Is Not Necessarily a Bargain.

If you find a price below ours you'll find the quality below also. Our prices are as low as superior workmanship, good trimmings and fabrics will allow.

JAMES Merchant
WALTERS Tailor
Napanee

Mr. Jas. Windover, Forest Mills, was a caller at our office on Saturday.

Word was received last evening of the serious illness of Mr. Jack Herring in New York. He is not expected to recover.

The following composed a party of ladies who came down from Napanee Saturday for the matinee of "Peggy from Paris": Mrs. William Templeton, Mrs. J. L. Boyes, Miss Minnie Smith, Miss McLaurin, Mrs. A. F. Holmes, Mrs. G. C. T. Ward, Mrs. W. H. Boyle, Mrs. F. F. Miller, Mrs. F. D. Miller, Mrs. R. J. Perry, Mrs. George Perry.

—Whig.
Last Saturday evening the home of Mr. and Mrs. C. J. Nichols, North Main st., was the scene of a pleasant gathering of neighbors and friends. The occasion was a reception tendered their son and his bride, Mr. and Mrs. Oscar A. Nichols, who were lately married at Napanee, Ont. The home, which has lately been modernized, was tastefully and prettily decorated. The happy couple received congratulations from all present. Useful and ornamental gifts were in evidence manifesting the esteem entertained for them. A fine collation of many kinds of cake, ice cream and punch was served. Mr. and Mrs. Nichols have a pretty home at 11 Wiburid st. Portsmouth, N. H., where the best wishes of all follow them. They are "at home" at all times to friends.—Reading Chronicle.

PROFESSOR DORENWEND

America's Greatest Hair Goods Artist, is coming to

PAISLEY HOUSE, NAPANEE, ON

Tuesday, Feb. 27th

This visit gives you a chance to consult PROF. DORENWEND about your Hair and to choose from the stock of Hair Goods which he carries with him—just what you require.

Baldness . . .

as all men know, disfigures and adds an aged expression to the face. Why remain Bald when Professor Dorenwend can fit you with a WIG or TOUPEE, which will hide

all traces of Baldness and take the place of your own hair? Doctors recommend these Toupees as a preventative for colds in head, catarrh and neuralgia. PROFESSOR DORENWEND will fit you on the spot and show you just how you look afterwards.

LADIES—READ THIS!

You will never have a better opportunity to see for yourselves the beautiful assortment of SWITCHES, BANGS, POMPADOURS, WAVES, WIGS, Etc., which Professor Dorenwend carries with him.

Remember the Date and don't fail to call at the hotel and see Professor Dorenwend early.

The DORENWEND CO. of Toronto, Limited,
103 and 105 Yonge Street, Toronto.

The New Carpets and Housefurnishings.

We announce the opening of the New Spring Stock of Carpets and Housefurnishings. Our new stock consists of the leading patterns, the most appropriate designs, the most durable qualities, and the most reasonable prices. Having received exceedingly large consignments in all classes of Carpets, Draperies and Furnishings, our Mr. E. W. SCOTT and efficient staff are now prepared to execute all orders for refurnishing your home.

See our Windows for the Latest in Carpets.

AXMINSTERS.

These well-known Carpets form an important and prominent part of our complete stocks. For wearing qualities, colorings and designs we consider Axminsters as leaders.

WILTONS.

The choicest and finest of Floor Coverings. For richness of colorings and exclusive designs our Wilton stock this season is one of elegance.

See the New Draperies and Striped Madras Muslins.

BRUSSELS.

The Carpet of reliability, the Carpet that has stood the test of wearing qualities. We are amongst our new goods, showing them in the neatest designs and colorings, exclusive patterns not seen elsewhere.

TAPESTRY.

The medium-priced Carpet, in a range of designs and colorings, equal in appearance and wear to the more expensive grades. Our stock this season is without exception the finest and greatest ever shown here.

Let us show you the Newest Goods.

INGRAIN.

All-wool, the most fashion-approved colorings, in effective designs and most suited for bedroom and dining-room coverings.

RUGS.

Wilton, Axminster, Velvet, Brussels, Tapestry, Wool and Jute. In these goods our stock is now splendidly assorted, and contains many rare specimens interesting to art lovers.

The New Stock is one of Elegance.

LACE CURTAINS.

Nottingham, Swiss, Brussels and Bobbinette. For refined beauty and truly artistic effects our enormous stock cannot be surpassed. Silk Draperies, Foulards, Peralines, Cretonnes, Furniture Coverings and Curtain Nets—the selections are beautiful.

WINDOW SHADES, POLES, &c,

In plain and lace and insertion; creams, duns and terra—all sizes. We also make shades to order. Curtain poles, trimmings, vestibule rods, etc.

CREX.

The new Floor Covering—artistic, durable, sanitary. Will not hold dust, and the most economical of all floor coverings.

TOWN COUNCIL.

Council Chamber
Feb. 19th, 1906

The Council met at the usual hour, 7.30 p.m., the Mayor in the chair. The following members were present: Councillors Graham, Kimmerly, Meng, Normile and Williams.

The minutes of the previous meeting were read and confirmed.

COMMUNICATIONS.

From the Electrical World soliciting the support of Council. Fyled.

From the Municipal Journal asking the Council to join the Union with other Municipalities for their mutual benefit. Fyled.

From Thos. Roberts & Co., re their account. Laid on table and later ordered to be paid.

From Dominion Rock Drill Co., asking for remission of taxes. Referred to Court of Revision.

TENDERS.

The following tenders were received in connection with work on the Electric power-house: Madole & Wilson, \$120; Boyle & Son (which was put in dividing the work into two parts, \$76 and \$3) \$119. The tender of Boyle & Son was on motion accepted.

LEGISLATIVE.

Mr. Manly Jones was heard in reference to having one of the Normal Schools established in Napanee, and asked that a deputation be appointed to go to Toronto to advocate the measure before the Legislature. The Mayor and Councillor Meng were appointed.

Mr. Brisco was heard in reference to the reduction of the license fee of \$50 per annum claimed against the Opera House. It was moved by Coun. Graham that the matter be placed in the hands of the Clerk and that he communicate with other towns and get information on the matter. Councillor Normile thought the Council fully competent to deal with so simple a matter without the advice of other towns. Councillor Williams moved that the fee be reduced to \$25, which was unanimously carried.

REPORTS OF COMMITTEES.

Reports were received from the Fire Water and Light, Town Property, Police and Printing Committees, but contained nothing of public interest.

THE BAND.

The grant of \$125 for the maintenance of the band and the purchase of new music, on condition that they play one night each week during the summer, in the park, introduced at last meeting of the Council, was again brought forward. Councillor Williams moved an amendment to make the amount \$100. After considerable discussion the original motion was carried by a vote of two yeas and four nays against the amendment. The Mayor and Coun. Meng were appointed in the interests of the town to see that the agreement be carried out.

An account for coal ordered by the Poor and Sanitary Committee was found correct and ordered to be paid; as also one by same committee for ticket for indigent to Kingston.

One for \$86. for three telegrams in connection with Fire and Light was also ordered paid.

The account of Mr. A. Bruce, K.C., for fees in connection with Electric Lighting By-Law and other legal work totalling \$170 was submitted and ordered paid.

There were also several miscellaneous accounts, as freight in connection with

Inspection invited to this Department.

Value of the Average Man.

Genius is a phenomenon; the average man is a law. He has seen Shakespeares and Goethes and Napoleons and Wagners rise and fall, and he goes on calmly, knowing that it is he and not they who are the race. Despise him, kick him as you will, the last word is with him. He is nature's favorite. Like a true mother, she loves her dull boy best. A Shakespeare was too much for her, but she saw to it that his faculty perished with him. He died, a wonder among men, and his family reverted to the average. Least the abhorred thing should reappear in the course of generations the family presently died out. The case is typical. It is almost a commonplace of the science of heredity that the appearance of extraordinary talent in any branch of a family means the extinction of that branch.—London Standard.

Canadian and American Coal Oil.
MADOLE & WILSON.

The Extended Popularity Of

Diamond Dyes

Induces Speculators to Introduce Weak And Worthless Imitations.

DIAMOND DYES, true home helpers and money-savers for mothers and wives, are dear to every woman's heart.

Recently, speculators have gone into the package dye trade with the view of gaining a share of the immense and ever-increasing trade held by the manufacturers of the DIAMOND DYES, but all such efforts will, as in the past, result in failures.

The crude and worthless dyes brought out in opposition to the DIAMOND DYES, can never become popular, for the simple reason that they have not one good quality to boast of. The merchants of Canada who were induced to buy these adulterated dyes now find them dead and worthless stock.

The progressive and busy druggists and dealers of Canada sell only the DIAMOND DYES, which have an established reputation of over twenty-five years. The modern merchant has not the time or inclination to encourage the sale of worthless and deceptive goods.

If our Canadian women desire full, brilliant and fast colors, they should at all times ask for the DIAMOND DYES, the only guaranteed package dyes in the world. When buying package dyes see that the words DIAMOND PACKAGE DYES are on each packet handed out by your dealer. WELLS & RICHARDSON CO., LIMITED, MONTREAL P.Q., will send free to any address their New Dye Book, Card of Dyed Samples, and new book in verse entitled "The Longjohns' Trip to the Klondike." This little book is interesting thousands.

T. B. WALLACE, Pharm. B.
The Prescription Druggist

PRESENTATION.

There assembled at the residence of Mr. John Wilson, Township of Richmond on the evening of Tuesday the 13th inst a very large gathering of his friends and co-worshippers of the Empey Hill Church to wish him all happiness in his new home at Strathcona, and God-speed in the new sphere he is about to enter.

Some members of the family had been made aware of the intended invasion of the house of our friend, and had made preparations accordingly: but succeeded in keeping Mr. Wilson in ignorance as to the matter till it could no longer hide from his eyes. Few if any of the members of the church on the hill were missed; and a few friends of the neighborhood beside, who had special relations to the Wilson family were present, so that the house was necessarily illuminated throughout, and every available part occupied.

At 8 o'clock the minister of the congregation at Empey Hill asked the stirring to sing a few verses of the soul-stirring hymn.

"Blest be the tie that binds,"

after which he called on Rev. Perry Scott to offer prayer the people all standing in Presbyterian style. Then Mr. Ed. J. Sexsmith was called upon to read the following address:—

To Mr. John Wilson,
Beloved Leader,—

We, the members of the Methodist Church of Empey Hill, and the friends accustomed to worship there, have taken the liberty of invading your peaceful home this evening, in order that we may express to you something (not all, that were impossible) of our feelings of respect and love upon the eve of your departure from our midst.

We could have wished you to abide with us to the end.

But it is something of a solace for us to know that you are removing but a little way, so that we retain the pleasing prospect of looking in your face at no great intervals of time, in the social or the church circle, and renewing the fellowship with you that we have prized so much.

Our religion teaches us unselfishness therefore, we take some comfort from the thought that what we count our loss will prove to be for others gain.

When we reflect upon what you have been to us through the long stretch of years, our sense of deprivation is keen and the deepest and tenderest emotions of our hearts are stirred.

You have taken a lively and intelligent interest in the church on the hill from its very inception, contributing your wise counsel and your liberal financial aid.

You have faithfully fulfilled the duties pertaining to offices of steward to the entire satisfaction of your brethren, and the good of the "Cause."

But, perhaps in no capacity have

BOYLE & SON.

IN THE HIGH COURT OF JUSTICE

Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A.D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Napanee at his Chambers in the Court House, Napanee, on

FRIDAY THE 3RD DAY OF MARCH,
A.D. 1906,

at 2 p.m. the following valuable farm lands, Parcel No. 1. The Northwest 14 of Lot No. 11 in the 5th Concession of the Township of Camden, in the County of Lennox and Addington, containing 40 acres more or less.

Parcel No. 2.—The Northwest 14 of Lot No. 11 in the 6th concession of the said Township of Camden in the County of Lennox and Addington containing 40 acres more or less.

Parcel No. 3 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds.

Parcel No. 2 is pasture land without any buildings and well fenced with a patent fence. The 2 parcels will be sold separate or en bloc at the option of the Master, and subject to an annuity of \$30 a year against the 2 parcels payable to Eleanor McKeown and subject also to a reserve bid fixed by the Master.

The purchaser shall pay down a deposit in the proportion of \$10 for every \$100 of the purchase money, and the balance in one month thereafter without interest.

In all other respects the terms and conditions of sale will be the standing conditions of sale of this Court.

For further particulars, apply at the law offices of Messrs. Herrington Warner & Grauge and Morden & Rutten, Napanee.

Dated the 3th day of February, A.D. 1906.

(Sgd.) S. S. LAZIER, Master.

Address Manager, 132 Lake Street,
Chicago, Ill., U.S.A.

CUT PRICES

You have faithfully, fulfilled the duties, pertaining to offices of steward to the entire satisfaction of your brethren, and the good of the "Cause."

But, perhaps in no capacity have your services been more appreciated than in that most useful and characteristic office of Leader, founded by John Wesley, and which has proved under God such a means of grace to his spiritual offspring ever since. Here indeed you have proved the wise counsellor, sympathizing friend, and faithful guide. It is here especially, we feel our bereavement, and we think, Who will stand in your place?

We owe you a debt we can never pay for though we are conscious of returning you both gratitude and love, still our feelings continue as before—your debtors we remain.

We rejoice with you in the quickened state of religion in the church you have loved and served so long. How happy will the memory of the last days on Empey Hill be to you—the memory of believers rejoicing, sinners crying for pardon, then with the mouth making confession unto Salvation, and, as on last Sunday, being formally received and enrolled as members of the visible Church of Jesus Christ.

We would like to add to these simple words of the heart, which but inadequately express what we feel, this Chair for your acceptance.

We have no fear of being forgotten by you; but who is not pleased to have a visible reminder of a distant friend?

Dear Sir—many passages of the good word teach the comforting doctrine of a Divine Providence directing our earthly pilgrimage: "A good man's goings are established of the Lord; and he delights in his way," Psal. 37:23, therefore we rest in the thought that not only for those so near and dear to you will the change of residence prove a blessing in many ways, but for you also. And we wish to assure you that though the visible tie our fellowship is about to be severed, there are ties which cannot be broken—ties of fond memory, love and hope. Memory will perpetuate your influence on yonder hill, and brotherly love will continue to warm our hearts towards you and our common hope will teach us to look for the day of our triumphant re-union in Heaven.

Signed in behalf,
 RICHARD DUKE, Pastor.
 WM. P. SMITH, Leader.

Mr. Wm. Smith, on behalf of the people, presented the chair. Mr. Wilson with much feeling and well chosen words acknowledged the gift.

Messrs. John Russell, James Sexsmith and Neilson Russell supported the sentiments of the address.

Mr. Ira B. Hudgins then very fittingly reminded the gathering that Mr. Wilson felt a deep and intelligent interest in the work of God throughout the entire circuit, and that other parts would also feel that they were sustaining a great loss at his removal.

Then the pent up feelings of the friends broke forth in one stanza of that old favorite which preserves forever its freshness as a song

"And if our fellowships below
 In Jesus be so sweet."

The third Oddfellows Lodge will be instituted at Kingston this evening.

The Lindsay Gas Lights will save you Gas, gives better light and reduces your Bill. BOYLE & SON, Agents.

Marmalade,

Just received a new lot of fruits such as the bitter marmalade oranges, Valencines, Navels and lemons for making genuine marmalade also a fresh line of French Plums, table and cooking figs, dates and table raisins. A nice line of nuts, filberts, walnuts, almonds and brazils. A genuine line of Maple syrup, sealed in glass bottles, a nice lot of breakfast foods, such as rolled wheat, cracked wheat, rolled oats and buckwheat flour for pancakes, all nice and fresh.

THE COXALL CO.,

"Robbing Peter to Pay Paul."

This saying had its origin in the rivalry between St. Peter's cathedral, now Westminster abbey, and St. Paul's, when, in 1550, an appropriation was made from St. Peter's to make good a deficiency in the accounts of St. Paul's. Much opposition was shown to this, and it was for the time a popular outcry, "Why rob Peter to pay Paul?" The saying was revived as a proverb upon the death of William Pitt, earl of Chatham, in 1778. The city of London argued that so illustrious a statesman should be buried at St. Paul's, while parliament held that the remains of so great a leader should be placed with the dust of kings and that to bury him away from the Abbey of Westminster would be again a robbing of Peter to pay Paul.

One Sure Method.

There is a story of a medical student before a board of examiners to whom the question was put again and again of how he would produce perspiration in a patient. He proposed all sorts of things, to which one importunate examiner always replied:

"Well, and if that would not do?"

At last the poor young man, driven to his wits' end, exclaimed, "I would send him before this board to be examined, and I warrant that would make him perspire."

The Obstacle.

"I came near eloping once," said the sweet young thing.

"Indeed!"

"Yes. We had quite made up our minds."

"Who?"

"Papa and I. but I could not find a man who would elope with me."

Washing Machines and Wringers, all of the new ones at BOYLE & SON.

If you are not troubled with rheumatism, and never have been, be thankful and take good care of yourself. If you are a victim of its torturing pains do not be discouraged.

Have You Rheumatism ? ? ?

You are not doomed to go on suffering forever because there is a sure and speedy cure for you in Tuck's Rheumatic Bone Oil. Perhaps you have tried a lot of patent medicines and now have no confidence in any. Do not condemn this until you have tried it. We have such confidence in it that if you try it and it does not cure you we will refund your money. It is a powerful, penetrating oil that acts directly on the bone—the seat of the disease—and has brought deliverance to so many that we have no hesitation in saying it will deliver you. Here is one case:—

Dear Sirs—I am free from rheumatism to-day because I used Tuck's Bone Oil. I had rheumatism in my hands and feet and thought at one time that my life was going to be ruined by it. I consulted a doctor and tried various remedies, but while some of them that I took internally made me feel better for a time none of them took the pain away. After I had suffered for six months or more, doctoring all the time, I was advised to try Tuck's Rheumatic Bone Oil. I did and I never can be thankful enough to the man who told me to get it. I had not used a bottle until I was better and before the second one was done my joints were loosened up, the pain was gone and I was well. Tuck's Bone Oil did it. That was six years ago and I have not been bothered since.

H. S. Brown, Merrickville.

For rheumatism, lame back neuralgia sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Rheumatic Bone Oil. A bottle should be on the shelf of every home. For sale by all medicine dealers at 50c. a bottle or sent prepaid by The Tuck Bone Oil Co., Limited, Smith's Falls, Ontario.

of the adulterated Japan Teas.

LEAD PACKETS ONLY. 400, 500 AND 600 PER LB. AT ALL GROCERS.
HIGHEST AWARD: ST. LOUIS, 1904.

THE LARGEST RESERVOIR.

In South as in North America, Nature does her work on the grand scale, and one of her noblest achievements is the Amazon River. Rising in the Andes, it flows across the continent and discharges into the Atlantic Ocean at the Equator. The vastness of the area which it drains, amounting to 2,368,000 square miles, will be evident when it is borne in mind that this is more than the area of Russia in Europe and Austria-Hungary. It has a length of nearly 4,000 miles, is navigable for 2,300 miles from the sea, and is fed by numerous streams, which in any other country would be ranked as great rivers. In the wet season, which lasts for about eight months, its width varies from five miles to 400. No wonder the Amazon has been called a gigantic reservoir rather than a river.

BABY'S OWN TABLETS.

Meets the mothers' needs in caring for the health of their little ones as no other medicine in the world can. The Tablets cure constipation, indigestion, colic, simple fevers, diarrhoea, teething troubles and expel worms. They break up colds and prevent croup. They make children sleep naturally and healthily, because they remove the cause of sleeplessness. And they are the only medicine that gives the mother a solemn guarantee that it contains no opiate or poisonous soothing stuff. They are good for children from birth onward; they always do good—they can not possibly do harm. Mrs. Geo. Turner, Barry's Bay, Ont., says: "I have used Baby's Own Tablets for the troubles that come to little ones with perfect satisfaction. I think there is no medicine can equal the Tablets." Every mother ought to keep a box of these Tablets in the house as a safeguard for her little ones. Sold by all druggists, or sent by mail at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

EVER NOTICE?

When people say anything good about you, ever notice what a few are present?

The Most Popular Pill.—The pill is the most popular of all forms of medicine, and of pills the most popular are Parulee's Vegetable Pills, because they do what it is asserted they can do, and are not put forward on any fictitious claims to excellence. They are compact and portable, they are easily taken, they do not nauseate nor grip, and they give relief in the most stubborn cases.

She wished to break it to him gently. "I have decided," she said, "to return your ring." He, however, was a resourceful man, who did not believe in letting a woman get the better of him. "You needn't bother," he replied. "I buy them by the dozen."

Mother Graves' Worm Exterminator does not require the help of any purgative medicine to complete the cure. Give it a trial and be convinced.

Gashaway—"What made you propose to her on the steamer?" Cleveland—"I wanted to prove I could love her even when she was sea-sick."

DEATH BY UMBRELLA.

Man Confesses to Involuntary Homicide and Is Sent to Prison.

Nicholas Lieb, of Althausen, in the Canton of Argovie, Switzerland, has been sentenced to twelve months' imprisonment and ordered to pay a fine of \$200 for involuntary homicide.

Some time ago when returning from a dance with his fiancée, he was attacked in the dark by a stranger. Lieb, in self-defence, made a lunge with his umbrella, and his assailant dropped on the ground. He struggled to his feet again, and Lieb and his fiancée hurried away.

Next day a man named Albert Rey was found dead on the road, and the inquest showed that some instrument had pierced his eye and entered deeply into the skull.

Several of the victim's friends and acquaintances were arrested and released before Lieb heard of the affair, when he made a full confession. He has lodged an appeal against his sentence.

1900 CALENDARS FOR 1906.

Do you throw away your old calendars? A Paris statistician has discovered that it is a mistake to do so, and being of an economical turn of mind has discovered further that calendars for 1900 will serve equally well for 1906. As a rule, of course, a calendar is only of use eleven years later, and leap year upsets this calculation pretty often. But as 1900 was allotted 365 days only, instead of 366 the days of the 1906 week fit exactly those of 1900.

AGONIZING NEURALGIA.

Due to Poor, Weak Blood — Dr. Williams' Pink Pills will insure a Cure.

Neuralgia is the surest sign that your whole system is weak and unstrung. Those sharp, stabbing pains are caused by your jangled nerves. But your nerves would not be jangled if your blood was pure and strong. You can't cure neuralgia by liniments or hot applications. They may relieve for a moment—but they can't possibly cure. You can never cure neuralgia until you enrich the blood and brace your starved nerves with Dr. Williams' Pink Pills. They actually make new blood. They soothe the nerves and strengthen the whole system. They strike right at the cause of agonizing neuralgia. Mr. John McDermott, Bond Head, Ont., says:—"As the result of a wetting, I was seized with pains in all parts of the body. I consulted a doctor, who told me the trouble was neuralgia. He treated me for some time but did not help me. I had often read of Dr. Williams' Pink Pills, and decided to try them. By the time I had taken three boxes, there was a good improvement in my case, and after I had taken ten boxes, every ache and pain had disappeared. I had gained in weight and felt better in every way. I shall always have a good word to say for Dr. Williams' Pink Pills."

When the blood is poor, the nerves are starved; then comes neuralgia, insomnia, St. Vitus dance, paralysis or

THE HEIR OF SANDLEIGH

OR
THE STEWARD'S SON

CHAPTER XXIII.—(Continued).

Norah put her hand to her brow. "I do not understand yet," she said, in a low voice. "Should—should not all this money have gone to my father's nephew, the present earl?"

Mr. Petherick coughed behind his hand.

"Ahem—that is a difficult question to answer, my dear young lady. In ordinary cases it might—that is, a portion—er—no doubt the present earl will feel slightly—er—disappointed. The estate, with the title and the position it involves, is—er—heavy—and—"

"You mean that he ought to have had some of this money?" said Norah, raising her eyes to the old man's face.

"Well—but, no," he replied, stanchly. "It was the earl, your father's, own personal property, to do with absolutely as he chose, and I repeat that, considering the circumstances, he chose well and—er—wisely."

Norah sighed, and her hand moved restlessly in Lady Ferndale's.

"What am I to do with all this money?" she sighed.

Mr. Petherick smiled.

"It is easier to wish with money, however large the sum, than without it, my dear," he said, gently. "Yes, an excellent will," he added, thoughtfully. "And yet I—er—wish the earl had permitted me to draw it. It is a strange thing that whenever a non-legal man, a man who is not a lawyer, draws up a will he makes some mistake."

Lady Ferndale looked up quickly.

"There is no mistake—nothing to invalidate the will?" she said.

"No, no," he responded. "Nothing. Just a simple blank, which does not affect it, fortunately."

Lady Ferndale inclined her head with a look of relief. The old man's words had frightened her.

"There is one thing that surprises me," she said, "and that is the smallness of the bequest to Mr. Guildford Berton."

"Ah, yes, yes," said Mr. Petherick. "Just a souvenir, so to speak. Yes. Very much to his credit."

Norah raised her eyes, and, answering the look, he went on:

"I must say that I was surprised. Mr. Berton was so great a friend, and has been of so much use to the earl, that I should not have been astonished if he had been left a sum of money. It is much to his credit that it is not so. I mean," he went on, stumbling and coughing, "that it is evident that Mr. Berton is an honest and disinterested man. He might have used his influence with the earl to get himself named for a certain sum of money. Very much to his credit, especially as he is, I believe, a—er—poor man."

"Yes, he has behaved very well," said Lady Ferndale, but with a slight wrinkle on her forehead; "very well. Don't you think so, dear?"

Norah murmured an assent. The insignificance of the earl's bequest to Guildford Berton had surprised her; she did not even yet understand it.

Mr. Petherick went on talking about the property that had been left to Norah, and she gathered, listening listlessly with downcast eyes, that though the Court must go to the present earl, the missing man, there were other houses, as large, if not as historic, which had fallen to her.

"I am afraid you are dreadfully rich, my dear," said Lady Ferndale, with a fond smile; and Norah sighed. There flashed across her memory the story of the man dying of thirst in the desert, who in the course of his last feeble

princely in extent and character. Ahem

—I really think you should go."

And Norah said that she would go—when the earl arrived. Then he would sigh and shake his head, and proceed to tell her about the shares in a coal mine which he had discovered belonged to her, and asked her what she would do with a large sum which he found invested in the funds in the earl's name, and which now belonged to her. And then Norah sighed, and, begging him to do just as he pleased, closed the interview.

Another fortnight passed, and one evening she was sitting in the drawing-room, looking out at the view, which was rapidly disappearing in the gloaming of the short late autumn day, when a footman entered and brought a card to her.

She took it up and held it toward the light. It was Guildford Berton's, and on it was written in pencil, "Will you see me for a few minutes?"

Norah held the card in her fingers, her brows drawn together in silence for fully a minute; then she inclined her head to the footman, who stood like a statue beside her, and he opened the door and announced Guildford Berton.

He came in with his noiseless tread, and Norah, who had taken up a book and held it in her right hand, rose and bowed to him without offering to shake hands.

"I must ask your pardon for intruding on you, Lady Norah," he said, slowly, and in the manner of one who was repeating words which he had learned by heart, "but I am leaving England for some time, and I could not go without wishing you farewell."

"His tone was so subdued, so humble, and, indeed, reverential, that Norah's frigidly melted somehow. After all, she thought, his greatest crime had been his daring to love her, and it is a crime which most women find easy to forgive."

"You are leaving England?" she said.

"Will you not sit down?"

He took a chair and she sank into hers.

"Yes," he said, sadly, "I am going away for a change of air and scene. I may be away for some time—for years."

"Where are you going?" she asked, not because she cared, but with the desire to be at least polite to the man who had been her father's closest friend, and who had only sinned in loving her.

"To Australia, I think," he said. "They tell me that a man can find work there, and it is time I made the quest. I have been idle too long—for a poor man."

Norah's heart smote her—it had grown very tender during these weeks of solitary musing. Sorrow teaches us sympathy even with those we dislike, and she was conscious of a feeling of pity for this man who had wasted his life dancing attendance on one who had rewarded the sacrifice by—a gold watch and chain!

"I hope you will—succeed," she said.

He glanced up at her gratefully, but with the same air of playing a part he had carefully rehearsed.

"It is very good of you to express so kind a wish," he murmured, "especially as I know—am bitterly conscious—that I have lost your friendship."

Norah's brow darkened, and her lips came together tightly.

"Is there any need to speak of—of what is past, Mr. Berton?" she said.

"Forgive me," he pleaded. "It is hard not to speak of what is in one's thoughts day and night, continually. You will understand why I find this place unendurable. It is a source of torture to me! To feel that I am near you and that I

Another Graves' Warming Exterminator does not require the help of any curative medicine to complete the cure. Give it a trial and be convinced.

Gashaway—"What made you propose to her on the steamer?" Cleveland—"I wanted to prove I could love her even when she was sea-sick."

Put up in \$1 Yard Rolls. The famous "The D & L" Menthol Plasters which cure lumbago, backache, sciatica, neuralgia, etc., are also put up in one yard rolls for physicians and family use. Davis & Lawrence Co., Montreal.

It is about as difficult to satisfy a man who does not know what he wants as it is a woman who does know what she wants.

"My Physicians Told Me I Must Die, but South American Kidney Cure cured me of that awful Bright's Disease." This is a sentence from a letter of a young Frenchman from a town in the western town who, through overwork, and worry, had contracted this deadly complaint. It was released, and finally cured, all kidney diseases, 100.

Mr. Henpeck says that the reason a married woman looks under the bed for a burglar is because she is afraid that he'll get to her husband's pockets before she does.

It Needs No Testimonial—It is a guarantee in itself. If testimonials were required, they could be furnished in thousands from all sorts and conditions of men in widely different places. Many medicines are put forth every year which have but an ephemeral existence and you are glad of no more. Dr. Williams' Kidney Cure has grown in reputation every day since it first made its appearance.

"How glad of the result of this course of yours. After several months' use, a good deal better." "After 'Yes' to often asks five and six times a month for it."

Chemists Have Trouble in getting iron into such state that the system will absorb and benefit by it. In Peruvian the best tonic, perfection has been achieved. It builds and strengthens.

"I am so glad your sister enjoyed her visit to us, Mr. Smith." "Oh, well, she is the sort of a girl who can enjoy herself anywhere you know."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Johnny—"I told you, really mean, if when you and I spent anyone that it was that you. The 'last' came from me and I told you. Johnny—"Don't you know, Steve, Bridget is just as good as dead."

When Baby Had Scald Head. When Mother had Salt Rheum. When Father had Piles. Dr. Ayer's Ointment gave quickest relief and surest cure. These are some of the truths picked from testimony which is given every day to this greatest of healers. It has never been matched in curative qualities in Eczema, Tetter, Piles, etc. 25 cents—100.

OPEN WORK PROPOSAL

"You say you want open work stockings all winter," she asked. "Yes; I can't get anybody to mend them."

"Oh, George, this is so sudden."

stones, every ache and pain had disappeared. I had gained in weight and felt better in every way. I shall always have a good word to say for Dr. Williams' Pink Pills."

When the blood is poor, the nerves are starved; then comes neuralgia, insomnia, St. Vitus dance, paralysis or locomotor ataxia. All these troubles are cured by Dr. Williams' Pink Pills, because they actually make the rich, red blood that feeds and soothes the starved nerves and sends health and strength to every part of the body. That is why these pills always cure such troubles as rheumatism, anaemia, chronic erysipelas, indigestion, and the special ailments of growing girls and women. But you must get the genuine with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. If in doubt, write the Dr. Williams' Medicine Co., Brockville, Ont., and the pill will be sent by mail at 75 cents per box, or six boxes for \$2.50. If you are ailing, try them to-day.

The ever fading medicine, Holloway's Corn Cure, removes all kinds of corns, warts, etc., even the most difficult to remove, without withstand this wonderful remedy.

Young Bore in the parlor—"Tommy does your sister know I'm here?" Tommy—"I think so. She told mamma this morning she had a presentiment that trouble was coming."

An Awful Experience with Heart Disease.—Mr. L. J. Law, Toronto, Can., writes: "I was so sorely troubled with heart disease that I was unable for 18 months to be down in bed less I smothered. After taking one dose of Dr. Ayer's Heart Cure, I retired and slept soundly. I used one bottle and the trouble has not returned."—99

Wealthy Man—"And my boy, a millionaire's position is a hard one." "Sceptical Friend" "In what way?" "Wealthy Man" "If I heard my wealth they say I'm a scoundrel, and if I give my money away they say I'm trying to ease my guilty conscience."

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise, giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This highly illustrated book was written by W. H. Veno, a gentleman who has made a study of these diseases. The price is by a graduate of the University of Wurzburg. Send postal to-day and you will receive the book free by return. Address: The Veno Drug Co., 24 King St., West, Toronto.

FASTEST VESSEL IN THE WORLD.

During the last year the British navy has been augmented by eight remarkable vessels known as fleet scouts, which have practically the speed of torpedo-destroyers, but have sufficient length and coal capacity to go considerable distances, and not only gain information, but prey upon an enemy's merchant shipping. The Attentive, the latest of these scouts, when recently tested, made a record of 25.88 knots on a sustained run of 6½ hours, during which a maximum speed of 26½ knots was reached, this being reached on the last hour of the trial trip. If destroyers and high-speed launches are excepted, this probably makes the Attentive the fastest vessel in the world, and the representative of a type which soon may spread beyond the British navy.

PHONOGRAPH AS SALESMAN.

An enterprising German has patented a device for fitting phonographs to doors. As the customer enters the door of a shop, a voice will call out, "Flour is cheaper to-day"; "New consignment of special quality mince meat just received; try some," and similar invitations.

as large, if not as historic, which had fallen to her.

"I am afraid you are dreadfully rich, my dear," said Lady Ferndale, with a fond smile; and Norah sighed. There flashed across her memory the story of the man dying of thirst in the desert, who, in the course of his last feeble crawl in search of a spring, came across, not water, but a bag of precious stones, and how he flung them from him with a curse. He would have bartered them all for one draught of the life-giving water, and she would have bartered all the immense wealth that the earl had left her for one draught of Cyril Burne's love.

"Ah," she thought, as she sat in her own room and mused over it all, "if he had but been true, if he had but remained constant, that I might have gone to him and laid it all at his feet. Of what use are lands and money to me, who would have been so happy sharing a cottage with him, and cannot but be miserable now that I have lost him?" She lay awake all that night, the same refrain surging in her ears, and recalling with an agony too deep for tears those too short happy hours she had spent in the woods by his side.

Lady Ferndale remained at the Court for three days, and would have stayed longer, but Norah would not permit her to do so. Nor would she yield to Lady Ferndale's oft-repeated prayer that Norah would go back with her to Ferndale.

"I do not know how it is," she said, "but I have a feeling that I ought to stay here until the earl arrives."

"That's nonsense," said Lady Ferndale, stoutly; "he may never arrive. Besides, why should you sacrifice yourself by remaining in this vast place for the sake of welcoming a stranger who will probably—"

"Wish me gone as soon as he arrives," finished Norah, with a smile. "I don't know, but I put myself in his place, that is all. I should not like to come back and find the place deserted."

"Come back!" The young man has never been here," persisted Lady Ferndale.

"Then he will feel all the more a stranger," said Norah. "You go home, dear, and make my peace with Lord Ferndale for keeping you so long, and I promise that immediately Lord Arrowdale comes home I will pack up my things and invade you."

Lady Ferndale had to be satisfied with this, and went off reluctantly, and Norah was left alone, for even Mr. Petherick had found it necessary to return to London.

"I must find this earl," he said; "I must find him. If you want anything, my dear young lady, telegraph at once, and if you cannot wait even so long for me, send for Mr. Berton, who knows everything connected with the estate."

Norah inclined her head, but she thought that if Mr. Berton did not come to the Court before she sent for him it would be some time before his tall figure shadowed the threshold.

And it seemed as if he meant to wait for a summons from her, for the days passed and he did not approach the Court. He had glided out of the room on the day the will was read, and she had not seen him since.

After a time she ventured beyond the park gates, and wandered aimlessly along the lanes and over the common, very much as she wandered about Norton after her mother's death; but though the expected and dreaded—to meet him, he did not cross her path.

A fortnight passed, Lady Ferndale drove over frequently and once or twice persuaded Norah to go over to Ferndale for lunch or dinner, and she was made much of and petted to her heart's content, but she always returned to sleep at the Court. Mr. Petherick ran down from London several times, bearing formidable-looking documents, which he required her to sign, and giving her further details of the wealth which she had inherited.

"I think you ought to go to one or two of your places, Lady Norah," he said, gently. "Wealth has its responsibilities, as well as its privileges. The place in Scotland, for instance, the earl had not seen it for years. Now what do you think of paying it a visit? It is a very fair specimen of—er—architecture, quite

as there any need to speak of—of what is past, Mr. Berton?" she said.

"Forgive me," he pleaded. "It is hard not to speak of what is in one's thoughts day and night, continually. You will understand why I find this place unendurable. It is a source of torture to me! To feel that I am near you and that I dare not approach you—Lady Norah," he rose and took a step nearer to her. "I had intended to wish you farewell in the fewest possible words, but, alas! my heart is too strong for my will! I am going—forever, but before I go will you give me one more chance, will you let me plead for that which is indeed dearer than life?"

Norah rose, and stood, pale and almost majestic, her brows very low indeed, her lips tightly compressed.

"No, I cannot permit you to say a word—a word of that kind," she said, coldly, haughtily. "I am sorry—no, I am glad that you are going, if, as you say, you cannot forget—"

"Forget that I am only Guildford Berton, the son of your father's steward, and that you are an earl's daughter, and the owner of half a million of money," he said, slowly, raising his eyes to her face with a curious expression, half respectful, half defiant. "Is that what you would say, Lady Norah?"

"No," said Norah, and her words cut sharply and clearly. "That is not what I would say, Mr. Berton. It would make no difference to me if you were a prince and I a beggar at your gates."

"Because you hate me so intensely—is that it?" he said, gnawing his lip, but still with the half-defiant look in his eyes.

"Hate!" she said, her bosom heaving. "It is you and not I who use the word."

"But you mean it," he said, breathing quickly. "If you were a princess and I the beggar, you could not speak with greater hauteur."

"Need we pursue this subject?" she said, coldly. "If you have come to bid me farewell, let us part in peace, for the sake of my father, whose friend you were. You were his friend, and I will not forget that; as his daughter, it is my duty to remember it."

She tried to speak quietly, as a woman should do to the man whom she has rejected; but she felt that her tone rang with pride and hauteur, and that she could not soften it.

"Fair words," he said, "but words only. You speak of your duty to your father; it was his wish that you should be my wife. Why will you not respect that wish, and at least give me a hearing?"

Norah looked at him straight in the face.

"I do not know that it was his wish of his," she said.

The remark stung him almost beyond endurance.

"You think I lied," he said, a hot flush reddening his face.

"I think you were mistaken, Mr. Berton," she said. "But I will not discuss it with you. You have come to say good-bye."

"No," he said, sharply. "I have come to remove the barrier your pride has erected between us. You speak like a princess; indeed, you would like to send me from your presence like a dog, Lady Norah." A spot of red burned in his pale cheeks. "Lady Norah!" he laughed. "The title sounds sweet and pleasant in your ears, does it not? It warrants all your pride and hauteur. What would you say if I told you that it rests with me whether you ever hear it again?"

Norah looked at him as if she thought—as indeed she did think—he had gone mad, and then her eyes wandered toward the bell.

"Wait," he said, evidently struggling for his usual self-possession. "There will be plenty of time to ring the bell when you have decided whether you will still be an earl's daughter and my wife or—a beggar like myself."

(To be continued).

Norah inclined her head, but she thought that if Mr. Berton did not come to the Court before she sent for him it would be some time before his tall figure shadowed the threshold.

And it seemed as if he meant to wait for a summons from her; for the days passed and he did not approach the Court. He had glided out of the room on the day the will was read, and she had not seen him since.

After a time she ventured beyond the park gates, and wandered aimlessly along the lanes and over the common, very much as she wandered about Norton after her mother's death; but though the expected and dreaded—to meet him, he did not cross her path.

A fortnight passed. Lady Ferndale drove over frequently and once or twice persuaded Norah to go over to Ferndale for lunch or dinner, and she was made much of and petted to her heart's content, but she always returned to sleep at the Court. Mr. Petherick ran down from London several times, bearing formidable-looking documents, which he required her to sign, and giving her further details of the wealth which she had inherited.

"I think you ought to go to one or two of your places, Lady Norah," he said, gently. "Wealth has its responsibilities, as well as its privileges. The place in Scotland, for instance, the earl had not seen it for years. Now what do you think of paying it a visit? It is a very fair specimen of—er—architecture, quite

as there any need to speak of—of what is past, Mr. Berton?" she said.

"Forgive me," he pleaded. "It is hard not to speak of what is in one's thoughts day and night, continually. You will understand why I find this place unendurable. It is a source of torture to me! To feel that I am near you and that I dare not approach you—Lady Norah," he rose and took a step nearer to her. "I had intended to wish you farewell in the fewest possible words, but, alas! my heart is too strong for my will! I am going—forever, but before I go will you give me one more chance, will you let me plead for that which is indeed dearer than life?"

Norah rose, and stood, pale and almost majestic, her brows very low indeed, her lips tightly compressed.

"No, I cannot permit you to say a word—a word of that kind," she said, coldly, haughtily. "I am sorry—no, I am glad that you are going, if, as you say, you cannot forget—"

"Forget that I am only Guildford Berton, the son of your father's steward, and that you are an earl's daughter, and the owner of half a million of money," he said, slowly, raising his eyes to her face with a curious expression, half respectful, half defiant. "Is that what you would say, Lady Norah?"

"No," said Norah, and her words cut sharply and clearly. "That is not what I would say, Mr. Berton. It would make no difference to me if you were a prince and I a beggar at your gates."

"Because you hate me so intensely—is that it?" he said, gnawing his lip, but still with the half-defiant look in his eyes.

"Hate!" she said, her bosom heaving. "It is you and not I who use the word."

"But you mean it," he said, breathing quickly. "If you were a princess and I the beggar, you could not speak with greater hauteur."

"Need we pursue this subject?" she said, coldly. "If you have come to bid me farewell, let us part in peace, for the sake of my father, whose friend you were. You were his friend, and I will not forget that; as his daughter, it is my duty to remember it."

She tried to speak quietly, as a woman should do to the man whom she has rejected; but she felt that her tone rang with pride and hauteur, and that she could not soften it.

"Fair words," he said, "but words only. You speak of your duty to your father; it was his wish that you should be my wife. Why will you not respect that wish, and at least give me a hearing?"

Norah looked at him straight in the face.

"I do not know that it was a wish of his," she said.

The retort stung him almost beyond endurance.

"You think I lied," he said, a hot flush reddening his face.

"I think you were—mistaken, Mr. Berton," she said. "But I will not discuss it with you. You have come to say goodbye."

"No," he said, sharply. "I have come to remove the barrier your pride has erected between us. You speak like a princess; indeed, you would like to send me from your presence like a dog, Lady Norah." A spot of red burned in his pale cheeks. "Lady Norah!" he laughed. "The title sounds sweet and pleasant in your ears, does it not? It warrants all your pride and hauteur. What would you say if I told you that it rests with me whether you ever hear it again?"

Norah looked at him as if she thought—as indeed she did think—he had gone mad, and then her eyes wandered toward the bell.

"Wait," he said, evidently struggling for his usual self-possession. "There will be plenty of time to ring the bell when you have decided whether you will still be an earl's daughter and my wife—or a beggar like myself."

(To be continued.)

SHUT YOUR MOUTH—TRY IT.

Shut your mouth and open your eyes and soon you will be considered wise.

The greatest follies are often committed by the smallest fools

POLICE WILL BE PUZZLED

THEY MUST REMEMBER FEATURES OF BRITISH M. P.'S.

Member of the Force Who Guards Crossing at Parliament Street, States Experiences.

The most perplexed men in London to-day is the House of Commons police. How are they to recognize the shoals of new members who will shortly troop through the gates of the Palace of Westminster?

Among the 670 new M. P.'s there will be at least 300 strange faces.

Perhaps the most puzzled constable of all is P. C. X., who holds the members' crossing at the end of Parliament Street.

For 20 years he has held this honorable post. Yet, never, he confessed, does he remember a time when so many legislative strangers were sent to the popular chamber.

"My duty is," he explained, "to stop the traffic for M. P.'s to cross the road. I have had difficulties in the past with new members, but none so great as those before me in the opening days of the coming session. The first week or so M. P.'s will have to take their chance. They will have wait with the other people until I stop the traffic in the ordinary way. But as soon as I get to know them it will be all right."

The burly officer moved to apostrophise a cabman for passing on the wrong side. Then he returned to his station.

"There is another thing," he continued, reflectively, with a touch of sorrow befitting one who cherishes the dignities of the Mother of Parliaments.

"Some of them are so shockingly dressed that you would never imagine they were M. P.'s. I am not thinking of the Labor members, though I do not myself approve of the caps in the House. I am thinking of the Nationalists. You would not believe they were members of the English House of Commons. As for their clothes—well, I wouldn't wear them myself.

AN EXPERIENCE.

"But," he concluded, a little hopefully, "I dare say I shall recognize them all after a bit. I hope I shall not repeat my experiences of four years ago. It was just at the end of the session, and a member came along. I stopped the traffic, and he crossed the road. The next minute came another gentleman. I looked him hard in the face, but failed to recognize him. So he crossed the road as best he could. But he was a member after all, and wrote and complained of my inattention. The matter was investigated, and then it transpired that was the only time he had attended the House during the whole session. How could I be expected to know a man like that?"

The constables at the other entrances to the historic chamber are also greatly perturbed. But their course is clear.

"I always stop everybody I don't know," said a member of the force. "I shall stop a good many the first day or two, and they won't like it. But it can't be helped. You would not believe how 'uppish' some of the new young members are. They get elected and think the whole world ought to know them, and then, if I venture to stop them, they get quite nasty, call it 'confounded impertinence,' and such like. But what can I do? I haven't got a picture gallery of all the new members on the pavement."

COPIED FROM COINS.

The fashion of hair-dressing is constantly changing, but Lady Evans demonstrated to the members of the Royal Numismatic Society, which met in London, England, recently, that modern

HE WAS LAID UP FOR OVER A YEAR

TILL DODD'S KIDNEY PILLS CURED HIS KIDNEY TROUBLES.

Now He's Perfectly Healthy and Able to Work—Gives all the Credit to the Great Canadian Kidney Remedy.

Wapella, Assa., N.W.T., Feb. 12 — (Special).—Cured of Kidney Disease that had laid him up for over a year, Mr. Geo. Bartleman, a well-known man here, is loud in his praises of Dodd's Kidney Pills for to them and nothing else he claims he owes his cure.

"Yes, I had Kidney Trouble," Mr. Bartleman says. "I had pains in my back and in other parts of my body and though the doctor did what he could for me, I grew worse till I was unable to work."

"Then I started to take Dodd's Kidney Pills, and I took them all winter and summer while I was unable to work. I took in all twelve boxes, and now I am perfectly healthy. My pains are all gone and I am able to work. I heartily recommend Dodd's Kidney Pills to all sufferers from Kidney Disease."

Dodd's Kidney Pills always cure the kidneys. Healthy kidneys strain all impurities, all seeds of disease, out of the blood. That's why Dodd's Kidney Pills cure a wide range of diseases including Bright's Disease, Rheumatism and Urinary Troubles.

PHYSICAL DEBILITY.

"Musicians are the least courageous class of workers when they go on strike."

"Why do you say that?" "Because they are always unwilling to face the music."

A bottle of Bickle's Anti-Consumptive Syrup, taken according to directions, will subdue a cough in a short time. This assertion can be verified by hundreds who have tried it and are pleased to bear testimony to its merits, so that all may know what a splendid medicine it is. It costs you only 25 cents to join the ranks of the many who have been benefited by its use.

Barry—"They tell me you have had a very narrow escape from death." Harry—"Yes, they were going to operate on me for appendicitis, but they discovered in time I hadn't the money to pay for it."

Spots and blotches on the face and neck are often merely signs of foul blood. Apply Weaver's Cerate to obtain immediate relief and take Weaver's Syrup to rid the blood of pollution.

Mamma—"What would my little girl do if mamma should go away?" Little Flora—"I don't know. I suppose I'd have to try to box my own ears myself when I was naughty."

"I believe it to be the most effective remedy for the Stomach and Nerves on the market," is what Annie Patterson, of Sackville, N. B., says of South American Nerve, for, she says, La Grippe and the complications which followed it left her next to dead with Indigestion, Dyspepsia and General Nervous Shattering. It cured her.—100.

Winks—"Why did they call the Middle Ages the Dark Ages?" Binks—"Because the women kept their ages dark." Winks—"No; because there were so many knights."

Signals of Danger—Have you lost your appetite? Have you a coated tongue? Have you any unpleasant taste in the mouth? Does your head ache and have you dizziness? If so, your stomach is out of order and you need medicine. But you do not like medicine. He that professes sickness to medicine must suffer, but under the circumstances the wise man would procure a box of Parusel's Vegetable Pills and speedily get himself in health, and strive to keep so.

Present System of Hairdressing Existed in Ancient Rome.

The fashion of hair-dressing is constantly changing, but Lady Evans demonstrated to the members of the Royal Numismatic Society, which met in London, England, recently, that modern styles have more than a slight resemblance to those in favor with the women of ancient Rome.

Lady Evans illustrated her address by ancient Roman coins. In the Republican era the hair of the women was collected on the back of the head and fastened in a knot, but later a more elaborate dressing was seen, and the hair was drawn to the top of the head and passed over the forehead.

In imperial times it was plainly crimped, and had a queue which was arranged in a series of wavy curls very similar to the fashion in England at the present day. The head of Faustina, the wife of Antoninus Pius, was shown in illustration of this style.

Afterward the hair was treated more simply, and on a medallion of the head of the mother of Constantine the Great it is seen to be covered with a cloth and, from under which a fringe of curls was arranged over the forehead. At this period, too, the "bun" coiffure was in existence—a style with which modern ladies are very familiar.

The series of illustrations given by Lady Evans extended over four centuries.

"SAVED MY LIFE"

—That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedying improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment—the kind of nourishment that cannot be obtained in ordinary food. No system is too weak or delicate to retain Scott's Emulsion and gather good from it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

LAY IN BED FIFTY YEARS.

Woman Entered Hospital in 1854 and Cost Institution \$17,500.

That an incurable disease need not necessarily be a bar to a long and relatively happy life is proved by the remarkable happy story of a patient who died the other day at the Royal Hospital for Incurables, Putney, England.

The institution was opened in 1854, and in November of that year Miss Relfe, then 29 years of age, entered as the first patient. She was suffering from paralysis of the muscles of the throat and paralysis of the arms and legs, and her case from the first was hopeless. Although so cruelly afflicted, she lingered on for 51 years, and died at the last from senile decay at the age of 80. Her long period of residence had cost the institution \$17,500.

The same institution furnishes other examples, hardly less remarkable, of tenacious clinging to life on the part of sufferers who are terribly handicapped by bodily ills.

Still living in the hospital is a woman, a martyr to paralysis, who entered in 1857, and there are several who have been inmates for 40 years. A woman who obtained admittance in 1864 has never left her bed since. Another old woman, still handsome of face, the personification of contented happiness, has kept to her bed for 27 years.

The men incurables, for some reason, do not live as long as the women, but in the hospital there is one man who entered in 1866, and another man who has been there for 35 years.

GRATITUDE OF A THIEF.

Servant Confesses to Employer That She is Spy of Burglars.

A wealthy widow living in Brussels, Belgium, engaged a young French maid at high wages recently. The girl fell ill, and was carefully nursed by her mistress. On her recovery she insisted on leaving the house at once.

Pressed for her reasons, the girl confessed that she was a member of a gang of thieves who preyed chiefly on widows and unprotected women. Her duty to her confederates was to explore the house and inform them of the easiest mode of entrance and of the rooms in which valuables were stored.

In return for her mistress' kindness, she promised not to tell the thieves that the house contained anything of value. The widow, none the less, sold her property and took up her quarters in a boarding-house.

A BOY'S BREAKFAST.

There's a Natural Food That Makes It's Own Way.

There's a boy up in Hoosick Falls, N. Y., who is growing into sturdy manhood on Grape-Nuts breakfasts. It might have been different with him, as his mother explains:

"My 11-year-old boy is large, well developed and active, and has been made so by his fondness for Grape-Nuts food. At five years he was a very nervous child and was subject to frequent attacks of indigestion, which used to rob him of his strength and were very troublesome to deal with. He never seemed to care for anything for his breakfast until I tried Grape-Nuts, and I have never had to change from that. He makes his entire breakfast of Grape-Nuts food. It is always relished by him and he says that it satisfies him better than the ordinary kind of a meal.

"Better than all he is no longer troubled with indigestion or nervousness, and has got to be a splendidly developed fellow since he began to use Grape-Nuts food." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pkgs.

CASE OF SHOPPING MANIA

ACCUMULATION OF NINETEEN YEARS' LABOR UNEARTHED.

House of Mystery in Brooklyn Contained More than \$250,000 Worth of Goods.

More than \$250,000 worth of goods bought in four years of shopping in Brooklyn and New York City, piled unused in rooms, closets and halls, nearly filling a large four-story brown stone mansion in Brooklyn, lay for nineteen years unheeded, says the New York Tribune.

Laces were heaped upon calico, furs on cotton, the daintiest of linens and silks were stored with common household garments, \$500 gowns from the most fashionable of dressmakers were laid on cheap Mother Hubbards, solid silver and cheap plate, the most fragile of china sets were mixed with ironware—crystal and cut-glass with common glassware—all cast in piles reaching as high as the ceilings, stuffed in closets and lying on the stairs.

WOULD FILL SEVERAL VANS.

This was the result of a search of the "house of mystery," No. 178 State street, Brooklyn. It tells of the mania of Mrs. Mary Cook King, who died nearly two weeks ago in a Flushing sanitarium, and it explains what became of part of the \$500,000 estate left to her by her husband twenty years ago. The search was conducted by J. H. Squibb of No. 148 Columbia Heights, executor of Mrs. King's estate. The goods would fill several large vans, and except for the pottery, the silver and crystal they are of little value, for the moths and time have ruined everything else.

Mrs. King died two weeks ago Tuesday. She had made one request, and that was that she should have the key of her house, and in no circumstance was any member of her family to obtain entrance until after her death. By her will Mr. Squibb was the executor. Thursday of last week he turned the key in the rusty lock and entered the house.

First entering the drawing-room, he found it nearly filled with bundles, boxes and parcels, some of them as large as a man could carry, others tiny enough to slip into the pocket. He opened one, and the tattered, moth-eaten fragments of a silken skirt were disclosed. He forced open the windows and became interested. He tore open bundle after bundle, and began to get an idea of whence the money had gone. On the parcels were the names of the great merchants, milliners and dressmakers of past days, and inside was everything a woman can wear, in all grades, qualities and sizes. None had ever been worn.

ONE THOUSAND HANDKERCHIEFS.

Closets of the upper rooms gave up the china, crystal and silver. The silver was still wrapped and only a little tarnished.

One room was devoted to handkerchiefs. There were hundreds of packages and more than one thousand handkerchiefs, some worth \$30 once and others five-cent cotton affairs.

Epitaphs have made more people famous than virtue ever has.

SHAKING HANDS.

The Arabians when they meet a friend shake hands six or eight times. Once is not enough. Should, however they be persons of distinction, they embrace and kiss one another several times and also kiss their own hands. In Turkey the greeting is to place the hand upon the breast and bow, which is both graceful and appropriate.

Parsons—"If I should ask old Bullion for his daughter's hand, what do you think of my chances?" Burrett—"Very fair. You have youth, health and a good constitution, and should pull through with careful nursing."

When You Have a Cold, the air cells are clogged with mucus or phlegm. Allen's Lun Balm, in curing a cold, clears the tiny air passages and heals the bronchial tubes.

"It would be helpful to you," said the prison visitor, "if you could take some motto and try and live up to it." "That's right," replied the convict. "I'd like to select, for instance, 'We are here to-day and gone to-morrow.'"

ISSUE NO. 7-66.

DEADLY CHEMICALS FOUND

Russian Terrorists Turn to Cyanide of Potassium.

REVOLUTIONISTS ARRESTED.

A despatch from St. Petersburg says. An important arrest of six social revolutionists lavishly provided with explosives and bombs, who it is believed were planning an attempt on the life of Governor-General Doubasoff, of Moscow, was made here on Friday evening just previous to their departure for Moscow. A seventh member of the party, a student, threw away a bomb and escaped. The police also took into custody eight terrorists belonging to another group, at whose residence was found cyanide of potassium and other deadly chemicals sufficient, it is said, to kill half the population of St. Petersburg, and thousands of revolutionary proclamations. It is suspected that the terrorists, failing to reach prominent persons here by open violence, are about to try the more subtle means of poison.

TERRORISTS ARE ACTIVE.

A despatch from St. Petersburg says: The Official Messenger prints the weekly summary of violent political crimes and seizures of bombs, explosives and weapons. The record consists mainly of a long enumeration of cities where the terrorists have been active. These include St. Petersburg, Moscow, Odessa, Kieff, Nishni, Novgorod, Vilna, Warsaw, Samara, Kursk, Sebastopol, Kazan, Tiflis, Riga and other principal cities where officials have been killed, patrols fired on, bombs, weapons and dynamite seized or post-office, banks or other State institutions attacked. A number of the crimes were committed by mere boys.

Despatches tell of a grammar scholar wounding a reactionary teacher at Khar-koff and the arrest at Berdicheff of a 15-year-old lad having three loaded bombs in his possession.

There is evidence that a bomb explosion which occurred at Vilna on Feb. 12 was part of a general plot, with ramifications throughout the empire, aimed at preventing the participation of the moderate parties in the election, and the chief of the secret police here has sent orders to the gendarmerie of all the cities to do everything possible to guard against similar attempts. Details of the explosion at Vilna show that six local revolutionists were on their way to blow up a club-house where moderates were in session, when one of the former slipped on the icy sidewalk and exploded a bomb.

The Czarevitch, the first battleship of the Russian Far Eastern fleet to return to European Russia, has arrived at Libau.

POLICE INCITING MURDER.

The St. Petersburg correspondent of

the London Times says that a distinguished official vouches for the correctness of the following story: A few days ago Premier Witte learned that the secret police were printing an enormous number of proclamations, drawn up by Gen. Bogdanovitch and Gen. Trepoff, inciting the people to murder the Liberals and Jews. Count Witte, accompanied by Minister Filosofov and Prince Urusoff, went to the police offices and found unmistakable evidences of the fact. A stormy scene followed between Count Witte and M. Durnovo, Minister of the Interior. The former subsequently went to TsarskoeSelo, but failed to obtain expected support from the Czar. It is stated that Prince Urusoff and several high officials of the Ministry of the Interior will resign.

It is semi-officially stated that the Minister of the Interior has instructed the provincial authorities to forcibly levy taxes. The arrears exceed \$15,000,000.

RUSSIAN NOBLES MURDERED.

A despatch from St. Petersburg says: Count Lamondorff (not the Foreign Minister) and Baron Bone were dragged from a sleigh near Tukum and savagely murdered on Saturday. This appears to be the last of retaliation for the military executions in the repression of the Baltic revolt.

The goods station at Riga has been ransacked and robbed of \$10,000. Many railway officials have been murdered.

BRUTAL COSSACKS.

A despatch from St. Petersburg says: Fifty educated Estonians at Dorpat, most of them landowners, have telegraphed a protest to the St. Petersburg newspapers against wholesale military executions in districts where revolutionaries did not destroy property.

It is stated that over seventy alleged revolutionaries have been shot at Fellin, where no violence had been committed. At Lienzuzen, in Wesenburg, two women and several children, who were cowering in the cellar of a house, were shot in cold blood by Cossacks.

Executions are now general in the Dorpat district. Captain Von Siever, the military "executioner," has been furnished with a list of the condemned, and as fast as arrested they are placed against a wall and shot—sometimes by a firing squad, sometimes by a single soldier, and occasionally by the officer in charge.

At Mitau, Courland, ten revolutionaries were shot this week. A school-house "denounced" as a revolutionary headquarters, was burned by soldiers, although it cost the Government thousands of pounds to build.

Buyers stated that the bulk of the exporters brought forward were little better than short-keeps. Dealers did not care to pay more than \$4.75 for exporters', save in cases where the animals were of superior quality. The nominal range to-day was \$4.40 to \$4.90 per cwt.

Quite a number of mixed loads of exporters' and butchers' were received. The sales of these were readily made. One lot brought \$4.70 per cwt.

For straight butchers' heifers, stalled and equal in quality to exporters', fancy prices were paid. But these cattle easily rank above any others in the butchers' line. Some small select lots sold at \$4.50 to \$4.75 per cwt. Good butchers', in loads, sold at \$4 to \$4.25. Cows were in demand to-day, and their values were firm. Good ones brought \$2.50 to \$3.60; common \$2.50 to \$3. and

ONTARIO LEGISLATURE

Speech From The Throne at The Opening of the House.

With all the usual pomp and ceremony, military accompaniment, and social display, the second session of the eleventh Legislature of Ontario was opened in the Parliament Buildings, in Queen's Park, Toronto, Thursday afternoon. The many beautifully dressed women on the floor of the House made a brilliant scene. Immense crowds packed every place of vantage on the floor and in the galleries. The corridors were thronged with hundreds seeking admission.

THE SESSION'S PROGRAMME.

The speech from the throne was as follows:

Mr. Speaker and Gentlemen of the Legislative Assembly:

I take great pleasure in meeting you again as representatives of the Province in Parliament assembled.

Our very earnest thanks are once more due to Almighty God for the bountiful harvest of the year that has passed, which even exceeds the one that called for our gratitude last year. With this harvest, the market conditions have been such as to maintain the prosperity which our farmers have enjoyed in recent years. This has been noticeable in the dairying industry, the output of which has been very large. The evidences of steadily increasing enterprise and activity on the part of our people, which have been apparent for several years past, are to be seen on all sides at the present time, and afford good reason for congratulation and thankfulness.

FOR FARMERS' COLLEGE.

The past year has been the most successful in the history of the Agricultural College from the standpoint of the number of students, the number of farm visitors, and the amount of work done. For the first time in its career, the total number of students of all classes exceeded one thousand. The Macdonald Institute has apparently taken firm hold on the appreciation of the public, and farmers' daughters have come to its halls in numbers that promise a very bright future for the institution. You will be asked to provide funds for increasing the teaching facilities of the college in various departments.

The past year has shown a large increase over previous years in the number of immigrants settling in Ontario. Preparations are being made to receive and settle a larger number during the present year, who will be directed to the farms of the Province. With increased facilities and an improved system, it is confidently expected that the immigration and colonization work of this Government will reach the highest mark yet attained. The funds appropriated are being used solely to assist in providing farm and domestic help.

REFERENCE TO EARL GREY.

Since the last meeting of the Legislature, his Excellency Earl Grey, Governor-General of Canada, accompanied by Countess Grey and their estimable family, have visited several sections of the Province, and the seat of Government has been honored by their presence on two occasions. The people of the Province have noted with satisfaction this great interest taken by his Excellency in all matters affecting their welfare and happiness. The extensive experience gained by his Excellency in the various public positions which he has occupied renders his opinions on such questions of the greatest possible value; while the interest manifested by the Countess Grey in all movements of a philanthropic and social nature has been a source of great satisfaction.

IN NEWER ONTARIO.

You will be pleased to learn that the operation of the first section of the Temiskaming and Northern Ontario Railway for the past year has been very satisfactory—the income being largely in excess of the expenses of operation—

WEDDING AT WHITE HOUSE

Miss Alice Lee Roosevelt Married to Mr. Nicholas Longworth.

A Washington despatch says: In the beautiful white and gold east room of the White House, a few minutes after noon, on Saturday, the venerable Right Rev. Henry Y. Satterlee, Bishop of Washington, of the Protestant Episcopal church, pronounced the fateful words which united in marriage Alice Lee Roosevelt, eldest daughter of the President of the United States, and Nicholas Longworth, the representative in Congress from the first district of Ohio. The floral decorations were most elaborate. Two huge vases each filled with easter lilies and fern fronds occupied each of the mantels and two handsome tables bore jardinières of flowering rhododendrons. At the great centre windows was a floral bower. A semi-circular platform was constructed before the windows. On this the ceremony took place, so that all in the room had practically an unobstructed view of it.

THE BRIDE'S DRESS.

At noon the President and the dainty bride, resting her hand lightly upon his left arm, proceeded to the east room, the orchestra rendering the march from Tannhauser. Her bridal dress was a magnificent creation of heavy white satin, point lace, chiffon, filmy, tulle and silver, brocade. The material from which the gown was developed was manufactured especially for Miss Roosevelt, and the design was destroyed as soon as the necessary amount of material for the dress was made. The gown had a long train of superb silver brocade. The bodice was made high without a collar, was trimmed with rare old point lace, and the elbow sleeves were finished with the same filmy material. The sleeves just met the long white gloves. A voluminous tulle veil almost completely enveloped the bride.

PRESENTS NOT ON VIEW.

Only the family and intimate friends were permitted to see the wedding presents. Among the hundreds received by Miss Roosevelt are the following:—President Loubet of France, magnificent gobelin tapestry, made expressly for Miss Roosevelt; Emperor William of Germany, bracelet; the Emperor of Japan, two beautifully chased vases of silver and a piece of Japanese embroidery. Republic of Cuba, necklace of selected pearls; the Emperor of Austria, diamond and pearl pendant; the Empress Dowager of China, dowry chest filled with rare articles; the King of Italy, Mosaic table depicting scenes in Italian life; Pope Pius X., Mosaic representing a great painting in the Vatican; the King of Spain, pieces of antique jewellery. King Edward of England sent a gift, the character of which has not been disclosed.

ALONE WITH A MADMAN ON SLED.

Terrible Trip Taken by a Sergeant of Mounted Police.

A despatch from Edmonton, Alberta, says: Sergt. Field, of the Royal Northwest Mounted Police, has just arrived from the Fort Chippewa district with a trapper named Brown, who had become a raving maniac on account of the solitude of his surroundings. The 400-mile trip was made under most trying difficulties, owing to the fact that Brown was in such a condition that the policeman was obliged to strap him down to the dog sled. The madman refused to eat, and Sergt. Field was obliged to force food into his mouth. For four days the journey south was made especially arduous because the madman continuously struggled to regain his liberty. At one time a blizzard overtook them and they were obliged to seek shelter under a huge pine tree, where they were snowed under for two days.

TOOK MONEY AT PISTOL POINT.

Belleville Highwayman Held Up Two Ladies in a Public Street.

A despatch from Belleville says: A

LEADING MARKETS

BREADSTUFFS.

Toronto, Feb. 20.—Wheat—Ontario No. 2 white 79c to 79½c, red 78½c to 79c, mixed 78c to 78½c, goose and spring 74c to 75c, at outside points.

Wheat—Manitoba—No. 1 hard 89c, No. 1 northern 86½c, No. 2 northern 84c, No. 3 northern 82½c, at lake ports; all-rail quotations 3½c more than these prices.

Flour—Ontario—Exporters bid \$3.15, in buyers' bags, at outside points; high patents, at Toronto, bags included, quoted at \$3.75; 90 per cent. patents \$3.60; Manitoba first patents, \$4.30 to \$4.50; second patents, \$4.10, bakers', \$4. Millfeed—Bran, in bags, outside,

baggers' bags, at outside points; high patents, at Toronto, bags included, quoted at \$3.75; 90 per cent. patents \$3.60; Manitoba first patents, \$4.30 to \$4.50; second patents, \$4.10, bakers', \$4. Milfeed—Bran, in bags, outside, \$16.50; shorts, \$16.50 to \$17.50. Oats—35c to 36c, outside. Barley—No. 2 49½c, No. 3 extra 46c to 46½c, No. 3 43c to 43½c. Peas—79c, outside. Rye—70c, outside. Corn—Canadian, 43c, Chatham freights; American, No. 3 yellow, 49c to 49½c; mixed, 48½c to 49c, at Toronto. Buckwheat—51½c to 52c, outside.

COUNTRY PRODUCE.

Butter—The market for choice stock continues fairly active and steady. Creamery 24c to 25c do solids 23c to 24c Dairy 1b rolls, good to choice, 21c to 22c do large rolls 18c to 19c do medium 18c to 19c do tubs 20c to 21c do inferior 17c to 18c Cheese—Unchanged at 13½c for large and 13¼c for twins. Eggs—Are quoted lower at 21c to 22c. Storage are easier in sympathy at 45c to 16c. Poultry—Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c; thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese 10c to 11c; turkeys 14c to 15c, for choice small lots.

Baled Hay—No. 1 is worth \$8 per ton in car lots on track here, and No. 2 is weak at \$6. Baled Straw—\$6 per ton for car lots on track here.

MONTREAL MARKETS.

Montreal, Feb. 14.—Grain—The demand by cable for Manitoba spring wheat was very limited and trade was quiet.

Oats—No. 2, 41c; No. 3, 40c; No. 4, 39c. Peas—79c f.o.b. per bushel. Barley—Manitoba No. 3, 48½c; No. 4, 47c to 47½c.

Corn—American mixed, 52½c; No. 3 yellow, 53c ex-track.

Flour—Manitoba spring wheat patents, \$4.60 to \$4.70; strong bakers', \$4.20; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do in bags, \$1.85 to \$1.95; extras, \$1.65 to \$1.75.

Milfeed—Manitoba bran in bags, \$19; shorts, \$19 to \$20 per ton; Ontario bran in bulk, \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolls Oats—Per bag, \$1.90 to \$1.95; cornmeal, \$1.30 to \$1.40 per bag.

Hay—No. 1, \$8 to \$8.50; No. 2, \$7 to \$7.50; clover, mixed, \$6 to \$6.50, and pure clover, \$5.50 to \$6 per ton in car lots.

Provisions—Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clear fat back, \$19 to \$20; compound lard, 6½c to 7½c; Canadian pure lard, 11½c to 12c; kettle rendered, 12½c to 13c; hams, 12c to 13½c, according to size; bacon, 14½c; fresh killed abattoir dressed hogs, \$10; country dressed, \$8.75 to \$9.50; alive, \$7.25, selects and mixed lots.

Eggs—New laid, 23c to 24c; selects, 20c to 21c; No. 2 candied, 15c to 17c per dozen.

Butter—Choice creamery, 22½c; undergrades, 21½c; dairy, 19c to 20c. Cheese—Ontario, 13c to 13½c; Quebec, 12½c.

Ashes—First pots, \$5.25; seconds, \$4.70; thirds, \$3.75; first pearls, \$7.

BUFFALO MARKET.

Buffalo, Feb. 20.—Flour—Firm. Wheat—Spring unsettled; No. 1 Northern, 90½c, carloads; Winter, nothing done. Corn—Barely steady; No. 2 yellow, 46½c; No. 2 corn, 45½c. Oats—Steady; No. 2 white, 34½c; No. 2 mixed, 33c. Barley—Western in store quoted at 45 to 52c. Rye—Dull; No. 2 in store, 71½ to 72c asked.

NEW YORK WHEAT MARKET.

New York, Feb. 20.—Wheat—Spot steady; No. 2 red, 88½c elevator; No. 2 red, 92½c f.o.b. afloat; No. 1 Northern, Duluth, 94½c f.o.b. afloat.

CATTLE MARKET.

Toronto, Feb. 20.—Business opened steady at the Western Market today.

Use the easy tank above any others in the butchers' line. Some small select lots sold at \$4.50 to \$4.75 per cwt. Good butchers', in loads, sold at \$4 to \$4.75. Cows were in demand to-day, and their values were firm. Good ones brought \$3.50 to \$3.60; common \$2.50 to \$3, and canners, \$1.50 to \$2 per cwt. The run of short-keep feeders was larger than usual to-day. Buying in them was active and values were steady, the top figures reaching \$4.40 per cwt.

Hogs are now quoted at \$6 75 per cwt for selects, and \$6.50 for lights and fats. The deliveries were small, and the packing houses are keenly competing for supplies.

BIG JUMP IN TRADE.

The Last Seven Months Beat all Previous Records.

An Ottawa despatch says: An aggregating foreign trade for seven months exceeding that of the whole of 1899 by \$10,668,305 and the whole of 1896 by \$92,015,417. The figures quoted above are sufficiently striking, but if the past seven months be compared with the same period of the preceding year it gives a betterment of \$41,216,143. The figures of the former period being \$323,616,803. The exports of domestic produce totalled \$150,834,433, or a gain of \$25,603,940 when compared with seven months of 1905. Exclusive of coin and bullion, the imports amounted to \$156,259,403, an increase of \$15,774,987. Excess of exports for the seven months over imports for the same period was \$9,828,962. Exports of all classes show considerable gains, but the most important were animals and their produce, \$4,498,735, and agriculture, \$13,493,366. Shipments of manufactured goods exhibit an improvement of \$1,707,339.

A QUEER CONCOCTION.

What An Analyst Found in "Communion Wine."

The New York Sun of Wednesday publishes the following:—Health Commissioner Darlington told the Aldermen's Committee on Salaries and Officers on Tuesday that the adulteration of the food and drink sold in this city had become so general that it had spread to the wines used in churches for communion services. He informed the committee that a few days ago he had analyzed a bottle bearing the label "Communion Wine," and found that it was made of wood alcohol, hard cider and an aniline coloring matter. After the meeting Dr. Darlington was asked if he had any reason to believe that the concoction he had examined was generally used in the churches. "I don't know," he replied, "but I do know that the wine we examined was an unwholesome, and even dangerous, mixture."

STARVED AMIDST WEALTH.

Fatal Economy of a Woman Worth a Million.

A despatch from New York says: Miss Maria Corsa, 56 years old, whose fortune is estimated at from \$600,000 to \$1,000,000, is dead at her home in the Bronx. Her death was caused by starvation and exposure, due to her life of seclusion and economy. She lived entirely alone in one room of the Corsa residence, denying herself even the necessities of life and refusing the warmth of a fire, which might have been built with coal which had been in the cellar for years. Miss Corsa died Monday night after thirty-six hours of medical treatment, which was provided by neighbors. On Sunday morning the daughters of a neighbor found her unconscious, and other neighbors took charge of the woman. Dr. Edward C. Fodvin worked all day to restore her, but she died without regaining consciousness. Miss Corsa was born in Port Morris. Her father and mother were both old Knickerbocker families, and with the Schuylers, Valentines, Berrians and Briggs were among the first settlers in Fordham.

Winnipeg Board of Education's estimates total \$249,836.

You will be pleased to learn that the operation of the first section of the Temiskaming and Northern Ontario Railway for the past year has been very satisfactory—the income being largely in excess of the expenses of operation—and that the construction of the extension of this road has been proceeded with in the most energetic manner.

The growing importance and value of the mineral interests of the Province call for the most careful consideration and management, and necessary amendments to the Mining law will be submitted to you for your consideration.

Since the last session, an agreement has been arrived at with the Dominion Government for the negotiation, on equitable terms, of a treaty with the Indians who occupy large portions of the Province not now under treaty.

AMENDMENTS TO LAW.

Among the measures to be submitted to you for your consideration, in addition to the amendments of the Mining law, above mentioned, will be: Bills respecting County Councils; respecting the Department of Lands and Mines; amending and consolidating the Liquor License Act; amending the Volunteer Land Grants Act; revising and amending the Railway Act, and the Electric Railway Act; amending the Agriculture and Arts Act, amending and consolidating the several Acts relating to companies; revising and amending the Acts relating to Public Schools and the Act respecting the Department of Education; respecting the University of Toronto; and amending the Supplementary Revenue Act, 1899, providing for the taxation of railways.

ELECTIC POWERS.

The extraordinary possibilities which the future may have in store with reference to electric power are still attracting increased attention on the part of scientific and practical men. It is expected that the report of the Commissioners appointed to inquire into and report upon hydraulic and electric power in the Province will be laid before you before the close of the session. A mass of information has been collected, which will, no doubt, be of great value in the future consideration of this very important question.

THE UNIVERSITY.

In the month of October last, a Commission was appointed to report upon a scheme for the management and government of the University of Toronto in the room and stead of the one under which the said University is now governed and for other purposes. The report of the Commission is expected shortly.

You will be glad to learn that the revenues of the Province are largely in excess of the estimates and more than sufficient to meet the Provincial expenditure during the year.

The public accounts will be laid before you for your consideration at the earliest moment, and the estimates for the coming year will also be submitted for your approval at an early date.

FAVOR OLD AGE PENSION.

British Premier and Chancellor Receive Delegation.

A despatch from London says: While declining to make rash promises, Premier Campbell-Bannerman and Chancellor of the Exchequer Asquith on Thursday declared themselves in entire sympathy with a deputation which called on them to advocate the establishment of a national system of old age pensions. The deputation urged that the scheme should be comprehensive and include all citizens, men or women, who at the age of sixty should receive at least \$1.25 weekly pension, and the money being found by means of Imperial taxation.

The Premier and the Chancellor of the Exchequer in replying heartily approved of the suggestions. The only difficulty at present, they pointed out, was the question of ways and means. They thought, however, that with greater care in the administration of the country's finances it would not be impossible to find money for such a beneficent scheme.

TOOK MONEY AT PISTOL POINT.

Belleville Highwayman Held Up Two Ladies in a Public Street.

A despatch from Belleville says: A daring hold-up occurred in this city on Saturday night about 10 o'clock. Two ladies, Mrs. F. Osborne and Miss Yates, were proceeding homeward on Bridge Street east, which is one of the thickly populated streets in the city, when a man confronted them and with a revolver pointed at them, demanded their money. The ladies were so terrified that they were unable to make any outcry, and both delivered their pocketbooks to their assailant. The man then hastily decamped, and although police were soon upon his trail, his whereabouts could not be discovered. The police are badly handicapped, as the ladies were unable to give a description of the man. The affair has caused considerable excitement in the city, as the hold-up is the first which has occurred here for years.

THE FAMINE IN SPAIN.

Bands of Unemployed Pillaging Farms, Bakeries and Stores.

A Madrid despatch says: The famine in the Meridional Provinces again is grave. The intense cold of recent days has killed the sugar crop in the Provinces of Seville, Cadiz, Malaga and Granada. Numerous bands of men unable to obtain work, are scouring the country, pillaging farms, bakeries and provision stores, and threaten to attack the land owners. Thousands are awaiting the commencement of Government famine works, which are indispensable to effect any improvement in the frightful situation; the consequences of which cannot be measured if the conditions are prolonged.

AIM TO CAPTURE AMUR PROVINCE.

The Chinese to Descend on Russian Territory.

A despatch from St. Petersburg says: The Slovo states that the Chinese are preparing to capture the whole Province of Amur, and that the Government is alarmed, and contemplates the sending of a special army for the province's protection. The Province of Amur is a part of Asiatic Russia, and has Siberia proper on its north and Chinese Manchuria on its south and west. Its area is 173,552 square miles, but its population is only about 50,000. It has been largely colonized by Cossacks and Siberians. It is very mountainous, but is finely timbered, and its fur product is important, while its valleys are very fertile.

KILLED FOURTEEN WOLVES.

Ernest Appleton of Kenora Makes a Good Bag.

A despatch from Toronto says: Wolves seem to be plentiful in the Rainy River district this season, though circumstances are not favorable to longevity there. In two days fourteen wolves were killed at Sabascoshow Bay, Lake of the Woods, by Ernest Appleton of Kenora, and the Treasury Department has received his application for bounties aggregating \$210, or \$15 per head, the bonus for the killing of wolves in unorganized districts.

WAGES FOR IDLE EMPLOYEES.

Communal Court in Polish City Delivers Strange Judgment.

A despatch from Warsaw says: Considerable comment has been caused by the judgment of the Communal Court at Widzewo, near Lodz, ordering the Coates thread factory to pay the wages of 800 employees during the ten weeks the works were closed. The factory shut down Nov. 30, and a shortage of coal was given as the reason for so doing. The Court, in rendering judgment, said it was not lack of coal but the high price of coal which induced the closing of the works, and found that this was not a good reason for stopping work, hence the order for the payment of the wages of the employees.

WHOLE FAMILY DEAD.

A Terrible Tragedy at Dominion in Cape Breton, Nova Scotia.

A despatch from Sydney, N. S., says: A terrible tragedy occurred at Dominion No. 1 early on Friday morning. Four charred and blackened corpses—those of Anton Stetka, his wife and two children, a boy and a girl aged four and two—were found among the ruins of his burned dwelling. Great mystery surrounds the occurrence. The fire was discovered by Conductor Calhoun, who came through Dominion in charge of a train of empty cars. The engineer gave the alarm, and the trainmen rushed up to the burning building and rapped on the door. The house was burning fiercely inside, and the flames were just beginning to break through.

FOUND THE VICTIMS.

According to some neighbors, who hurried to the scene, the fire had apparently started downstairs. The people had been in the habit of keeping fires in the kitchen only. The parents and children all slept in the same room. It was supposed all the inmates had made their escape.

At 3 o'clock the walls of the house fell in, and after a search among the ruins, the bodies were discovered. The children were locked in each other's arms and the skulls of the wife and children were broken and that of the husband entirely removed.

Stetka and his wife were Austrians and had been residing in the Dominion for about three years. About six months ago they purchased a house from Henry Mitchell, and had practically paid for it, but during the past few days expressed a desire to return to Austria. This is said to be due to something that occurred about three months ago. On a pay night, during the absence of her husband, Mrs. Stetka is alleged to have been the victim of an attempted assault by a Newfoundlander named Snelgrove, who was subsequently arrested and committed to the Supreme Court. He now lies in jail awaiting trial.

THOUGHT TO BE AN ACCIDENT.

Crown Prosecutor Hearn stated that he believed there was nothing to indicate foul play. It was learned by Crown Prosecutor Hearn that the whole family were preparing to leave the country before the trial came on, as the woman expressed a disinclination to appear in court to give her evidence. The furniture, including the bedsteads, had been piled up in one of the rooms, preparatory to departure, and the theory is that they had the mattresses on the floor near the kitchen stove, and a spark from the fire ignited the bedding. The fact that the children were found clasped in each other's arms is taken as evidence that they were smothered while sleeping.

MARRIED IN COURT.

A Swedish Girl Saved From a Long Term in Jail.

A despatch from Montreal says: A delightful romance stirred Westmount on Wednesday night when William Brown, a youth of little more than twenty years, publicly espoused a young Swedish girl, thereby rescuing his bride from the shadow of the prison bars and securing her with the subtler bonds of matrimony. The girl, Hilda Sjoberg, a domestic of engaging countenance, had fallen from the path of rectitude by giving way to the temptation of an evil moment and setting aside some of her mistress' gawgaws. The result was a trial and a conviction, but just as Magistrate McMahon was about to pronounce sentence the young man appeared and offered to pay any fine that might be imposed. As fining for such an offense was not within the reading of the law, the Magistrate paused. But the youth persisted, declared his love for the maiden, and finally, on a hint from the court, offered to make the accused his wife as soon as a license and a minister could be provided. The Magistrate thought that the domestic fireside might prove a more abiding corrective than the company of convicts, so he suspended sentence pending the fulfillment of the conditions.

CRUSHED BY ELEVATOR.

Boy Killed in a Strange Manner in a Galt Factory.

A Galt despatch says: Nelson Allison, aged fifteen, an employee in the C. Turnbull Company woollen mill, met a shocking death on Saturday morning. Allison and another boy entered the elevator on the ground floor with a bundle of goods which they were to take to the second floor, where it is supposed that Allison instead of pulling the rope, pulled the other one, and, becoming excited when the elevator continued to go on up, attempted to leave it and get out on the third floor. A wooden arm across the opening of the elevator shaft blocked this attempt, and he was caught and carried up to the arch, where his neck was broken. No one was an eye-witness of the accident. When he was found a few minutes later he was quite dead.

SWINDLED IN KING'S NAME

An Accomplished Rascal Borrows Money Right and Left.

A Madrid despatch says: A number of prominent residents of various towns, who were too willing to show sympathy with the wedding of King Alfonso and Princess Ena, have received with open arms a well-groomed, educated man, speaking Spanish with an English accent, who professed to be a relative of the Battenbergs and an aide to King Edward. Many of those who entertained him loaned him money. Among them was Cardinal Sancha, of Toledo. The man is an impostor, and has been arrested.

TOBACCO CULTURE.

Provincial Experiment Station at Ruthven Will Make Experiments.

A Toronto despatch says: Hon. Nelson Monteith says the Department of Agriculture will make trials this season on the raising of varieties of the tobacco plant of the experimental station at Ruthven in Essex county. The great difficulty in Canadian tobacco culture so far has been the curing of the leaf, even after it has been successfully raised and picked, and to this end the Government will also direct its attention.

60,000 AMERICANS.

Thirty Per Cent. Increase in the Immigration Movement to Canada.

A Winnipeg despatch says: Theodore Knappen, secretary of the Western Canadian Immigration Association, said on Wednesday that sixty thousand Americans will find their way into Western Canada this year, an increase of thirty per cent. over last year. Prejudices against immigration to a country under a monarchical form of government have already disappeared. This is a result of the experiences of American settlers already here, who find that the Government rests absolutely with the people.

PAYMENT OF WAR DEBTS.

Japan Will Not Be Free of Burden for Twenty-Five Years.

A despatch to London from Tokio says that the financial programme of the Cabinet, which has passed the Lower House, will undoubtedly be endorsed by the Upper House. According to the programme, the war debts, which will aggregate \$911,000,000 in 1907, will be completely paid off in 1930, during which interval there will be six operations of conversion. The programme shows that the domestic debts, now amounting to \$287,500,000, will be entirely discharged in 1942.

SUICIDE IN EUROPE.

Natives Defeat Belgian Expedition —

CHINESE ATTACK MISSION

Outrage in the Province of Nganhwei is Reported.

The correspondent at Shanghai of The London Standard telegraphs: "News has reached here of another attack on a foreign mission at Nganking, province of Nganhwei, the left bank of the Yangtse Kiang River. No loss of life is reported."

"On Wednesday an attempt was made here by a trusted Chinese servant to murder the Secretary of the French municipal Council while he was asleep. The attempt was frustrated and the assailant was arrested."

"Many of the great provincial Viceroy are displaying a marked anti-foreign attitude which they would hardly dare to assume so openly unless they thought that Pekin approved their conduct. In the foreign settlements of treaty ports efforts are being made quietly to recover privileges granted to foreigners."

"In some quarters Japan is believed to view with equanimity the possibility of armed intervention being necessary since it would provide her with occasion to obtain from China what she failed to exact from Russia."

"In Shanghai two additional companies of volunteers are being raised. It is reported that the municipal Council favors strengthening the Sikh police force by 500 men. Unfortunately it is at this juncture that it has been decided to reduce the British China squadron."

ON GUARD IN PEKIN.

The Pekin correspondent of The Lon-

don Times says that all the Legation guards have been warned that danger is impending. The Secretary of the German Legation has obtained an additional field battery.

The position in China is becoming increasingly ugly. The trouble will probably spread from the south to the north.

The Government, eager to save the dynasty, is seeking to placate the foreigners. Viceroy Yuan Shih Kai, on the pretence of suppressing the Chun Chuses, who are absolutely quiescent, is sending six regiments with artillery to Chinchow. It is presumed that the real reason for the despatch of these troops is that the army is honeycombed with secret societies, and the Government wishes to remove a dangerous weapon from the neighborhood of the capital.

AN UPRISING PREDICTED.

A despatch from San Francisco says: C. E. Young, an eye-witness of the recent riot in Shanghai, arrived here on Wednesday from the Orient on the steamer Doric. He tells of the intense anti-foreign sentiment that exists among the Chinese and predicts that an uprising will take place within the next few months. Young says that 200 Chinese were killed in the riot in Shanghai and that only the presence of the foreign gunboats at Shanghai prevented the wholesale slaughter of Americans and Englishmen. Young represents a local firm, but because of the boycott he was unable to transact any business with the Chinese merchants.

A USEFUL INSTITUTION

ONTARIO AGRICULTURAL COLLEGE AND EXPERIMENTAL FARM.

Great Work the College is Doing to Fit Boys and Girls for Life on the Farm.

The College was established in 1874. Its objects were twofold: First to train young men in the science and art of improved husbandry, and, second, to conduct experiments and publish the results. In 1875, the President said in his first report: "It is evident to the most cursory observer that Canada depends, and will be obliged for many years to depend largely, if not exclusively, on her raw produce for her national wealth. And amongst the various forms of raw material none are so valuable as those included under the head of Agriculture Produce. To the observant statesman it is plain that the readiest manner of increasing the national wealth is by increasing the quantity and quality of that produce. But though plainly seen, it is not so easily accomplished. Precedent, prejudice and general conservatism stand in the way. Throughout the Province there is a powerful minority of intelligent, enterprising and successful farmers pursuing the improved system of cultivation; yet the great majority are depending solely in increased acreage for increased returns."

That was thirty years ago, and the College, facing these conditions, with the opposition of the very class which it was intended to help, has grown steadily in favor with the people, until now farmers themselves visit the College in June and December to the number of nearly 40,000; and we had last year in attendance at the various College classes

1,004 STUDENTS.

More than 1,200 teachers visited the College and examined the workings of the different departments during the past

and other leguminous plants, take the nitrogen from the atmosphere, and convert it into plant food. Our bacteriologist propagates in his laboratory and supplies in small bottles millions of these nitrogen forming bacteria, which may be spread upon the seed before it is sown, and thus introduce into the soil these nitrate-forming bacteria. A crop of clover will leave in the soil in the roots alone about fifty pounds of nitrogen per acre. Thus the plant food supplied to the soil by a crop of clover is

\$10 PER ACRE IN ONE YEAR,

and the farmer has the clover crop, tops, and leaves to the good. This, if practised on every farm, would mean millions each year to this Province.

(6) Chemistry. — It was said a few years ago that sugar beets could not be grown profitably in this Province. Our Department of Chemistry conducted experiments in the different parts of Ontario, and analyzed the beets at different stages of growth. It is now known that we can grow as good beets as in any part of the world, and men are putting their money into the building of sugar beet factories. Over 22,000,000 pounds of sugar were made in Western Ontario last year. Chemistry did it.

Our Chemistry Department last year analyzed flour made from four different grades of wheat grown in the Northwest. There was a difference of many cents per bushel in the market value of these wheats, and yet, after analyzing the flour and having bread made from each of the different lots, it was found that the fourth grade made bread just as good, just as palatable, just as much bread per bushel of flour, and just as nutritious as the higher grade, but it was not so bright in color. The result of this analysis will enable poor people or people in moderate circumstances, to get the best bread for their families at very much less than they have been paying.

(7) Physics. — In this department are taught the principles of soil cultivation and soil drainage. All farm crops take their food from the soil in a watery solution. When the land dries up no more food can be taken; hence the necessity for a knowledge of how to conserve

offered to make the accused his wife as soon as a license and a minister could be provided. The Magistrate thought that the domestic fireside might prove a more abiding corrective than the company of convicts, so he suspended sentence pending the fulfillment of the lover's pledge. The girl did not reject the offer, so time was given for preparation, and on Wednesday night at 7 o'clock in the court room Rev. E. Bushell made the twin one. The ceremony was witnessed by an interested group of townspeople and officers at the Town Hall. Mr. Brown, the groom, is an electrician, well employed.

MONTANA TO EDMONTON.

The Great Northern Railway's Projected Line.

A Winnipeg despatch says: W. Robinson of New York, confidential agent of the Great Northern Railroad, was here to-day en route to Toronto and New York. He has been quietly in the west preparatory to securing a charter for his company to build a line from Havre, Montana, to Edmonton, Alberta, via Medicine Hat, a distance of about 420 miles. The company now have nine branches touching the Canadian border. The latter may be the preliminary step of access to the great oil fields believed to be in northern Alberta.

COPPER MINERS ALARMED.

Earthquake Shocks in Michigan Mines Many and Violent.

A Houghton, Mich., despatch says: Many miners are resigning their positions in the copper mines in this vicinity owing to the continued earthquakes, or air blasts, which have now become so frequent and dangerous that the miners fear for their lives. Until last week no particular damage was done, when there commenced a series of shocks, much more violent than at any time in the past. Each day since then there have been numerous shocks.

BIG FIRE AT TILLSONBURG.

Packing-house of Oat Mills Destroyed With all Its Contents.

A despatch from Tillsonburg says: About 7.30 on Thursday night a fire started in the building adjoining the oat mills of the Tillson Company, which is utilized for packing the oatmeal and other cereals. The contents of the building were of such an inflammable nature that all efforts to control the fire were of no avail and the building with all the contents was completely wiped out in about two hours. The dry kiln, elevator and oat mill were not injured, the thick fire wall preventing the flames from getting through to them. The loss will be many thousands of dollars.

SAVED BY A BUSH.

Toronto Man Has Narrow Escape From Death at the Falls.

A despatch from Niagara Falls, Ont., says: Edward Fenton, of 783 Queen Street, Toronto, had a narrow escape from death at the Falls on Thursday. While walking along the top of the Gorge, he slipped on the ice and fell over the edge. He seized a thornbush which grew on the brink of the precipice, and hung, helpless. His companion, Harvey Whitmore, also of Toronto, took off his overcoat and let it down to Fenton, who was drawn up to a place of safety. Fenton was completely prostrated by his experience.

FIGHT IN THE CORTES.

One Spanish Deputy Used Flats, the Other His Cane.

A despatch from Madrid says: A quarrel occurred in the Cortes on Thursday between Deputies Segui and Doval, and the latter was punched in the face. He retaliated, striking Senor Segui with his cane. Both were arrested.

\$287,500,000, will be entirely discharged in 1942.

SUICIDE IN EUROPE.

Natives Defeat Belgian Expedition — Sent to Punish Murderers.

A Brussels despatch says: A Belgian expedition has been routed in Congo. The expedition was commanded by Commandant Pimpurniaux, and was sent against two native chiefs who were charged with the murder of two state agents. The rebellious natives now control the forest of the Comani concessions, and are attacking caravans and stopping trade. They are equipped with rifles and ammunition stolen from a State factory. Another expedition is being organized.

RISING IN THE CONGO.

France Heads the List, With Denmark a Good Second.

A Geneva despatch says: Figures published by the Swiss Government show that there has been 16,640 suicides in Switzerland in the last thirty-five years. In the same period suicides in Germany have totalled 332,600, and in France, 274,000. France has the highest percentage of any European country, the figures being 239 per million inhabitants. Denmark is next, with 234 per million, followed by Switzerland, 225; Germany, 206; Austria, 158; Sweden, 147; Belgium, 124; Britain, 89; Italy, 60, and Holland, 56.

REDUCTION BY MAGNETS.

New Scheme of Producing Iron Invented in Sweden.

An Ottawa despatch says: Mr. C. E. Sontum, Canadian agent at Christiania, Norway, in a report to the Department of Trade and Commerce, says that considerable attention has been directed to an invention of two Swedes, who have discovered a new method of producing iron ore. The ore is crushed into a fine dust, and then the iron is drawn out by the aid of strong magnets, after which it is molded into brick form.

HIS LEG TORN OFF.

Arthur S. Skead Meets a Shocking Death at Port Arthur.

A Prince Albert despatch says: Arthur S. Skead, assistant miller in the H. B. Company's mill here, met a horrible death on Thursday morning when at work alone in the basement. He evidently became entangled in the belting, and when found was lying on the floor with one leg torn from the body, but still alive. He was taken to the hospital, but died immediately afterwards. A wife and child survive him. Deceased's home was in Winnipeg, where his father resides. He is either the second or third of the family to meet a violent death, his brother having been drowned two years ago.

FREIGHT STRUCK SLEEPER

Seven Passengers Injured on the C. P. R. Expts.

A Winnipeg despatch says: Because the engineer of a westbound freight evidently disregarded the flag signals sent out by the conductor of the second section of the Pacific Express, due in Winnipeg from the east on Thursday, a rear-end collision took place at an early hour in the morning at Osisko, a point on the C. P. R. main line 46 miles west of Fort William, in which six Western people and a resident of Battle Creek, Mich., were injured. They are: Mrs. R. Barbour, Snowlake, Man.; Mrs. S. R. Home, Calgary, Alta.; Miss Merrill Wright, Oxbow, Sask.; Esther Gardiner, Aylesbury, Sask., aged 10 years; Ella Gardiner, Aylesbury, Sask., aged 12 years; A. McNab, Battle Creek, Mich.; Mrs. A. D. Cardinal, Darling, Ont., Man.

ber of nearly 40,000; and we had last year in attendance at the various College classes

1,004 STUDENTS.

More than 1,20 teachers visited the College and examined the workings of the different departments during the past two years.

In the beginning students were paid to attend the institution, and there was practically no revenue from the College or farm. In 1905, we turned into the Provincial Treasury as revenue from the College and farm \$61,568.20. The work of the different departments is as follows:

(1) Field Agriculture. — Teaching of students and experimenting with field crops is the work of this department. In Mr. Zavitz's report of last year the following paragraph appears under the head of "Barley": "The results show that the Mandscheuri gave decidedly the greatest yield per acre of the four varieties for the whole period of fifteen years, and also for the last five years. The Mandscheuri gave an average of 9.3 bushels per acre per annum over the common six-rowed barley in the average results for fifteen years. The average area devoted to barley in Ontario from 1882 to 1904 is given as 633,290 acres per annum. An increase of nine bushels of barley per acre throughout the province, would, therefore, amount to an increase of over five million bushels of barley in Ontario annually. This increase at fifty cents per bushel would amount to about two and a half million dollars. Two and a half million dollars annually would pay the running expenses of about thirty agricultural colleges like the one located at Guelph. The Mandscheuri barley was imported from Russia by the Ontario Agricultural College in the spring of 1889. Not only has it made a very excellent record at the College, but it has given high results in the co-operative experiments throughout Ontario and has been grown in general cultivation very successfully during the past few years. In looking up the records of the Bureau of Industries, we find that the average yield of barley throughout the Province for the period of ten years from 1895 to 1904, inclusive, is 29.8 bushels per acre; while that for the period of ten years from 1885 to 1894, inclusive, was 24.85 bushels per acre. This shows an average annual increase of about

4 1/2 BUSHEL PER ACRE.

for the latter, as compared with the former period of ten years. From these results does it not appear as though the introduction of the Mandscheuri barley by the Ontario Agricultural College has been worth to the Province of Ontario within the past ten years an annual money value equal to more than fifteen times the entire cost of the College?" Similar work is being done with wheat and oats and peas and rye and grasses and clover and roots.

(2) Animal Husbandry. — Here students are taught the comparative value of the different breeds of domestic animals, and as it is said that 90 per cent. of all the crops grown on the farms of Ontario is fed to live stock, it will be seen at a glance how important it is to be able to tell a good feeder when one sees it.

(3) Dairying. — The making of better butter and better cheese and the breeding and feeding of better animals. The average cow in Ontario gives less than 3,000 pounds of milk per year. The College, by careful selection and proper feeding, has built up a grade herd which in 1904, contained sixteen cows which gave more than 6,000 pounds each.

(4) Horticulture. — Here we are somewhat handicapped by severe climatic conditions. Being 900 feet above Lake Ontario, we cannot grow the more delicate fruits. Students are given instruction in the growing of all kinds of fruit, vegetables, and flowers, and experiments are conducted with the small fruits and with cover crops for the orchard.

(5) Bacteriology. — Nitrogen is one of the principal needs of a plant. It is worth commercially about 20 cents a pound. The air is 80 per cent. nitrogen, and yet plants cannot use it in the form in which it appears in the atmosphere. Certain bacteria, if introduced into the soil, will work on the roots of clover

giving. (7) Physics. — In this department are taught the principles of soil cultivation and soil drainage. All farm crops take their food from the soil in a watery solution. When the land dries up no more food can be taken; hence the necessity for a knowledge of how to conserve soil-moisture. This is one of the most important questions that a farmer has to deal with, and experiments are being conducted in the Department of Physics all the time along these lines.

(8) Botany. — In this department the subject of weeds and how to destroy them, the question of fungous growth, and when and how to spray to exterminate them, the importance of growing grasses and clovers, and such things are taken up and discussed.

(9) Entomology. — Again, millions of dollars are lost every year by insect depredation. Only by studying the life history and habits of an insect can it be properly combated. These are taught to the farmers' boys and

BULLETINS ARE PUBLISHED

and sent broadcast to the farmers from our Entomological Department.

(10) Poultry. — Chickens used to sell anywhere on the market from 20 to 30 cents a piece. To-day they bring three times that amount, where they have been properly fed, killed and dressed. We have on trouble of disposing of our poultry here at from 12 to 15 cents a pound dressed, and our students are taught how to breed and feed so as to obtain these results. We have four different styles of poultry houses to test the effects of heat and cold on the egg-laying proclivities; hence we find that the coldest, and therefore the cheapest house, is the best, and that fresh air is essential to good egg production.

(11) Macdonald Institute. — Three things are taught: Domestic science, manual training and nature study. In domestic science there were 360 girls in attendance last year, each one being obliged to learn cooking, sewing and laundry work. In a Province where over 90 per cent of the women do their own housework, what a blessing it would be if they were all properly trained for their daily duties. Manual training makes boys and girls handy in the use of simple tools, and nature study, which is really elementary agriculture, helps teachers to the extent that they may return and give to their pupils an education that will more nearly fit them for the earning of their daily bread.

The College is then doing three things: First, fitting boys and girls for their life work on the farm; second, by experimenting along different lines it is saving the farmers millions of dollars each year by securing from them exact data in reference to the value of different farm crops, farm animals, and so forth; and third, by the writing and publication of bulletins and reports, the farmer is supplied in his own home with reliable information in reference to his business.

DISHONEST YANKEE TRICK.

Selling Bank Imitation of Canadian Bacon in British Market.

A despatch from Ottawa says: Mr. P. H. Ball, Commercial Agent at Birmingham, reports to the Department of Trade and Commerce that it is stated that at least one large American firm is imitating Canadian Wiltshire bacon and putting the imitation on the British market as Canadian bacon. He quotes from an interview with a large seller, who declares that Canadian bacon now is so good when cured by the regular houses that they were not afraid to sell it as Canadian, but that he also got fabby, oil-fed bacon marked Canadian. This merchant advised the branding of the word Canadian on all grades of bacon made in Canada.

COST RUSSIA \$993,000,000.

Enormous Expenditure Entailed by Recent War in Manchuria.

A despatch from St. Petersburg says: The Imperial Council announces that the total cost of the war was 1,966,600,000 roubles (\$993,000,000). This is almost double the cost of the Russo-Turkish War.

Is It Your Own Hair?

Do you pin your hat to your own hair? Can't do it? Haven't enough hair? It must be you do not know Ayer's Hair Vigor! Here's an introduction! May the acquaintance result in a heavy growth of rich, thick, glossy hair! Use this splendid hair-food, stop your falling hair, and get rid of your dandruff.

Ontario Agricultural College and Experimental Farm.

The College was established in 1874. Its objects were two-fold: First, to train young men in the science and art of improved husbandry; and second, to conduct experiments and publish the results. In 1875, the President said in his first reports is evident to the most cursory observer that Canada depends and will be obliged for many years to depend largely, if not exclusively, on her raw produce for her national wealth. And amongst the various

different departments during the past two years.

In the beginning students were paid to attend the Institution, and there was practically no revenue from the College or farm. In 1905, we turned in to the Provincial treasury as revenue from the College and farm \$61,568.80. The work of the different department is as follows:

(1) Field Agriculture. Teaching of students and experimenting with field crops is the work of this department. In Mr. Zavitz report of last year the following paragraph appears under the head of "Barley": "The results shows that the Mandsehuri gave decidedly the greatest yield per acre of the four varieties for the whole period of fifteen years, and also for the last five years. The Mandsehuri gave an average of 9.3 bushels per acre per annum over the Common Six-rowed barley in the results for fifteen years. The average area devoted to barley in Ontario from 1882 to 1904 is given as 633,290 acres per annum. An increase of nine bushels of barley per acre throughout the Province would, therefore, amount to an increase of over five million bushels of barley in Ontario annually. This increase at fifty cents per bushel would amount to about two and a half million dollars annually would pay the running expenses of about thirty Agricultural Colleges like the one located at Guelph. The Mandsehuri barley was imported from Russia by the Ontario Agricultural College in the spring of 1889. Not only has it made a very excellent record at the College, but it has given high results in the co-operative experiments throughout Ontario and has been grown in general cultivation very successfully during the past few years. In looking up the records of the Bureau of Industries, we find that the average yield of barley throughout the Province for the period of ten years from 1895 to 1904, inclusive in 29.3 bushels per acre; while that for the period of ten years from 1885 to 1894, inclusive, was 24.85 bushels per acre. This shows an annual average increase of about 4½ bushels per acre, for the latter as compared with the former period of ten years. From these results does it not appear as though the introduction of the Mandsehuri barley by the Ontario Agricultural College has been worth to the Province of Ontario within the past ten years an annual money value equal to more than fifteen times the entire cost of the College?" Similar work is being done with wheat, and oats, and peas and rye, and grasses, and clover, and roots.

(2) Animal Husbandry. Here students are taught the comparative values of the different breeds of domestic animals, and as it is said that 80 per cent. of all the crops grown on the farms of Ontario is fed to live stock, it will be seen at a glance how important it is to be able to tell a good feeder when one sees it.

(3) Dairying. The making of better butter and better cheese and the breeding and feeding of better dairy animals. The average cow in Ontario gives less than 3,000 pounds of milk per year. The College, by careful selection and proper feeding, has built up a grade herd which, in 1904, contained sixteen cows which gave more than 6,000 pounds each.

(4) Horticulture. Here we are somewhat handicapped by severe climatic conditions. Being 900 feet above Lake Ontario, we cannot grow the more delicate fruits. Students are given instruction in the growing of all kinds of fruit, vegetables, and flowers, and experiments are conducted with the small fruits and with cover

Slaves to Rheumatism

Freed by

"Fruit-a-tives"

"Fruit-a-tives" cure Rheumatism and Rheumatic pains by removing the poisons which cause the disease. Rheumatism means poisoned blood. Too much urea or tissue waste is retained in the blood, owing to defective action of the bowels, kidneys or skin. The retained urea becomes uric acid, which inflames nerves and joints and thus rheumatism is produced.

MRS. R. H. DENNIS, Sault Ste. Marie, Ont., writes as follows: "I think 'Fruit-a-tives' are fine. I am using them for rheumatism, and have not felt it since I started to take them."

Fruit-a-tives

or Fruit Liver Tablets.

"Fruit-a-tives" cure Rheumatism by greatly stimulating the action of the liver, kidneys and skin. "Fruit-a-tives" make each of these vital organs do its share of nature's work properly. "Fruit-a-tives" rid the system of excessive urea and uric acid—and so purify and enrich the blood and build up the general health, that there can be no rheumatism.

"Fruit-a-tives" are fruit juices, concentrated and combined by our discovered process, which makes them much more powerful medicinally. Then tonics and internal antiseptics are added and the whole compressed into tablets.

If your druggist does not have them, don't take substitutes. Sent prepaid on receipt of price—50c. a box or 6 boxes for \$2.50.

The College is then doing three things: First, fitting boys and girls for their life work on the farm; Second by experimenting along different lines

K&K K&K K&K K&K K&K K&K K&K K&K

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no fee. We treat all cases of Gonorrhea, Blood Diseases, Stricture, etc.

curiously observe that Canada depends and will be obliged for many years to depend largely, if not exclusively, on her raw produce for her national wealth. And amongst the various form of raw material, none are so valuable as those included under the head of Agricultural Produce. To the observant statesmen, it is plain that the readiest manner of increasing the national wealth is by increasing the quantity and quality of that produce. But though plainly seen, it is not so easily accomplished. Precedent, prejudice and general conservatism stand in the way. Through the Province there is a powerful minority of intelligent, enterprising and successful farmers pursuing the improved system of cultivation; yet the great majority are depending solely in increased acreage for increased returns."

That was thirty years ago, and the College, facing these conditions, with the opposition of the very class which it was intended to help, has grown steadily in favor with the people, until now farmers themselves visit the College in June and December to the number of nearly 40,000; and we had last year in attendance at the various College classes 1,004 students. More than 1,200 teachers visited the College and examined the workings of the

the more delicate fruits. Students are given instruction in the growing of all kinds of fruit, vegetables, and flowers, and experiments are conducted with the small fruits and with cover crops for the orchard.

(5) Bacteriology. Nitrogen is one of the principal needs of a plant. It is worth, commercially, about 20 cents a pound. The air is 85 per cent Nitrogen, and yet plants cannot use it in the form in which it appears in the atmosphere. Certain bacteria, if introduced into the soil, will work on the roots of clover and other leguminous plants, take the nitrogen from the atmosphere and convert it into plant food. Our Bacteriologist propagates in his laboratory and supplies in small bottles millions of these nitrogen forming bacteria, which may be spread upon the seed before it is sown, and thus introduce into the soil these nitrate-forming bacteria. A crop of clover will leave in the soil in the roots alone about fifty pounds of nitrogen per acre. Thus the plant food supplied to the soil by a crop of clover is \$10 per acre in one year, and the farmer has the clover crop, tops, and leaves to the good. This, if practised on every farm, would mean millions each year to this Province.

(6) Chemistry. It was said a few years ago that sugar beets could not be grown profitably in this Province. Our Department of Chemistry conducted experiments in the different parts of Ontario and analysed the beets at different stages of growth. It is now known that we can grow as good beets as in any part of the world, and men are putting their money into the building of sugar beet factories. Over 22,000,000 pounds of sugar were made in Western Ontario last year. Chemistry did it.

Our Chemistry Department last year analysed flour made from four different grades of wheat grown in the Northwest. There was a difference of many cents per bushel in the market value of these wheats, and yet, after analysing the flour and having bread made from each of the different lots, it was found that the fourth grade made bread just as good just as palatable, just as much bread per bushel of flour, and just as nutritious as the higher grade, but it was not so bright in color. The result of this analysis will enable poor people, or people in moderate circumstances, to get the best bread for their families at very much less than they have been paying.

(7) Physics. In this department are taught the principles of soil cultivation and soil drainage. All farm crops take their food from the soil in a watery solution. When the land dries up, no more food can be taken; hence the necessity for a knowledge of how to conserve soil moisture. This is one of the most important questions that a farmer has to deal with, and experiments are being conducted in the Department of Physics all the time along these lines.

(8) Botany. In this department the subject of weeds and how to destroy them, the question of fungous growth, and when and how to spray to exterminate them, the importance of growing grasses and such things are taken up and discussed.

(9) Entomology. Again, millions of dollars are lost every year by insect depredation. Only by studying the life history and habits of an insect can it be properly combated. These are taught to the farmers' boys and bulletins are published and sent broadcast to the farmers from our Entomological Department.

(10) Poultry. Chickens used to sell any where on the market from 20 to 30 cents a piece. To-day they bring three times that amount, where they have been properly fed, killed, and

Unnourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and rashes disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicose, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

Save Dollars Every Week

—BY GOING TO—

S. BOND & CO.'S FRIDAY BARGAIN SALES.

You will save from 10 to 30 per cent. over any other store in the Province. These prices are good on Fridays only.

Here are a few of our prices for Friday:—

Coal Oil, 13c. a gallon.	Peas, 5c. a can.
Corn, 6c. a can.	Tomatoes, 7c. a can.
Napoleon, 8c. a plug.	Briar, 9c. a plug—3 for 25c.
Cotton, 1 yard wide, 5c.	Wrapperette, 1 yd. wide, 8c.
Flannelettes, from 4c. per yard, up.	

These sales will continue every Friday until further notice.

HIGHEST PRICE PAID FOR ALL FARM PRODUCE.

S. BOND & CO.'S GENERAL STORE, ODESSA.

Not Her Work.
"Madam, you make me look like a blooming idiot."
"Sir, I emphatically deny the responsibility."

Kitty Lost.
Miss Maybelle McGee, who was fat, By accident sat on the cat.
Said she: "Here, poor Kitty! Dear puss, what a pity! I wonder where she can be at!"

They Caused Themselves.
"I wonder what caused Mrs. Fijitt's wrinkles?"
"She must have got them worrying about them."

A Question.
Had Lazarus heeded the cry Of the rich man in torments new Could we say, without telling a lie, He was giving the devil his dew? —Judge.

None For Him.
"So poor Henpeck is dead. I suppose his last words were"—
"Didn't I tell you his wife was at his bedside?"

A Critical Summary.
This world's a stage; that's understood. Like other shows we've had, Some parts of it are pretty good And some are pretty bad.

Didn't Bother Her.
Him—Now turn me not away, fair one. All I am I owe to thee.
Her—Oh, don't mind such a little debt as that.

The Meaning of It.
That "might makes right" Is understood To mean that might At least "makes good."

Albert College Belleville, ONT.

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters. \$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the College is a guarantee of thoroughness. New Commercial Hall one of the finest in Ontario. Catalogue with specimen of penmanship FREE.

Honest Confession.
Jack—And do you always speak the truth about your friends?
Lola—Yes, but not until after they are gone.

Consumption

There is no specific for consumption. Fresh air, exercise, nourishing food and Scott's Emulsion will come pretty near curing it, if there is anything to build on. Millions of people throughout the world are living and in good health on one lung.

From time immemorial the doctors prescribed cod liver oil for consumption. Of course the patient could not take it in its old form, hence it did very little good. They can take

SCOTT'S EMULSION

and tolerate it for a long time. There is no oil, not excepting butter, so easily digested and absorbed by the system as cod liver oil in the form of Scott's Emulsion, and that is the reason it is so helpful in consumption where its use must be continuous.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

SIZE OF A THUNDERBOLT.

Geologists Have a System by Which Such Measures Are Taken.

"Did you ever see the diameter of a lightning flash measured?" asked a geologist. "Well, here is the case which once inclosed a flash of lightning, fitted it exactly, so that you can see how big it was. This is called a 'fulgarite,' or 'lightning hole,' and the material it is made of is glass.

"When a bolt of lightning strikes a bed of sand it plunges downward into the sand for a distance less or greater, transforming simultaneously into glass the silica in the material through which it passes. Thus by its great heat it forms a glass tube of precisely its own size.

"Now and then such a tube, known as a fulgarite, is found and dug up. Fulgarites have been followed into the sand by excavations for nearly thirty feet. They vary in interior diameter from the size of a quill to three inches or more, according to the 'bore' of the flash. But fulgarites are not produced

A Test Will Tell

What Liquezone Can Do for You--and It Is Free

You who are waiting—we ask you again to try Liquezone; to try it at our expense. You'll regret this delay when you learn what the product means to you. Do as millions have done—stop doubting; give Liquezone a test. Then judge it by results. Germ diseases—and there are scores of them—call for a germicide. Those are the diseases to which Liquezone best applies. Don't cling blindly to old-time remedies, if you don't find them effective. Let us prove the power of the new.

What Liquezone Is.

The virtues of Liquezone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Liquezone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquezone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Liquezone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Liquezone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Liquezone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Liquezone can do.

Where It Applies.

These are the diseases in which Liquezone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison
Bowel Troubles

Any physician or hospital not yet using Liquezone will be gladly supplied for a test.

DIAMONDS.

If You Want to Make Them. Here Is the Process of Manufacture.

Would you like to know how to manufacture diamonds—real diamonds? The process is somewhat difficult, requiring time, patience and some outlay of money. But then consider the possible result! The diamond, we know, is simply carbon in a transparent crystalline form. It comes of humble parentage and is brother to the lump of coal.

Unlike easily crystallizable bodies, carbon is insoluble in all ordinary solvents. But molten metals will combine with it. Let the diamond maker choose iron for a solvent for charcoal, melting it in an electric furnace, allowing it to take up as much carbon as it can—in other words, saturate itself with carbon. The crucible containing the white hot metal should then be plunged into a bath of molten lead. The result will be that globules of iron will rise to the surface of the lead and are quickly cooled on the outer surface. Inside the hard crust the iron remains for some time in a molten condition, and as iron expands in solidifying the contents of these little globules receive a pressure unobtainable by any other means. When the lead becomes solidified some bullets of iron will be found bound up in the mass. Dissolve with some powerful acid first the lead and then the iron, and a residue of carbonaceous matter will be found to contain tiny crystals—real diamonds. Any chemist with a well equipped laboratory can make diamonds in this way, but the largest of them will not be more than a fiftieth of an inch in diameter.

THE CULT OF SILENCE.

Truest Intercourse Between Congenial Spirits Is Without Words.

Now, to keep one's freshness there ought to be a zone of silence around every human being during some part

YOUR BRAIN HOLDS THE NERVE STRINGS

AND IF DISEASE TAKES HOLD OF THE NERVES THE BRAIN LOSES CONTROL OF ALL THE FORCES THAT CONTRIBUTE TO HEALTH AND MENTAL AND PHYSICAL COLLAPSE ARE AS CERTAIN AS SUNSET

South American Nervine

begins at the beginning to prevent and eradicate disease—it acts on the nerves that control the vital organs of the body, gives strength to the whole nervous system, fills the blood with that richness and purity that is so essential to health—because, remember this, that when these nerves become weakened and exhausted it means indigestion, torpid liver, stagnant kidneys, the heart flutters and becomes irregular and weak, the lungs fail to have the nourishment and weaken, and the climax, naturally enough, is debility—and the next stage may be consumption. All such dire consequences may be saved by the wonderful potency of South American Nervine.

South American Nervine is greatest blood purifier of modern medicine. South American Nervine is woman's best friend in very deed.

You persist and it never fails.

SOUTH AMERICAN RHEUMATIC CURE cures in from one to three days.
SOUTH AMERICAN KIDNEY CURE for diabetes, Bright's disease and all bladder troubles.

feet. They vary in interior diameter from the size of a quill to three inches or more, according to the 'bore' of the flash. But fulgarites are not produced alone in sand. They are found also in solid rock, though very naturally of slight depth, and frequently existing as a thin, glassy covering on the surface.

"Such fulgarites occur in astonishing abundance on the summit of Little Ararat, in Armenia. The rock is so soft and porous that blocks a foot long can be obtained, perforated in all directions by little tubes filled with bottle green glass formed from the fused rock.

"Some wonderful fulgarites were found by Humboldt on the high Nevada de Toluca, in Mexico. Masses of the rock were covered with a thin layer of green glass. Its peculiar shimmer in the sun led Humboldt to ascend the precipitous peak at the risk of his life."

It Won For Sardon.

It is a singular fact that the famous French dramatist Sardon owed his first success on the boards to his excellent handwriting. He had sent in his often rejected play, "La Taverne des Etudiants," to the Odeon management for consideration, and the manuscript was thrown, with some others, upon a table. One day at rehearsal the charming actress Mlle. Berengere was attracted by the handwriting and took up the manuscript, crying, "Oh, what an exquisite hand!" She read the play and recommended it so strongly to the directors that they were induced to read it and then accept it. At the time Sardon was starving. He had gone through seven long years of terrible hardship and privation.

Hops In England.

The English were taught the uses of hops by a native Artois, who introduced them into England in 1524. They met with some hostility, for physicians represented them as unwholesome, and parliament was petitioned against them as a "wicked weed." In 1528 their use was prohibited under severe penalties. Henry VIII. appears to have been prejudiced against hops, for in a manuscript, dated Eltham, January, 1530, occurs an injunction to his brewer "not to put hops or brimstone" into the ale.

Time and Money.

"Time is money, young man."
"That so? Well, I've a bunch of time on hand I'd like you to break into small bills."

Hard Luck.

One time a young fellow got busy making love to a maiden named Lusy. When he asked for a kiss, Though, the petulant miss Gave him such a hard slap he was dusy.

The Laughing Owl.

One of the most fantastic of birds is the laughing owl of Florida and some other southern parts. He sits well up in a tree at night and emits a series of loud, strange ha-ha's that sound like half human laughter. The sound is sufficiently terrifying to a nervous camper unacquainted with the habit of the bird, though less groomsome than the unearthly call of the Chesapeake loon heard at all hours of the night along the shores of that bay.—New York Telegram.

Fairy Stories.

Mr. Bacon—When a woman tells a fairy story she always begins like this: "Once upon a time." Mrs. Bacon—Yes, and when a man tells a fairy story he always begins like this: "There now, dear, don't be angry with me; you see, it was like this."

A man fifty years of age has in ordinary cases undressed himself 18,262 times and of course dressed himself just as many.

Real Spirits Is Without Words.

Now, to keep one's freshness there ought to be a zone of silence around every human being during some part of every day. It is significant that the great religions of the world have come out of silence and not out of noise, and the finest creative work is done, as a rule, in seclusion—not necessarily apart from men nor in solitary places, but away from the tumult and away from distracting sounds.

It is in silence alone that we come into possession of ourselves. The noises of life disturb us as a cloud of dust intervenes between the eye and the sky. There ought to be a cult for the practice of silence—a body of men and women committed to the preservation of the integrity of their souls by neither hearing nor making speech for certain periods, pledged to the culture of the habit of quietness.

Maeterlinck has pointed out the fact that the best things are never spoken, and the truest intercourse between congenial spirits is carried on without words. If we said less and thought more there would be far fewer things to explain, many sources of irritation would be dried up at the sources and the prime cause of irritation, which is nervous exhaustion or excitement, would be removed.—Outlook.

Long Beards.

Howell's "Welsh Celebrities" says: "Llewenn had the longest beard of which we have record. When loose and flowing it fell down over his horse's shoulders almost to the animal's knees. It was of a peculiar yellow or straw color, which was all the more curious, both his parents being dark haired mountain Welsh people. Years afterward the mountain people had proverbs which referred to this freak, they often using the expression, 'About as long as Howland's beard' or 'Yellow as the whiskers of Llewenn.'"

George Killingworth, whom Queen Mary sent to Russia in 1555 as one of her agents to Czar Ivan the Terrible, had a beard five feet three inches in length, and Count Ruloff of Poland, 1807, rejoiced in the possession of a mustache which was so long that he could not touch the ends of it with his fingers.

Sulphur.

Sulphur is a solid, nonmetallic mineral which has been known from earliest ages. It is hard, yellow and brittle and has a most offensive odor. It is found in veins or beds, mostly near active volcanoes. The imported sulphur mostly comes from Solfatia, in Sicily, but large quantities are also procured from copper and iron pyrites. These minerals are heated, and the sulphur being volatile flies off in fumes, which are conveyed by means of pipes to a condensing room. If left in the powdery state in which it condenses it is called flour of sulphur. If melted and cast into bars it is called roll sulphur.

Apple Cure For Drunkards.

"For ten years," said a physician, "I have advocated apples as a cure for drunkenness. In that time I have tried the apple cure on some forty or fifty drunkards, and my success has been most gratifying.

"Let any man afflicted with the love of drink eat three or more apples daily, and the horrible craving will gradually leave him. The cure will be greatly helped along if he also smokes as little as possible.

"I know a woman who cured a drunken husband without his knowledge by keeping always a plentiful supply of good apples on the dining table. The man ate these apples and finally stopped drinking altogether."

always in the house. A bottle of this famous remedy is your best protection against those sudden night attacks of croup. Equally good for all throat and lung troubles—for young and old. 25 cts. bottle.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

Frost Fences Are Strong All Around

The laterals of a Frost Fence are High Carbon No. 9 Hard Steel Cold Rolled Wire, thoroughly galvanized—that can't be broken until the strain reaches from 1900 to 2200 pounds.

The stays are No. 7 or this same No. 9 wire.

And the two wires are locked with the Frost Locks.

That braces the fence in all directions—up down and diagonally.

We are so sure that Frost Fences are the strongest and best that we guarantee to repair, free of charge, any fence that goes wrong. That's fair, isn't it? Frost Wire Fences are for sale by

St. John, N.B., Toronto, Winnipeg

LUCKY THIRTEENTH

By INA WRIGHT HANSON

Copyright, 1905, by McClure, Phillips & Co.

The sky was blue, the ocean bluer, and Dorothy's eyes the fairest blue of all. The sand was white, the breeze caressing, and Dorothy seemed unusually susceptible. I judged it to be an auspicious time to declare my feelings, so I began:

"Dorothy, dear, I have wealth through no fault of my own, social status ditto and a moderately good disposition. I love you. Will you mar?"

To my surprise, Mistress Dorothy sprang to her knees, crying, "Don't, don't!" and clapped her small hand over my mouth.

"Very well, then, I won't," I said to the circumstances.

"Oh, but I want you to!" was the next astounding development, while she dropped down on the sand again, bowed her head and wept.

I thought I was used to Dorothy's moods, but I realized then that my knowledge concerning them was small. As I didn't know what else to do, I just sat still. Finally she raised her head from the sanctuary of her hands and looked at me reproachfully.

"Oh, George, I've been waiting a whole year to hear you say it, and now why couldn't you have said it differently?"

Vapo-Resolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Creosolene is a boon to Asthmatics

Creosolene is a long-established and standard remedy for all the above ailments. It cures because the air rendered clear and the lungs are kept clear of the diseased surface of the mucous tubes with every breath, giving relief and constant treatment. Those of a consumptive nature or suffering from chronic bronchitis, find the most relief from coughs or inflamed conditions of the throat.

Creosolene is sold in all the leading drug stores. It is a pure, natural product, and is not a poison. It is a remedy for all the ailments mentioned above, and is a boon to all who suffer from them.

Branch Office, 1111 F St., Washington, D. C.

I sat up a little straighter. "How should you wish me to approach the subject?" I inquired coldly.

"Of course you don't understand, poor boy!" she sighed, poking back behind her pink ear a little damp brown curl. "I have a chum at home, and we were always thinking of something that no one else would. One day she said, 'Let's make vows.' So we each took a piece of paper and wrote on it a vow which we were bound to keep if we were—were—hung for it. Nell's vow was"—

"Never mind Nell's vow," I said. "What was yours?"

"I vowed I wouldn't marry a man who didn't propose to me in a way no other man ever did."

"Ever proposed to you?" I asked jealously.

"No, no! Ever proposed to anybody. I vowed, so I have to keep it. Oh, George, I've just lived to have you say it in some strange way!"

"There's no law against a fellow's proposing twice, is there?" I asked.

She looked up eagerly. "Oh, you haven't said it yet, you know. I stopped you. Do you suppose you could think of some original way?"

"Well, I'll try mighty hard. But what a fool thing for you to do anyway!"

"I know it," she acknowledged, with unguished meekness.

As our afternoons at Santa Monica were devoted to the surf, we met again in front of the bath house and hand in hand walked toward the seething breakers. She looked more charming than ever in her black suit, banded with scarlet, and a scarlet handkerchief knotted about her small head.

"Heavens, Dorothy, how I love you!" I exclaimed as we emerged from our plunge through the first swell.

"And I love you, too, dear," she murmured, coloring a little. "You will find some way, won't you?"

"Yes, if I have to pick you up some day and run off with you."

"That wouldn't do. Some of the savages behave that way. It isn't the doing anyway; it's the asking."

"Dorothy Allen, see that swell coming? When it gets here I'll hold you under it till there isn't a breath left in your body if you don't say you'll marry me!"

"It isn't original," she persisted. "The man Nell's engaged to said almost that."

"Darn the man, and Nell, too!" I said viciously under my breath. I didn't try any more that day, but she allowed me one kiss as we sat on the raft, and that was something.

It would be a wearisome task to relate all the ways in which I tried to propose to Dorothy that summer. I lay awake nights trying to think of some wild and woolly way to ask her to marry me, only to face bitter defeat by being told that some other John had said the same to his Joan. Dorothy's knowledge on the subject seemed prodigious. It would have looked suspicious to me had she not really felt as bad as I did over my inability to be original.

The summer was almost gone. A certain Thursday was to mark Dorothy's departure for her New York home. On the Tuesday before we, with a gay party, were to visit Mount Lowe.

Dorothy's pretty lips read the description from the guidebook as we left Los Angeles and were borne swiftly through suburban places toward the fog wreathed mountains. The rest of the crowd was considerably oblivious of us two, so I made bold to interrupt.

"Dorothy, this has got to end. I am

losing my appetite, and I can't sleep nights. I have tried twelve times. If I can't find a way to suit you on this trip I am off for Africa or Shanghai next week. You needn't look incredulous. I am in dead earnest."

"Seems as though you might think of something," she replied.

"And if I do you are going to marry me right away and let me go home with you," I went on, ignoring the reproach of her remark. "I deserve something for all I've gone through."

She didn't say yes, but, on the other hand, she didn't say no, so I felt fairly confident.

"Echo mountain," called the conductor. "Change cars for Alpine tavern. Five minutes' wait."

On the right were the ruins of a hotel, which we went over to observe. Here we found a cannon, mounted and ready for business.

"That," said the man who had been there before, "is fired off occasionally to show the marvelous power of echo. It reverberates here, yonder, to the right, the left, many times over."

I grasped Dorothy's hand and drew her away from the crowd.

"Darling," I whispered, "I'm going back on this car, and I'm going to marry you tonight. Wait here or at the observatory yonder. When you get tired of observing, pick your wedding bouquet, for you will need it as soon as I get back. Goodby, sweetheart." And before she could do anything but stare at me in a half frightened, wholly charming way I had caught the down car and was out of her sight.

Once the car reached Los Angeles I was out, tearing along the sidewalk to the courthouse, where the smiling county clerk favored me with the precious bit of paper which would allow me to wed my Dorothy.

"Do you know anything about any of the preachers in this town?" I asked, wiping my perspiring forehead.

His smile broadened. "Well, if it is a runaway match I shouldn't advise you to tackle the Methodist. A trifle narrow is Mr.—"

"It isn't a runaway match," I answered hastily, "but for certain reasons I want the services of a young man."

"Mr. B. of the Unitarian is about your age, I should judge."

"He's the man. Where can I find him?"

After getting definite directions I fled down the courthouse steps. I found Mr. B., who when he had heard my story laughed immoderately, but, as I thought a young man would, consented to go with me. Consequently the last car for Altadena and Mount Lowe found us on board, together with a huge, awkward parcel which I had purchased on the way to the station.

As the car reached Echo mountain I found a laughing, much larger crowd than we had started with and in their midst Dorothy, looking most uncomfortable, but holding in her little hands a bouquet of Indian paint brush, the gorgeous coloring matching well the hue of her own sweet cheeks.

"They've surmised something," I whispered to my companion. "Well, the more the merrier, I suppose; kind of tough on us, though."

At which speech I thought the minister was going to disgrace his cloth again by unseemly levity. The crowd drew back a little as I advanced toward Dorothy and introduced the reverend gentleman. I tucked her little trembling hand under my arm, and, with my great parcel under the other, the minister discreetly leading, and after us the crowd, though not fully understanding the play, we wended our

La Grippe Cured

Twelve times and out! Doctors say that LA GRIPPE will come two or three years more and disappear again for 50 years. It has a periodical run of 12 years. Each time it comes it is worse than the time before. This time LA GRIPPE is prophesied to have terrible neuralgic and rheumatic pains as a symptom and afterclap. These pains are the most excruciating—worse than the rack and torture. Avoid LA GRIPPE, prevent LA GRIPPE, or cure LA GRIPPE, by taking the specific, scientific remedy

most ancient known. They are of silver and bear on the upper side the figure of a turtle and on the under an indented mark. Coins are among the most certain evidences of history. In the later part of the Greek series they illustrate the chronology of reigns. In the Roman series they fix the dates and succession of events. Gibbon observes that, if all our historians were lost, medals, inscriptions and other monuments would be sufficient to record the travels of Hadrian. The reign of Probus might be written from his coins.

NOSE CHANGES.

They Are Gradual and Imperceptible, but Continuous.

Don't worry about the shape of your baby's nose if it is a snub nor be sure if it pleases you by its regularity that it will be the nose that will grow up with it, for scientists have observed that no feature changes more as life progresses. The length of the nose increases so much faster than its breadth that the snub nosed baby may evolve a long, even hooked nose. This change in the shape of noses is gradual and imperceptible, generally more expeditious in the male than in the female, correlated with various other characteristics, such as intellectual attainments or weak constitution, and producing different results. During maturity and senescence the bridge of the nose becomes more and more prominent, often more convex, so that extreme old age may even develop an aquiline nose, so that one need never despair of possessing a satisfactory nose at some period of his life if he only lives long enough. But

Make Your Hair Grow

Satisfied with your short, stubby, scraggly hair? Or would you like it longer, richer, thicker? Then feed it with Hall's Vegetable Sicilian Hair Renewer. There's solid comfort in handsome hair. Get it! Be happy! For the whiskers and moustache we make BUCKINGHAM'S DYE. It colors a rich brown or a soft black. E. P. HALL & CO., Nashua, N. H.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them." M. E. PARKS, Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely." MRS. GEO. A. SMITH, Hayworth, Quebec.

"After 1 1/2 years' experience in treating infantile ailments in our home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried." W. C. WEIR, Pastor Baptist Church, Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

DOUGLAS & CO., Napanee, Ont., Can., Wholesale Agents for Canada.

the minister discreetly leading, and after us the crowd, though not fully understanding the play, we wended our way toward the cannon, mounted and ready for business.

I dropped Dolly's hand, tore the paper wrapping from my megaphone and put it to my lips.

"Dorothy!" I shouted, and first this hill, then that, here, there, yonder, repeated her sweet name.

I raised it to my lips again, and "Re mine!" sang out the hills. Then I laid it on the ground and held out my hand, while the women smiled and the men tossed up their hats in delight. The situation was severe, but my Dorothy was game. Blushing, tearful, yet happy withal, she gave me her hand, and the minister stepped forward with his little book.

HOW TO STUDY PROPERLY.

Books Should Be Well Chosen and Read Carefully, Not Devoured.

Study is like a dinner. The viands must be well chosen and eaten slowly, not devoured, then well turned over in the mental stomach for awhile until with ease and comfort they are perfectly digested and furnish nutriment to the brain. Most students study without thought, which is like eating without digesting. Others read merely as a fad and soon forget all they may have learned.

The most satisfactory method of study is the digestive. It is the thorough one—the one that gives strength to the brain. Take the subject you are studying. Read a few lines or a few pages, as the case may be, then put the book down and think on what you have read. Turn it about in your mind from every standpoint. Do not accept it immediately. Argue for and against it in your mind. In other words, masticate it. You need not be at your leisure to do this. Do it in your walks, in your idle moments, at any time. When you have satisfied yourself on the subject go on with a little more in the same way. In a short time you will find yourself more a thorough student than if you had read all at a sitting. The best educated man in the end is the man who learns slowly, but surely.

even develop an aquiline nose, so that one need never despair of possessing a satisfactory nose at some period of his life if he only lives long enough. But, like so many other blessings that are deferred, the right kind of a nose may arrive too late to affect one's fortunes or happiness.

A Study In Wrinkles.

When George Rignold was playing Henry V. a friend visited him in his dressing room and remarked a large and handsome photograph of Wordsworth hanging on the wall. Said the friend, "I see you are an admirer of Wordsworth."

"Who's Wordsworth?" queried the actor.

"Why, that's his picture—Wordsworth, the poet."

"Is that old file a poet? I got him for a study of wrinkles."

Commercialized.

"This is indeed the age of commercialism," said the man of sentiments. "What makes you think so?"

"Some of our statesmen never mention the American eagle any more and are continually applauding the work of the American hen."—Washington Star.

Making a Name.

"Yes, she made a name for herself."

"In what way?"

"Why, she used to be Ellen Cummins Brown. Now she is Aileen Comyns Browne."

Knowledge.

Knowledge will not be acquired without pains and application. It is troublesome and deep digging for pure waters, but when once you come to the spring they rise up and meet you.

The Engagement Was Recent.

He—I wonder if there is another girl in the whole wide world so sweet as my little sweetheart. She—What's that? How dare you think of another girl? I shan't speak to you for a week.

We know books by reading them, horses by handling them, houses by living in them and men by trusting them.

Practical Eye Wash.

A little salt and water used as an eye wash will cleanse and strengthen inflamed lashes and rest tired eyes. It is safe to use it at any time that irritation is felt. A New York surgeon prescribes the ocean for bad eyes, particularly young eyes. "Get off," he says, "whenever you can and let the salt and the sea breeze wash and blow around your eyes. It will do them good. It will dislodge the germs of disease, for the air breathed by half the world is germ laden, and sore eyes are more quickly caught than smallpox and more fatal. It will brighten and strengthen them and prolong their beauty and usefulness."

Elegance.

Elegance is something more than ease; it is more than a freedom from awkwardness or restraint. It implies, I conceive, a precision, a polish, a sparkling, spirited, yet delicate—Hazlitt.

Sensible.

"What prevented Bella from eloping?"

"Her young man preferred a home wedding."

Get a Move On.

"All things come round to him who waits."

Oh, nonsense, rubbish, stuff!

All things come round to some one else if we wait long enough.

KALADAR.

The Social at Mr. Shier's, Northbrook, on Thursday night, was well attended by the young folks of this place and report a good time.

Messrs. C. Godfrey and Wm. Bongard spent Monday at Napanee.

Mr. Robert Paul, of Selby, was through here on business.

Mr. Alexander Forbes, spent Monday in Napanee.

Messrs. Luke Sedore and Chas. McBride of Roblin, was through here on Thursday last, on business.

Mr. Wm. Hughes has the contract of drawing wood for the Rathbun Co.

We are glad to see the sick on the gain: Mr. and Mrs. Wm. Millar, at the King Edward, on Sunday last.

Mrs. Hughes spent Thursday last at Tweed.

Too late for last week.

Our school is progressing favorably under the management of Miss Edith Laidley.

Mr. H. W. Huff of Napanee, was here on business.

Mr. William Morton spent Saturday last at Tweed.

Mr. William G. Rigby, of Leaside Junction, formerly of this place was visiting relatives.

Miss Etta Jayne, who has been visiting her sister Mrs. O. Keller has returned to her home at Gosport.

A number around here are sick with La. Grippe.

Walter Delane of Cloyne, registered at the King Edward, on Monday last; also Mr. Harry Head at the Algerian.

Mrs. Peter Hughes was at Tweed on Saturday last.

Mr. Fred Sedore Flinton has moved his mill down to saw out Mr. Morton's cut of logs.

Heating and Sanitary Plumbing.
MADOLE & WILSON.

DENBIGH.

We are still wishing and waiting for snow enough to give us fair sleighing. The output of saw logs and other products of our forests this winter will probably be the smallest on record, and the loss to Lumbermen and local jobbers will be very large and will react to a great extent on all other business men.

The Municipal Council met on the 10th, inst. The Auditor's Report was received and adopted.

Mr. John Lane was reappointed Township Treasurer, the necessary Pathmasters, Fenceviewers, and Poundkeepers were appointed, and considerable other important Municipal business was transacted.

Mrs. E. Stein, who has been in the Brockville Hospital for some time is expected home again in a few days considerably improved in health.

Thos. Pringle who received a serious kick from a horse is able to be around again, but it will be some time yet, before he will be able to do any ordinary or hard work.

Horace C. Wienecke youngest son of Mr. and Mrs. Chas. Wienecke cut two of his fingers nearly off, playing with his father's axe. The injury was promptly attended to, and hopes are entertained that no permanent injury will be the result of this accident.

Mr. and Mrs. Geo. A. Suider have taken rooms with Mr. Chas. C. Stein, and started housekeeping. Mr. Suider has been conducting divine services in the Methodist church nearly every Sunday.

Edward John who has been for over two months in a hospital in Parry Sound suffering from a severe attack of typhoid fever, had recovered sufficiently to undertake the journey home to his parents, Mr. and Mrs. Adolph John, but since his arrival home he has had a relapse and is again very low. His brother Alfred, of Depot

Rear-Admiral Hichborn Praises Pe-ru-na.

REAR-ADMIRAL HICHBORN.

ADMIRAL'S WORDS CARRY WEIGHT.

REAR-ADMIRAL HICHBORN is one of the best known admirals of our navy.

His statement concerning Peruna will have much weight as it goes out into the world.

What he says is echoed by many other naval officers of high standing.

WHAT THE ADMIRAL SAYS.

Philip Hichborn, Rear-Admiral United States Navy, writes from Washington, D. C., as follows:

"After the use of Peruna for a short period, I can now cheerfully recommend your valuable remedy to any one who is in need of an invigorating tonic."—Philip Hichborn.

AN EVERPRESENT FOE.

The soldier and the sailor are especially subject to catarrh in some form or phase.

Exposed as they are to constant changes, subject as they are to various vicissitudes, and all kinds of climate, wet and dry, night and day, they find catarrh to be their most insidious and everpresent foe.

In the barracks and on the field, Peruna is equally efficacious.

Taken in time, it will absolutely prevent catching cold.

PE-RU-NA AN ABSOLUTE SPECIFIC.

After a cold has become established, Peruna will break it up quicker than any other remedy known to man.

Even after a cold has become settled in some organ of the body Peruna can be relied upon to promptly dispel it.

Peruna will cure catarrh, whether acute or chronic, but a few doses taken in the first stages of the disease will be more effective than when the disease has become chronic.

If you suffer from catarrh in any form, do not neglect it. Take Peruna at once. Delays in such matters are dangerous.

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

NATURE'S CRUELTY.

The Ichneumon Fly Makes Its Natural Enemy Serve Its Purpose.

The Ichneumon fly of Ceylon is the natural enemy of the spider. This insect is green in color, and in form resembles a wasp with a marvelously thin waist. It makes its nest of well worked clay and then goes on a hunt-

RECOMMENDS PE-RU-NA.

"I am convinced of Peruna's curative qualities and I unhesitatingly recommend it to all persons suffering from catarrh."—Commodore Somerville Nicholson.

FROM HIS OWN EXPERIENCE.

"The use of your Peruna as a remedy and cure for catarrh by many of my friends who have been benefited by the same, as well as my own experience as to its efficacy and good tonic properties, causes me to recommend it to all persons."—Ex-Lieut. U. S. Navy, James M. Morgan.

PE-RU-NA CURES THROAT CATARRH.

"I can cheerfully recommend your remedy, Peruna, to my friends and other sufferers as one of the best remedies I have ever tried for catarrhal troubles of the throat and kindred diseases. I also consider Peruna a grand tonic."—Admiral James A. Greer.

FOR COUGHS AND COLDS.

"I have used your Peruna with satisfaction and can cheerfully recommend the remedy as an effective remedy for coughs and colds."—Rear-Admiral J. A. Howell.

USED PE-RU-NA IN HIS FAMILY.

"I have used Peruna in my family with the most flattering results.

"I can recommend your valuable remedy as a most efficient remedy for coughs, colds and catarrh."—Col. U. S. Marine Corps, C. J. Porter.

No remedy ever yet devised has received such unstinted eulogy from so many renowned statesmen and military men as Peruna.

We have on file thousands of testimonials like those given above. We can give our readers only a glimpse of the vast array of endorsements Dr. Hartman is receiving.

Notice.

Mexican Courtship.

A Mexican girl is courted by a unique process. Her would be lover walks up and down the street on the opposite side and stares at her window by the hour. If his appearance is agreeable she appears at the window after a few days of this performance. When the acquaintance develops he is introduced to her papa, and after the necessary marriage arrangements have been made he is introduced to her. The preliminary tramping and staring are called "doing the bear."

are frequent allusions to it in the Bible. Job, in the oldest book of all, says: "Canst thou draw out a leviathan with a hook or his tongue with a cord which thou lettest down? Canst thou put a hook in his nose?"

to his parents. Mr. and Mrs. Adolph John. But since his arrival home he has had a relapse and is again very low. His brother Alfred, of Depot Harbor, and sister Ite, of Nananee, have been sent for.

WHAT OTHER PAPERS SAY.

Kingston Whig.

Conservatives resent the idea that the federal government will stop the flow of speech in parliament by adopting the closure. But the noise of faction will not deter the government from applying the brakes if the legacity of some members is to become troublesome. The closure is a conservative expedient.

Bradford Expositor.

Premier Whitney announces that an increase in seasonal indemnity is not being considered for the members of the Ontario legislature. The general public which was so agitated over the Ottawa "salary grab" of last session will feel greatly relieved.

Halifax Herald.

A Toronto lawyer, employed by some corporations, is complaining that corporations cannot now get a fair jury trial, so great is the popular prejudice against them. The people are just now beginning to realize that they never knew a fair corporation.

Winnipeg Free Press.

The jealousy between the Island of Vancouver and the mainland of British Columbia, which has often been in evidence during the election contests, has cropped out in the discussion excited by the appointment of Hon. Templeman to the vacant position in the Government. This appointment was not desired by some of the main land Liberals; and their dissatisfaction found expression in some rather ungenerous references to the new Minister in certain Liberal newspapers.

Toronto Globe.

The report of the profitable working of the Temiskaming Railway shows that it is profitable to keep the highways under public control. Alienation has been easy, but recovery of them will mean generations of effort and onerous financial burdens.

sect is green in color, and in form resembles a wasp with a marvelously thin waist. It makes its nest of well worked clay and then goes on a hunting expedition. Its victims are invariably spiders of various kinds, but all are subject to the same mode of treatment. A scientific sting injects some poison which effectually paralyzes the luckless spider, which is then carried off to the nest and there fastened with a dab of moist clay. Another and another victim is brought to this chamber of horrors. Then the prescient mother ichneumon fly proceeds to deposit her eggs, one in the body of each spider, which can just move its legs in a vague, aimless manner, but can offer no resistance.

This done, the fly returns to her work as a mason. She prepares more clay and builds up the entrance to this ghastly cell. Then she commences a new cell, which she furnishes in like manner and then closes; then she adds yet another cell and so proceeds until her store of eggs are all provided for, and her task in life being accomplished, she dies, leaving her evil brood to hatch at leisure. In due time these horrid little maggots come to life and find themselves cradled in a larder of fresh meat. Each poor spider is still alive, and his juices afford nutriment for the ichneumon grub till it is ready to pass in the chrysalis stage, thence to emerge as a winged fly fully prepared to carry out the traditions of its ancestors with regard to spiders.

ANTIQUITY OF FISHING.

The Art of Angling Is as Old as the Human Race.

The art of angling no doubt had its origin in man's necessities. The earliest record of mankind makes reference to the taking of fish for food. There

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

Job, in the oldest book of all, says: "Canst thou draw out a leviathan with a hook or his tongue with a cord which thou lettest down? Canst thou put a hook in his nose?" Homer, in the "Iliad," speaks of fishing in these lines: As bearing death in the fallacious bait, From the bent angle sinks the leaden weight.

And it is recorded in the "Odyssey."

As when the angler, his long rod in hand, On a projecting rock assumes his stand, Casts to the flery fry the baited snare, Then flings the wriggling captives in the air.

The Romans, Greeks and other races of early days around the Mediterranean practiced the art of angling. Plutarch tells of a prank played by the fair Egyptian, Cleopatra, while out fishing with Antony. "They wagered on their angling, and her divers did hang a salt fish on his hook, which he with fervor drew up."

The ruined walls of Herculaneum and Pompeii abound in frescoes of fishermen. All along the track of history are found traces of this gentle recreation, showing the gradual improvement from the hook of bone and rude equipment of the cave man to the elegant accessories and belongings of the modern angler.

Written in Slang.

Matthew Henry's commentary on the Bible was written for the common people and in the slang of the day. In commenting on Judges ix he says: "We are here told by what acts Abimelech got into the saddle. He hired for his service all the scum and scoundrels of the country. Jotham was really a fine gentleman. The Sechemites were the first to kick him off. They said all the ill they could of him in their table talk. They drank health to his confusion."

Her Pocketbook.

"Oh, my!" exclaimed Mrs. Schoppen. "I've lost my pocketbook."

"Never mind, dear," replied her husband. "I'll get you another pocketbook, and you can easily collect more dress goods samples."—Kansas City Independent.

TWO SCOTCH STORIES.

Origin of the Macintyres and the Bloody Hand Legend.

My father, says a writer in Blackwood's Magazine, had no end of anecdotes about our ancestors, parts of which I remember, though I was only a schoolroom child of under fourteen when I heard him relating them. I was, however, old enough to feel keenly interested in them. One story that impressed me very much was related to account for the origin of the Clan Macintyre. A party of Macdonells on one occasion were out in a boat when a knot of wood sprang out, causing a serious leak, whereupon one of the party stuck in his finger to fill the hole and then cut it off with his dirk, thus saving the life of the whole party. From this circumstance his descendants were called the Macintyres, or sons of the carpenter.

Another story which I heard my father tell relates to the bloody hand which appears in our coat of arms. A doubt having arisen as to which of two brothers a certain estate belonged, it was agreed that he whose flesh and blood should first touch the property was to be regarded as the rightful owner. Accordingly the two young men started in two boats for the land in question. One of them, seeing that he was losing the race, when near the shore pulled out his dirk, cut off his hand and threw it on land, thus establishing his right to the property, as his flesh and blood had touched it first.

introduced to her papa, and after the necessary marriage arrangements have been made he is introduced to her. The preliminary tramping and staring are called "doing the bear."

Smith a Greek God.

In the grammar department of one of our public schools the teacher, after talking with her class on the subject of mythology, read to them as follows:

"Vulcan, smith, architect and chariot builder for the gods of Mount Olympus, built their houses, constructed their furniture," etc. The following day the subject of the preceding day was given as a language lesson, and as no mention was made of Vulcan the teacher asked the class who built the houses for the gods of Mount Olympus. For awhile the children seemed to be lost in deep thought, when suddenly a gleam of intelligence illuminated the face of one little girl, and she replied:

"I can't think of his first name, but his last name is Smith."

Seven Days in a Year.

At the examination of pupils in a primary school the inspector put questions at random to the scholars. Among the latter was a towheaded lad who on being asked how many days there are in a year answered, "Seven." When the tittering of the rest of the class subsided the inspector remarked: "I said a year, not a week. Now, try again. How many days are there in a year?" The lad appeared nonplused and vexed for a moment, then ejaculated: "Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday; just seven. If there's others I never heard of 'em."

IT DRAWS HARD

On a woman's vitality to do work for which she is unfitted, and we wonder how some of the women of our land live through a single season of pleasure or dissipation.

They will say with tears in their eyes, when they mention the subject at all, "it is a hard pull," that with pain, weakness and weariness they are "almost dragged out." Many, in this condition, resort to alcoholic stimulants and "invigorants," the after effects of which are very injurious.

Dr. R. V. Pierce, forty years ago found that women were being misreated through ignorance or carelessness and determined to devote his life and energies to their relief.

Having found the cause of their suffering, he next sought for the means of relief, and found in Nature's laboratory—the earth, certain roots which had remarkable and valuable medicinal virtues for the cure of these ailments.

Using chemically pure glycerine, of proper strength instead of alcohol, he prepared extracts of these, and the result was so satisfactory that the combination became his "Favorite Prescription." The roots used are: Lady's Slipper root, Black Cohosh root, Unicorn root, Blue Cohosh root and Golden Seal root. The world knows it as Dr. Pierce's FAVORITE PRESCRIPTION, which has the wonderful and unparalleled record of a half-million of cures in the last forty years.

Write to Dr. Pierce, Buffalo, N. Y., for advice, given without charge.

"I am glad to be able to testify as to the merits of Dr. Pierce's Favorite Prescription for the many ills that women suffer with," writes Miss Gertrude Mitchell (President, Young Ladies' Christian Endeavor Society), 43 Columbia Street, E. Detroit, Mich. "After many years of suffering and pain, I took your medicine, and in a short time began to feel stronger, became more regular, and didn't have the bearing-down pains which had been my lot for so long. Shall never cease to be very grateful that it was brought to my notice. I have no pains, and feel much stronger generally."

Dr. Pierce's Pellets cleanse the clogged system from accumulated impurities.

"Let the GOLD DUST TWINS do your work."

The Dog and The Shadow

You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

Gold Dust Washing Powder

with the Gold Dust Twins on the package."

OTHER GENERAL USES FOR GOLD DUST: Rubbing down, weathering clothes and dishes, cleaning wood, walls, ceilings, silverware, etc., removing grease, dirt, and grime, cleaning iron, brass, and metal, and making the most efficient.

Made by THE N. H. FAIRBANK COMPANY, Montreal, P. C. - MAKERS OF FINE SOAP.

GOLD DUST and **Gold Water** are

RELIGION AND BUSINESS

As Much Danger of a Man Losing His Character in the Church as in the Street.

Providing for honest things, not only in the sight of the Lord but in the sight of men.—II. Cor. viii., 21.

The question, can a man be a Christian and succeed in business, though old, is still asked every day. There are yet a great many who regard religion and business as conflicting pursuits, and they attempt a compromise by the clear-cut division of time into business hours and church time.

If the question means, can a man take out his backbone and succeed in business, there need be no hesitancy as to the answer. If becoming a Christian means the elimination of all virility from the character, the substitution of soft soap and sawdust for strength and diligence, religion cannot be regarded as a help in business. There are too many people who think that sloth is a sign of spirituality and that you cannot be a saint unless you have softening of the brain.

The question is either a reproach to religion or to business. It is assumed by many, with especial conviction by those who know business only by reputation, that it demands the sacrifice constantly of honor, truth, mercy, and every other virtue. The man who thinks that he is pious because he is pulseless, draws a fancy picture of red-blooded men fighting, intriguing, slaying, like demons new from the pit; and that, he thinks, is

MODERN BUSINESS.

Strife is everywhere. If religion means sequestration from temptation we need to pray to be delivered from it. There is as much danger of a man's losing his character, selling his soul, in the church as in the market. The temptation to the merchant to misrepresent his goods for a larger profit is not greater than that which comes to the minister to magnify his abilities for an increase in fame. Things honorable are the same every-

where; they are written deep within us, and by them church and mart both are judged. Every man knows that the chief business of life, whether through commerce, toil, study, recreation, or worship, is to develop the best life, to make of himself a true, full grown man, who shall render to this world a full man's service.

Business is a more effective school of character than any other we have. If some of the standards of that school have been unworthy—and who shall say they have not?—it is our duty to revise them, to make them higher; not to abolish the school, nor to stay away from it because it is imperfect, but to make it fit to serve its true purpose.

Business always will be immoral as long as it is an end in itself. The product is greater than the machine, the making of character greater than the mechanism by which we make a living.

THE SERIOUS DANGER

comes when a man begins to lay his soul on the counter, when he reverses the course in this school of character and makes the end serve the means; sacrifices honor, truth, and the soul that business may succeed.

Only failure lies that way. No business ever became permanently great by making its people small. Success here is to be measured by the soul. No matter what a man may be doing he must keep himself above his task. The work must serve the worker.

The question is whether we are serving business or is it serving us? If a man lives for his wage he will sacrifice everything to get it, but if he works that he may find life, then he will ever refuse to lose the things of which life is made in the pursuit of success. He knows he does not have to make money, but he does have to make manhood. That is the end both of religion and of business.—Henry F. Cope.

THE S. S. LESSON

INTERNATIONAL LESSON,

FEB. 25.

Lesson VIII. Jesus' Power to Forgive.

Golden Text, Mark 2. 10.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

Popularity, Silence, Conflict.—The day of miracles at Capernaum (compare last lesson) brought Jesus into sudden and to him unwelcome popularity. A short absence from the city, during which he made a tour throughout all Galilee preaching and healing the sick (Mark 1. 35-45), did not diminish the enthusiasm of the Capernaum populace, upon whom the events of that first notable Sabbath day had made a profound and indelible impression. But to Jesus this popularity was most unwelcome. It hindered rather than helped the work in which he was engaged. He sought earnestly to avoid it, and even forbade some whom he had healed from publishing the fact abroad. The miracles he performed were primarily works of benevolence, the spontaneous breaking forth of the supernatural power of his divine presence in the presence of great suffering and need, and not a display of supernaturalism intended to establish his authority.

With the second chapter of Mark's narrative begins the account of the long period of conflict with the Jewish authorities which culminated ultimately in the tragedy of his death. Many

from bringing their friend to the notice of Jesus. The sick man doubtless also exercised faith, but the antecedent of the pronoun they is clearly the word four in verse 3.

Son—Gr. child.

6. Certain of the scribes—Pharisees and lawyers present for the express purpose of watching, and, if possible, finding cause for legal accusation against him. Doubtless some of those referred to were emissaries from the hostile party at Jerusalem, by whom the death of Jesus had probably already been determined upon (comp. Luke 5. 17 and John 5. 18).

7. He blasphemeth—For strict orthodox Jews who rejected the claims of Jesus to be the Messiah there was no alternative verdict, for the claim to forgive sins implied a claim to distinct equality with God. This implied claim of Jesus was well understood by these men. Hence their question, Who can forgive sins but one, even God? Having rejected his claim to divinity, they could not do otherwise than bitterly antagonize Jesus.

8. Perceiving in his spirit—Knowing who these men were, Jesus knew they would understand his message and his implied claim to divinity. He knew, too, that for them there would be but two possible courses of action with regard to himself. Either they must admit his claim and become his disciples, or they must reject it and treat him as an impostor and blasphemer. The expression on their faces doubtless indicated which of these alternatives they were choosing. It is not necessary to invoke any miraculous knowledge on the part of Jesus.

9, 10. Which is easier, to say—As if Jesus had said, "You have heard me say, Thy sins are forgiven, but have no way of knowing whether my word carries the necessary power with it. But

DE RESKE LOSES ESTATE

REVOLUTION IN POLAND DEPRIVED HIM OF INCOME.

Great Tenor May Return to the Stage—Lands May Be Taken by the Peasants.

No man has lost more heavily by the revolutionary outbreaks than M. de Reszke, the world-famed singer. Owning the largest estates in Poland and accounted the richest man there, he has suddenly been deprived of every penny of income from his property—if it can still be called his—and is left with a big palace in Paris on his hands and many dependent upon him.

It took five hours with a pair of prancing steeds to drive across Jean de Reszke's broad acres in Poland. The property of his brother and sister adjoined his, so that the de Reszkes owned as much land as would make a goodly sized province. Now the peasants are up in arms and are parceling out the land among themselves. Discussing the outlook with me, M. de Reszke said:—

BACK TO STAGE.

"If the world should come, I am able to go back to the stage. I feel perfectly able to make a tour in America. My few years of teaching have rested me and have given me time to work out my theories and to put them into practice. But I hope necessity will not compel me to give up teaching, for my duty to the music-loving world lies exactly there."

"In our beloved Poland," he continued, "socialists are taking possession of the land. Their object is to divide up into small patches the thousands of acres held by the large landholders. They are everywhere. Their steady work of over a quarter of a century is being brought to a climax."

"How do you work the land in your country?"

"The large landowner works it through his peasants. The peasants own certain strips of land. The wages paid them are not large, but they grow upon the bits of land given them food for themselves and their cattle. On Fridays they are permitted to pick up the dead branches of the trees in the forests of the landowners. In the past a pretty annual custom obtained, which went to show the friendly relations existing between the peasant and the noble. It was a species of what would be called a harvest home in England. When the harvest was gathered in, the people used to assemble and make presents of little rustic ornaments to the landowners. Their habit was on these occasions, while partaking of the hospitality of their chiefs, to sing their master's praises. Frequently they took occasion to enhance the virtues of their own chief by depreciating and abusing those of their neighbors. These gatherings were exceedingly picturesque. The brilliant red or yellow flowers in the shawls of the women pleased the eye. Altogether, I know of nothing so picturesque as a Polish harvest home. This pleasant custom will now disappear forever."

GOOD TO HIS TENANTS.

"Every year the harvest home, which I have tried to describe, used to take place upon my estates and those of my brother and sister. It is one of the pleasantest memories of my life in Poland. I have tried to do my best for the people; I have lodged them well and otherwise looked after their wants. True, all proprietors are not good to those dependent upon them, yet the innocent should not suffer with the guilty."

HEALTH

SOME EVIL EFFECTS OF SUNLIGHT.

It is a common belief, well supported by facts, that light is a powerful agent in the cure of many diseases and in the destruction of the injurious bacteria that prey upon the animal body. Experiments have shown that these little organisms not only will not multiply when exposed to sunlight, but are even rapidly destroyed. Experience has taught us that disease lurks in dark corners, and that light rooms are as necessary to health as good ventilation, but we are only beginning to recognize that the sun is not altogether good for us; its light must be used in moderation, for in excess it may do harm.

Of course every one knows that prolonged exposure to the powerful rays of the summer sun may bring on a sunstroke, but it is a fact not so well known that excessive light, even without direct exposure, may in time seriously impair health.

Light kills bacteria by destroying their substance—the protoplasm which constitutes the main portion of every living cell, whether animal or vegetable. But this effect is exerted upon the protoplasm of our own cells as well as upon that of bacteria, the only difference being that the protoplasm of the single cell, which is all there is of bacterium, is more exposed than that of the cells of our bodies, and so is acted upon more promptly.

Animals and plants are protected against the injurious effects of light by their color, and it is a general rule that those plants and animals, including man, which live in the tropics and in other regions where the sun shines brightest, are the darkest in color, while those of the cloudy north are blonds for the most part. People of the north who go to the south to live soon begin to feel the effects of the increased light. At first this acts as a stimulant. The newcomer feels better, the vital functions are quickened, there is nothing but praise for the wonderful climate and contempt for the indolent natives. But in a year or two a change comes. The immigrant loses tone, becomes irritable and works less and less. The light is working on his protoplasm, which is not protected by so thick a layer of pigment as that which the native has. His nerves give out, and unless he adopts the light-shunning habits of those about him, he must flee or die.

A medical writer has recently advanced the theory that American nervousness is due to the excess of light here as compared to the cloudiness of the north of Europe. It is this, so, the logical treatment of "nerves" would be rest in a darkened but well-ventilated room, and not exercise in the open air, as is generally advised.

THE SALT BATH.

An article much used in the bathroom just now is salt. Nearly all physicians recommend its use in some form, with either hot, tepid or cold water, and, in many instances, without any water at all, except just enough to moisten the salt. With some the coarsest salt possible to get, sea salt, preferably, is thrown into the bath water and used as a sort of weak brine; the temperature of the water should be such as is ordinarily used for the bath, and only the best, if any, soap should be used. Another form of use is to complete the scrubbing process, then, taking large handfuls of moist salt, rub the whole body and limbs with this, following the scour with a rinsing off in cool, clear water. This is said to be very strengthening.

Another process is to take a small Turkish towel and dip it into a strong solution of salt and water, wring out and hang in the sunshine until dry; then at night, in your room, give your whole body and limbs a "dry-rub" with this dry, salty towel. The same towel may be used several times, then washed out, resalted and dried, and used again.

This is an excellent tonic for the skin, and certainly brings the blood to the

the spontaneous breaking forth of the supernatural power of his divine personality in the presence of great suffering and need, and not a display of supernaturalism intended to establish his authority.

With the second chapter of Mark's narrative begins the account of the long period of conflict with the Jewish authorities which culminated ultimately in the tragedy of his death. Many things about the character and method of his public activity tended to arouse the hostility of the self-righteous and bigoted scribes and Pharisees. His extraordinary claims, the character of the men whom he chose as his disciples (common laboring men, including even a despised taxgatherer), his revolutionary teaching with regard to fasting and Sabbath observance, and his utter ignoring of precedent and rabbinical teaching and authority, all made inevitable the hostility and conflict. Thus Mark has brought out vividly by the selection and grouping of events, Luke gives the same grouping, Matthew, on the contrary, distributes these events.

Verse 1. He entered again into Capernaum. After an absence of some days, during which he made the preaching tour of Galilee referred to above.

It was noised—The rumor that he had returned and was again in the house (that is, probably the house of Simon and Andrew, where he had last been seen) spread quickly through the city.

2. Spoke the word unto them: The message of truth and of the gospel which he had come to bring to the world.

3. And they come—That is, certain unnamed persons, a larger company than just the four men with their burden. The incident which follows is introduced into the narrative to illustrate how the words and works of Jesus aroused the antagonism and hatred of "certain scribes" (verse 6).

A man sick of the palsy—Literally, a paralytic.

4. Uncovered the roof—The roofs of Palestinian houses were flat and covered with brick or, in case of the more modest dwellings, with tunch.

5. Their faith: More especially the faith of the four men who would not be deterred by any difficulties, however great,

must reject it and treat him as an impostor and blasphemer. The expression on their faces doubtless indicated which of these alternatives they were choosing. It is not necessary to invoke any miraculous knowledge on the part of Jesus.

9, 10. Which is easier, to say—As if Jesus had said, "You have heard me say, Thy sins are forgiven, but have no way of knowing whether my word carries the necessary power with it. But there is another simple sentence as easily spoken, though as difficult of fulfillment, with which we may make the test of the supernatural power to which I lay claim. That word is, Arise, and take up thy bed, and walk. And that ye may know that this power is really mine I will speak that second word also."

Jesus doubtless would have healed the sick man anyway, since none of his miracles were performed merely to gratify curiosity or prove his power. Now, however, at the very beginning of the long conflict with the recognized religious authorities his enemies were not to be left in reasonable doubt of the validity of his claims, and therefore the miracle is permitted in this case to serve a double purpose. It relieves actual suffering and reveals to the doubting scribes a sure and adequate ground for faith in Jesus.

11. The word translated bed signifies any slight pallet or mat used for mid-day sleep, or the service of the sick.

12. Before them all—They were all eye-witnesses of the sudden and complete healing of the sick man. There was no room left for doubt.

LOVERS DIE TOGETHER.

A sad love tragedy was enacted the other day at the Village of Dasio, in the Canton of Tessin, Switzerland. The belle of the village, a girl of 18, had been secretly engaged to a farmer, but her father refused his consent to the marriage. Finding that entreaties had no effect, the young couple decided to commit suicide. The farmer bought a revolver, and during a walk through the woods he fired four shots at his sweetheart, killing her on the spot. He then carried the body to the cemetery, a mile off, placed it on a grave, and shot himself through the heart. The bodies were discovered by a grave-digger.

OLD BRITISH ELECTIONS.

Days When Electors Were Kept Under Lock and Key.

In by-gone days men were often unwilling to be made members of the British House of Commons. It was costly, and therefore a difficult position for a poor man, but at the same time representatives were not easily to be found among the well-to-do classes. There is an amusing account of how a sheriff rode up to the county court in the fourteenth century, ready to nominate a candidate. A gay knight, fearful of election, "hastily withdraws from the crowd at the words 'election' and 'parliament,' and spurreth off as fast as his good horse may carry him." On the other hand, some sought election by any means, and the first instance of corruption in electioneering matters is said to be that of Thomas Long, in 1571, who, "being found to be a very simple man, and not fit to serve in that place, was questioned how he came to be elected." The "simple man" admitted that he "gave to Anthony Garland, mayor of the town, £4 for his seat in Parliament," which was ordered to be returned, though the seat was not forfeited.

A burlesque "bill of costs for a late Tory election in the west," printed in the Flying Post for 1715 contains some very significant items concerning old-time English election expenses. "For roars of the word 'Church,' £40," is one; "For demolishing two houses, £200," is another. Others were: "For secret encouragement to the rioters, £40," "For breaking windows, £20," "For a gang of aldermen abusers, £10," "For a set of notorious liars, £50."

This was not so much of a burlesque, though, as might be supposed. In the elections of 1721, for instance, voters of the opposing candidate were constantly surrounded by mobs hired for the purpose, and cut off from their polling booths, while others were actually carried off by force and kept under lock and key until the election was over.

Time is money, but it's better to be in a hurry than broke.

This is said to be very strengthening. Another process is to take a small Turkish towel and dip it into a strong solution of salt and water, wring out and hang in the sunshine until dry; then at night, in your room, give your whole body and limbs a "dry-rub" with this dry, salty towel. The same towel may be used several times, then washed out, resalted and dried, and used again.

This is an excellent tonic for the skin, and certainly brings the blood to the surface. These applications of salt are just well for a well person as for a sick one, and is claimed to be the most refreshing of all baths and rubs ever tried. Its effect upon the skin and complexion is magical. The application is so simple and easy, that any one can take these baths at home by simply putting a few pounds of coarse salt into a jar, pour just enough water on it to moisten it well, then, standing in a bath tub, or even on a piece of oilcloth, take up handful and rub briskly, but not so hard as to "scrape" the skin, over all parts of the body and limbs; then, take a thorough douching, or rinsing off with cold water as can be comfortably borne, following this with a brisk rubbing.—Exchange.

TO CURE INDIGESTION.

Eat slowly, masticate thoroughly, are two cardinal rules for the dyspeptic. Generally the sufferer will find relief in taking solids and liquids at separate times, for fluid dilutes the already weakened gastric secretion, and so diminishes the digestive powers. An excellent simple treatment is as follows: Take a tumbler of hot water on rising in the morning, a second about eleven o'clock, and another half an hour before bedtime. If a little bicarbonate of soda, enough to lie on a ten cent piece, is added to the hot water, a further beneficial effect will be obtained.

"Look here," remarked the thrifty man to his extravagant wife, "you're carrying too much sail, my lady." "I don't know why you should bother about that," she retorted. "No!" said he. "I think I should, since I have to raise the wind."

COST OF LONDON'S CRIME.

Each Householder Pays \$8.81 Annually to Prevent It.

London, England, is paying the penalty paid by all large cities. Crime is inside her gates. In round numbers she has to pay nearly \$8,000,000 to keep criminals in check, for that is the sum paid out to her police, courts, prisons and prosecuting officers. It fails to include stolen property, losses due to the idleness of criminals, losses to injured parties, etc.

Serious crimes, such as burglary, housebreaking, counterfeiting, etc., are increasing.

Arrests are more frequent than formerly, and each arrest adds to the expense and loss account of the city. Estimates put the bill of the city's expenses as high as \$10,000,000.

In other words, each taxpayer or head of a household of five persons pays \$8.81 a year for London's crime. Nor do these millions make up the total loss. There are the hundreds of thousands taken, consumed by the criminals, hidden away, lost or destroyed. Add then to these the amounts paid by private parties to prevent burglary, etc., watchmen, caretakers, burglar alarms, door and window fastenings, safes, revolvers, life protectors, dogs, etc., and one begins to get a fairly good idea of what are the losses due to crime in a large city.

A table prepared in London puts the police and courts down for \$9,149,000, the prisons for \$569,980, lost property for \$1,216,625, loss by injuries, assaults, etc., \$973,300; loss in labor of criminals, etc., \$1,167,960, or a total of \$13,090,885. These appalling figures cover often only the well known items.

YOUNG FOLKS

GRANDMA'S PARTY.

Once my grandma gave a party;
My! but there was lots to eat!
Sandwiches and chicken salad,
Cakes and every kind of sweet.

Must have been a million waiters—
Anyhow, I'm sure of eight;
'Cause each time I saw a new one
I would have him fill my plate.

When they woke me up next morning
Tummick didn't feel just right;
And I didn't want my breakfast;
Guess I ate that, too, last night.

RAGGLES.

Raggles was only a scrubby little Indian pony. His owner had evidently considered him of no use, and had cruelly turned him loose in the bare prairie to shift for himself.

He was a sorry-looking little fellow, as he stood one morning at the gate to Mr. Hudson's large cattle ranch, in Western Kansas, shivering in the wind, and looking with a wistful gaze at the sleek, fat ponies inside.

Mr. Hudson noticed him and started to drive him away. But his little daughter Lillian said: "Let him in, papa; he looks so hungry." Mr. Hudson opened the gate and the pony walked in just as if it were his home.

Mr. Hudson made inquiries, but no one knew anything about him; and as no owner ever came to claim him, Lillian claimed him as her special property, and named him Raggles on account of his long, tangled mane and tail.

He was a docile little creature, unlike the rest of the ponies on the farm. He soon came to regard Lillian as his mistress. She learned to ride him, and could often be seen cantering over the prairies with her father.

But Raggles seemed to consider that she was not much of a rider, for he would carefully avoid all the dangerous-looking places and holes in the ground.

Fashion Hints.

The milliners are making a renewed effort to induce their patrons to wear the drooping veil appendage to their hats, says the fashion authority of the New York Post. The effort failed last year, but the milliners are confident that it will be more successful now that women have grown more or less used to the idea. In this particular group of hats were made with long chiffon veils.

The prettiest hats are those which were so popular last summer—lingerie hats. They have been much improved and are now presented in combination with fine straw as well as all-over embroidery. Pale colored embroideries are used as often as white, and will be worn to match gowns in delicate hues. The pale pink hats are charmingly becoming, giving even pale faces a glow of color. The pale blue hats will suit blonde women and brunettes whose color is high. No one wears pale blue better than the latter type.

A very pretty lingerie hat was a Tam-o'-Shanter shape in heavy unbleached linen, embroidered in French knots in a pattern. A wide scarf of fine organdie encircled the crown and was tied in a big bow in front. The edges of the scarf were trimmed with two rows of narrow Valenciennes.

A sailor shape in eyelet embroidery on snowy white linen had a wide scarf of pink satin ribbon tied in the back and falling in long ends. Around the top of the low crown was a solid wreath of very small pink roses without foliage.

A SHORT BRIMMED SAILOR.

Very pretty was a short brimmed sailor hat of fine white straw, the crown of which was encircled by a wide puffed strip of fine eyelet embroidery. This was tied in the middle with a white satin ribbon, which was tied on the side in a large bow. A curled white cock's feather also trimmed the side of the hat.

Among hats which were meant for immediate wear was a unique turban of pale pink marabout. The turban was boat shaped and rather large. The only trimming was a bow of gold tinsel ribbon and a long pink wing pointed backward on the left side.

Now is the time to accumulate a fur hat, if one is coveted. Amazing bargains are offered in the shops. A lovely little marquis hat of dark grey squirrel was marked \$5, and a small mink turban was offered for \$10. Ermine, caracul and even sable hats are to be had for half price. It certainly pays to pick up bargains of this kind, for, although it costs something to keep and to make over furs, they last long enough to justify the expenditure.

SASHES AND SCARFS.

We are to wear sashes again, it appears. Ribbons of sash width are everywhere exhibited among the new things, and many of the model gowns are fitted with them. Many of the sashes are edged with white silk fringes. Ribbon sales should therefore be watched for. Often the prices of expensive ribbons are materially reduced for a sale and beautifully sashes may be picked up for comparatively little.

Fashion has the scarf habit. Never were so many beautiful, filmy scarfs seen. Prettiest of all are the printed chiffon affairs. Roses and violets and soft-tinted flowers like hydrangeas are the favorites, and with them are mingled pompadour loops and ends of ribbon, printed in pale tints. Spangled scarfs are also much in evidence. The vogue of gold and silver tinsel extends to these decorative pieces, and Syrian scarfs thickly sewn with gold or silver beads and sequins are the most popular of the collection. They cost as high as \$20, although very pretty ones may be had for \$10 and \$12.

MATRIMONIAL VENTURES

SLIPS BETWEEN THE MARRIAGE CUP AND LIP.

Thrice a Bride and Died a Spinster— Strange Vagaries of Bride and Bridegroom.

Cupid has seldom treated one of his victims quite so scurvily as Miss Katherine Brett, of Allentown, Pennsylvania, whom he has twice lured to the altar, only to turn his impertinent little back on her.

Two years ago Miss Brett was wooed and won by Mr. John Ryan; the happy day was fixed, and the bride, in all her nuptial finery, was at the church with her bridesmaids and friends. But, alas for the cup of happiness held so tantalizingly to her lips, the bridegroom never appeared, for the sufficient reason that his mother, who objected to the marriage, had packed him safely off into the country under an effective escort. Only a few weeks ago Miss Brett, having in a weak moment taken Cupid into favor again, once more donned her bridal gown and was awaiting her future lord at the church, when a letter from him was handed to her, confessing that he had a wife already and was thus not in a position to wed again.

But Fate was still more unkind to a Miss Dora D., who died a few years ago in the North of England at the advanced age of ninety-eight. In the days of her youth and beauty Miss D. had been on the very brink of widowhood no fewer than three times, and yet

SHE DIED A SPINSTER.

Her first matrimonial venture was at the immature age of sixteen, when she eloped with the son of a neighboring squire, only to be overtaken by her father at Carlisle and carried home again in tears and disgrace; on the second occasion her husband-to-be was thrown from his horse and killed on his way to the church; while her third lover chose the day arranged for his nuptials to elope with the pretty daughter of a local publican, the news of his treachery reaching Miss Dora just as she was stepping into the carriage which was to take her to church. Miss D. survived this last painful experience three-quarters of a century, a fact which may, or may not, be taken as evidence that jilted girls live long.

There are many men who, for some obscure reason, would rather face an enemy's guns than the ceremony which ought to crown them with happiness; but, happily, few allow their apprehension to affect them so seriously as Herr Sonnemann, of Sandberg, in Germany, who was so terrified at the prospect of marriage that he committed suicide on his wedding morning; or as Mr. Henry R., who, as the newspapers recorded recently, had to be dragged to the church, even after he had been fortified by

TWO GLASSES OF BRANDY.

The excitement which, perhaps naturally, precedes a wedding is responsible for many strange vagaries on the part of bride and bridegroom. It is only a few weeks since the preparations for a wedding near Birmingham were all complete, when it was found that the bride was missing. She had gone out to purchase a pair of gloves, and from that time no trace of her could be discovered. The police were informed, the country for many miles around was scoured; but it was not until the following day that a police superintendent while driving overtook a woman, almost dropping from fatigue who proved to be the missing bride. She had spent the whole of Saturday night wandering about the lanes, and when rescued could give no explanation of her movements.

More amusing was the misadventure which befell a bride recently in a Berkshire town. Owing to a lapse of memory a liveryman neglected to fetch the bride, and the bridegroom and friends were kept in suspense at the church for

HUMOR

SURE TO COME BACK.

"Do you really keep a cat?"
"Yes, and I can tell you the best way to do it."
"How?"
"Try to chase it away."

SO CONSISTENT.

Mrs. Subbubs—I was cleaning our silver on Sunday when Mrs. Straightlance called on her way home from church. Fortunately, though she did not find it out.

Mrs. Naybor—She's very strict about the Sabbath, isn't she?
Mrs. Subbubs—Yes. She apologized for calling upon me on that day, but she thought she just ought to tell me that scandalous story about Mrs. Giddy.

TAKING PRIDE DOWN.

A young man started in the livery business a few weeks ago, and the first thing he did was to have a sign painted, representing himself holding a mule by the bridle. He was particularly proud of this sort of business enterprise, and straightaway asked of his wife:

"Is not that a good likeness of me?"
"Yes," she replied, "It is a perfect picture of you; but who is the fellow holding the bridle?"

ONE WAY OF LOOKING AT IT.

A little lad had climbed a very steep spout attached to his parents' house to get a nest which had been built by some birds.

He was successful, and was walking away with his companions, when a gentleman, who had watched his dangerous feat, stopped him and said:

"My little fellow, I was sorry to see you risk your life for such a paltry thing. What would have happened if the spout had given away?"

"Oh!" said the lad, "it wouldn't have mattered much; we're going to leave the house to-morrow."

CRUELTY TO A CONGREGATION.

The minister of a Scottish congregation mentioned in Sir Archibald Geikie's "Reminiscences" neglected to bring the manuscript of his sermon to church one Sunday, and to make time to go home, a mile away, and fetch it.

Grievously agitated, he gave out the one hundred and nineteenth Psalm, and as soon as the congregation began to sing the first of the one hundred and seventy-six verses the minister rushed away to the manse, from which he by and by returned to the church breathless and found the clerk waiting, nervous and uneasy.

"How are you getting on?" gasped the minister.

"O sir," said the clerk, "they've got to the end of the eighty-fourth verse, and they're cheepin' like wee mice!"

The situation was saved, but clerical remissness had nearly done for the pious congregation.

IT WENT WRONG.

The other day a counsel, engaged in a case in which property of various descriptions was involved, made a long and rambling speech referring to each kind in turn.

His monotonous delivery had sent nearly everyone to sleep, when he suddenly startled them all by abruptly changing his voice as he exclaimed to the judge:

"My lord, I will now address myself to the furniture."

"You have been doing that for some time, I think, Mr. Wells," remarked the judge, sweetly, amid universal tittering.

Now there was another judge who

could often be seen cantering over the prairies with her father.

But Raggles seemed to consider that she was not much of a rider, for he would carefully avoid all the dangerous-looking places and holes in the ground, made by coyotes and prairie dogs, which are very plentiful in Western Kansas.

When the next spring came Raggles did not look like the same little scrub. His rusty brown coat had all come off, and a new black one had taken its place.

By the next fall the neighborhood could boast of a public school, and when Lillian began to go Raggles found he had regular duty every day.

Lillian would saddle him and ride to the school house, which was two miles away, then tie up his bridle and send him home. At about half-past three Mr. Hudson would saddle him again and send him for Lillian.

He always arrived on time, and if a little early he would wait patiently by the door until school closed.

Some of my readers will remember the blizzard that struck Western Kansas in 1885, when so many people lost their lives and thousands of cattle were frozen to death. The storm commenced about noon and the weather grew steadily colder.

The snow blew so thick and fast that Mrs. Hudson was afraid to trust Raggles to go for Lillian, but Mr. Hudson was sick and there was no one else.

She went to the barn and put the saddle on him, and tied plenty of warm wraps on. Then she threw her arms around his shaggy neck and told him to be sure and bring Lillian home.

He seemed to understand, and started out with his shambling trot in the direction of the schoolhouse.

One hour passed slowly to the anxious parents. When two had passed their anxiety was terrible, as they strained their eyes to see through the blinding snow his shaggy form bringing their darling safely home. At last he came with Lillian on his back, bundled up from head to foot.

The teacher had fastened her on the pony and given him the rein; and so he had brought her safely home, none the worse for her ride, except being thoroughly chilled.

to these decorative pieces, and Syrian scarfs thickly sewn with gold or silver beads and sequins are the most popular of the collection. They cost as high as \$20, although very pretty ones may be had for \$10 and \$12.

MAN LOVES MEDICINE.

Some Remarks of Dr. Osler Anent His Profession.

Dr. William Osler writes:—"Man has an inborn craving for medicine. Heroic dosing for several generations has given the tissues a thirst for drugs. As I once before remarked, the desire to take medicine is one feature which distinguishes man, the animal, from his fellow creatures. It is really one of the most serious difficulties with which we have to contend. Even in minor ailments, which would yield to dieting or to simple home remedies, the doctor's visit is not thought to be complete without the prescription."

Of the cultured physician he says:—"In no profession does culture count for so much as in medicine, and no man needs it more than the general practitioner, working among all sorts and conditions of men, many of whom are influenced quite as much by his general ability, which they can appreciate, as by his learning, of which they have no measure."

Dr. Osler advises physicians to "walk with the young":—"I would urge the clinical physician, as he travels farther from the east, to look well to his companions—to see that they are of his own age and generation. He must walk with the 'boys,' he must travel with the men who are doing the work of the world, the men between the ages of 25 and 40."

BOASTERS.

For boasters the world has no use; but it is always on the lookout for men who do things. Solomon said: "Let another man praise thee, and not thine own lips." The world says to-day: We have no time to listen to what you are going to do; let us see something you have done, or are doing.

More amusing was the misadventure which befell a bride recently in a Berkshire town. Owing to a lapse of memory a liveryman neglected to fetch the bride, and the bridegroom and friends were kept in suspense at the church for over half an hour. A messenger was dispatched to the livery stable and the proprietor admitted his laxity, but when told to proceed with haste to fetch the bride he naively replied, "What'll be the use of fetchin' 'er now? The service'll be 'alf over." He was soon made to see the absurdity of his statement, and the delayed ceremony was carried out

WITHOUT FURTHER HITCH.

The obstacle to a wedding at Wern not long ago proved more formidable. The bride and bridegroom, with their relatives and friends, were all assembled at the local chapel; the parson was in attendance and the ceremony was about to commence, when the registrar made his appearance, announced that, as the legal time for which the banns should be published had still forty-eight hours to run, there could be no wedding that day. Was there ever a more tantalizing illustration of the cup being dashed from the lips? However, the blow was borne with philosophy and good humor, and the whole party found abundant solace in the wedding breakfast, to which they forthwith adjourned.

An incident which promised to be tragic marked a wedding ceremony a month or so ago at St. Paul's Church, Zwickau, Germany. The clergyman was just putting the all-important question to the bridal pair, when suddenly the bridegroom sank insensibly at the feet of his intended bride. A wild shriek from the latter alarmed the whole church and nearly caused a panic. A doctor who was called to the scene succeeded in reviving the young man, and declared that the fainting had been caused simply by too tight a collar. Two hours later the marriage was solemnized in the same church and by the same clergyman.—London Tit-Bits.

There is room at the top for the man who can push the other fellow up.

to the furniture."

"You have been doing that for some time, I think, Mr. Wells," remarked the judge, sweetly, amid universal tittering.

Now there was another judge who heard this anecdote, and thought of storing it up for some future occasion.

At the court, soon afterwards, his opportunity seemed to have arrived. He was trying a case in which the circumstances were somewhat similar, but the property involved was live stock.

An due course one of the counsel said: "My lord, I will now address myself to the donkey."

"You have been doing that for some time was the prompt response, whereupon a regular roar of laughter followed, which highly gratified the judge until its true reason dawned on him.

BOUND TO HANG SOMEONE.

There was once a robber in Cairo who fell from the second storey of a house he was trying to enter and broke his leg, writes Mr. Charles Dudley Warner. He went to the cadi and complained. The man's window was badly made and he wanted justice. The cadi said that was reasonable, and he summoned the owner of the house. The owner confessed that the house was poorly built, but claimed that the carpenter was to blame, and not he. This struck the cadi as sound logic, and he sent for the carpenter.

"The charge is, alas, too true," said the carpenter, "but the masonry was at fault and I couldn't fit a good window!"

So the cadi, impressed with the reasonableness of the argument, sent for the mason. The mason pleaded guilty, but explained that a pretty girl in a blue gown had passed the building while he was at work, and that his attention had been diverted from his duty. The cadi thereupon demanded that the girl should be brought before him.

"It is true," she said, "that I am pretty, but it's no fault of mine. If my gown attracted the mason, the dyer should be punished, and not I!"

"Quite true," said the cadi; "send for the dyer."

The dyer was brought to the bar and pleaded guilty. That settled it. The cadi told the robber to take the guilty wretch to his house and hang him from the door; and the populace rejoiced that justice had been done. But pretty soon the crowd returned to the cadi's house, complaining that the dyer was too long to be hanged as ordered.

"Oh, well," said the cadi, who by that time was suffering from ennui, "go find a short dyer and hang him! Justice shall prevail."

GOOD ENOUGH AUTHORITY.

The cleverest of barristers occasionally find their match when engaged in their favorite occupation of breaking down an opponent's witness; and this frequently occurs in the case of "horsey" individuals.

The following wordy contest between an ostler and a counsel is one of the most amusing specimens of the kind:—

"Now, I ask you, sir, under what authority you are prepared to swear to the mare's age?"

"Under what authority?" said the ostler, interrogatively.

"You are to reply, and not to repeat the question put to you."

"I doesn't consider a man's bound to answer a question afore he's time to turn it in his mind."

"Nothing can be more simple, sir, than the question put, and I repeat it. Under what authority do you swear to the animal's age?"

"The best authority," said the witness, gruffly.

"Then why such evasion? Why not state at once?"

"Well, then, if you must have it—"

"Must! I will have it!" thundered the counsel, interrupting the witness.

"Well, if you must and will have it," rejoined the ostler, with imperturbable gravity, "why, then, I had it myself from the mare's own mouth."

A simultaneous burst of laughter rang through the court, during which the non-plussed barrister subsided, and it was with difficulty that the judge could restrain his risible muscles within judicial decorum.

GATE TO THE NORTHWEST

EDMONTON, THE CAPITAL CITY OF ALBERTA.

For Years This Has Been One of the Great Trading Points of the North Lands.

I write this at Edmonton, the biggest city of central Alberta and the depot for the vast territories which stretch from here to the Arctic Ocean, writes Frank G. Carpenter, from Edmonton, Alberta, to the Chicago Record-Herald. Edmonton is the northernmost point of continuous railroad connection on this continent. It lies 350 miles above the State of Montana, and there is a line of railroads from it to the edge of Central America. As it is now, one can go in a sleeping car from the Isthmus of Tehuantepec clear across Mexico and the United States and this far into Canada.

When the railroads now planned are completed there will be an extension northward to Alaska, and if the road should be built across Behring Strait, we may some day be able to go from Calais, on the English Channel, by way of Paris, Moscow, and the trans-Siberian Road to North America, and on down to the Isthmus of Panama, and thence by the intercontinental line to the Strait of Magellan, or almost to Cape Horn, by rail.

Edmonton has already two railroads. It is reached by the Canadian Pacific and the Canadian Northern. By this time next year the Grand Trunk Pacific will have been built through it, and eventually there will be extensions northwesterly to the Klondike and Cape Nome.

There are wagon and water routes from here to the Arctic Ocean. By the lines of travel and freight the distance is almost as great as from New York to San Francisco.

IMPORTANT AS TRADING POST.

The supplies come to Edmonton by rail and are then taken to wagons to Athabaska, thence on the Athabaska River. They are floated down this river to Lake Athabaska, and thence on the Great Slave lake, and on into the Mackenzie, which carries them past the various trading posts to the Arctic Ocean. Large cargoes of goods pass over that route every year, and hundreds of thousands of dollars' worth of furs are brought back over it to Edmonton, to be shipped from there to New York or London. This trade made Edmonton a town before the railroads came, and with the new ones here and building it promises to become one of the largest cities of the Northwest. The place is growing rapidly. It has now something like 10,000 people and its citizens claim that it will equal Winnipeg some day.

Edmonton lies on the north bank of the Saskatchewan River, a stream named as big as the Mississippi, and more than a thousand miles in length. The river here flows through a valley about a mile wide, the stream itself being about a thousand feet wide. There are high bluffs on each side of the Saskatchewan and Edmonton is built on one of the bluffs.

The town winds its way with the river and Main street, which is laid out along an old Indian trail, is as crooked as a dog's tail. The town itself is one of the most of these. The houses are of all shapes, materials and heights. The older ones are of one story, but the newer are of brick and stone and many are four stories high. The prices of business property are exceedingly high. A fifty-foot lot on Main street sold last week for \$20,000, and a section demised for land in the business section is \$400 or \$500 per front foot.

KEY TO NORTH COUNTRY

Edmonton, as far as its location is concerned, is much like St. Louis. It is on a good-sized river surrounded by a farming region as rich as that of the

Canadian parliament. The province has an area of 253,000 square miles. It begins at the Montana boundary and runs north through eleven degrees of latitude. Its western limit is along the line of the Rocky Mountains, and on the east it is bounded by Saskatchewan. The province is about 400 miles wide at the centre and it is 600 miles long.

The southern part of Alberta is devoted to ranching. The country there is dry, but it grows rich grasses for horses and cattle. Many of the stock farms are owned by Americans, who have winter residences at Medicine Hat and Calgary. The central part of the province is given up to mixed farming. It is largely settled along the lines of the railroads, and the whole of this part has been opened to homesteading. The northern part is said to be good, but so far the only settlements are along the Peace River, and these are few and far between. They chiefly consist of Hudson's Bay posts and Indian settlements, at some of which are mission stations, the missionaries raising wheat.

I met at Edmonton G. H. V. Bullyea, the lieutenant governor of this new province, and had a talk with him about his principality and its new citizens. He said:

"Alberta promises to be one of the most populous parts of the new Canada. We have already about 200,000 people, and we can support several millions. We are having a large immigration from the United States, and fully one-third of our citizens are Americans, the remainder being equally divided between the Canadians and the Europeans."

"What are the Americans doing?" I asked.

"They are mostly farmers, engaged in raising wheat and other grain. Not a few are cattlemen, who have come across the boundary, and are now running large herds about."

CALGARY AND MEDICINE HAT.

We have also a colony of Mormons, who have irrigated lands about Lethbridge, where they are doing mixed farming and sugar-beet raising.

"Tell me something about your European immigration, governor. I understand you are getting the off-scourings of the southeastern part of that continent."

"I do not believe that," was the reply. "The most of our immigrants come from the British Isles, and from Germany, Scandinavia and Ireland. We have also Canadians. They come from Austria-Hungary and might be called Austrian Poles. These men are thrifty, and, although they are ignorant, they will in time make good citizens. They are not satisfied until their farms are broken and well stocked. The average Canadian pioneer sees first after his physical comforts. He puts up a good house and then tries to pay for it. The Canadian is satisfied with a few logs dotted with mud. He uses this until he has paid for his farm. His whole family, and his wife, and children, working in the fields, as well as the man. Every dollar is saved, and it is only when the family has gotten ahead that it builds a good home."

"But do the Catholics make good citizens?"

"Yes, they want to get far away from Europe as possible. They use out-migration papers, they send their children to the Canadian schools, and make them learn English. Many of the Catholics have lands as soon as they get a little ahead, although they often have to borrow money to pay for the seed for their first crops. They are good citizens."

EDMONTON TO BE METROPOLIS.

"Do you expect much from the northern part of the province?"

"Yes. There is no doubt that we can raise wheat in every part of it and we have the advantage of being able to do mixed farming. This ought to be a great dairy country, but the trouble is that our men will not milk. Farm hands look upon that as a woman's business, and they cannot be trusted to handle cows. We grow oats and flax here about Edmonton. They are raising wheat along the Peace River, and there is reason to believe that it can be raised beyond our state. I don't mean the other day when they met me here from the southern shores

MEN ON WHOSE ACTION WILL DEPEND

CABINET AND ITS LAWS BATTLESHIP LAUNCHED

NOT RECOGNIZED BY LAW AND PARLIAMENT.

History of the Most Powerful Institution in the British Government.

It is indeed strange that the most powerful body of men in the whole world, and the greatest force in the British Constitution, should not be recognized by the Law and the Parliament of which they are the directors. Yet such is the standing of the British Cabinet, says Pearson's Weekly.

Moreover, it keeps no secretary, nor any record of its meetings and resolutions, the memories of its members alone being relied upon, and these records themselves are never officially announced to the public.

Few things in our history are more curious than the origin and growth of the power now possessed by the Cabinet. From an early period our sovereigns were assisted by a Privy Council, to which the law assigned many important functions. By degrees this body became too large for dispatch and secrecy.

The rank of Privy Councillor was often bestowed, too, more as an honorary distinction than because of any value set upon the opinions of its recipients, and the Sovereign, when he required advice, usually resorted to a small band of ministers. Thus in time the Cabinet drew to itself the chief executive power of the country.

POWER IT POSSESSES.

For very many years now it has consisted of the leader of the House of Commons, the heads of certain Government departments, and members of the Lower and Upper Houses. Though it is usually the rule to select the members of the Cabinet from both Houses of Parliament, there is nothing to make this selection compulsory. Another curious fact is that if a member is not a Privy Councillor, he becomes so in his appointment to the Cabinet.

As the supreme governing body of the whole Empire, it carries out the acts of administration, and decides the policy to be adopted by the Government.

DREADNAUGHT, PEER OF THE WORLD'S WARSHIPS.

One Discharge of Her Guns Will Throw Twice as Much Metal as Any Foreign Man of War.

The launch of the monster battleship, the Dreadnought, at Portsmouth, England, recently, the largest and most powerful battleship of the world's navies, marks the first stage in which the British Admiralty claim as the greatest achievement in naval construction. On October 2nd, 1905, work was commenced at Portsmouth on the vessel, the first of what is to be known as the Dreadnought class. The promise was made then that she would be launched within six months. The Admiralty has more than made good their boast, and Britishers have another cause for pride in their navy. Another twelve months, all going well, the Dreadnought will be commissioned and join the Atlantic fleet, thus breaking all previous records in battleship building by six months.

LESSONS FROM THE JAPANESE.

There are two reasons why work is being rushed on the Dreadnought. One is the great saving in cost, but the chief reason is that the ship is to some extent an experiment, and it is desired to give her a good trial before commencing construction of any more of her class. Great Britain, it will be remembered, was the only power having attaches or observers on Japanese ships during the Russo-Japanese war, while expert British constructors were given every opportunity of learning wherein the ships of Japan proved weak or strong as the case might be. These men are busy from start to finish of the war, and immediately after the battle of the Sea of Japan came home with her data, which was submitted with suggestions to a special committee, on which sat not only the most experienced naval experts, but the director of naval construction, Lord Kelvin, and a number of the leading private shipbuilders.

TREMENDOUS GUN POWER.

The Dreadnought is the outcome of their deliberations, an embodiment of the latest ideas in the art of

"Tell me something about your European immigration, governor." I understood you are getting the off-scourings of the southeastern part of that continent."

"I do not believe that," was the reply. "The most of our immigrants come from the British Isles, and from Germany, Scandinavia and Iceland. We have also Galicians. They come from Austria-Hungary, and might be called Austrian Poles. These men are thrifty, and, although they are ignorant, they will in time make good citizens. They are not satisfied until their farms are broken and well stocked. The average Canadian pioneer sees first after his physical comforts. He puts up a good house and then tries to pay for it. The Galician is satisfied with a few logs daubed with mud. He uses this until he has paid for his farm. His whole family aids him, the women and children working in the fields, as well as the men. Every dollar is saved, and it is only when the family has gotten ahead that it builds a good home."

"But do the Galicians make good citizens?"

"Yes, they want to get as far away from Europe as possible. They take out naturalization papers, they send their children to the Canadian schools and make them learn English. Many of the Galicians buy lands as soon as they get a little ahead, although they often have to borrow money to pay for the seed for their first crop. They are good citizens."

EDMONTON TO BE METROPOLIS.

"Do you expect much from the northern part of the province?"

"Yes. There is no doubt that we can raise wheat in every part of it and we have the advantage of being able to do mixed farming. This ought to be a great dairy country, but the trouble is that our men will not milk. Farm hands look upon that as a woman's business, and they cannot be hired to handle cows. We grow oats and flax here about Edmonton. They are raising wheat along the Peace River, and there is reason to believe that it can be raised beyond our state. I met a man the other day who had just come from the southern shores

MEN ON WHOSE ACTION WILL DEPEND

CABINET AND ITS LAWS BATTLESHIP LAUNCHED

NOT RECOGNIZED BY LAW AND PARLIAMENT.

History of the Most Powerful Institution in the British Government.

It is indeed strange that the most powerful body of men in the whole world, and the greatest force in the British Constitution, should not be recognized by the Law and the Parliament of which they are the directors. Yet such is the standing of the British Cabinet, says Pearson's Weekly.

Moreover, it keeps no secretary, nor any record of its meetings and resolutions, the memories of its members alone being relied upon, and these records themselves are never officially announced to the public.

Few things in our history are more curious than the origin and growth of the power now possessed by the Cabinet. From an early period our sovereigns were assisted by a Privy Council, to which the law assigned many important functions. By degrees this body became too large for dispatch and secrecy.

The rank of Privy Councillor was often bestowed, too, more as an honorary distinction than because of any value set upon the opinions of its recipients, and the Sovereign, when he required advice, usually resorted to a small band of ministers. Thus in time the Cabinet drew to itself the chief executive power of the country.

POWER IT POSSESSES.

For very many years now it has consisted of the leader of the House of Commons, the heads of certain Government departments, and members of the Lower and Upper Houses. Though it is usually the rule to select the members of the Cabinet from both Houses of Parliament, there is nothing to make this selection compulsory. Another curious fact is that if a member is not a Privy Councillor, he becomes so on his appointment to the Cabinet.

As the supreme governing body of the whole Empire, it carries out the acts of administration, and decides the policy to be adopted by the Government.

DREADNAUGHT, PEER OF THE WORLD'S WARSHIPS.

One Discharge of Her Guns Will Throw Twice as Much Metal as Any Foreign Man of War.

The launch of the monster battleship, the Dreadnought, at Portsmouth, England, recently, the largest and most powerful battleship of the world's navies, marks the first stage in which the British Admiralty claim as the greatest achievement in naval construction. On October 2nd, 1905, work was commenced at Portsmouth on the vessel, the first of what is to be known as the Dreadnought class. The promise was made then that she would be launched within six months. The Admiralty has more than made good their boast, and Britishers have another cause for pride in their navy. Another twelve months, all going well, the Dreadnought will be commissioned and join the Atlantic fleet, thus beating all previous records in battleship building by six months.

LESSONS FROM THE JAPANESE.

There are two reasons why work is being rushed on the Dreadnought. One is the great saving in cost, but the chief reason is that the ship is to some extent an experiment, and it is desired to give her a good trial before commencing construction of any more of her class. Great Britain, it will be remembered, was the only power having attaches or observers on Japanese ships during the Russo-Japanese war, while expert British constructors were given every opportunity of learning wherein the ships of Japan proved weak or strong as the case might be. These men are busy from start to finish of the war, and immediately after the battle of the Sea of Japan came home with their data, which was submitted with suggestions to a special committee, on which sat not only the most experienced naval experts, but the director of naval construction, Lord Kelvin and a number of the leading private shipbuilders.

TREMENDOUS GUN POWER.

The Dreadnought is the outcome of their deliberations, an embodiment of their deliberations, an embodiment of their deliberations, an embodiment of their deliberations.

KEY TO NORTH COUNTRY.

Edmonton, as far as its location is concerned, is much like St. Louis. It is on a good-sized river surrounded by a farming region—almost as rich as the Mississippi Valley, with a vast country beyond it which will some time be thickly populated. The Peace River district, which extends northward and westward for hundreds of miles, is composed of good farming lands, and it has not yet been opened to settlement. All supplies for that district will pass through Edmonton, and the town will be the key to the future trade of the North. At present, it is at the northwestern end of the wheat belt, and towns are springing up in every direction for hundreds of miles to the east and south of it.

I came here from Calgary over the Canadian Pacific Railroad. There are towns everywhere—building between the two points. The houses are wooden and the streets unpaved, although a few of the older places have sidewalks of boards. Every town has a coat of new paint, and its store windows are packed with fresh goods. Great quantities of farm machinery are kept in sheds or out in the open awaiting purchasers. I notice that the cattle are feeding out of doors. The grass is grey. It is cured on the stalk, and the animals are fat, although there is some snow on the ground.

I am surprised at the climate of this part of Canada. It is as mild as that of our central states for the greater part of the winter. The coldest part of Canada is further eastward. About Winnipeg the thermometer frequently falls to forty below zero, and the con skin coat is in evidence from November till May. Here the weather is tempered by the warm winds which blow over the Rockies. It is heated by the Japanese current to such an extent that it keeps British Columbia and Washington green the year round and takes the edge off the cold of Edmonton and Calgary. Edmonton is in latitude 54. It is several hundred miles south of St. Petersburg and in what the Europeans think the heart of the temperate zone.

CLIMATE IS NOT SEVERE.

Indeed, the bulk of progressive Europe lies north of the forty-ninth parallel, while forms our northern boundary. All the British isles, Holland, Belgium, Scandinavia, a large part of France, two-thirds of Germany, and about three-fourths of European Russia are north of that parallel. St. Petersburg, for instance, is hundreds of miles north of Winnipeg, which is in the latitude of Paris. Berlin is also far higher up on the globe. Western Europe is kept warm by the gulf stream. Similar influences warm Edmonton, but they come from the Japanese current, and are moderated considerably by the wide stretch of mountains which they must cross before they reach here.

The whole state of Alberta is comparatively temperate. The climate of Calgary is much like that of Denver, and all along the foothills of the Rockies the weather is mild. The state is adapted to mixed farming. It produces enormous crops of oats, barley and timothy and both winter and spring wheat. Within forty miles from here they are growing oats as tall as a man, with timothy sheaves of oats and timothy with a little bundle of winter wheat leaning against my chest. The wheat almost tickled my chin, and the oats and timothy were as high as my head. The people claim that the oats produced here will run from seventy-five to a hundred bushels per acre, about forty pounds to the bushel. Winter wheat is said to produce forty bushels per acre, and the yield of barley is large. The farmers are now raising barley for hogs. They claim that barley-fed hogs are better than corn-fed hogs, and say that they will soon be supplying Canada with pork. These western Canadians do not understand pork packing, and most of the Edmonton stores are now supplied by our beef trust.

ALBERTA A BIG PROVINCE.

Alberta is a brand new state. It was a part of the Northwest Territory until last September, but it now has a governor of its own and has members in the

Legislature. We grow oats and flax here about Edmonton. They are raising wheat along the Peace River, and there is reason to believe that it can be raised beyond our state. I met a man the other day who had just come from the southern shores of the Great Slave Lake. This is as far above the United States, I should say, as St. Paul is above New Orleans. He tells me that the soil is good there and that spring wheat can be matured. You see the land drops from here down to the Arctic Ocean. The lower the altitude the warmer the climate, provided it is not too far north. I have no doubt one might raise wheat for hundreds of miles north of Edmonton.

"What do you think of Edmonton, governor?"

"It will be the largest city of the Northwest. It will be the key to this whole region and the supply point for the Mackenzie River. When the Hudson's Bay route to Europe is completed a great part of the goods from Asia will pass through here and we will have a short haul for our products to that point. I doubt not we shall some day have railroads from here to Hudson's Bay."

"What do you think of the future of the country—politically?" I asked.

"It is great," was the reply. "We have in northwestern Canada as much arable land as in the whole United States. The country will undoubtedly support millions and it is bound to be the most important part of the Dominion."

COSSACK CAVALRY.

Feats of Horsemanship for Which They are Famous.

The horsemanship of the Cossacks has been famous for more than two centuries. The author of "A Journey Through the Caucasus and Persia," published thirty years ago writes of their feats of skill and daring as he witnessed them.

After being paraded, the men, about sixty in number, mounted on strong, ugly little horses, were ordered to perform a sham skirmish. Forming themselves into two camps, each combatant attacked his opponent on his own hook and after his own fashion.

Here was a fellow standing bolt upright in his saddle and discharging his musket at another, who, hanging pendent by his legs, returned fire underneath his horse's belly; there were two Cossacks clinging like cats to the flanks and ribs of their chargers, and thus completely sheltering their own bodies; they watched a favorable moment for pinking each other, although to me they almost appeared like a couple of reckless horses. Others flattened themselves at full length on their beasts' backs and manoeuvred for the chance of some unguarded movement on the part of their foes. All this at full gallop, accompanied by a good deal of screaming and yelling.

Other feats were then performed. Galloping with the head downward in the saddle and the body and legs erect in the air seemed a favorite one; still more so, picking up a stone, or even a coin at the same pace, the performer holding on the while to his saddle by his feet.

Two hours of this sort of work seemed to be enough for horse and man, so, closing up into a column four deep, the Cossacks marched home, singing in remarkably good time a native chorus with an accompaniment of two kettledrums.

ALWAYS RAINING THERE.

There is a group of islands to the south of New Zealand called the Sisters, or Seven Sisters, which are reputed to be subjected to a practically constant rainfall. The same may be said of the islands and mainland of Tierra del Fuego saving for the difference that the rain often takes the form of sleet and snow. On a line running round the world from four to eight or nine degrees there are patches over which rain seldom ceases to fall. This is called the "zone of constant precipitation," but at the same time there are several localities along it with very little rainfall.

A good woman is too good for any man—but fortunately she doesn't know it.

Councillor, he becomes so on his appointment to the Cabinet.

As the supreme governing body of the whole Empire, it carries out the acts of administration, and decides the policy to be adopted by the Government. Through the Secretary of Foreign Affairs it confirms all foreign treaties, while it considers all modifications of existing legislation as well as settles all details of bills about to be put before the Lower House.

When a Prime Minister resigns his office he invariably suggests a successor to the Sovereign. This gentleman may be summoned to the Royal presence and asked to form a government. No sooner does the party leader accept than he commences to form his Cabinet.

HOW IT IS CHOSEN.

The general rule is to issue invitations to his political friends to call upon him, when the important position is offered to them; or the new Premier may make the momentous offer through the post.

The selection of members for the Cabinet is indeed a most difficult matter. It is so easy to create a jealousy and ill-feeling among the new Premier's own party.

Of the twelve to twenty members who compose it, five to nine may be members of the House of Lords. In Mr. Balfour's Government now dissolved, of the seventeen members eight were peers.

Lord Salisbury, in his 1855 and 1900 administrations, had ten members of the House of Lords in his Cabinet, while Lord Rosebery's and Mr. Gladstone's last Cabinet contained but six.

It may be taken for granted, however, that the positions of the Lord Privy Seal, the Foreign Minister, and the Lord President of the Council will be filled by noblemen. Twelve, then, is the minimum number composing a Cabinet, while the inclusion of further members is entirely in the hands of the Premier.

VETO OF THE SOVEREIGN.

As a matter of fact, the appointment of a Cabinet Minister is considered to be the personal gift of the Crown.

The Sovereign can, as Queen Victoria and George the Third did on several occasions, strike out the name of any member objectionable to him, while he may suggest the names of persons who do not figure on the list of selections.

Even after a Cabinet is actually formed, the Sovereign still has the power to remove any offending Minister. William the Fourth used this royal prerogative more than once.

Nowadays the Cabinet sits at irregular intervals, but in good Queen Anne's time it was usual to hold meetings weekly, when the Sovereign was always present and presided over its deliberations.

This right of the monarch to be present at Cabinet meetings has not been revived since her reign, principally because of the fact that George the First knew no English, and was scarcely able to converse with his Ministers.

CANNED ICELAND MOSS.

New Delicacy May Soon Appear on the Market.

The fact that Iceland moss has nutritive as well as curative qualities is pretty generally known, but now a Norwegian inventor has arisen who has patented a process to convert the humble lichen into a succulent and nourishing dish for the dinner table. After being thoroughly rinsed the moss is soaked in a boiling hot chemical solution, by means of which the bitter element is extracted from the plants. Then they undergo a second rinsing, after which the moss is ready to be packed in tins for the trade. The inventor intends to place large quantities of his delicacy on the German market, and "Unned lichen" may yet become the fashionable vegetable on the tables of the rich.

Magistrate—"How comes it that you dared to break into this gentleman's house in the dead of night?" Prisoner—"Why, your worship, the other time you reproached me for stealing in broad daylight. Ain't I to be allowed to work at all?"

construction. Lord Kelvin and a number of the leading private shipbuilders.

TREMENDOUS GUN POWER.

The Dreadnought is the outcome of their deliberations, an embodiment of the lessons of the late war in the far east, a ship apparently invincible, capable at one discharge of her guns of throwing with unparalleled force twice as much metal as any foreign man-of-war now afloat, while her armor will render her immune from attacks by any enemy's guns, and, some claim, even against torpedoes, fired at the usual battle range. The details of the Dreadnought's construction, remain a secret, so well has the Admiralty guarded the plans. Efforts of naval attaches to gather information for their governments have been fruitless. No information is forthcoming the answer to all inquiries being the candid one that Great Britain intends to maintain secrecy, as to what her experts learned as a result of Japan's experiences for one year and, by rushing to completion, the Dreadnought, will gain a year, if not more, in naval construction over all other powers, except her ally.

EVERY DETAIL A PROFOUND SECRET.

Usually when ships are building a board is placed at the head of the ship, giving her name, displacement, principal dimensions, horse power and speed. In the case of the Dreadnought, not an item of the design is revealed, the board containing the simplest sentence, "His Majesty's ship Dreadnought, commenced October 2nd, 1905." When ready for sea, the ship will displace 18,500 tons, but this is the least remarkable thing about her, for besides the ideas introduced as a result of the far eastern war, Britain is placing on her new fighting machine the heaviest armament ever carried by a ship. In the past British vessels have carried four 12-inch guns, throwing 850-pound shells; the Dreadnought will carry ten of these weapons of a new type, with a muzzle energy of 49,568, as compared with the 32,832 of the guns carried in as recent battleships as the Maletic class, an increase in power of 50 per cent.

A RANGE OF TWENTY-FIVE MILES.

In a great sea fight the Dreadnought will be able to discharge every minute ten projectiles weighing altogether about 8,500 pounds with sufficient velocity to send them twenty-five miles, or to penetrate about sixteen inches of the hardest armor at a range of about two miles. Unlike all British and foreign battleships built in the past thirty years, the new addition to the fleet will carry no weapon smaller than the great twelve-inch piece, except eighteen three-inch quick firers for repelling attacks by torpedo craft. She will mount neither 9.2 inch, 7.5 inch, nor 6-inch guns, and she will be the biggest warship afloat, and she will have only the biggest and most powerful guns. The secrets which will be incorporated in the huge hull are still hidden, but it is known that they tend to economy as well as efficiency.

UNIQUE IN EVERY POINT.

The Dreadnought will cost ten per cent. per ton less than recent battleships British built, although she will represent the last word in all details of her construction. In another respect the Dreadnought will be unique; she will be the first battleship in the world to be driven by turbines. These engines will supply the power for four propellers, two more than any previously built British battleship, which should make her the fastest ship of her class afloat. Another advantage of the turbines, as shown by the performances of the Germania, is that the gunners will have a steadier deck from which to handle the guns. The guns, armor, machinery, boilers, etc., are ready to be placed in the Dreadnought, so there should be no difficulty in having her ready for sea in twelve months, when she will join the Atlantic fleet, based on Gibraltar, thus being placed midway between the channel and the Mediterranean fleets. As trouble threatens on the one side or the other, the ships of the Atlantic fleet are moved, making them of the greatest use in the time of war, no matter who the enemy might be.

THE QUESTION OF ANOTHER COAL STRIKE.

DESTRUCTION CONCENTRATED.

Writing on this fleet as it will be when the Dreadnought joins, a naval expert said: "Nothing as devastating as this concentrated destruction has ever been conceived in the brain of man. It is impossible to picture the result of one minute's well-directed fire at an enemy's ships, and when one minute is followed by others, the effect would be too terrible for words, presuming the gunners got the range and fire as at target practice. To this length has the contest for sea power gone, and this is not the end, for the time is not far distant when the British ensign will fly over fleets and squadrons of Dreadnoughts, vessels costing a million and a half sterling each, each with ten or twelve 12-inch guns, which will engage an antagonist when three or four miles distant, and will pour in a succession of shells, each weighing 850 pounds, carrying wholesale destruction in their wake."

NO ORIGINAL MANUSCRIPTS.

How New Testament Writings Have Come to Us.

No part of the original manuscripts of any of the New Testament writings is known to exist. The most sanguine student will scarcely venture to hope that at some time we may discover the original autograph of an apostle or an evangelist. It is true there are still preserved some few manuscripts older than the Christian era, while during the last few years fragments of manuscripts older than of contemporary with the dates of the Epistles have been discovered in the dry soil of Egypt, but we dare not hope that the papyrus rolls used by the apostolic writers have been preserved in other countries where the climatic conditions of Egypt do not exist. It is evident that the writers of the New Testament did not intend to provide anything like a body of Christian Scriptures. They wrote as the occasion seemed to demand. There was no thought of bringing the various apostolic writings together. They were detached works, compiled to meet particular circumstances or to deal with certain definite errors. Some of them at first were scarcely known beyond the particular Christian communities to which they had been addressed and which did not attain general recognition until long after they were originally written. The late date at which the

SOUP SERVED IN SCHOOL

AN OASIS AMID DEPRESSING SURROUNDINGS.

Popular Feature of Life at the Elizabeth Street School, Toronto.

The lady teachers of Elizabeth street school, Toronto, are wont to conceal their light under a bushel, but nevertheless the light is there. Anyone can see it who goes up at noon and looks at the banquet hall. It is one of the cheeriest sights of these cold winter days, cheerier, perhaps, because its background is "The Ward," where are to be found congestion and want, and the things that go with them. It is said to be not unusual for a whole family to live in one room in this district, and pay eight or ten dollars a month for the privilege of doing it. They eat, sleep and cook in the one room, only the cooking and eating are said to be tumor matters.

In "The Ward" you meet with fierce-looking foreigners, arrayed in strange, outlandish clothes, expatriates, driven by various influences and persecutions from the countries of Europe.

SOUP AND BREAD.

The banquet hall of the Elizabeth street public school is an oasis amid surroundings that are depressing. Go in there at noon any day and you see what might at first seem to be a class absorbed in the study of physics. On closer inspection the steam is seen to arise from numerous well-filled but rapidly emptying bowls of soup. You are looking for the time being at 20 or 30 students of phytonomy, practically illustrating the excellence of vegetables when cooked. Bread is there too, bread in large, generous slices. Usually the bread is treated with the vegetable solution aforesaid before consumption.

NOT A NEW THING.

It is fifteen years since the lunch counter was first established in the school. In the beginning, it is said, the discovery that pupils attending the school were handicapped by the possession of painfully empty stomachs, led to the inauguration of the kitchen and

Your Money Refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

\$5,000 reward will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Equally good with hard or soft water.

BAD TEETH AND INFLUENZA.

Decayed Grinders are Responsible for Much Illness.

Influenza has been so rampant in this country, especially in London, during the last few years, that medical men have been making great efforts to discover its causes and to find means of preventing its spread.

It is not generally accepted that the disease is due to a special microbe the "bacillus influenzae," which enters by the mouth and forms poisonous products which, circulating in the system, give rise to the too familiar symptoms. Investigators were still puzzled to explain why the microbe attacked some people and not others exposed to the same risks of infection.

A theory, and to the lay mind a rather startling one, has been propounded by a well-known dentist, that bad teeth and defective hygiene of the mouth are the most important causes in determining infection. He contends that in a healthy mouth the invading microbes do not find such a good feeding ground as in a mouth where the teeth are decayed and covered with tartar and the gums in an unhealthy condition.

A well-known London physician

strongly in favor of the proposition. He said: "The idea has been gaining ground in the medical profession that defective hygiene of the mouth, or, as it is technically called, 'oral sepsis,' is largely responsible for a great many diseases of the intestinal tract, especially dyspepsia and gastritis, and much greater attention is paid to the care of the teeth and mouth than was formerly the case. Personally, before treating any case of indigestion, I advise a visit to the dentist."

"As to influenza, I should think it extremely probable that bad teeth predispose to it, especially to those varieties of influenza in which intestinal and gastric symptoms predominate."

They were walking out together on a cloudless night under the light of the big round moon, which seemed unusually bright and beautiful. Suddenly he stopped, clasped his hands and cried, rapturously:—"Oh, Mary— Look at the moon to-night. Isn't it beautiful—mag-nificent?" "Yes, ain't it, William?" she replied with equal enthusiasm. "It looks just like a big fried egg, don't it, dear?"

THE DOMINION BANK

—PROCEEDINGS OF—

The Thirty - Fifth Annual General Meeting of the Stockholders

THE THIRTY-FIFTH ANNUAL GENERAL MEETING OF THE DOMINION BANK was held at the Banking House of the Institution, Toronto, on Wednesday, January 31st, 1906.

Among those present were noticed:

Dr. Andrew Smith, Messrs. J. G. Ramsey, Barlow Cumberland, W. R. Brock, R. T. Gooderham, H. C. Hammond, Cawthra Mulock, E. B. Ostler, M.P., J. J. Foy, K.C., David Smith, R. J. Christie, J. M. Bond, A. W. Austen, F. J. Harris, Ira Standish, E. C. Burton, A. R. Boswell, Jno. T. Small, J. Bruce Macdonald, W. Mulock, Jr., Sidney Small, H. Gordon Mackenzie, J. Gordon Jones, F. J. Stewart, Wm. Ross, W. G. Cassels, Geo. D. Scott, N. F. Davidson, W. H. Cawthra, J. A. Proctor, David Kidd, F. D. Benjamin, J. F. Kavanagh, S. Samuel, W. C. Harvey, W. Dixon C. Holland, F. J. Phillips, Wm. Davies, H. W. A. Foster, W. C. Crowther, E. W. Langley, H. S. Harwood, R. M. Gray, Richard

Among those present were noticed:

Dr. Andrew Smith, Messrs. J. G. Ramsey, Barlow Cumberland, W. R. Brock, R. T. Gooderham, H. C. Hammond, Cawthra Mulock, E. B. Ostler, M.P., J. J. Foy, K.C., David Smith, R. J. Christie, J. M. Bond, A. W. Austin, F. J. Harris, Ira Standish, E. C. Burton, A. R. Boswell, Jno. T. Small, J. Bruce Macdonald, W. Mulock, Jr., Sidney Small, H. Gordon Mackenzie, J. Gordon Jones, F. J. Stewart, Wm. Ross, W. G. Cassels, Geo. D. Scott, N. F. Davidson, W. H. Cawthra, J. A. Proctor, David Kidd, F. D. Benjamin, J. F. Kavanagh, S. Samuel, W. C. Harvey, W. Dixon C. Holland, F. J. Phillips, Wm. Davies, H. W. A. Foster, W. C. Crowther, E. W. Langley, H. S. Harwood, R. M. Gray, Richard

tain definite errors. Some of them at first were scarcely known beyond the particular Christian communities to which they had been addressed, and which did not obtain general recognition until long after they were originally written. The late date at which the Epistle to the Hebrews, the Epistle of St. James and the second Epistle of St. Peter were received into the canon of the New Testament may be explained as due to this cause.

WITHIN HIS RIGHTS.

The Naggsboys were entertaining, and to be entertained by the Naggsboys is a liberal education in the art of bickering, and making things generally uncomfortable for everyone present.

One of the guests was engaged in a gentle and alluring amusement of criticising an absent friend.

"Well," he said, "he's the meanest, stingiest man I ever knew; in fact I don't think there's another man in the world who is half so mean—"

"Oh, I don't know," interrupted Naggsboy; "that's a pretty fair order, you know. I think I know a stingier man. There's my father-in-law, for instance."

This acted like a red flag on Mrs. Naggsboy.

"Look here," she snapped, "you're always backbiting your father-in-law! I simply won't stand it!"

"Oh, pooh, pooh!" rejoined Naggsboy. "He's my father-in-law, not yours. Just you wait until I say something about yours before you begin to talk!"

That was at eight o'clock, and at eleven-thirty they were still at it, and going stronger than ever.

A FAILURE.

Mrs. Wiggins—"I don't believe whippings do children any good."

Mr. Wiggins—"Why not?"

Mrs. Wiggins—"Because I whipped Harry at the photographer's three times because he wouldn't look pleasant, and he still looked as cross and disagreeable as ever."

GENEROUS CRITICISM.

He—"Your new hat is charming, but I fancy it doesn't do well with the dress."

She (enchanted)—"Oh, you dear old hubby, so you really mean to buy me a dress as well?"

HIS OCCASIONAL EFFORT.

Giles—There goes the laziest chap I ever encountered, yet he occasionally works with a will.

Miles—How's that?

Giles—He's a lawyer.

HER METHOD.

Knicker—"How does your wife always manage to dress in next season's style?"

Bocker—"By using next season's money."

PHILOSOPHICAL.

"Even misfortune has its advantages," remarked the home-grown philosopher.

"Oh, I don't know," rejoined the skeptical person.

"But it has," protested the philosophy dispenser. "I know a man who lost both his legs in a railway accident and he is no longer troubled with corns or bunions."

They met on a bridge. Each held out his hand, and they shook, and instantly realized that they were after strangers. Had not one of them been a genuine Hibernian the situation might have been embarrassing. "Bogorra, that's queer," says Pat. "When we wor so far off that we could see aich other I thought it was you an' you thought it was me, and now we're here together it's nayther of us."

"Women are certainly changeable creatures," said the weary-looking man. "What's the explanation?" asked the friend of the family. "During our honeymoon," answered the weary party, "my wife declared she could not live a day without me." "Well?" queried the family friend. "Only last week," continued the other, "she tried to get me to insure my life for \$50,000 in her favor."

It is fifteen years since the lunch counter was first established in the school. In the beginning, it is said, the discovery that pupils attending the school were handicapped by the possession of painfully empty stomachs, led to the inauguration of the kitchen and lunch. That was long ago. The kitchen now supports itself, and every guest at the board is there on a business basis. Boy or girl, he or she earns and owns the big slice of white bread and the bowl of steaming soup. There is a well-defined system. Usually the boys and girls who take in the lunch are boys and girls whose parents are not at home to provide lunches for them. In many cases the father and mother are both away at work. The boy or the girl entitled to lunch by reason of good marks at school, doesn't have to go home. That's all. Of course, it isn't to be supposed that the absence of good marks is ever allowed to actually maintain a lean companionship with an absence of bread and soup when there is downright need for the bread and the soup.

The school lunch room a long time ago was intended as a class room. It wasn't a good class room, however, it wasn't light enough, but its suitability as a banquet hall is far beyond question. There are comfortable seats, and there's a monster kitchen stove, not to mention another wood heater for zero days. The soup keeps warm on the big stove and exhales most agreeable odors. This soup is not made on the premises. It is imported. It comes from the House of Industry, a block farther down the street, and those who have sojourned at the House of Industry can testify to the excellence of its soup. The graniteware bowls and the spoons are provided by the School Board. The bread—but that is another story.

CLOTHING ALSO.

The bread is provided in parts at least from the profits of an extensive clothing business carried on in the school. There is a stock of hats, coats, boots, rubbers, etc., always on hand. The scholars are from time to time fitted out from his stock on the same basis as that upon which they get their meals. They earn the clothes. Their fathers and mothers also are privileged to draw upon the stock, always however on the strictly business basis. The grown-ups pay for what they get. The charges, though, are not exorbitant, ten or fifteen cents purchasing a suit of clothes. They are good clothes, too, not brand new, but certainly not worn out. They are sent in by friends of the school.

DECENTLY AND IN ORDER.

In the early history of the banquet hall there were incidents of disorder in the matter of eating. Victuals were occasionally distributed over the tables and floor by careless consumers. Those times have passed. Good table manners are a feature of the lurch. There is expedition and despatch carried once in a while to the extreme, but there is little or no waste. Cleanliness is a fetish of the school. There is, in fact, a bathroom near the banquet hall provided with a good steel clad bath and lots of hot and cold water. The bath is in great demand by the girls and boys of the school. It is as popular an institution as the kitchen, or as the rink in the school yard.—Telegram.

Whortle—"Your wife used to be rather pensive before your marriage. Is she still so?" Berry—"Oh, no—now she's expensive."

Mr. Stingiman's antiquated steel is, to put it mildly, rather thin. As it to make up for the lack of flesh on the body, however, the animal has a head many sizes too large for it. Of course, people talk about that horse, and Mr. Stingiman doesn't like it. The other week, for instance, Stingiman had gone to the expense of a new collar for the brute. Ten minutes after delivery, he was back at the saddle's with the collar. "You blundering idiot!" he blurted out. "You've made it too small! I can't get it over his head." "Over his head?" ejaculated the soddier. "Man, it wasn't made to go over his head. Back him in to it!" And Stingiman was quite rude.

Foy, K.C., David Smith, R. J. Christie, J. M. Bond, A. W. Austin, F. J. Harris, Ira Standish, E. C. Burton, A. R. Boswell, Jno. T. Small, J. Bruce Macdonald, W. Mulock, Jr., Sidney Small, H. Gordon Mackenzie, J. Gordon Jones, F. J. Stewart, Wm. Ross, W. G. Cassels, Geo. D. Scott, N. F. Davidson, W. H. Cawthra, J. A. Proctor, David Kidd, F. D. Benjamin, J. F. Kavanagh, S. Samuel, W. C. Harvey, W. Dixon C. Holland, F. J. Phillips, Wm. Davies, H. W. A. Foster, W. C. Crowther, E. W. Langley, H. S. Harwood, R. M. Gray, Richard Brown, Henry Johnson, Wm. Spry, W. Glenney, Frank H. Hill, Jno. J. Dixon, G. N. Reynolds, F. C. Taylor, F. G. Hodgins, W. C. Lee, F. E. Macdonald, Jno. Stewart, Thomas Walmsley, T. G. Brough and others.

It was moved by Mr. W. R. Brock, seconded by Mr. A. W. Austin, that Mr. E. B. Osler do take the chair, and that Mr. T. G. Brough do act as Secretary.

Messrs. A. R. Boswell and W. G. Cassels were appointed Scrutineers.

The Secretary read the report of the Directors to the Shareholders and submitted the Annual Statement of the affairs of the Bank, which is as follows:

To the Shareholders:

The Directors beg to present the following statement of the result of the business of the Bank for the year ending 30th December, 1905:

Balance of Profit and Loss Account, 31st December, 1904	\$134,572.64
Profit for the year ending 30th December, 1905, after deducting charges of management, etc., and making provision for bad and doubtful debts	490,495.90
	\$625,067.94
Dividend 2½ per cent. paid 1st April, 1905	\$75,000.00
Dividend 2½ per cent., paid 3rd July, 1905	75,000.00
Dividend 2½ per cent., paid 2nd Oct., 1905	75,000.00
Dividend 2½ per cent., payable 2nd Jan., 1906	75,000.00
Written off Bank Premises	75,629.87
	375,629.87

Balance of Profit and Loss carried forward \$249,437.97

With deep regret your Directors have to record the death, which occurred in October last, of Mr. William Ince, who had been a member of the Board since 1884. The vacancy was filled by the appointment of Mr. R. J. Christie.

Branches of the Bank have been opened during the past year in Hespeler, Ontario; in Winnipeg, at No. 643 Portage Avenue and at the corner of Notre Dame and Nena streets; and in Toronto at the corner of Dovercourt Road and Bloor street and at the Union Stock Yards.

Premises have been secured in Windsor, Ontario, and a branch will shortly be opened there.

All branches of the Bank have been inspected during the year.

E. B. OSLER,
President.

Toronto, 31st January, 1906.

The Report was adopted, and the thanks of the Shareholders were tendered to the President, Vice-President, and Directors for their services, and to the General Manager and other Officers of the Bank for their efficient performance of their respective duties.

The following gentlemen were elected Directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, R. J. Christie, T. Eaton, J. J. Foy, K.C., M.L.A., W. D. Matthews and E. B. Osler, M.P.

At a subsequent meeting of the Directors, Mr. E. B. Osler, M.P., was elected President, and Mr. W. D. Matthews, Vice-President, for the ensuing term.

TELESCOPES,

all sizes Prices 35c to \$1.15.

THE **J. J. HAINES** SHOE HOUSES,

Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

See West Window Display.

CALL AND SECURE BARGAINS.

A. E. PAUL.

Oliver Wendell Holmes recorded his protest against the custom of telling a person who does not actually ask to know that he cannot recover. As that loving observer of mankind asserted, so must every one who knows whereof he speaks assert that people almost always come to understand that recovery is impossible. It is rarely needful to tell any one that this is the case. When nature gives the warning death appears to be as little feared as sleep.

An Evil Communication.
Teacher—Evil communications corrupt good manners. Now, Johnny, can you understand what that means? Johnny—Yes'm. For instance, pa got a communication from ma's dressmaker this morning, and it made him use bad language.

Misfortunes are moral bitters which frequently restore the healthy tone to the mind after it has been cloyed and stricken by prosperity.

W. C. T. U. will be held in the school room of the Western Methodist church Tuesday, February 27th, at 3 o'clock.
L. ANDERSON, Sec.

CENTREVILLE.

Nearly all took advantage of the little sleighing we had the first of the week in hauling logs, lumber, etc. Thos. Pybus has a gang of men quarrying stone in McGrath's quarry for the foundation of the Wagar Block at Enterprise.

The remains of Peter Vandewater, were placed in the vault here last week Mr. Vandewater was a resident of this village for over thirty years being Division Court Bailiff, from the time he came here to reside, until last spring when the Whitney Government saw fit to remove him from an office that as well as this part is concerned had outlived its usefulness. He removed from here last fall to live in Napanee with relatives, in Napanee, where a couple of weeks ago he suffered a stroke of apoplexy, which caused his death. Deceased was well and favorably known throughout the Township of Camden, in politics he was an ardent Liberal and in religion a Methodist.

E. T. Hinch has been appointed Township Clerk, and D. Goudy, superintendent of the stone crusher, R. Cox Enterprise was appointed assessor. Geo. Clancy has the timber all on the ground for his barn.

Geo. McFarlane is expected home from the hospital this week.

The usual amount of valentine's received in the past, St. Valentine's day.

Our village is moving south by degrees, soon reach Mud Lake.

STRATHCONA.

Mr. Frank Haycock is seriously and dangerously ill. He is not improving.

Mrs. John Murphy is slightly better. Rev and M. S. Mears were calling on friends here Tuesday.

R. L. Lott, of Owen Sound, arrived at his mothers Saturday night, quite unexpectedly. Having business east he visited his old home, remaining til Monday.

Mrs. S. Weese spent Tuesday with Mrs. and Miss Lott.

Mr. A. Granger and family, left Tuesday for Minnesota, where they will reside.

Mr. W. Wilson will immigrate, to the great west, the 1st of March. Mr. J. Wilson, of Selby, who had bought his farm, will move here, it is the old Miller home stead, a fine place.

Mrs. Winters has moved to this village, occupying the house lately vacated by Mrs. Neely.

A number about the country as well as the village are afflicted with gripe.

Mrs. Martin Kehoe has had a bad attack of bronchitis.

Any Kind of Dye.

At WALLACE'S DRUG STORE you can get 8 packages of Diamond Dyes, Turkish Dyes, Standard Dyes, Rexall or Dyrola for 25 cents. We have a cheap Brown for Carpet Rags which gives excellent results. Everything Fresh and Good at the Red Cross Drug Store.

STELLA.

Our ice bridge is considered quite safe on the bay now. Teams with heavy loads are crossing every day.

Another of our old and highly respected residents departed this life on Saturday in the person of Mrs. Daniel Wemp. She leaves a husband and nine children, all grown to manhood and womanhood, and several brothers and sisters. Two sons, John and George, and two daughters, Mrs. R. Instant and Mrs. S. Morrow, reside here, but the others were all present at the funeral but one daughter, who is settled in the west.

Mr. Thos. Tagwell, who has been with a survey party for the past six months, is home again looking well.

The C. O. F. held a very successful assembly on Friday evening. Selby's orchestra making its first appearance at Stella and giving good satisfaction.

H. K. Filson and R. A. Caughey drove up from Kingston to be in attendance.

Free! Free!

Give it a trial. Carbo Magnetic Razor, with our name on, free for a month, if you are not satisfied bring it back. All we ask is a trial.

BOYLE & SON, Agents.

BATH

The oyster supper given by the cheese patrons in the hall was a decided success. A large crowd and a good programme was given and very instructive speeches listened to. All went away well pleased, with hope of enjoying another in the coming year.

Mrs. Wm. Keys gave a very enjoyable evening to a large number of her friends as a farewell party in honor of her son George and his bride, who started last Thursday for the Northwest. They will reside in Winnipeg where he has a good position. They take with them the good wishes of many friends. His sister, Miss Ethel, also returned to her duties in Canandagoo, N. Y., as trained nurse. She is a very successful nurse, having received a telegram urging her speedy return before her two weeks' visit had expired.

A pleasant evening was spent by a number of friends lately at the home of Mr. and Mrs. Wm. Day.

A. S. Kimmerly is selling Bran 85c per 100 lbs. Bread made from Five Roses Flour won First prize at several Fall Fairs Try a bag at \$2.45. Try our Tea, 2 lbs 25c our 25c Tea beats the world. We sell sugars cheaper than all dealers.

PROFESSOR DORENWEND

America's Greatest Hair Goods
Artist, is coming to

PAISLEY HOUSE, NAPANEE,

ON

Tuesday, Feb. 27th

This visit gives you a chance to consult PROF. DORENWEND about your Hair and to choose from the stock of Hair Goods which he carries with him—just what you require.

Baldness . . .

as all men know, disfigures and adds an aged expression to the face. Why remain Bald when Professor Dorenwend can fit you with a WIG or TOUPEE, which will hide

all traces of Baldness and take the place of your own hair? Doctors commend these Toupees as a preventative for colds in head, catarrh and neuralgia. PROFESSOR DORENWEND will fit you on the spot and show you just how you look afterwards.

LADIES—READ THIS!

You will never have a better opportunity to see for yourselves the beautiful assortment of SWITCHES, BANGS, POMPADOURS, WAVES, WIGS, Etc., which Professor Dorenwend carries with him.

Remember the Date and don't fail to call at the hotel and see Professor Dorenwend early.

The DORENWEND CO. of Toronto, Limited,
103 and 105 Yonge Street, Toronto.

We have just received a nice line of Baby Carriages, Go-Carts and Carriers; also some beautiful Parlor Suites, which we intend selling at a very close mar-

lars, winter has moved to this village, occupying the house lately vacated by Mrs. Neely.

A number about the country as well as the village are afflicted with grippe.

Mrs. Martin Kehoe has had a bad attack of bronchitis.

Mrs. Loyed visited at Mr. William's on Wednesday last.

Mr. S. Walker spent Monday with friends here.

Miss Nesbit was the guest of Miss Lott We Cready.

Mrs. Dunlap is with her sister Mrs. Calder, who is seriously ill.

Two at Keyhole.

"Bobbie, were you looking through the keyhole last night at me and your sister?"

"Honest, no. Mother was in the way."

Observant.

"There is nothing," the cinder remarked as the smoke

Past train windows flew merrily by. "Like watching for chances like this is to keep

Oneself in the great public eye."

Another Lapse.

Grocer—When do your folks want that flour sent up?

Mr. Nomenry (looking troubled)—They want it yesterday.—Lippincott's Magazine.

THE AGILE TIGER.

He is "shod With Silence" and is as Quick as Lightning.

Most wild animals are specialists—that is to say, they are highly developed in one particular direction. The tiger is great as a stalker. His feet seem to be "shod with silence." R. H. Elliot, for many years a resident of India, cited an experience of one of his neighbors illustrative of this point.

He had been much annoyed by tigers and at last tied a bullock out in a clearing and took up his own position in a tree to wait till the tiger should come after the bait. The ground was covered with dried leaves, which in hot weather are so brittle that even the walking of a bird over them can be heard for a good distance.

In no very long time a large tiger slipped out of the forest and slowly edged toward the bullock. His method was so elaborate and careful that the man who saw it used to declare that it would have been worth 1,000 rupees to any young sportsman to have witnessed it.

So carefully did he put down each paw and so gradually did he crush the leaves under it that not a sound was to be heard. Between him and the bullock was a stump about four feet high, with long projecting surface roots. This, plainly, the tiger looked upon as a godsend.

He got upon one of the roots, balanced himself carefully and so was able to walk quickly and silently as far as the stump. He approached so gradually and noiselessly and his color against the brown leaves was so invisible that he was close upon the bullock before he was perceived.

Then instantly the bullock charged. The tiger eluded him and in a moment more had his paws on the bullock's neck ready to drag him down. Then, like a flash, he caught sight of the rope by which the bullock was tied and turned and sprang into the forest, all so quickly that the man in the tree had no opportunity to fire.

Sore Throat and Coughs

A simple, effective and safe remedy for all throat irritations is found in

Cresolene Antiseptic Tablets

They combine the germicidal value of Cresolene with the soothing properties of slippery elm and licorice. 10c. All Druggists

A. WILLIS.

MORVEN

Springlike weather still prevails in our midst and we are yet without sleighing.

Business is very dull, not much hay or grain moving.

The revival meeting conducted by Rev. Mr. Thomas is increasing in interest and there are prospects of greater things to come.

Those on the sick list are better excepting Mrs. McQuin, who is suffering from cancer.

The local sports are making very good use of the driving track on Mr. Kaylor's farm with their high steppers.

Our assessor is making his annual round.

WILTON

The furnace in the Methodist church has been undergoing repairs this week. Special meetings are being held in the Methodist church.

Harvey Timmerman returned Tuesday from Kingston hospital, very much improved in health.

Wesley Parrott is also improving. Miss Kendrick leaves to-day for her home in St. Andrews, N.B., stopping off in Montreal for a visit with friends.

Miss Florence Ward is spending the week at J. B. Sanderson's.

A large amount of first-class ice has been drawn to the Metzler factories during the past week.

Mrs. Albert Purdy, Murvale spent a few days this week with Mrs. Alfred Miller.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Cresolene tablets, ten cents per box. All druggists

STOCO.

The remains of the late Maggie Nolan were deposited in the vault in the Roman Catholic cemetery on Friday 16th. The deceased was the youngest daughter of Owen Nolan. Patrick Murphy of Tweed, formerly of Stoco, sailed from Halifax, on Friday, 16th inst., for Liverpool. A great many from here are attending the bazaar in Tweed this week. The burning of the public school in the Taft's neighborhood, north-west of Tweed, is supposed to have been the work of an incendiary. Thomas Donahoe, of Belleville, has bought out Mr. Jackson, photographer Tweed. As the family of Peter Doran, of Bogart, were on their way to church on Sunday, 11th inst., the waggon upset in crossing an icy place on the road north of Stoco. The occupants were thrown headlong into the adjoining ditch by the wayside. Mrs. Doran and Miss Nellie Doran sustained severe injuries from which they have not yet recovered. The three other occupants of the vehicle escaped unhurt.

His Happiest Hour.

He—Do you remember the night I asked you to marry me? She—Yes, dear. He—For a whole hour we sat there and not a word did you speak. Ah, that was the happiest hour of my life.—Translated For Tales From Echo de Paris.

Pain Through Ignorance.

All our misery, all our pain, is traceable to ignorance and misuse of our forces. Enlightenment is the sovereign cure alike for physical and moral ills.

PRESENTATION.

Last week we published the report of the presentation to Mr. John Wilson Richmond, but lack of space would not allow us to also publish the presentation which took place the same evening (Tuesday 13th, inst.) to Mrs. Wilson, below we give the presentation to Mrs. Wilson.

The Rev. R. Duke, who presided then called upon Mrs. Libbie Winters to read the following address with which she had been entrusted.

To Mrs. James Wilson—
Dear Friend and Neighbor—We cannot let your departure from our midst pass by without some slight token of esteem in which you are held by young and old of this neighborhood and vicinity. We have learned to love and esteem you not only as a kind neighbor but one who is ever ready and willing to lend your sympathy to those who are in need, and also a helping hand in every enterprise which makes for the betterment and ennoblement of humanity, and that which stands for good citizenship, and more especially to those who are more intimately connected with you in the circle of society in which you move.

Your influence as such will not soon be forgotten by those you leave behind but we have lived to learn that all things here are passing and fleeting, even those we love best; however, we would not be selfish, and want it all our own way; thus we can say what will be our loss is others gain.

And now you will please accept this our gift, not for its intrinsic worth but as a token of good will from those, your friends, who have assembled here to-night, and in leaving us you may be assured you are carrying with you our best respect and heart's desire that you will in your new home have health and prosperity, not forgetting your old friends at Empey Hill. "May fortune smile on you and yours."

Mrs. Nettie Jackson, on behalf of the friends, presented a beautiful fruit dish to Mrs. Wilson, who acknowledged with much feeling, both the address and gift, and thus was brought to a close the formal part of the evening's entertainment; and then followed an hour of unrestrained social fellowship of the happiest kind; tinged only by the depressing thought that we were so soon to part with those we had such good reason to esteem so highly.

At the recent Quarterly Official Board of the Selby Circuit, the following resolution was moved by Mr. Thos Sexsmith and seconded by Mr. Ira B Hudgins, and carried unanimously:—

That this Quarterly Official Board of the Selby Circuit, having learned that our esteemed and much beloved brother John Wilson, for many years an active and faithful member of this board, is about to sever his connection with us by removing to another circuit, we hereby assure him that it is with much pain of mind we are forced to think upon this separation from us, but trust it is at the call of Providence and that the days that are to come will show it to have been so.

We have been accustomed to follow our brother's example and counsel on occasions in connection with the government of the church on this charge and we now, unitedly pray that the blessing of Almighty God may rest upon him and upon his household and upon his interests in the new home which he is about to set up, and thereby and by our union may be perfected in the home not made with hands.

RICHARD DUKE, Pastor.
IRA B. HUDGINS, Secretary

Wednesday, March 7th, at 10 a. m.

EXECUTOR'S NOTICE TO CREDITORS.

In the Matter of the Estate of John Craig late
of the Township of Camden, in the County
of Lennox & Addington, Farmer, deceased.
Notice is hereby given, pursuant to chapter
126, section 38, of the Revised Statutes of
Ontario, 1897, and amending Acts, that all
creditors and others having claims against the
said John Craig, deceased, who died 11th Janu-
ary, A. D. 1906, are requested to send by post,
prepaid, or deliver to the undersigned solicitors
for the executors of the last will and testament
of the said deceased, on or before the

15TH MARCH, A. D. 1906

full particulars and proofs of all claims (if any)
which they have against the said estate and
effects of the said deceased, together with their
Christian and surnames, addresses and descrip-
tions, and the nature of the security (if any)
held by them.

And notice is hereby further given that after
the said 15th day of March, 1906, the said execu-
tors will proceed to distribute the assets of the
said deceased among the parties entitled there-
to, having regard only to the claims of which
notice has been received as above required, and
the executors will not be liable for the assets so
distributed or any part thereof whose names
shall not have been received prior to the time
of such distribution.

NEWS IN GENERAL.

Tons of "purious" creamery butter were seized at Detroit and several arrests were made.

The skeleton of a man with a Toronto newspaper clipping in his pocket was found at Niagara Falls, N.Y.

At Port Arthur a man named McNabb committed suicide by blowing out his brains.

French priests and English missionaries were killed by Chinese rioters at Nanchang.

An immense outflow of gold from Russia will further embarrass the financial condition of that country.

The first Rothschild immigration party arrived in Toronto, and within a few hours practically all had been found situations on Ontario farms.

A Government bill to provide for Government ownership of telephones was introduced in the Manitoba Legislature.

Ada Eckworth, a confessed polygamist, who is said to have been married five times, was sentenced to three months in jail at London, Ont.

A special cable from The London Times says that Russia must raise \$45,000,000, and may have to pay 7-12 per cent. for it.

Premier Campbell-Bannerman said the Government was considering the question of pay for members of the House of Commons.

Frederick Dory, a Canadian railway official, who was said to have been left \$150,000 by an old woman he had befriended, has disappeared.

Fifty British warships, with 730 primary guns, and 40,000 seamen and marines, will attempt to force the Straits of Gibraltar in naval manoeuvres now in progress.

Thos. Beasley, City Clerk of Hamilton for over 50 years, has resigned owing to ill-health, and Mr. Samuel H. Kent, Assistant Clerk, has been appointed to the position.

Three young lady nurses from St. Boniface Hospital have gone to Port Arthur, in response to a request from the authorities to help in coping with the typhoid epidemic.

Judge MacTavish, Ottawa; Mr. J. W. Langmuir, Toronto, and Mr. A. L. Kent Montreal, are the commissioners named to investigate the life insurance system of Canada.

The bill for the removal of the embargo on the Canadian cattle will have the support of Scotch members in the British House of Commons. Opposition in the House of Lords is expected.

Dr. Heroult, the French expert, is reported to have made very successful experiments in smelting iron and nickel ores by electricity at Sault Ste. Marie.

The Minister of Railways has received resignations from five engineers and inspectors held responsible for faulty work on the Peterboro' and Kirkland Lake roads.

F. W. SMITH,
ISSUER OF MARRIAGE LICENSES.
Strictly Private and Confidential.
Smith's Jewellery Store,
Napanee.
30-3-m

Pictou, Ont., Feb. 26.—On Saturday about four o'clock while Mr. James Brown, with his mother, a lady about seventy years of age, were out driving near McAuley's woods on the edge of the town, Mrs. Brown was shot through the lung with a bullet from a rifle in the hands of Frank Nelson, a young lad 17 years of age. Nelson rented the rifle Saturday, and accompanied by four or five other lads of his own age, started for the woods to hunt. The story goes that Nelson in a moment of recklessness drew his rifle and told the other lads to watch and see how close he could come to Brown's horse, with the result as above. Mrs. Brown is still alive, but very low, and the doctors say she cannot recover.

Nelson was arrested on Sunday and confined in the county jail. He had only lately returned from a two-years' term at Mimico.

Pictou, Feb. 27.—Frank Nelson, the seventeen-year-old lad arrested on Sunday on the charge of shooting Mrs. Brown, an elderly lady, on Saturday afternoon, appeared before Magistrate Curry this afternoon. The case was remanded until Monday next. Mrs. Brown is very low and no hopes are entertained for her recovery.

Pictou, Ont. Feb. 28th.—Mrs. Sarah Brown, the aged lady who was shot through the lungs on Saturday afternoon last, died last night, at nine o'clock. Frank Nelson, the seventeen-year-old lad, arrested in connection with the affair, will come before Magistrate Curry on Monday.

SIRATHCONA.

A sad drowning accident occurred here Friday evening, the 23rd inst. Three children, two of them sons of Mr. Hillman and Bruce Finley, son of William Finley owner of the paper mill, all three lads under seven years of age, about five o'clock started to cross the ice to a maple tree that was tapped on the opposite shore, for a drink of sap. Near the middle of the stream was a hole in the ice, perhaps three feet in diameter, Sidney, the younger Hillman fell in, his brother immediately plunged in after him, and succeeded in getting hold of him, but with young Finley's assistance he was unable to get him out, at last the little fellow was drawn under the ice. It is a miracle the other boys were not drowned. A little farther down the river makes a sharp turn where the water is calm. Men have been at work ever since cutting the ice and searching for the body. Mr. and Mrs. Hillman are strangers here, coming from Sherbrooke Quebec.

Mrs. Murphy is some better, she is at her father's, Mr. Robt Pybus.

Frank Haycock is improving in health.

James Wilson, Seiby, was here looking over his property.

Rev. T. F. Dowdell was here visiting Mr. and Mrs. Hillman in their affliction.

Some work is still going on about the cement plant, yet it cannot last long.

FARM FOR SALE BY AUCTION.

The farm of the late Robert M. Brisco will be sold by Public Auction, March 2nd, on the premises, at 2 p.m. 200 acres situated east half of lot 2, in third con. Eneestown, owned by the late Robert M. Brisco. Thoroughly tiled drained, good walls and two water-falling springs. The fences are in good shape. The buildings are in good repair, which consist of good two-story frame dwelling house, barns and sheds, drive-house, tool-house, blacksmith shop, hog pen, hen house, ice house and granary. Eight acres good orchard, two acres of young fruit trees and berry bushes, and forty acres of woods. About 6 miles from Napanee, 4 from Bath, and a mile from Fredericksburgh Station, which is

IN THE HIGH COURT OF JUSTICE

Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A.D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Napanee at his Chambers in the Court House, Napanee, on FRIDAY THE 9TH DAY OF MARCH, A.D. 1906,

at 2 p.m., the following valuable farm lands, Parcel No. 1. The Northwest 1/4 of Lot No 11 in the 5th Concession of the Township of Camden, in the County of Lennox and Adirondack, containing 10 acres more or less. Parcel No. 2.—The Northwest 1/4 of Lot No 11 in the 6th Concession of the said Township of Camden in the County of Lennox and Adirondack containing 10 acres more or less. Parcel No. 3 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds. Parcel No. 2 is pasture land without any

experiments in smelting iron and nickel ores by electricity at Sault Ste. Marie.

The Minister of Railways has received resignations from five engineers and inspectors held responsible for faulty work on the Peterboro' and Kirkfield lift locks.

The Grand Trunk Pacific Company will ask Parliament to sanction an amendment to their act of incorporation, authorizing them to issue debenture stock to the amount of \$25,000,000 in lieu of \$20,000,000 worth of preference stock.

E. St. George Banwell, the Crown Bank teller, charged with robbery, and his wife, arrived at Halifax Tuesday afternoon in charge of detectives, and took the train for Toronto.

At a meeting held in Picton last week a curling and lawn bowling club was organized. It is proposed that the club buy the lot opposite the post office and erect suitable buildings and grade a lawn. Sixteen hundred dollars was subscribed, which is a very handsome start. Besides there is already an additional seven hundred in view. Dr. J. A. Stirling is chairman of the committee, James Hepburn, secretary. It is necessary to have \$3,000 subscribed before a charter will be taken out for the club.

Belleville, Ont., Feb. 22.—William Montgomery, a Tyendinaga farmer, while going home from this city, last evening, turned his horses on to the railroad track at the Canifon road crossing, instead of going over it. The animals went on till they came to the railway bridge, between the sleepers of which they thrust their legs. The nine o'clock train came along and missed the outfit by a few feet. Then the railway people hoisted Montgomery and his team and waggon up with a derrick and took them out of danger. The driver was intoxicated. He had a very narrow escape.

New Century, Sunlight and Handy Washers, sold on approval.

MADOLE & WILSON.

London, Feb. 26.—In advocating self-government in the Transvaal Lord Elgin said to-day: "As between responsible government and representation government I have no hesitation in choosing in favor of responsible government. Seventy years ago a similar question arose, and the principal of responsible government advocated were put forth by my grandfather and my father. It is an encouragement to me that in taking the view which I have ventured to express I am following the principles which they thus professed and which have resulted in the prosperous, loyal Dominion of Canada."

Rev. T. F. Dowdell was here visiting Mr. and Mrs. Hillman in their affliction.

Some work is still going on about the cement plant, yet it cannot last long.

Stewart Weese's little boy froze his hand while on his way to school during the recent cold snap.

S. Ackerman was married recently to Miss Sagar, of Empey Hill.

ARISTOCRATIC REFUGEES.

Russian Countess is a Milliner, Baroness Teaches Languages.

It is estimated that 10,000 Russians of all ages and ranks have taken refuge in Switzerland during the last year, as a result of the unsettled state of affairs in their own country.

Among them are members of the Russian aristocracy, who have lost their fortunes during the strikes, and are now obliged to work for their living.

In Geneva there is a Countess who is employed as a milliner, while at Zurich a Baroness is teaching languages to support herself and her two children. A Russian Count is offering his services at Basle, through the medium of advertisement as a private secretary.

Several penniless Polish nobles and their families are at present staying with Federewski, the famous pianist, at Morges.

There are also many Russian children at schools in Switzerland who have been sent away from the seat of revolution.

HOW TO MAKE BABY SLEEP.

The baby that cries half the night does not cry for nothing. It cries because it is not well, and the chances are the trouble is due to some derangement of the stomach or bowels, which would be speedily removed if a dose of Baby's Own Tablets were given the little one. These tablets make children sleep soundly and naturally, because they remove the cause of crossness and wakefulness. They are a blessing to the little one, and bring relief to the tired worried mother. Mrs. A. C. Abbott, Hudson's Heights, Que., says:—"I have found Baby's Own Tablets a splendid medicine for stomach and bowel troubles, from which my little one was troubled. Thanks to the relief the Tablets have given my baby now sleeps quietly and naturally, and is in the best of health." And the Tablets are absolutely safe—they always do good—they cannot possibly do harm. They will cure the ailments of a new-born baby or a well-grown child. Sold by druggists, or sent by mail at 25 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

They are Carefully Prepared.—Pills which dissipate themselves in the stomach cannot be expected to have much effect upon the intestines, and to overcome constiveness the medicine administered must influence the action of these canals. Parmelec's Vegetable Pills are so made, under the supervision of experts, that the substance in them intended to operate on the intestines is retarded in action until they pass through the stomach to the bowels.

Old Fossil—"I suppose you get any amount of silly questions asked during the day?" Porter—"Yes, sir, any amount; yours is the twenty-third I've had asked me to-day."

Tearing Down Signals does not delay storms. Optimaladen "medicines" do not cure. When you begin to cough take Allen's Luna Balsam, free from opium, full of healing power.

WOMAN'S STRANGE WILL

LEFT INSTRUCTIONS TO HAVE
THROAT CUT AFTER DEATH.

Request Stirs Up Comment on Best
Method to Avoid Interring Per-
sons in Trance.

The publication last week of the will of Miss Louisa Stains, of Ipswich, England, who left instructions that if cremation were not possible, the main artery of her throat was to be severed before burial, raises several interesting legal questions.

Supposing proof were forthcoming that a person was in a deep trance when the artery was severed and that the individual so mutilated actually died a second death, how would the medical man who carried out such instructions stand in the eyes of the law?

A famous member of the London bar, who was questioned on this point said: "I am of the opinion that if, in the circumstances suggested, a medical man severed the artery of a person who was in such a condition that he could not tell whether he, or she, was alive or dead, even though he might be held to have acted recklessly, yet he could not be charged with murder."

RECKLESS, BUT NOT MURDER.

A Harley Street physician declared there were many instances of men and women who have begged their medical attendants to make sure of death by some violent means or other.

"Comparatively few, however," he said, "leave such instructions in their wills. They merely exact promises from their doctors. One elderly patient of mine has repeatedly reminded me of the fact that she wishes to have a strong poison injected immediately after death. Few medical men carry out these instructions. I quite agree, however, that more thorough tests are needed in cases of sudden death."

URGES WAITING MORTUARIES.

Dr. Stenson Hooker, honorary medical secretary of the Association for the Prevention of Premature Burial, feels, of course, strongly on the subject:—

"The idea of mutilating a person supposed to be dead in order to make sure death has occurred is a revolting one. I contend that, especially in the case of young people, who have died suddenly after enjoying apparently good health, the only convincing proof of death is a change which comes over the body. Full time should be allowed for this change to take place. In several cases this change has not taken place for seven or even ten days. The system adopted in Frankfurt of waiting mortuaries, where bodies are watched in well-ventilated and warmed rooms until the change takes place, should be followed in all countries."

THE POSTMASTER

TELLS HIS SECRET

THE HEIR OF SANDLEIGH

OR
THE STEWARD'S SON

CHAPTER XXXIV.

If Guildford Berton had expected his ominous words to produce any effect upon Norah, he was mistaken.

She looked at him with the same calm surprise and displeasure. To her the question sounded like an outburst from a frenzied man, nothing more, and she tried to remain patient and restrain her anger.

"I don't understand you," she said, quietly enough. "Perhaps you do not understand yourself."

"You will soon understand," he said, with a sinister smile; then he seemed to make an effort to control his temper, and said, more softly: "Will you not sit down, Lady Norah? I—I spoke more warmly, precipitately, than I intended, but—"

Norah declined the chair with a gesture, and stood schooling herself into patience. She would listen to what he had to say; she was, if the truth must be told, just a little curious. She glanced at the bell again; it was within her reach, and she could dismiss him in a moment if she chose. But she intended to listen to all he had to say.

Guildford Berton laid his hand upon the mantelshelf, and looked down thoughtfully for a moment; then he commenced:

"I fear I shall cause you some pain, Lady Norah. Heaven knows I would have avoided this revelation, but you have forced it upon me. If you had listened to me, if you had consented to be my wife, the story I am going to tell you would have been locked within my bosom, and I should have remained silent till death."

Norah did not speak, and he went on, slowly and impressively.

"You remember your mother, Lady Norah?"

Norah inclined her head slightly. "You are aware that she and the earl separated soon after their marriage?"

Norah's face burned, and her eyes began to flash.

"Please do not misunderstand me," he said. "I am not going to speak disparagingly of either the earl or the countess. The separation was caused by no graver reason than the impossibility of their living happily together. I do not wish to speak ill of the dead, but I do not think any woman could have lived with the Earl of Arrowdale. That is all I intend to say on that point. As you are aware, the countess was accompanied in her exile by a faithful servant, Catherine Hayes. She was devoted to the countess; it was one of the instances of affectionate fidelity which are as rare as they are touching. You were born after the separation, and saw nothing of the earl until the death of your—shall I say adopted mother, Catherine Hayes? I fear I am taxing your patience rather sorely; you are wondering why I should repeat all this, which you know already. Bear with me a little longer, please, Lady Norah. I am right, am I not, in stating that a very strong affection existed between you and Catherine Hayes; in fact, that after the countess' death, she took the place of a mother to you?"

Norah assented by a gesture. His words recalled the quiet, peaceful life in the cottage at Norton, and all the dead woman's devoted care of her, and the tears were very near her eyes; but she specially desired to repress any emotion in Guildford Berton's presence, and forced the tears back.

"Can you tell me where you were

In a word or two, the facts—the lamentable facts!—are these: Just before the Countess left the court and went into exile, Catherine Hayes committed the folly of marrying. She married a man—a gentleman—named Woodfern, James Woodfern," he added, taking a paper from his pocket, and glancing at it. "Catherine had asked and obtained a holiday, and had spent it in Plymouth. There she met this gentleman, Woodfern. He was a lieutenant in the navy, on a few days' leave from his vessel," he looked at a paper again—"the Enchantress, then stationed at Plymouth. It was a case of love at first sight. Mr. Woodfern wooed with the ardor of a sailor, and Catherine Hayes, being presumably as much in love as himself, consented to marry him after the short period of courtship which the exigencies of Her Majesty's naval service permitted him. They were married—this Lieutenant Woodfern and Catherine Hayes—at St. Stephen's, Plymouth. Permit me to hand you a copy of the church register. The original I have seen within the last week, and I can testify that this is a correct copy."

He placed the slip of paper in Norah's hand and waited.

She looked down at it, and mechanically read the formal document.

"What—what has all this to do with me, with my mother, the countess?" she asked, with a catch in her voice.

He raised his eyebrows, as if astonished at her dullness of perception.

"You will see presently," he replied. "Lieutenant Woodfern's leave was a short one, and the husband and wife separated. He went on board the Enchantress; she who was Catherine Hayes, but now Catherine Woodfern, returned to the Court and the service of her mistress, the countess. They had agreed to keep the marriage a secret. Possibly the lieutenant wanted to prepare his relatives for the surprise in store for them. It was not a very good marriage for him, and he thought that he would break it to them gently, and present his wife when he came back from the voyage on which the Enchantress started a few weeks after the wedding. It was a close secret. Only one man was admitted to his confidence, the first mate of the vessel, a man named Furlong. You will find him duly set down in the certificate as a witness to the marriage. They parted. Catherine went back to her mistress, and when the earl and countess separated—which they did soon afterward—Catherine accompanied the countess. They went to London. Some months afterward a child was born, a girl, the daughter of Lieutenant Woodfern and Catherine, his wife; in fact, yourself, dear Miss Norah!" and he inclined his head gravely.

Norah caught the arm of the chair and grew deathly white. In the space of a moment, even as he had been speaking, the scene of Catherine's death rose before her. She understood now what those words of anguished parting meant. She realized now the meaning of the dying woman's off-breathed question: "Do you love me, Norah? Have I been really like a mother to you?" Her head fell upon her hands, and her bosom heaved with choking sobs.

"Do not cry," said Guildford Berton. "It is all so long ago. Shall I go on?" She raised her head and set her teeth hard.

"Yes," go on," she said.

"Your mother had very little difficulty in winning the countess' forgiveness for the concealment she had been guilty of,

"Can you tell me where you were

you are the twenty-first century. I had asked me to-day."

Tearing Down Signals does not delay storms. Opium-laden "medicines" do not cure. When you begin to cough take Allen's Lungs Balm, free from opium, full of healing power.

Father—"What—marry my daughter? Why, she's only a child." Spooner—"Yes, sir, I thought I'd come early to avoid the rush."

Halloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of its failing to remove even the worst kind.

"My goodness!" exclaimed an anxious mother, "what in the world made your face so dirty, Willie?" "Johnny Jones and me had a fight," explained Willie, "and he throwed more dirt in my face than I could swallow."

"The D & L" Menthol Plasters are marvelous in their quick action when applied to tense backs or stiff rheumatic muscles or joints. They give immediate relief.

Mr. Tothery "Could you marry a very old man with a good deal of money, if he had you frankly now old he was and how much he was worth?" Miss Timely "How much is he worth?"

Nurse's Good Words. "I am a professional nurse," writes Mrs. Eisner, Halifax, N.S. "I was a great sufferer from rheumatism almost constant association with best physicians I had every chance of a cure if it were in their power—but they failed. South American Rheumatic Cure was recommended—today my six years of pain seem as a dream. Two bottles cured me—166."

The Preacher "I was surprised to see your husband walk out of the church while I was preaching. The Wife—"Oh, don't mind that! You know he's troubled with somnambulism!"

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Schoolmaster "Now, Rogers, what are you doing? Learning something?" Rogers "No, sir, I'm listening to you, sir."

A Small Pill, but Powerful—They that judge of the powers of a pill by its size would consider Parmeleg's Vegetable Pills to be lacking. It is a little wonder among pills. What it lacks in size it makes up in power. The remedies which it carries are put up in these small doses, because they are so powerful that only small doses are required. The full strength of the extracts is secured in the form and do their work thoroughly.

A man never discovers that he is growing old by looking in the mirror. He makes the discovery by looking at his wife.

The Brained "And now, I suppose, you want to see if they'll have the same 'fed' on me?"

Dropsy and Heart Disease. "For ten years I suffered greatly from Heart Disease. Fluttering of the Heart and Smothering Spells made my life a torment, almost set in. My physician told me to prepare for the worst. I tried Dr. Kennedy's Cure for the heart. One dose gave relief, one bottle cured me completely." Mrs. James Adams, Syracuse, N.Y. 107

the cottage at Norton, and all the dead woman's devoted care of her; and the tears were very near her eyes; but she specially desired to repress any emotion in Guildford Berton's presence, and forced the tears back.

THE POSTMASTER TELLS HIS SECRET

HIS HEALTH MAINLY DUE TO THE USE OF DODD'S KIDNEY PILLS.

Postmaster Lee Looks Ten Years Younger Than His Seventy-Six Years and He Gives the Credit to the Great Canadian Kidney Remedy.

Tubercular, Cumberland Co., N. B. Feb. 10.—Dr. Special.—Honorable J. Lee, Postmaster here, is now in his seventy-sixth year, but so bright and healthy does he look and so energetic is he in his movements that he would easily pass for ten years younger.

"How do I keep young looking," the postmaster says. "Well I attribute it largely to my good health and my health is mainly due to the use of Dodd's Kidney Pills."

"I first learned the value of this Kidney Remedy some years ago. I was then suffering from Kidney Disease. My feet and legs swelled and I had to rise eight or ten times in the night because of urinary troubles. Six boxes of Dodd's Kidney Pills restored my health at that time and I have used them at intervals since."

BLOOD-STAINED THRONE.

Great Popular Upheaval May Sweep It Away.

Are the days of Peter I. of Serbia as King of that country numbered? It is believed so in Austria, and the fact explains the attitude of the Imperial Government to the proposed tariff union between Serbia and Bulgaria.

The Austrian authorities have learned that the days of Peter I. as King of Serbia are not to be long. The Karaageorgievich dynasty day in Serbia is gone, and before another year is over the King and his family will be driven out.

It is well known in Serbia that it is owing to the dynasty alone that Serbia has lost position and influence all over Europe.

In the courts of Europe the opinion prevails that Peter I. knew of the plan for the murder of King Alexander; if he was not himself actually its instigator. All the courts of Europe have refused to receive a visit from King Peter or to have any direct dealings with him. Serbia is thus, so to speak, bottled out from among the States of Europe.

The King, moreover, and in a greater measure, the Crown Prince, his son, have made themselves remarkably unpopular all over the country.

Serbia, according to information received by the Austrian Government, is for these reasons advancing in the direction of a new revolution. There is already formed a strong party, whose desire it is to see a German prince on the throne of Serbia. This party has its eyes on Prince Francis Joseph of Battenberg, who was married in May, 1897, to a Montenegrin princess, but has no children.

The difficulties of the Servian Government in obtaining money have become so acute that a crisis may be expected any moment.

The regicides, knowing the extreme danger, are running things with a high hand, and King Peter is little more than a prisoner in his own palace.

"Woman's crowning glory is her hair," he quoted. "Not now," returned his pessimistic friend. "What do you mean?" he demanded. "In many cases now woman's crowning glory is some other woman's hair."

the cottage at Norton, and all the dead woman's devoted care of her; and the tears were very near her eyes; but she specially desired to repress any emotion in Guildford Berton's presence, and forced the tears back.

"Can you tell me where you were born, Lady Norah?" he asked.

Norah started slightly.

"No," she said, answering her own thoughts rather than his question.

He suppressed a smile.

"Nor when—the day, the month?"

"No," said Norah, a faint surprise rising.

"Did it ever occur to you that there was something strange, unusual, in your ignorance of these facts?"

She shook her head.

"Why do you ask me these—these questions?" she replied coldly.

"My reason will be obvious directly," he responded. "Did you know that Catherine Hayes was a married woman?"

"I do not know," replied Norah.

He unbuttoned his coat, and, taking the photograph from his pocket, held it out to her.

"Will you take that in your hand and look at it carefully?"

Norah took it after a moment's hesitation, and looked at it.

"Where—did you get this?" she demanded with a start.

"I found it," he replied, quickly.

Norah's eyes flashed unbelief.

"It is mine!" she said.

"I am very glad to be able to restore it to you," he said, suavely. "Will you tell me whose portrait it is?"

"You know whose it is," she said. "It is Catherine's—Catherine Hayes'."

"I do not believe that you found it. It has been stolen."

"Very likely," he assented, coolly; "it is of little consequence—you have it again. Doubtless you will treasure it far more precious and carefully than you have hitherto done, now that you know it is the portrait of your mother."

For a moment the words did not convey their proper significance to Norah, and she looked at him vaguely—she was thinking of Catherine; then she started, and her eyes opened upon him.

"What was that you said?" she asked.

"I said that it is the portrait of your mother," he repeated, with a sinister smile, and a gleam of triumph in his eyes.

"My mother! This is Catherine Hayes, not my mother, not the Countess of Arrowdale!" she exclaimed.

"It is not the Countess of Arrowdale," he said; "but it is Catherine Hayes, your mother."

Norah held the portrait tightly, and looked at him.

"Are you—are you mad?" she gasped.

He smiled.

"It is not an unreasonable question. I can appreciate your astonishment, and I sympathize with you; indeed and indeed I do. I am not mad, and I am speaking the same and sober truth; that is the portrait of your mother you hold in your hand, Norah."

She did not notice his intentional omission of the "Lady;" she was too amazed, too overwhelmed. She sunk into the chair, still looking at him as if she were waiting.

"It is a terrible shock," he said, in a tone of gentle sympathy, "for one who has always regarded herself as of noble birth, to find that instead of being the daughter of an earl she is only the daughter of a commonplace lady's maid, companion—"

Norah began to tremble.

"It is not true," she said, almost inaudibly. "Why have you told me this falsehood?"

"It is quite true, alas!" he said; "and it is better that you should hear it from me, who love you and can sympathize with you, than from the lips of strangers, who would simply enjoy the romance of your disappointment."

"I do not believe it," she faltered.

"I am not surprised at that," he retorted, in the same slow voice, easy, cool as that of one confident in the truth of what he asserts. "I do not ask you, expect you to believe it without proofs. I have come prepared for your incredulity; though, if you ask yourself what purpose I could hope to effect by telling you a string of falsehoods, you will find it difficult to find an answer."

"It is all so long ago. Shall I go on?"

She raised her head and set her teeth hard.

"Yes," go on," she said.

"Your mother had very little difficulty in winning the countless forgiveness for the concealment she had been guilty of, and very soon the countess grew as fond of the little girl as her own mother was. Indeed, the solitary lady clung to the child with a loving tenderness which seemed to surpass that of the mother; and I can imagine how easy it was for the countess to believe that if the child had been her own and had been born before the earl and she had separated, no separation would have taken place. It must have occurred to her that if the earl could be made to believe that the child was his own—you see? Yes! So these two women conspired in all affection; the little girl was to be regarded as the daughter of the Countess of Arrowdale, and when they left London and took up their abode in the country, it was as the young lady Norah that the child of Catherine Woodfern was presented to the world. There was no limit to Catherine's devotion; she even relinquished her child! It was very feasible. No one knew of the marriage excepting the man Furlong, and he would not have known of the birth of the child if he had not chanced to meet Catherine in London before the two women had decided upon the exchange of mothers, and heard from her that the lieutenant had a daughter.

Norah caught her breath.

Her father! He knew—he must have

THE above picture of the man and fish is the trademark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

amount, yours is the twenty-third. I had asked me to-day."

Tearing Down Signals does not delay storms. Opium-laden "medicines" do not cure. When you begin to cough take Allen's Lung Balm, free from opium, full of healing power.

Father—"What—marry my daughter? Why, she's only a child." Spooner—"Yes, sir, I thought I'd come early to avoid the rush."

Halloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of its failing to remove even the worst kind.

"My goodness!" exclaimed an anxious mother, "what in the world made your face so dirty, Willie?" "Johnny Jones and me had a fight," explained Willie, "an' he throwed more dirt in my face than I could swallow."

"The D & L" Menthol Plasters are marvelous in their quick action when applied to lame backs or stiff rheumatic muscles or joints. They give immediate relief.

Mr. Tottlerly—"Could you marry a very old man with a good deal of money, if he told you frankly how old he was and how much he was worth?" Miss Timely—"How much is he worth?"

Nurse's Good Words.—"I am a professional nurse," writes Mrs. Eisner, Halifax, N.S. "I was a great sufferer from rheumatism—almost constant association with best physicians I had every chance of a cure if it were in their power—but they failed. South American Rheumatic Cure was recommended—today my six years of pain seem as a dream. Two bottles cured me.—106

The Preacher—"I was surprised to see your husband walk out of the church while I was preaching. The Wife—"Oh, don't mind that! You know he's troubled with somnambulism!"

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Schoolmaster—"Now, Rogers, what are you doing? Learning something?" Rogers—"No, sir; I'm listening to you, sir."

A Small Pill, but Powerful—They that judge of the powers of a pill by its size, would consider Parmeleg's Vegetable Pills to be lacking. It is a little wonder among pills. What it lacks in size, it makes up in power. The remedies which it carries are put up in these small doses, because they are so powerful that only small doses are required. The full strength of the extracts is secured in this form and their work thoroughly.

A man never discovers that he is growing old by looking in the mirror. He makes the discovery by looking at his wife.

The Benedict—"And now, I suppose, you want to see if they'll have the same effect upon me."

Dropsy and Heart Disease.—"For ten years I suffered greatly from Heart Disease. Fluttering of the Heart and Smothering Spells made my life a torment. Dropsy set in. My physician told me to prepare for the worst. I tried Dr. Agnew's Cure for the heart. One dose gave relief, one bottle cured me completely."—Mrs. James Adams, Syracuse, N.Y.—107

in all countries."

THE POSTMASTER TELLS HIS SECRET

HIS HEALTH MAINLY DUE TO THE USE OF DODD'S KIDNEY PILLS.

Postmaster Lee Looks Ten Years Younger Than His Seventy-Six Years and He Gives the Credit to the Great Canadian Kidney Remedy.

Tabernacle, Cumberland Co., N. B., Feb'y. 19.—Special.—Horatio J. Lee, postmaster here, is now in his seventy-sixth year, but so bright and healthy does he look and so energetic is he in his movements that he would easily pass for ten years younger.

"How do I keep young looking," the postmaster says. "Well I attribute it largely to my good health and my health is mainly due to the use of Dodd's Kidney-Pills.

"I first learned the value of this Kidney Remedy some years ago. I was then suffering from Kidney Disease. My feet and legs swelled and I had to rise eight or ten times in the night because of urinary troubles. Six boxes of Dodd's Kidney Pills restored my health at that time and I have used them at intervals since.

"To anyone afflicted with Kidney Trouble I say 'Dodd's Kidney Pills are all right.' Try them and you will be sure to find a benefit."

PARALYSIS YIELDS TO DR. WILLIAMS' PINK PILLS

**AFTER SEVERAL DOCTORS HAD PRONOUNCED
THE CASE HOPELESS.**

**Convincing Proof That Cure Was Permanent—in Five Year
the Patient Has Had no Relapse—Facts in a Remark-
able Case Substantiated by Sworn Statements**

Dr. Williams' Pink Pills are not a patent medicine, but the prescription of a physician, placed on sale with full directions for use under a trade mark that is a guarantee of their genuineness to every purchaser. They contain no stimulant, opiate or narcotic, and while they have cured thousands have never injured anybody. To show that cures effected by this remedy are really permanent and lasting we recently investigated the case of Mr. Frank A. Means, of Reedsville, Mifflin County, Pa. Mr. Means has been an elder in the Reedsville Presbyterian church for many years as county commissioner and as school director for nine years. He was afflicted with creeping paralysis, losing the entire use of the lower half of his body, and for a year was a helpless invalid, confined to his bed with no power or feeling in either leg, and physicians had given him up as hopeless. Mr. Means was cured by Dr. Williams' Pink Pills and his testimonial was printed five years ago as follows:

"I had the grip for four winters and as a result my nerves broke down. I lost the entire use of the lower half of my body. My stomach, liver, kidneys, heart and head were never affected, but the paralyzed condition of the lower part of the body affected my bladder and bowels. For a whole year I lay in bed perfectly helpless with no power in either limb and the feeling gone so that I couldn't feel a pin run into my legs at all. I couldn't turn over in bed without help. To move me a pulley was rigged up on the ceiling and a windlass on the floor.

"During two years of my affliction I had six different doctors, but none of them gave me relief. A specialist from Philadelphia treated me for three months, but he was no benefit to me. These doctors gave me up and said it was only a question of a few weeks with me as nothing more could be done. After the physicians had given me up, a friend sent me a pamphlet containing statements of two men who had been afflicted something like me, and who had been cured by the use of Dr. Williams' Pink Pills. I began taking them at once and although my improvement was slow it was certain. Now I can walk most of the time without a cane and everybody around here thinks it is a miracle that I can get about as I do. Your pills have certainly been a God-send to me. Within the last three years I have answered dozens of letters from invalids who had heard of my case and who asked me if it was true that I had been cured by Dr. Williams' Pink Pills. I have told them all that this remedy cured me and I am glad of this opportunity of telling about my case so that others may find relief as I have done."

Signed, F. A. MEANS.
Subscribed and sworn to before me this 17th day of April, 1901.

ALBERT S. GIBBONEY,
Notary Public.

One day recently Mr. Means was visited at his handsome home overlooking the valley of Honey Creek, near Reeds-

ville, where he made the following statement:

"Before I began taking Dr. Williams' Pink Pills I had been treated for a long time by my home doctor who pronounced my trouble creeping paralysis. I always believed that to be my trouble and I do yet believe so. I had also spent five weeks in the University Hospital in Philadelphia without the treatment benefitting me and had returned home to die. I began taking Dr. Williams' Pink Pills in 1897, but did not give a statement of my case for publication until I was sure that I was cured. After returning from the hospital I did not take any other medicine for my trouble and I owe it to Dr. Williams' Pink Pills and to them alone that I am able to be about to-day. Since my cure, as related in my statement on April 17, 1901, I have never suffered any relapse nor had occasion to employ a physician except for minor troubles such as coughs, colds, etc. I endorse Dr. Williams' Pink Pills as fully and heartily to-day as I did five years ago."

Signed, FRANK A. MEANS.
Subscribed and sworn to before me this 22nd day of January, 1906.

JACOB KOHLER,
Justice of the Peace.

Justice Kohler, of Reedsville, before whom the affidavit was made, voluntarily gave and signed the following statement:

"I have personally known Mr. Frank A. Means for the past forty-five years and know that any statement he makes is entirely reliable. I personally visited him when he was confined to bed and utterly helpless. I now see him daily and know him to be in as good health as most men of his age."

Signed, JACOB KOHLER.

Mr. Daniel W. Reynolds, postmaster at Reedsville, Pa., stated that he had received many inquiries from all parts of the country concerning Mr. Means' marvellous cure, and he cheerfully added his confirmation of the truth as follows:

"I certify that the facts stated in the testimonial of Mr. Frank Means are absolutely true. I knew him when he was unable to move and I see him every day now on the streets and in my office."

Signed, DANIEL W. REYNOLDS.
Here is evidence that must convince the most skeptical. But because many of the cures accomplished by Dr. Williams' Pink Pills are so marvellous as to challenge belief, the following offer is made:

\$5000 REWARD—The Dr. Williams' Medicine Company will pay the sum of Five Thousand Dollars for proof of fraud on its part in the publication of the foregoing testimonial.

No sufferer from paralysis, locomotor ataxia, St. Vitus' dance or any of the lesser nervous disorders can afford to longer neglect to try Dr. Williams' Pink Pills, the great blood builder and nerve tonic. Sold by all druggists or sent by mail on receipt of price, 50 cents per box; six boxes for \$2.50, by the Dr. Williams' Medicine Co., Brock-

ville, On

been written to! flashed through her mind.

Guildford Berton seemed to divine the thought.

"Yes, the lieutenant would have known, of course; but, unfortunately, he contracted yellow fever at St. Kitts two months after his marriage, and died there. The man Furlong was with him when he died. There is the certificate," and he handed her another paper.

"I have nearly come to the end of my story, Miss Norah," he said, wiping his lips, and eyeing her white face with a watchful keenness. "The plot was not a bad one. If the earl had only possessed the smallest of hearts, the announcement of his child's birth would have touched him and brought about a reconciliation; but the earl—well, you know him long and intimately enough to render it unnecessary for me to say anything further. He declined to hold any communication with his wife; he declined to receive her back or see the child. This was a startling disappointment, no doubt, and if it could have been effected, you would have been restored by the countess to your mother and acknowledged as the child of the widow of Lieutenant Woodfern; but, you see, that could not be. What was done could not be undone. The countess had presented you to the world as the daughter of the Earl of Arrowdale, and the daughter of the Earl of Arrowdale you had to remain. I don't think it mattered very much to Catherine; perhaps she consoled herself for playing the part of nurse instead of mother by reflecting that her child would figure as the daughter of a peer. That is very likely to have been her feeling. Any way, she died keeping the secret, and it was buried with her. Only one man could have revealed the truth—the sailor, Furlong; and he had disappeared, as sailors do. Probably she thought he was dead. But he is alive; it is from him that I have learned this interesting story of your birth, and it is in my power to compel him to remain silent or tell the story in a court of law. That the proofs may be complete, I have got from him a plain statement of the case; here it is. You will like to have it, I have no doubt."

He crossed over to her and placed it between her unresisting fingers. Then he went back and leaned against the mantelpiece again, and looked down at her.

Norah, with the papers in her hand, sat with her eyes fixed on the ground. She was scarcely conscious of his presence. She was simply crushed and overwhelmed by the revelation. Of its truth she did not doubt for a moment. Even if he had not produced the certificates and other documents, she would have been convinced of the truth of this story. Catherine—her mother's—last words were testimony enough. She was not the daughter of the Countess of Arrowdale, but of her companion, Catherine Woodfern.

And at that moment there was only room for one feeling in her heart; an overflowing love for the woman who had hidden the secret of her maternity in her bosom even to the gates of death! She raised the portrait to her lips and kissed it, and her tears fell upon it.

Guildford Berton accepted the action as her acknowledgment that he had spoken the truth.

"You are satisfied?" he said, in a low voice. "I thought you would be. But I fear you have scarcely realized the difference, the change, in your circumstances which this discovery must cause."

Norah scarcely heard him as she wiped her eyes and stifled her sobs.

"You have to realize, Miss Norah," he went on, "that you are no longer the Lady Norah, daughter of the late earl; that you are not the mistress of his immense wealth."

Norah raised her head and looked at him, and put her hand to her brow.

held out her hands like one striving to put aside a veil.

"You do not comprehend that not only are you not the daughter of the Earl of Arrowdale, but—penniless, and to all intents and purposes a beggar?" he said, suavely.

Norah's face flushed, and she rose. "I do not care—it is nothing!" she said, wearily. "But you forget that the earl has left me money—"

"Pardon me," he interrupted her broken words. "It is a natural mistake in the confusion of your thoughts; but the late Earl of Arrowdale has not left a penny—"

"I do not care, I do not wish to speak or think of it; but your revenge cannot go so far," she said, as wearily as before; "the earl's will—"

"Left his vast wealth to his daughter," he said, with a sinister smile; "to his daughter, not to a person named or known as Norah! Do you not remember the blank in the will? If he had written your name there I think—I am not sure—you would have been secure; but he did not. Only to 'my daughter.' You are not his daughter, Miss Norah Woodfern!"

(To be continued.)

A MIGHTY RAILWAY.

The average income of the Canadian Pacific Railway per week is \$1,250,000. Out of this sum they have to pay salaries to 30,000, which amounts up in a year to \$25,000,000. The president of the company has a salary of \$50,000 a year. The coal bill for a year is \$5,000,000, for two and a half million tons of coal. The number of cars possessed by the railway is 45,000; locomotives, 1,200; railway stations, 1,400. Since 1900 the Canadian Pacific have doubled their earnings; the total for the last six months is \$31,381,977, an increase of \$19,194,578 over the same period last year.

AUSTRALIAN WHEAT CROP.

The wheat crop of Victoria for this season is estimated at 23,000,000 bushels, being an increase over last year's return of 1,456,850 bushels. The amount required for home consumption is 6,500,000, and for seed 1,900,000, leaving about 14,600,000 bushels available for export. With present market prices at about 32s. per quarter—equal to 4s. per bushel—3s. 6d. per bushel would be realized after defraying freight, commission, and exchange, making the value of the wheat available for export £2,275,000.

UNDER WHICH KING.

"The More Postum the More Food—the More Coffee the More Poison."

The Pres. of the W. C. T. U. in a young giant state in the Northwest says:

"I did not realize that I was a slave to coffee till I left off drinking it. For three or four years I was obliged to take a nerve tonic every day. Now I am free, thanks to Postum Food Coffee."

"After finding out what coffee will do to its victims, I could hardly stand to have my husband drink it; but he was not willing to quit. I studied for months to find a way to induce him to leave it off. Finally I told him I would make no more coffee."

"I got Postum Food Coffee, and made it strong—boiled it the required time, and had him read the little book 'The Road to Wellville,' that comes in every pkg."

"Today Postum has no stronger advocate than my husband! He tells our friends how to make it, and that he got through the winter without a spell of the grip and has not had a headache for months—he used to be subject to frequent nervous headaches."

"The stronger you drink Postum the more food you get; the stronger you drink coffee the more poison you get." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

Pale, sickly children should use Mother Graves' Worm Expeller. Worms are one of the principal causes of suffering in children and should be expelled from the system.

"So you are going to marry. Have you anything laid by?" "Yes; I've got a rich uncle laid by with an illness of some sort, and I'm the only surviving relative."

Rose-colored spots on the bodies of children are sometimes mistaken for measles. The trouble may be rosacea, a local disease of the skin: Promptly cured with Weaver's Cerate.

Mrs. Smarte—"The doctor insists that I must spend the next few weeks abroad. He says I need a change. Mr. Smarte—"So you do; that's a fact." "Ah! you agree!" "Yes; you need a change—of doctors."

"They Sell Well" says Druggist O'Dell of Turro, N.S. Want any better evidence of the real merit of Dr. Von Stan's Pineapple Tablets as a cure for all forms of stomach trouble than that they're in such great demand? Not a nauseous dose that makes one's very insides rebel—but pleasant, quick and harmless—a tiny tablet to carry in your pocket. 25 cents.—104.

"You don't even know how to make a lemon tart," remarked the cooking school girl, with fine scorn. "It isn't necessary to make a lemon tart," replied the other. "All the lemons I've ever seen were pretty tart already."

It is easier to prevent than it is to cure. Inflammation of the lungs is the commonest of neglected colds, and once it finds a lodgement in the system it is difficult to deal with. Treatment with Bickle's Anti-Consumptive Syrup will eradicate the cold and prevent inflammation from setting in. It costs little, and is as satisfactory as it is surprising in its results.

"Were there laughter and cheers during your speech?" "Well," answered the youthful statesman, "there weren't any cheers, but now and then people in the audience looked at one another and laughed."

It Cures All Creeds.—Here are a few names of clergymen of different creeds who are firm believers in Dr. Agnew's Catarrhal Powder to "live up to the preaching" in all it claims. Bishop Sweatman, Rev. Dr. Langtry (Episcopalian); Rev. Dr. Withrow and Rev. Dr. Chambers (Methodist); and Dr. Newman, all of Toronto, Canada. Copies of their personal letters for the asking, 50 cents. —105

NELSON'S KEY TO SUCCESS.

Be a Quarter of an Hour Ahead of Time.

Nelson was always beforehand with every appointment. When he was leaving London on his last expedition against the enemy a quantity of cabin furniture was ordered to be sent on board the ship. Nelson had given a little farewell dinner at his house.

An upholsterer called with an account and to report the completion of the goods. His Lordship had him shown into the dining-room, and spoke to him in a corner apart from the guests.

"Everything is packed, my Lord," he said, "and will go in the wagon from the inn at six o'clock."

"And you will go to the inn and see them off?"

"I shall, my Lord; I shall be there punctually at six o'clock."

"A quarter before six," said Nelson, "be there a quarter before; to that quarter of an hour I owe everything in life."

HIS WAY OUT.

Ethel—Tell us, Mr. Wylkins, which of us do you think is the prettier—I or my sister Alyss?

Mr. Wylkins—Really, Miss Ethel, I don't know what to say. When I look at either of you, I think it isn't possible that there could be anyone in the world more beautiful.

Farmers wanted all over Canada as agents for Western Canada lands; all selected lands; liberal commission. Address "Farm Lands," P. O. Box 522, Winnipeg, Man.

THEY ARE ENEMIES NOW.

"Halloa, Mrs. Lovejoy!" exclaimed a gentleman of that lady's acquaintance "pray what brings you out so early in the day?"

"Oh! I've just been to the photographers with my pet dog, Dido" (which she carried in her arms), "and we have had our portraits taken together, haven't we, Dido? Beauty and the beast, you know, Mr. Johnson," with a saucy little laugh.

"And what a little beauty he is to be sure," replied Johnson, inadvertently, as he tenderly stroked poor Dido's head.

And then she suddenly remembered, and became hot and cold in turn, and they parted strangers for evermore.

An Englishman living in Italy, and fearing an earthquake in the region of his home, sent his two boys to a friend in London until the peril should be over. A few weeks after, the father received this letter from his friend: "Please take your boys home, and send on the earthquake."

Overworked Persons, either mentally or physically, should try "Ferro-China," the world renowned nerve and blood tonic and they will quickly recover strength and health.

Beggs—"My wife says that if I were to die she would remain a widow." Meggs—"Evidently she thinks there is not another man in the world like you." "On the contrary, she's afraid there may be, and that she'd get him."

A Time for Everything.—The time for Dr. Thomas' Electric Oil is when croupy symptoms appear in the children; when rheumatic pains beset the old; when lumbago, asthma, coughs, colds, catarrh or earache attack either young or old; when burns, scalds, abrasions, contusions or sprains come to any member of the family. In any of these ailments it will give relief at work a cure.

"It's raining hard," said the boy, who looked through the dripping window-pane. From behind his paper his father growled: "I don't care! Let it rain!" The little lad, in grave surprise, glanced sweetly up at him. "Why, I—I was a-go'in' to!" acknowledged little Jim.

For 33 Years

Shiloh's Consumption Cure, the Lung Tonic, has been before the public, and this, together with the fact that its sales have steadily increased year by year, is the best proof of the merit of

Shiloh

as a cure for Coughs, Colds, and all diseases of the lungs and air passage. Those who have used Shiloh would be without it. Those who have never used it should know that every bottle is sold with a positive guarantee that, if it doesn't cure you, the dealer will refund what you paid for it. Shiloh.

Has Cured

thousands of the most obstinate cases of Coughs, Colds and Lung troubles. Let it cure you.

"Last winter I coughed for three months and thought I was going into Consumption. I took all sorts of medicines, but nothing did me any good until I used Shiloh's Consumption Cure. Four bottles cured me. This winter I had a very bad cold, was not able to speak, my lungs were sore on the side and back. Six bottles of Shiloh made me well again. I have given it to several people, and every one of them have been cured.—D. Joseph, St. Hyacinthe, Que."

SHILOH

25c. with guarantee at all druggists.

ON THE FARM.

THE SHEEPFOLD.

In the days when wool growing was the primary object all sheep were bred with a view to wool alone and their owners seemed to forget that a sheep could have any other mission, writes Mr. W. A. McCoy. So now we find a man going into the mutton business he often has too much of the wool form in his mind and lays too much stress on a good fleece when other qualities are lacking.

In choosing a flock of ewes, get them as nearly square as possible, with a short, thick head and bright eyes, a large frame, well spread ribs, giving plenty of heart room, and not hollow just back of the shoulders. Also allow plenty of space where a large amount of food can be converted into mutton, or milk to raise a good pair of lambs. The model ewe for raising a strong, fat lamb should be built on the same wedge-shaped form as the model dairy cow. I have never seen a ewe that, at a rear view, presented a wide hind-quarter, tapering gradually to the fore-end and a level back, but raised a thick fleshed lamb. Have the ewes as near alike as possible, so that being bred to one ram they will drop lambs of a uniform type.

If the ewes are of the Downs, ram should be a Shropshire, Hampshire, Oxford or Southdown, but if they are long woolled the ram should be a Lincoln, Leicester or Cotswold. The nearer we approach the pure-bred type, by line breeding, the more perfect will the offspring be. He should be a thick, blocky fellow but, unlike the ewes, should be heaviest in front with thick head, broad between the eyes, a short neck and heavy shoulders. The shorter the distance from his mouth to the stomach the better. His back should be perfectly straight. Be sure to get your hands on him and by pressing firmly on the back notice whether the backbone sticks up like the blade of a knife if there is a crease all along his back and more noticeable toward the tail, indicating a well spread rib and a thick covering of meat. If the latter is true he is a sire of lambs that will be easily fed and thick fleshed.

As soon as the ewes are bred the ram should be taken away. Then when stormy weather commences in winter the ewes should have a dry shed to run in at nights and out of storms. But they should not be shut in unless there is danger from dogs or from some other cause, as they are liable to be overheated in too close a place. At this time if there is good clover hay a very little grain will do, but if the hay is not good a mixture of bran, oats and corn, equal parts by weight, should be fed about one or two pounds per head each day, depending on the condition of the ewes. A good thing to feed at this time is roots or silage to keep the system loose and cool. We never close our sheep barn tight until it gets 8 or 10 degrees below zero or very stormy until lambing time.

WINTERING BROOD SOWS.

It is not a good plan to ever get discouraged and neglect to properly feed and care for the brood sow. She is the machine that is capable, if well fed and cared for, of converting cheap grain, odds and ends of the waste fruit and vegetables, skim milk and other almost waste material into palatable and saleable meat. At the present price for grain and pork there is still money in the pig business. The brood sow brings returns twice per year, and although the margin of the profits are a little closer at some times than we really enjoy, when the advance in price comes, and it is sure to, there is another crop of pigs on hand to enable you to reap the benefits which the stockman richly deserves.

It is a matter of importance that the

ATTEMPTED MURDER.

Farmer Shot Thrice While Returning Home From Owen Sound.

A despatch from Owen Sound says: Wm. Morrison, a prosperous farmer living near Leith, six miles from here, was shot twice through the head and robbed of \$145 while returning from Owen Sound on Wednesday night. He was found in an unconscious condition some time after. So far no trace has been found of the highwayman.

Morrison came to town on Wednesday with a load of hogs, which he disposed of for about \$145. He left for home about dusk, and took the shore road. At a lonely spot, where trees shelter the road on both sides, he was attacked, shot twice through the head, and robbed. When found he was taken to his home in Leith, and doctors were summoned from Owen Sound.

Morrison's injuries will not prove fatal unless blood-poisoning sets in. He will, however, lose the sight of one eye. The event has stirred up the whole neighborhood, and is the first to have occurred in that section.

AN ARREST MADE.

The sensation arising out of the murderous attempt upon the life of James Morrison, the Sydenham farmer who was shot at by a young desperado to whom he was giving a ride on Wednesday night, was increased on Friday by the arrest of Alfred Stewart, a young man about eighteen years of age, who has a police Court record and whose appearance and actions coincide with those of the person described as connected with the shooting. He was arrested at the home of a farmer named Handley, who lives in Keppel township, near Kemble postoffice, twelve miles from this town. Stewart is an old country wail who was raised by a farmer in Sullivan township. At the death a few years ago of the latter, the young fellow drifted into town, where a friend secured him employment. He had not been long in town before he was given a three-months sentence for stealing a pair of candies from the Grand Trunk freight department. On his release he filled positions around town in intermittent stages, going out to work as a farm hand with the farmers of the adjacent sections at times. Last winter he robbed the Hogg postoffice and got a six-months sentence.

CURE FOR CONSUMPTION.

Italian Physician Discovers Anti-Tuberculosis Serum.

A despatch from Paris says: Professor Bouchard has informed a correspondent of the Matin that a new method of treating consumption has been discovered and tested with some measure of success by Dr. Marigliano, of Genoa. The doctor has produced a tubercle extracted from tuberculosis bacilli. An organism into which this tubercle is injected has its powers of resistance increased, and will withstand a second larger injection of the same poison which will kill an organism that had not been inoculated. Dr. Marigliano, in fact, claims to have discovered an anti-tuberculous serum, which he has used on men with satisfactory results. Professor Bouchard himself has experimented with the serum. His first subject was completely cured by it, but later tests were less conclusive.

MOTHER OF TWENTY-FIVE.

Had Six Pairs of Twins and Was Sister to Twenty-six.

A despatch from Denver says: Mrs. Elizabeth Conway, the mother of twenty-five children, nineteen boys and six girls, of whom there were six pairs of twins, died on Friday at the age of fifty-nine years from heart disease. Mrs. Conway was the youngest of a family of twenty-seven children. She was married at the age of fourteen, and her husband was the youngest of a family of thirty. She was the grandmother of twenty-five. Her mother lived to be

LEADING MARKETS

BREADSTUFFS.

Toronto, Feb. 27.—Wheat—Ontario—No. 2 white and red 77½c, mixed 77c, spring and goose 74c, at outside points.

Wheat—Manitoba—No. 1 hard 87c, No. 1 Northern 85½c, No. 2 northern 83c, No. 3 northern 81½c, at lake ports; all-rail quotations, at North Bay, are 3½c more than these prices.

Flour—Ontario—Best bid for export, \$3.10, buyers' bags, at outside points, for 90 per cent. patents; high patents, at Toronto, bags included, are quoted at \$3.65; 90 per cent. patents, \$3.50; Manitoba prices are easier, \$4.30 for first patents, \$4.40 for second patents and \$3.90 for bakers'.

Millfeed—Ontario bran, \$16.50 to \$17, in bags, outside; shorts, \$16 to \$17.50; Manitoba bran, \$19, shorts \$20, at Toronto and equal points.

Oats—1c lower, at 34c for No. 2 white and 33c for No. 2 mixed, at outside points.

Barley—Quiet, 49c to 49½c for No. 2 46c to 46½c for No. 3 extra, and 44c for No. 3, at outside points.

Peas—at 77c to 77½c, outside.

Rye—At 69c to 70c, outside.

Corn—Canadian—41c to 42c, Chatham freights; American No. 3 yellow, 48c; mixed 47½c, at Toronto.

Buckwheat—At 50c to 50½c, outside.

COUNTRY PRODUCE.

Butter—Receipts of creamery continue light, while there is an active demand by reason of the scarcity of choice dairy Creamery 24c to 25c
do solids 22c to 23c
Dairy lb. rolls, good to choice 18c to 19c
do large rolls 17c to 18c
do medium 16c to 17c
Cheese—Holds steady at 13½c for large and 13¼c for twins.

Poultry—Choice dry plucked are quoted:—Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c, thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese, 10c to 11c; turkeys, 14c to 15c, for choice small lots.

Potatoes—Ontario, 65c to 75c per bag on track here, 75c to 85c out of store; eastern, 70c to 80c on track, and 80c to 90c out of store.

Dressed Hogs—The market has taken on an easier tone, but practically none are coming here and it is impossible to quote figures.

Baled Hay—\$8 per ton for No. 1 timothy on track here, and \$5.50 to \$6 for No. 2.

Baled Straw—\$5.50 to \$6 per ton for car lots on track here.

MONTREAL MARKETS.

Montreal, Feb. 27.—There was an improved demand for Manitoba spring wheat this morning and a better feeling prevailed.

Oats—No. 2, 41c; No. 3, 40c; No. 4 39c.

Peas—79c f.o.b. per bushel.

Barley—Manitoba, No. 3, 49½c to 50c; No. 4, 48½c.

Corn—American mixed, 52½c; No. 3 yellow, 53c ex track.

Flour—Manitoba spring wheat patents, \$4.50 to \$4.60; strong bakers' \$4 to \$4.50; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do in bags, \$1.85 to \$1.95; extras \$1.65 to \$1.75.

Millfeed—Manitoba bran, in bags, \$19; shorts, \$20 per ton; Ontario bran, in bulk \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolled Oats—Per bag, \$190 to \$1.95. Cornmeal—\$1.30 to \$1.40 per bag.

Hay—No. 1, \$8 to \$8.50; No. 2, \$7 to \$7.50; clover, mixed, \$6 to \$6.50.

Cheese—unchanged at 13c to 13½c.

Butter—Fair at 22c to 22½c for choice creamery, 21½c to 22c for undergrades.

Eggs—New laid selling at 17c to 18c; fall stock at 14c and lined at 12c to 13c.

Beans—Choice primes, \$1.65 to \$1.70 per bushel; handpicked, \$1.80.

Peas—Boiling, in car-load lots, 90c to \$1.05 per bushel.

Potatoes—Per bag of 80 lbs., 65c to

VENGEANCE ON REBELS

Russian Bureaucracy Celebrates Return to Power.

A London despatch says: Since the bureaucracy regained the ascendancy in Russia there have been daily reports of severe vengeance taken on rebels throughout the empire, including the shooting and barbarous flogging of women.

The St. Petersburg correspondent of the Times, summarizing these punitive measures for the month ending Feb. 7, says that 78 newspapers have been suspended, 58 editors arrested, a state of siege proclaimed in 62 places, a minor state of siege in 32, summary executions including Moscow, 1,400; political arrests in St. Petersburg 1,716, and in the whole of Russia, 10,000. Temporary prisons were opened in 17 towns. Two thousand telegraph and postal employees were dismissed. More than a score of cheap restaurants in St. Petersburg were closed to prevent the unemployed from obtaining relief.

One correspondent asserts that 13 women and girls were flogged at Kurlenhof, near Odessa. They were stripped naked and cut from shoulders to ankles with knotted whips. Two died from the effects of their injuries.

NOTHING TO LIVE FOR.

Sad Suicide of a Young Woman at Toronto.

A Toronto despatch says: "No children and nothing to live for, life is a burden," wrote Mrs. Isabella Brooks, the young wife of Fred Brooks, a stonemason, just before ending her existence on Wednesday afternoon in her home at 175 Van Horne street. Her husband found the house locked when he returned home from work at 6 o'clock, and forcing the door, discovered his wife lying insensible on the floor, she having drank a quantity of carbolic acid. Before Drs. Dumble and Convey reached the house the woman was dead. Brooks and his wife came out from Manchester, Eng., a short time ago. Deceased was 24 years old. Before leaving for Canada she took poison to end her life. The Chief Coroner decided that there was no necessity for an inquest.

G. T. PACIFIC CONTRACTS.

Nearly a Thousand Miles Now Let for Construction.

A Montreal despatch says: Frank W. Morse, General Manager of the Grand Trunk Pacific Railway, announced on Thursday that contracts for the construction of the section between Touchwood Hills and Edmonton, 457 miles, for which tenders were received up to Tuesday, had been awarded, in two parts, the first part, 140 miles, from Touchwood Hills to Saskatoon, going to the Canadian White Company, Montreal, and the second part, 317 miles, from Saskatoon to Edmonton, going to Foley Bros., Larson & Co., St. Paul. This work, together with the work now in hand between Fort William and Lake Superior Junction, and Portage la Prairie and Touchwood Hills, makes a total of 942 miles under contract. The conditions imposed upon the contractors is that the work shall be rushed with the greatest speed.

KING TO VISIT KAISER.

Friendly Meeting of the Two Monarchs Likely in Near Future.

A Berlin despatch says: King Edward has written a most cordial letter to the Emperor on the occasion of his Majesty's birthday, and foreshadowing the prospect of a friendly meeting of the two monarchs in the course of the current year. This news will be welcomed at Berlin with great satisfaction, where the recent strained relations between the Emperor and his uncle have made a most unpleasant impression.

It is sure to there is another crop of pigs on hand to enable you to reap the benefits which the stockman richly deserves.

It is a matter of importance that the feed be in a palatable condition and that a great variety be used. Corn should not be given in very liberal quantities for it is not the material out of which good bone and muscle can be made if fed alone. It is far better to give some June clover or alfalfa each day, together with some corn stalks to chew on. If the corn stalks are not fed in too large quantities, and are sprinkled with a little brine they will eat the leaves and a large portion of the stalk.

For sloppy feed oats ground with the corn, cob and all, mixed with wheat middlings, make a good ration. As the farrowing time approaches, roots in small quantities with some bran and a little oil meal can be added with good results, as constipation is thus prevented and the fevered condition that sometimes causes them to eat the rigs will not appear. If fed liberally on such feeds, but not made excessively fat, a contented disposition will be cultivated and this is beneficial to both sow and the coming pigs.

Make the sow comfortable by giving her a warm, dry place, in which to sleep, and at same time furnish bedding. Take out the soiled portions of the bedding often and replace it with new.

Do not confine the brood sows to close quarters. They need pure air, and an abundance of exercise, to make them develop bone, muscle, life, and a vigorous constitution. This makes them capable of transmitting to the progeny the vim and constitutional vigor necessary to make thrifty and profitable animals.

DEHORNING CALVES.

This is most rapidly done while calves are young, and two general methods are employed. The first is to remove the horn when it first appears by means of the caustic potash treatment, but for mature animals dehorning with the knife is better.

In the first method it is only necessary to carefully watch a calf and as soon as the small button of the horn can be felt upon the head, the hair should be clipped closely from around it and the button rubbed, after being moistened, with a stick of caustic potash. This operation may be repeated until the button becomes very red and inflamed and seems to be tender. In a short while it will harden and drop off and usually there will be no further appearance of the horn. In some cases, however, it is necessary to make more than one application.

Older cattle may be dehorned with horn clippers, with but little difficulty, if facilities for holding them are at hand. All that is necessary is a narrow chute, with two heavy stanchions at the end, between which the head of the animal may be firmly held. Then with the aid of one of the improved horn clippers the horns may be removed with a single operation. If the dehorning is done with any of the crude instruments which first appeared upon the market for this purpose, the head of the animal may be bruised seriously and require subsequent attention. It is frequently a good plan to cover the wound with a daub of coal tar or some other disinfectant which will prevent undue bleeding and assist in the healing.

PIG NOTES.

It is better to raise eight good pigs than twelve inferior ones. There will be more money in the former than in the latter, though they outnumber them. Quality is more important than quantity.

All troughs and feeding pens should be kept scrupulously clean. Don't let any food remain after they get through with food in the trough. It sours, moulds, and is unhealthy.

Be sure that pigs have a trough for themselves that cannot be reached by the mother or the other hogs. It teaches them to eat and prevents any shrinkage during weaning. It is a self-weaner.

The Hungarian Parliament was dissolved with the aid of the militia and police.

Conway was the youngest of a family of twenty-seven children. She was married at the age of fourteen, and her husband was the youngest of a family of thirty. She was the grandmother of twenty-five. Her mother lived to be ninety-nine years old, and her husband's mother and father attained one hundred and one hundred and two respectively. Of the twenty-five children three daughters and five sons survive Mrs. Conway.

A BRAVE YOUTH.

Rescued Drowning Man From the Welland River.

A despatch from Niagara Falls, Ont., says: Ernest E. Webb, a 17-year-old boy, was the hero of a brave rescue from drowning in the Welland River on Thursday. A man named Snyder attempted to cross the river on the ice near the Michigan Central pumping station at Montrose, but broke through into deep water. Young Webb, who is the son of a pumping engineer, procured a skiff and dragged it out on the ice till it broke through. He then got in and made his way to where Snyder was struggling for his life. He was rescued in the nick of time.

DIED AFTER 107 OPERATIONS.

Case of a Massachusetts Woman—One of the Strangest on Record.

A despatch from Springfield, Mass., says: Mrs. Hattie Cronin, wife of Alexander E. Cronin, of No. 90 Union Street, died on Wednesday morning, after having submitted to 107 operations. Physicians say her case is one of the strangest on record. Mrs. Cronin was 28 years old, and had been a sufferer from dropsy of the liver for three years. During the last year operations were necessary almost every week.

COMPANION OF LIVINGSTONE.

Man Who Accompanied Remains of Explorer Home Dead in Hawaii.

A despatch from Honolulu says: James Arthur Laing died on Tuesday at Queen's Hospital. Laing was a Scotchman, 62 years old, and had been employed here several years as a searcher of records. He is said to have been a Fellow of the Royal Geographical Society, and to have conveyed the remains of Explorer Livingstone from Zanzibar to London, and is also said to have been a member of Henry Stanley's Niger expedition.

PHOTOS OF DISEASE GERMS.

An Important New Discovery In Medical Science.

A despatch from Boston says: A discovery of great importance in medical science has been made by Prof. H. C. Ernest, the bacteriologist of the Harvard Medical School. The discovery relates to the photography of disease germs, without the aid of chemicals coloration. Prof. Ernest, who has been assisted in his three years' experimentation by Prof. J. L. Morse and W. C. Sabine, has evolved a process of photographing the germs by means of the so-called ultra-violet rays of the spectrum, so that each germ stands out separate. Formerly this process of discovering the size and shape of germs was carried on by chemical means.

RUSSIA RAISES \$200,000,000.

Exploitation of Russian Turkestan by American Syndicate.

A despatch from Paris says: The Matin's correspondent at St. Petersburg states the Government has decided the National Assembly shall meet May 1. Russia's want of money is so great that she is prepared, the correspondent says, to give commercial advantages to the United States for the exploitation of Russian Turkestan for forty years on payment of \$200,000,000.

Beans—Choice primes, \$1.65 to \$1.70 per bushel; handpicked, \$1.80.
Peas—Boiling, in car-load lots, 90c to \$1.05 per bushel.
Potatoes—Per bag of 80 lbs., 65c to 70c.
Honey—White clover, in comb, 13c to 14c per pound section; extract, 8c to 9c; buckwheat, 6½c to 7c.
Provisions—Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clear fat back, \$19 to \$20; compound lard, 6½c to 7½c; Canadian pure lard, 11½c to 12c; kettle rendered, 12½c to 13c; hams, 13c to 13½c, according to size; bacon, 14½c; fresh killed abattoir dressed hogs, \$10 to \$10.25; country dressed, \$9.75 to \$9.50; alive, \$7.75, and \$7.50 for select and mixed lots.

BUFFALO MARKETS.

Buffalo, N. Y., Feb. 27. — Flour—Firm. Wheat—Spring, dull; No. 1 northern, 87½c, carloads; Winter offerings light; No. 2 red, 89c, through billed. Corn—Strong; No. 2 yellow, 45½c; No. 2 corn, 44½c. Oats—Firm; No. 2 white, 34c; No. 2 mixed, 32½c. Barley—Steady; Western in store quoted at 4c to 55c. Rye—Dull; No. 1 on track, 73c.

NEW YORK WHEAT MARKET.

New York, Feb. 27. — Spot steady; No. 2 red, 86½c elevator; No. 2 red, 80½c f.o.b., afloat; No. 1 northern, 91½c f.o. b. afloat.

LIVE STOCK MARKET.

Toronto, Feb. 27.—An active demand permeated the Western Market to-day. Light exporters' were bought up as butchers' owing to the scarcity of the latter. Heavy exporters' were in good demand. The following prices were quoted:—Good exporters', \$4.90 to \$5.25 per cwt.; medium animals sold at \$4.50 upwards.

Even fair to good cows were firm. A few choice heifers sold at \$4.50 to \$5 per cwt. The following quotations obtained in the other classes:—Good, \$4.25 to \$4.45; medium, \$3.80 to \$4.10; cows, \$2.65 to \$3.80.

An improvement was noticeable in short-keep feeders, with the advance of the season and the mildness of the weather. Stockers were also in request. Good short-keepers sold at \$4.30 to \$4.50 per cwt.

Deliveries of hogs were a little larger to-day, and prices were unchanged.

SUSPICIOUS OF CANADA'S FRUIT.

British Importers Complain of our Apple Shippers.

A despatch from Ottawa says: Notwithstanding the activity of the fruit inspectors, it is charged that fraudulent packing of apples still continues. J. B. Jackson, commercial agent at Leeds, quotes a North England trader as saying that the frauds perpetrated in the packing of Canadian apples have created a deep feeling of suspicion which will require some time to be removed. When satisfied that the fruit is honestly packed the dealer in question is prepared to take from 200 to 300 barrels per week.

The same agent suggests that Canadian cheese-makers get after the Yorkshire trade, where the people are partial to a particular brand of cheese that crumbles. He also suggests that it would be better if more butter were exported in small packages in place of bulk.

BOMBS FOR THE SULTAN.

Turkish Police Make Important Discoveries at Scutari.

A despatch from Constantinople says: The police have made some important discoveries at Scutari. They found a number of bombs and weapons, and also manifestoes calling for the assassination of the Sultan. Several Armenians have been arrested, and there are some indications that the alleged conspirators have American connections.

at Berlin with great satisfaction, where the recent strained relations between the Emperor and his uncle have made a most unpleasant impression.

WINNIPEG BANK ROBBERY

Money Found in the Caretaker's Tool Chest.

A Winnipeg despatch says: The mystery surrounding the clever robbery in the Merchants' Bank here last December, when a package of \$6,000, all in \$5 bills, was abstracted from the teller's cage under the very eyes of the officials, during business hours, was partially solved on Tuesday night, when Jerry James, night watchman in the bank, discovered \$2,300 hidden under a false lid in the top of the tool chest belonging to H. Thompson, another caretaker. James at once communicated his discovery to the police, with the result that Thompson was immediately placed under arrest. The prisoner refused to plead, and was remanded until Friday. Efforts of the police have hitherto been fruitless in locating the slightest clue.

INVASION OF CAPITAL.

Several New England Corps to Visit Ottawa This Summer.

An Ottawa despatch says: Several New England regiments are planning a joint visit to Ottawa on Aug. 18 and 19. It is estimated that the number of troops that will join in the excursion will be over 1,200, and may be as many as 1,500. The corps that up to the present have signified their intention of paying a visit to the capital are the 5th Regiment, Massachusetts Volunteer Militia, Boston, 600; British Naval and Military Veterans' Association, 300; Governor's Foot Guards, of Hartford, 150; Amosktag Veterans, New Hampshire, 150; Providence Light Infantry, number not known.

SIX YEARS FOR CHARTRAND

Robbed Poor Box of St. Helen's Church, Montreal.

A Montreal despatch says: Cyril Chartrand, aged 32, was sent to the penitentiary on Thursday for six years on conviction of sacrilege, he having stolen money from the poor-box of St. Helen's (Roman Catholic) Church on St. Maurice street. The accused has already served a term of three months in jail for masquerading as a priest, as well as three and five years respectively in penitentiary for robbery.

SHOT HIMSELF DEAD IN BOAT.

Gananoque Man Meets Death While Trapping on the River.

A despatch from Gananoque says: Arthur Chapman, while trapping on the Gananoque River on Friday, accidentally shot himself. As he did not return home, search was made for him. Below the Grand Trunk pump-house his boat was found with his cap and gun in it. Further search was made, grappling irons used, and the body recovered. Upon examination it was found that he had shot himself through the left side. The gun must have been close when discharged, as his coat was burned. Deceased was about 35 years of age, and leaves a wife and three children.

BRITISH FORCE OVERWHELMED.

Force of Fanatics Have Overrun Portion of Sokoto.

A despatch from Lagos, British West Africa, says: A force of religious fanatics is reported to have invaded and overrun a portion of Sokoto, Northern Nigeria, from the north, to have destroyed a French post near the frontier, killing five French officers and capturing two, and to have overwhelmed a British detachment, whose casualties are not given.

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

INTERIM VOTE OF \$600,000

A message from his Honor the Lieutenant-Governor was received transmitting estimates to the amount of \$600,000 for the continuance of civil service until the estimates for 1906 are finally passed. Hon. Mr. Matheson moved the House into committees of supply and ways and means, when the vote was passed, and he explained that it was needed for the civil service and for the payment of members.

PROVINCE'S CREDIT IS GOOD.

Mr. Harcourt was informed by Hon. Mr. Matheson that during the year 1905 the Government had received several definite proposals for the purchase of securities to be issued by the province. Several of the parties making the offers had asked that they be considered as confidential unless the sale was completed. As a sale of a permanent issue of stock or bonds had not yet been completed, it was deemed not in the interests of the province that the details should be made public at the present time. During the present year a proposal had been received from responsible parties which would secure to the province a higher net rate than any previous offers. There was no question about the province being able to sell. The matter was entirely one of the rate of interest. This had to be considered carefully, because every one per cent. meant \$70,000. He asked the members to remember that while negotiations were going on it was advisable to do nothing to injure the credit of the province.

GOVERNMENT TELEPHONES.

Dr. Lewis (Dufferin) presented a petition from Dufferin County asking that the question of establishing a provincial telephone service receive the early attention of the Government of Ontario and the Legislative Assembly. The petition recites that the telephone service is a monopoly, that it is doubtful whether the Government of Canada will take any action towards the taking over and operation of the telephone service or the long distance and trunk lines; that the Government of Manitoba has announced its intention of establishing a Government service, that the conditions in Ontario are exceptionally favorable for the operation of a provincial telephone service, and that the lack of such a service is felt by farmers and others alike.

BILLS GIVEN FIRST READINGS.

The following bills were introduced and read a first time:—

Mr. Hoyle—To amend the Assessment Act.

Mr. Gamay—To amend the Public Schools Act.

Hon. Mr. Hendrie—To amend the Municipal Act.

REDUCING BUSINESS TAX.

Mr. Hoyle's bill to amend the Assessment Act proposes to eliminate the word "trade" from the phrase "trade or commercial business" in sub-section 2 of section 10. The word "trade" has been diversely interpreted as meaning "barter and sale," or "calling." The words "commercial business" are considered sufficient for the proper meaning of barter and sale. Clause two of the bill proposes to reduce the minimum business tax on small offices held by one person, from \$250 to \$100.

SUPERANNUATION FOR POLICE.

Hon. J. S. Hendrie's bill is to amend section 492 of the Consolidated Municipal Act, 1903, by adding a sub-section empowering Municipal Councils to raise a sum annually sufficient to provide for superannuation or retiring allowances for members of the police force of not less than 25 years' continuous service in cities and towns. The allowance is to be one-half the salary received 12 months previous to retirement.

NOTICES OF MOTIONS.

Mr. May — Question — Has the Government made any changes in the teaching staff of the Normal schools? If so, when did they occur, and what were the names of teachers and the subjects?

MORE ONTARIO INSANITY

INSPECTOR'S REPORT OF IDIOT AND LUNATIC ASYLUMS.

Housekeepers, Laborers, Farmers and Domestic Servants Suffer Most.

The thirty-eighth annual report on the lunatic and idiot asylums of Ontario shows that there were 6,213 patients certified insane on September 30, 1905, an increase of 632 for the year, during which 1,130 patients were admitted. On September 30, 1905, the number of patients was 4,613. The total cost of maintenance for the year was \$760,204; a weekly cost per patient of \$2.32. Revenue from paying patients amounted to \$114,916.

Dr. Forbes Winslow is quoted as saying that "alcohol must be given the first place as a cause of insanity," with tobacco, especially cigarette-smoking, as a potent factor in lunacy. In the British asylums intemperance is assigned as the cause of one-quarter of the cases of insanity, while in Ontario only 6½ per cent. of the cases are attributed to drink.

Uniformity in the manual of service is recommended for the different institutions which have shown a disposition to live apart instead of working in sympathy. The itinerant system among officials is considered a helpful one. The appointment of a Provincial pathologist is recommended.

A strong protest is once more registered against the commitment of insane persons to jail. It is pointed out that the word "asylum" in connection with the insane is becoming obsolete. Hospital is the proper name for institutions devoted to their care.

Next to York County, which furnished 250 lunatics last year, comes Middlesex with 63; Wentworth and Frontenac had 46 each; Carleton, 46; Leeds and Grenville, 45; Simcoe, 41, and Northumberland and Durham, 40. Of the total number of patients 1,097 hail from York county, 351 from Middlesex, 280 from Wentworth, 253 from Simcoe, and 245 from Carleton.

As many as 643 patients have been in residence twenty years and upwards. There were 315 discharged cured during the year, one of these after twenty years. The number of deaths for the year were 343, a percentage of 5.97. Tuberculosis was the cause of 43. Senile decay and epilepsy were the next chief causes.

Of the occupations of insane persons the great bulk of them come from four classes. Housekeepers head the list for the period under survey with 5,434 cases; laborers follow with 4,680; farmers, with 4,368, and domestic servants, with 2,725. The enormous difference is apparent when it is noted that the next two classes are wives, with 650 cases, and carpenters, with 471.

Patients are given employment in the asylum to the number of 4,431, with an average number of 298 days for each patient.

FIRE ON INTERCOLONIAL.

The Railway Shops at Moncton, N.B., Are Wiped Out.

A despatch from Moncton, N.B., says: The most destructive fire in the history of this city and the worst calamity that has ever befallen the Intercolonial Railway took place on Saturday night. Nearly the whole group of Intercolonial workshops, giving employment to over a thousand men and representing with their contents an investment of about one million dollars, were destroyed in two hours.

It is known that one life is lost, and it is feared that there are other victims. Abraham Jones, employed in the paint shop, aged 55, lost his life in the effort to save a little stock of tobacco that he had in the building.

The fire started from a piece of oily waste in the upholstering department of the paint shop. There was much in-

HOME.

WITH THE APPLE.

Apple Amber (an English recipe) — Peel, chop and core three-quarters of a pound of apples adding to this six ounces of bread crumbs, two ounces each of flour and sugar and four ounces of fine chopped suet. Mix with these ingredients two well-beaten eggs, one half nutmeg grated and grated peel of a lemon. Butter a pudding mold, and when the mixture has been poured into it fit a cloth over the top; place in hard boiling water and keep at boiling point 3 hours.

Apple Charlotte (English recipe) — Cover one-half box of gelatine with one-half cup of cold water and let stand one-half hour, then place over hot water for another half hour. Meantime whip well one pint cream and place in an ice-cold bowl (over snow or ice if possible). Beat lightly into the cream two large, tart grated apples and the grated rind and juice of an orange or lemon. Strain into this the warm gelatine; stir quickly till thoroughly mixed then turn into a mold and set aside to harden. Serve with rich milk or cream.

English Apple Tart. — Pare and core apples and stew gently till tender enough to be pierced with broom splint. Line a baking dish with this pie paste and bake till a pale brown. In this place the apples carefully, not to break them, and in their centres drop a spoonful of peach or orange marmalade. Place marmalade between them, also. Cover the top with a lattice of narrow strips of paste interwoven and bake in a quick oven. Serve hot.

Scotch Apple Tart. — Peel, core and quarter as many apples as desired and set in a crock in the oven with neither water nor sugar. When soft mix with raisins, Sultanias preferably, allowing one-quarter pound of raisins to one pound of apples. Place in a flat baking dish, sprinkle with sugar and grated lemon, cover with a good paste and bake. Serve cold.

German Apple Cake. — In making up yeast bread keep out one cup sponge, adding to it one-half cup sugar, one tablespoon shortening, one salt-spoon salt, one cup of milk, and sufficient flour to make a soft dough like cake batter. Spread this half inch thick in a well-greased pan and spread on it thin sliced apple in rows, sharp side pressed down. Let this rise one-half hour in warm place, then sprinkle with one-half cup of sugar and cinnamon mixed and bake in moderate oven. Some cooks prefer adding an egg to the dough, and butter with other spices than cinnamon to the top.

WAYS WITH FISH.

Salmi of Mackerel. — Freshen for two hours in water a salt, fat mackerel, and then simmer it in a little water and butter, which save. Lift out of the pan (a flat one), take out the bone, remove head and tail, and cut to very small cutlets. Have cooked eight or more potatoes, egg size, peeled, boiled in salted water, tender, but not breaking. Make a white sauce of the mackerel, cooking water and equal quantity of milk (not cream), and make an oval on a hot serving dish; lay these around the plate, first dipping each potato into the sauce so as to coat all well. Then dip each piece of mackerel into the sauce and lay in centre of the potatoes. Always serve fennel with mackerel if possible. If not, water cress or lettuce, and manage to have some white mackerel sauce to serve apart.

New England Codfish. — The woman who asked for desecrated codfish was not so far off, so do not use that kind. Take nine pounds of middle best codfish and wash well and soak for three hours or more if very salt, cook until it will flake, saving the water for a cod-broth. Place in a large pan, add

to be one-half the salary received 12 months previous to retirement.

NOTICES OF MOTIONS.

Mr. May — Question — Has the Government made any changes in the teaching staff of the Normal schools? If so, when did they occur, and what were the names of teachers and the circumstances of the cases?

Mr. May — Question — What action does the Government intend to take in regard to the inspection of loan companies that have been granted charters from the Government of this province?

Mr. Carscallen (Hamilton) — Bill to amend an Act respecting stationary engineers.

KING EDWARD'S HEALTH.

Has Aged Very Much in the Last Few Months.

A London despatch says: It is no longer possible to ignore the unsatisfactory condition of King Edward's health. Reports of this nature always cause his Majesty annoyance, and usually produce emphatic denials from the palace officials. These rumors have been particularly numerous of late, and the denials likewise.

The fact remains that for some time his Majesty's condition has given his medical advisers some anxiety. It is persistently said that he is suffering from an affection which entails, among other things, abstinence from the use of tobacco, which is a great deprivation to a man who has been a lifelong smoker. A correspondent is unable to gain any confirmation of this report. To be sure, his voice, when delivering the speech from the throne, opening Parliament, was husky and sometimes inaudible, but his general weakness, which is quite apparent, would account for this. He has aged rapidly during the last few months. His hair and beard are now as white as snow, and his appearance is almost haggard.

The best information is to the effect that his Majesty is suffering from phlebitis of the leg, following a hunting accident, when he stepped into a rabbit hole. He is unable to walk even a few steps without a cane, and his general condition suffers from his long deprivation of exercise. Dr. Sir Frederick Treves and Dr. Sir Felix Simon visit him almost daily, and they are hopeful that they will be able to reduce the malady.

KAISER'S HINT TO FRANCE.

In a Significant Speech He Declares Germany is Ready for War.

A Berlin despatch says: The celebration of the Kaiser's silver wedding began on Sunday, when the Imperial family attended services at the cathedral. The crowds on the streets cheered them. Afterwards there was a series of receptions to the diplomats, federal councillors and other officials.

Replying to the Regent of Brunswick, who congratulated the Kaiser on behalf of the army and navy, his Majesty said: "My first and last thought is for my fighting forces by land and sea, and the constant endeavor of the Empress is to work to provide for the alleviation of want and sickness among them. May God grant that war does not come."

"Should it come, however, I am firmly convinced that the army will acquit itself as it did 35 years ago."

THE HOPE OF CANADA

A Matrimonial Epidemic in the Great Lone Land.

A Dauphin despatch says: The Galtians in the settlements north of this place are establishing marriage records these days. At Sifton one day last week twenty couples were joined in the holy bonds of wedlock, at Fort River sixteen couples and at Valley River eight.

During the Russian revolt property valued at £6,000,000 was destroyed, 10,000 people imprisoned, and 1,400 summarily executed. Temporary prisons were opened in seventeen towns and 78 newspapers were suppressed.

It is known that one life is lost, and it is feared that there are other victims. Abraham Jones, employed in the paint shop, aged 55, lost his life in the effort to save a little stock of tobacco that he had in the building.

The fire started from a piece of oily waste in the upholstering department of the paint shop. There was much inflammable matter in that building, which burned rapidly, and the fire got such headway that nothing could check it, and it was impossible to haul out much of the valuable rolling stock.

The buildings burned include the paint shop of wood, 500 feet by 70, built in 1875; second-class and freight car repair shop, about the same size; electric light station, boiler room, the main car shop, which was a brick structure, 400 feet by 75, two storeys high; boiler shop, the brass foundry and the master mechanic's office and half of the machine shop. The locomotive erecting shop is saved.

The cars burned included the dining car Yamaska, valued at \$17,000; the parlor car Cascapedia, \$18,000; general manager's car, \$15,000; three first-class passenger cars, \$10,000 each; one second-class, two baggage, one postal and two colonist, these six worth about \$25,000. About fifty trucks and platform cars loaded with coal and general freight were burned in the yard.

The fire was a great spectacle, lighting up the surrounding country, and being visible twenty miles away.

FARMERS WILL STRIKE.

200,000 Agriculturalists Will Demand Dollar Wheat.

An Indianapolis, Ind., despatch says: A strike of the 200,000 farmers composing the American Society of Equity, an organization with headquarters in Indianapolis, has been called for March 1, it was announced on Friday. Everyone who responds to this call will agree to withhold from marketing any agricultural products excepting at prices that are up to the level that has been decreed as equitable by the officers of this organization. The word is passing through all the wheat-growing States, and the response that is returned is said to be causing considerable concern on the part of the market men and speculators. The Society of Equity says that the producer ought to get at least \$1 a bushel for wheat, no matter what may be the size of the crop. The call for the strike sets forth a minimum selling price on all farm products.

CREAMERIES IN THE WEST

Total Production in Territories Was Million and Half Pounds.

An Ottawa despatch says: Years ago the Dominion Government established creameries in the North-West Territories which were the means of developing the dairy industry there to respectable proportions. The total production of the twelve Alberta creameries last year was about 925,000 pounds, and the average price received was 21.35 cents a pound for the whole year's output. There were 1,201 farmers subscribers to the Dominion creameries, among whom the results of the industry were divided.

Besides the 12 Government creameries operating in the new province, there are fifteen creameries operated under private management, which put up and exported last year some 650,000 pounds of butter, bringing the total creamery production of the province up to a million and a half pounds of butter, which brought the farmer of Alberta one-third of a million dollars.

Mackenzie & Mann have made an agreement to extend a spur of the James Bay Railway into the Moose Mountain iron mine, in the township of Hutton, and to bring out the ore.

The boundary line between Saskatchewan and Alberta runs down the main street of Lloydminster, and the town wants a declaration to decide which province it is in.

Fearing that there will be an anthracite strike, resulting in long idleness, many parents at Wilkesbarre, Pa., are taking their boys from the mines, and boys and girls from the schools, and finding positions for them in factories and stores.

Howard Ehrhart is lying at the point of death at his home, at York, Pa., suffering from lockjaw, caused by a small splinter, which he ran under his finger nail. The wound was practically unnoticed. Later the whole hand became affected with blood-poisoning.

A "Jack-the-Clipper" was chased through the streets of Chicago after he cut the braided tresses from the head of a 13-year-old school girl, but got away. He is believed to be the "clipper" who has, within the last few weeks, slashed off the hair of nearly a score of young girls.

The occupants at the home of Col. Nathan, Hartford, Conn., were awakened by the ringing of an automatic burglar alarm. The colonel called up the police and had a man watch the house, but no burglar put in an appearance. It came out during the day that the alarm had been set off by a mouse.

GENERAL.

The French Government will be asked to build three 18,000-ton battleships. M. Durnovo, Russian Minister of the Interior, says that it is necessary to use every severity to check once for all the spread of revolt.

ANDREW CARNEGIE HELPED.

How the Philanthropic Multi-millionaire Worked New Rochelle.

A despatch from New York says: A story was told the other day in New Rochelle of how Andrew Carnegie helped the members of the First Methodist Church to get a new pipe organ. The congregation wanted a \$1,000 instrument, and one of the members wrote to Mr. Carnegie for help. The philanthropist replied that if the congregation would first raise \$500 he would see what could be done. This response was encouraging, and the flock soon had the money pledged. They then told Mr. Carnegie, who in the meanwhile had investigated the needs of the congregation through the secretary. The deacons yesterday received a letter from Mr. Carnegie, who, instead of sending his cheque, said that he had found that the congregation was too small for a \$1,000 organ, but thought that one for \$500 would answer the purpose very well, and, inasmuch as they had collected this amount, there was no need of any help from him.

THE MANITOBA BUDGET.

Revenue of Province for Coming Year Estimated at \$1,878,447.

A despatch from Winnipeg says: The budget speech was delivered in the Manitoba Legislature on Wednesday afternoon by Hon. J. H. Agnew. The entire revenue for the province for the coming year is estimated at \$1,878,447. The total expenditure will aggregate almost \$2,000,000, including \$200,000 for Agricultural College extension. The population of the province is estimated at 283,059 by the assessors in 1905, but is considerably in excess of that number now. There are 45,260 farmers, and the assessment in real and personal property is estimated at \$153,241,706, an increase of \$20,000,000 over the preceding year.

SIX MONTHS' EXPORTS.

Total of Canadian Produce Was \$133,180,729—Britain Took Bulk.

An Ottawa despatch says: According to the official returns issued by the Customs Department on Thursday, the total exports of Canadian produce for the six months ending December 31 was \$133,180,729. Of this amount Great Britain took \$80,052,896 and the United States \$40,630,547. From Great Britain during the same period the imports totalled \$33,416,825, while from the United States the importations were valued at \$61,928,315.

To serve apart.

New England Codfish.—The woman who asked for desecrated codfish was not so far off, so do not use that kind. Take nine pounds of middle best cod fish and wash well and soak for three hours or more if very salt, cook until it will flake, saving the water for a cod fish sauce. Flake, not small, and keep hot. Make a sauce out of the water two ounces of butter, equal quantity of milk, a small onion, grated fine, an flour mixed in milk until the sauce is a thick cream consistency. Make an other small quantity of tomato sauce and breadcrumbs, seasoned, smooth an without lumps of bread in it. This give two sauces. Have desired quantity of potatoes mashed white and fine. Serv the codfish on a hot dish, having first put it in the white sauce and taken i out again. Trim the edge with dice o salt pork, first boiled, cold, and the fried and with water cress or parsley with the potatoes and two dishes of sauc flanking it.

Haddock with Herbs.—Take a fres haddock weighing two pounds or a litt less, clean and wipe dry and season with salt and pepper. Put inside a stuf ling of fine bread crumbs without crust well mixed with one grated onion, a tablespoon of parsley chopped fine, a tablespoon of butter, an egg, and mil to make a stiff paste. In the baking pu put water half way up to the fish, the medium sized onions, a layer of parsle in branches, a fresh lemon sliced, sa and pepper. Lay the fish on this an lay on it three strips of good raw ba con. Bake in a brisk oven thirty mi nutes. Strain the liquid for sauc an make another with the herbs, and strain

FILLINGS AND ICINGS FOR CAKES.

The following icings can be used wit any good layer cake recipe:

Maple Sugar Icing.—This is especial good for black fruit cake and is mad as follows: To one cup of grated mapl sugar add four tablespoonfuls of wat and boil until brittle when dropped int cold water. Remove from the fire an pour immediately in a line stream up on the beaten white of an egg, beatin it constantly while doing so and unt cold.

Carmel Filling.—Two cupfuls of brow sugar, one-half cupful of sweet cream, butter size of an egg, one tablespoonful vanilla added after other ingredien have boiled until thick. Beat hard whil it is cooling and spread immediately bet ween the layers.

Walnut Carmel Filling.—Use recip just given and after taking from the fir add one cupful of chopped walnu meats.

Butter Scotch Filling.—Boil togethe one cupful of brown sugar, one of Nev Orelans molasses, one-half cupful of bu ter and two tablespoonfuls of vinegar. When nearly done, add a pinch of soda. Beat it hard after taking it from the fir.

Uncooked Fillings.—Put the unbeate white of one egg and a tablespoonful o water, milk or cream in a dish and sti in confectioner's sugar until the requir ed thickness. Add flavoring at the be ginning. An infinite number of varia tions can be made by using a few drop of coloring matter, the grated rind o juice of an orange or lemon instead o the water, coconut, chocolate grated and melted, or dry powdered cocon, nu meats, chopped raisins, etc. Like the small boy who ran away from home fo life, and returned, repentant, withi two hours, before his mother had miss ed him, and who remarked gravely, "see you keep the same old cat," you can use "the same old cake" and by the use of a little wit in making a variety of icings no one will ever recognize i as an old, familiar friend, while you will earn a reputation in your home an among your friends as a cook of mar velous exeperience and infinite variety

Sixty to seventy millions sterling are required this year by the Russian Government. It may be necessary to mortgage the State railways or monopolies. Spain is offended because Germany has not taken kindly to the suggestion that she be a partner with France in the re organization of Moroccan police.

A Doctor's Medicine

Ayer's Cherry Pectoral is not a simple cough syrup. It is a strong medicine, a doctor's medicine. It cures hard cases, severe and desperate cases, chronic cases of asthma, pleurisy, bronchitis, consumption. Ask your doctor about this.

The best kind of a testimonial—

SIDESHOWS AT FALL FAIRS.

During the present session of the
Ontario Parliament there will probably
be some amendments made to the
Agriculture and Arts Act, and in view
of this coming event the Ontario As-
sociation of Fairs and Exhibitions at
its recent convention asked for the
repeal of the section which makes it a
penal offence to carry on horse-racing
in connection with these local institu-
tions, or within five miles of any one
of them. The adjoining section peremptorily
forbids all kinds of gambling

quite legitimate. What is prohibited
by law is any practice that would tend
to neutralize the purpose of the institu-
tion by drawing public attention
away from the exhibition itself to some
side show not in keeping with it, how-
ever legitimate in itself or when held
under other auspices. There is no law
against running horses on a race track
devoted to that purpose, and at some
time and place when the amusement
would not act as a counter-attraction
to draw attention away from the ex-
hibition for which aid is given out of
the Provincial treasury.

The obvious answer to the Exhibi-
tion Association is that if any local
exhibition society chooses to turn its
show into a horse race it may do so,
but that it must in that event get
along without Provincial aid. The
mass of the people of Ontario will not
stand for anything that would look
like subsidizing the race track as a
social institution, and especially doing
this under cover of an alleged grant to
promote skill in handicraft and enter-
prise in stock breeding.

THE WINTER FAIR.

A worthy ambition of skillful
breeders and feeders of fat stock in
Ontario is the winning of prizes at
the Winter Fair. The Fair at Guelph
has gained an international repu-
tation for fine exhibits and strong
educational features, and the Eastern
Ontario Live Stock and Poultry Show
bids fair to soon take an equally good
position.

The next Eastern Ontario Live Stock
and Poultry Show will be held in
Ottawa on March 5th to 9th. Prize
money of the following amounts is
given for competition in the different
departments.

Beef Cattle.....	\$774 00
Dairy Cattle.....	700 00
Sheep.....	790 00
Swine.....	690 00
Live & Dressed poultry.....	1750 00
Seeds.....	121 00

These prizes are sufficient to well re-
pay the winner for careful feeding and
should bring out many good exhibits.
Entries must be made with A. P.
Westervelt, Secretary. Parliament
Buildings, Toronto, on or before
February 24th. Exhibition buildings
will be light, warm and comfortable
and all exhibits will be carefully
housed.

The programme of lectures will be
ready for distribution shortly.

The North Toronto election showed
the fidelity of the constituency to
political tradition. There were no
congratulations nor commiserations
in the chamber. Toronto is not Ontario,
and the House is fully aware of the
fact. There is no prejudice against
Toronto in the Legislature, except such
as is manifested by Toronto herself,
and the members are apt to conclude
that the city knows her own business.

One of the arguments frequently
advanced—and a very reasonable and
plausible argument it is—in favor of
moderate protection is that it is neces-
sary in a young country like Canada,
when the roots of industry have not
yet grown deeply into the soil, and
where the winds of adversity might
sweep the plant away before it reaches
maturity.

It is seldom, however, that those
who advance the argument give any
indication as to how long the support
should continue—as to the time, condi-
tion and circumstances in which it
might reasonably be expected to cease.

When discussing the beet sugar in-
dustry with the Tariff Commission at
Ottawa, Mr. Robert Anderson, of this
city, put the case rather effectively. It

IRRITATED HEART
NERVOUSNESS BAD COMPLEXION

Begin treatment by taking
one "Fruit-a-tives" tablet
three time a day and two at
bedtime—for 3 or 4 days.

Take the tablets twenty
minutes before meals, and
always drink half a tumbler-
ful of cold water (not iced)
with each tablet.

Then take two tablets every
night for a week—and then
one every night for a month.

Be careful about the diet—
eat regularly—avoid veal,
pork, dark meat fowls, and
never drink milk with meals.

Bathe frequently—dress
warmly—exercise sensibly—
take "Fruit-a-tives" faith-
fully—and see how much
better you are at the end of
the month.

Webster's Portrait.

Daniel Webster once sat for his por-
trait to G. P. Healy, and the senator's
remark when he surveyed the complet-
ed picture became one of the artist's
favorite anecdotes in after years. "I
think," said Webster as he looked at his
counterfeit presentment, "that is a face
I have often shaved." Healy found
Andrew Jackson a disagreeable and
unwilling "subject," and he compensat-
ed himself by painting Old Hickory
with absolute fidelity to nature, not
glossing a single defect. The portrait
gives Jackson an ugly, savage and pal-
lid face.

A King's Ruse.

Alfonso, king of Aragon, was one
day examining the different articles in
his jeweler's shop in company with
many ladies of his court. He had
scarcely left the house when the jew-
eler missed a diamond of great value
and ran after him, complaining of the
theft. The king, not willing publicly
to disgrace any of his attendants, com-
manded a large basin full of sand to
be brought him, into which he directed
each person to put in the hand clinched
and to draw it out flat. By this means
the diamond was left in the sand, un-
known by whom.

A Bad Head.

"They say," murmured Mr. McSosh,
"that two heads are better than one,
but I doubt it. If I had two like the
one I've got this morning blamed if I
wouldn't commit suicide."—Cleveland
Leader.

BLOOD POISON

On account of its terrible effects, blood disease is called the king of all diseases. It may be either hereditary or contracted; so while it may not be a crime to have the disease, it is a crime to permit it to remain in the system. It may manifest itself in the form of Scrofula, Eczema, rheumatic pains, stiff or swollen joints, itchiness of the skin, eruptions or blotches, ulcers in the mouth or on the tongue, sore throat, falling out of hair, disordered stomach, and a general depression of the system. If you have any of these symptoms don't neglect yourself. You have no time to lose. Beware of "old fogey" treatment—beware of mineral poisons—beware of Quacks and Fakirs. OUR NEW METHOD TREATMENT is guaranteed to cure this disease, never to return. Bank Bonds will protect you. Our treatment is not injurious in any way, but reaches the very root of the disease and eliminates all poison from the system. The symptoms of disease gradually disappear. The blood becomes pure and enriched, the whole system is cleansed and purified, and the patient feels prepared anew for the duties and the pleasures of life. **CURE GUARANTEED OR NO PAY. 25 Years in Detroit. 250,000 Cured.**

Save Dollars Every Week

—BY GOING TO—

S. BOND & CO.'S FRIDAY BARGAIN SALES.

You will save from 10 to 30 per cent. over any other store in the Province. These prices are good on Fridays only.

Here are a few of our prices for Friday:—

Coal Oil, 13c. a gallon.
Corn, 6c. a can.
Napoleon, 8c. a plug.
Cotton, 1 yard wide, 5c.

Peas, 5c. a can.
Tomatoes, 7c. a can.
Briar, 9c. a plug—3 for 25c.
Wrapperette, 1 yd. wide, 8c.

Flannelettes, from 4c. per yard, up.

These sales will continue every Friday until further notice.

HIGHEST PRICE PAID FOR ALL FARM PRODUCE.

utions, or within five miles of any one of them. The adjoining section temporarily forbids "all kinds of gambling and all games of chance" on the fair grounds or within three hundred yards of them.

The motive of this legislation is clearly manifest and perfectly legitimate. The Legislature gives a liberal subsidy annually for the encouragement of fall fairs and exhibitions. The object of this grant is to develop arts and agriculture by the award of prizes to the exhibitors of competing articles and animals, and at the same time to use them as a means of educating the people of each locality by giving them an opportunity to make instructive comparisons between the various exhibits. Any side show that interferes with the usefulness of the main exhibition from its point of view should not be tolerated under the auspices of a local society that receives a share of the legislative grant.

There was evidently no disposition on the part of the Legislature to restrict the holiday character of the exhibition event. Various provisions of the statute make it quite clear that recreation in harmony with the main purpose of the local gathering is contemplated as

Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

Scott's Emulsion of Cod Liver Oil

It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always palatable and always beneficial where the body is wasting from any cause, either in children or adults.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

dustry with the Tariff Commission at Ottawa, Mr. Robert Anderson, of this city, put the case rather effectively. It was demonstrated that beets could be grown successfully in Canada, but the question was: "Could sugar be produced from them at such a price as would enable the industry to stand by itself?" This, he claimed, should be the test for every industry, and if an industry could only be kept above by perpetual protection, it ought not to be encouraged, because it was bound to become a constant burden upon the country. This is sound logic.

MENTAL REACTION.

The Mind's Quickness of Operation and How It is Measured.

Let a dozen or twenty persons take hold of hands in a ring. Each is to press the hand of his right hand neighbor as soon as he receives a pressure from the left. One person starts the pressure going and at the same instant observes the position of the second hand of a watch. The pressure passes all around the circle, and when it arrives at the originator he notes how many seconds were required for the given number of persons in succession to receive an impression and make up their minds to act in response. The total time is then divided by the number of persons. This is a crude illustration of the reaction time which we measure with great accuracy on single persons.

As the mental portion of the reaction time becomes more complicated the time becomes longer. For example, the processes of mental discrimination and choice require times of their own. The way we get these "higher" mental processes can be illustrated in a simple way. A person placed in a quiet room is to tap a telegraph key every time he sees a red light, which can be produced at the will of the experimenter in the recording room. The interval of time between the actual appearance of the light and the moment the key is tapped is accurately measured. For awhile nothing but the red light is used, this to obtain the simple reaction time. Then red and yellow lights are turned on in irregular succession. The person has now to discriminate between two colors and to choose between action and nonaction. The increase of time required over the simple reaction time gives the discrimination time for two colors. In another set of experiments three colors are used, then four colors. As the discrimination and choice become more complicated more time is required.

The importance of rapid and accurate reaction and discrimination is evident. Astronomers have difficulty in recording the moment at which a star passes a line in the telescope. The sportsman must pull the trigger at just the proper moment. The football player, the fencer and the boxer are trained in rapidity of discrimination and reaction. It is very evident that a player or a pugilist who takes a long time for discrimination, choice and volition will give a decided advantage to a quick opponent.—Forum.

The Calibar Bean.

The famous Calibar bean is said to be worse than strychnine. The natives use it for an ordeal. If a person is accused of a crime he is made to eat one, being adjudged to be guilty in case of death, which is almost inevitable. Another seed employed for a like purpose is that of the ordeal tree of Madagascar, said to be the most deadly of vegetable products. One of these seeds about the size of an almond will kill twenty men.

ther notice.

HIGHEST PRICE PAID FOR ALL FARM PRODUCE. S. BOND & CO.'S GENERAL STORE, ODESSA.

A curious detail of Napoleon Bonaparte's costume was the religious care with which he kept hung around his neck the little leather envelope, shaped like a heart, which contained poison that was to liberate him in case of irretrievable reverses of fortune. This poison was prepared after a recipe that Cabanals had given to Corvisart, and after the year 1808 the emperor never undertook a campaign without having his little packet of poison.

He Was Tender.

"Young Mr. Softy paralyzed Dr. Simton when he went to be vaccinated," observed Gaswell to Dukane.

"How was that?"

"He asked the doctor to put him under the influence of anaesthetics."

A Farsighted Girl.

"I will work night and day to make you happy," he said.

"No," she answered thoughtfully, "don't do that. Just work during the day and stay at home at night."

Patting yourself on the back is a difficult task—seldom done gracefully.

Albert College Belleville, ONT.

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters.

\$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. If You Would Seek a Cure in Life's Worries and Cares, Read the Story Recorded Here of Mr. Bryce Allan, of Jarvis, Ont.

Believe me, I am fully as gratified to tell you of my recovery with Psychine as you are to hear of it. Last fall I became weak, run down and nervous through overwork and worry. Was unfit for work, had no appetite, and felt as if I had lost all interest in life. I contracted a series of colds from changing winter weather, and gradually my lungs became affected. I tried remedy after remedy, and a number of doctors prescribed for me, but got no relief. I began using Psychine. After two months' treatment I regained my health and strength. I am sound as a bell to-day, and give Psychine all the credit.

BRUCE ALLAN,
Jarvis, Ont.

SAVED!

What a wonderful word to those who, for days perhaps, have been adrift on the wide sea. How eagerly every sunrise they have scanned the horizon in the hope of some friendly sail.

At last the morning dawns when their hopes are realized. There is the gallant ship! They shout and wave but their parched throats can scarce utter a sound.

Will she sight them? Yes, look! she alters her course and now in a few moments all their suffering will be at an end.

And to you also comes the glad morn.

For months, even years perhaps, you have been firmly held in the grip of some disease.

How eagerly you have sought relief but all in vain and now you are almost in despair.

Yet for you there is HOPE.

The light of knowledge has revealed PSYCHINE, a sure cure for all Throat and Lung troubles.

Pneumonia, Pleurisy, LaGrippe, Bronchitis, Consumption, Lassitude, Night-sweats and all Wasting Diseases can be effectually cured by this wonderful tonic.

PSYCHINE (Pronounced Si-keen)
The Greatest of all Tonics

PROBLEMS IN COLORS

WHITE IS COOL, YET ARCTIC ANIMALS AS A RULE ARE WHITE.

Why Are Land Birds Mostly Dark and Sea Birds, In Many Cases, White?—Why Have Nearly All Purple Blossoms Poisonous Properties?

In summer weather ladies, and men, too, when possible wear white. Why? To keep cool, of course, you will say.

If this be so, why, then, are almost all the creatures that live in arctic regions clothed in white? The usual reply is that the white color is for protective purposes—in order, in fact, to make them invisible to their enemies in the midst of the wastes of snow.

But, consider, again, is this reasonable? From whom does the polar bear need to hide? He has no enemies to fear. And as for the birds which assume a white plumage when they migrate north, surely they also have far fewer foes in the polar regions than when farther south.

Again, if white be a cool color this is surely another reason against the inhabitants of the coldest regions turning white at the approach of winter. It is easy to strengthen this argument. Visit the tropics, and you will find hardly any white animals or birds. In the very hottest regions of the globe not only is man, as a rule, black, but the birds and beasts are either very dark or else extremely brilliant in color. Of tropical birds the commonest colors run as follows: Brown, dark green and dark blue, emerald green, reds and yellows.

Speaking of the birds again, why is it that land birds are mostly dark hued while so many sea birds are white?

Here is another color puzzle. Almost all song birds are somber in hue, while the brightly colored species, such as the jays, the parrots and birds of paradise, have naturally harsh voices.

The colors of flowers and leaves offer numbers of interesting problems. No one quite knows why the prevailing tint of early spring flowers is either white or yellow. Yellow, indeed, holds its own to some extent all through the summer, but the typical color of summer blooms is pink, while as the autumn advances richer crimsons and all the rich, glowing hues of dahlias and chrysanthemums are seen.

Horticulturists have produced poppies of pretty nearly every shade under the sun, and with many other flowers they seem able to alter the colors almost as they please. Yet the blue rose, the black tulip and the green carnation seem as far off as ever they were in spite of constant efforts to arrive at them. Nearly three centuries ago Dutch gardeners imagined themselves on the verge of inventing a black tulip.

The colors of the blossom of fruit trees are limited to white, pink, bright scarlet and purple. The reason no one knows. Nor is it clear why nearly all plants with purple blossoms have poisonous properties. The deadly nightshade is an instance which will be familiar to all country readers.

It used to be said and many still imagine that intensity of color depends upon intensity of light. The brilliancy of a tropical landscape seems in some measure to bear this out. But any amount of arguments may be deduced against it. Rubies, opals and other exquisitely colored gems are dug from the depths of the earth.

The rays of the sun have never touched them. The pulp of some fruits is more richly tinted than the outer rind, while the crimson blood of animals is hidden from the light. What could be more rich and magnificent in color than the wings of many moths?

Say "S"

To This Offer, and See that You Will Get.

Write us if you are ready to try Ligozone. Let us buy the first bottle for you. Let the product itself prove the good it can do.

You who are waiting don't know what you miss. There are plenty to tell you if you would ask; for millions have already used it. Some use it to get well; some to keep well. Some to cure germ diseases; some as a tonic. You will use it as they do, when you learn what the product does. And you will then regret that you delayed so long.

What Ligozone Is.

The virtues of Ligozone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Ligozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Ligozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Ligozone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Ligozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Ligozone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Ligozone can do.

Where It Applies.

These are the diseases in which Ligozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma	Gout
Abcesses—Anemia	Gonorrhea—Gleet
Bronchitis	Hay Fever—Influenza
Blood Poison	La Grippe
Bowel Troubles	Leucorrhea
Coughs—Colds	Malaria—Neuralgia
Consumption	Piles—Quinsy
Contagious Diseases	Rheumatism
Cancer—Catarrh	Scrofula—Syphilis
Dysentery—Diarrhea	Skin Diseases
Dyspepsia—Dandruff	Tuberculosis
Eczema—Erysipelas	Tumors—Ulcers
Fever—Gall Stones	Throat Troubles

Also most forms of the following:
Kidney Troubles
Stomach Troubles
Liver Troubles
Women's Diseases
Fever, inflammation or catarrh—impure or poisoned blood—usually indicate a germ attack. In nervous debility Ligozone acts as a vitalizer, accomplishing remarkable results.

50c. Bottle Free.

If you need Ligozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you; to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Ligozone costs 50c. and \$1.

Note that this offer applies to new users only. Any physician or hospital not yet using Ligozone will be gladly supplied for a test.

the nucleus of a comet is composed of ice. Then suppose the heat of the sun to be so intense as to rapidly melt that portion of the ice globe exposed to the action of its rays, which are strong enough to immediately convert it into vapor, which ascends toward the sun.

"Imagine now a fierce wind blowing out from the sun, causing the vapor which meets it to be whirled out into space behind the comet. This will clearly illustrate the theory of the formation of a comet's tail, only that the nucleus of the comet is not ice and the vapor is not water vapor, neither is the force which drives it away from the sun a fierce wind."

The unknown force hinted at by the astronomer above quoted readily explains why a comet's tail, as a rule, points in an opposite direction to the sun. The Russian astronomer Bredichen distinguishes three different types of cometary tails—those composed of particles having the specific gravity of hydrogen, those having the specific gravity of hydrocarbon gas and a third class having all the peculiarities of an equal mixture of hydrogen and iron vapor.

BEAUTY SPOTS.

Japanese women gild their teeth.
In Greenland women paint their faces blue and yellow.

The ladies of Arabia stain their fingers and toes red.

In India the women of three high castes paint their teeth black.

Borneo women dye the hair in fantastic colors—pink, green, blue and scarlet.

A Hindoo bride is anointed from head to foot with grease and saffron.

In New Holland sears made carefully with shells form elaborate patterns on the ladies' faces.

In some South American tribes the women draw the front teeth, esteeming as an ornament the black gap thus made.

DR. AGNEW

WITH THE FORESIGHT OF A PROPHET, BY THE AID OF THAT GREATEST OF KNOWN TREATMENTS—"DR. AGNEW'S CURE FOR THE HEART"—IS LEADING THOUSANDS OUT OF "EGYPTIAN BONDAGE" OUT OF ILL-HEALTH AND UNTOLD SUFFERING TO THE "PROMISED LAND" OF PERFECT HEALTH

DOES YOUR HEART ACHE?

DR. AGNEW'S CURE FOR THE HEART WILL STOP THE PAIN

Is there palpitation—Is there fluttering—Is your breath short—Is it hard to find your pulse sometimes—Do you have smothering spells—Do your feet and ankles swell—Do you have fainting turns—Do you have nightmare—Do you have pain in the left side, shoulder or arm—Ever experience great hunger and exhaustion—Do you have chilly sensations? Dr. Agnew's Cure for the Heart has saved thousands of sufferers, and it can help and cure you; but you cannot afford to toy with heart troubles, so if you have any of the heart symptoms to-day then to-day is the day to put yourself in touch with a remedy—this great heart treatment that never fails.

"I was under treatment," says Mr. A. Lavers, of Collingwood, Ont., "with some of the best physicians in London (England) for what they diagnosed as incurable heart trouble. I suffered agonies through pain about my heart, fainting spells, palpitation and exhaustion. As a drowning man grasps at a straw I tried Dr. Agnew's Cure for the Heart. The first bottle relieved me greatly; two bottles took away all traces of my heart trouble."

DR. AGNEW'S LITTLE LIVER PILLS cure all liver ills—20 cents.
DR. AGNEW'S CATARRHAL POWDER a sure cure for catarrh.

GRAY'S SYRUP OF RED SPRUCE GUM

A few doses, at the first sign of a cold, will allay all throat irritation—take away hoarseness—check the inflammation—strengthen the lungs—ward off the cough.

All the healing, soothing, curative properties of Canadian Spruce Gum—combined with aromatics. Pleasant to take. 25 cts. bottle.

rimed, while the crimson blood of animals is hidden from the light. What could be more rich and magnificent in color than the wings of many moths? Yet these are all night flying creatures.

Speaking of moths, it seems odd that there is no blue moth. Very few show even a touch or spot of blue. The colorings of butterflies present many problems, for there seems no order or method in their hues and markings, and a strange point is the absolute difference in these points between species otherwise closely allied.

Why do autumn leaves turn yellow? Here is a question which is more easily answered than some that have already been suggested. The popular reply is, "The frost does it." This is only partly correct. If a really hard frost were to happen early in autumn there would be no tints at all. All the leaves would turn brown at once. The really gorgeous colors are produced by a slow and gradual fall of temperature, of course, without too much wind or rain. The cold causes a chemical ferment, which attacks the color compounds in the cells of the leaf. It is those leaves which contain most sugar which oxidize most rapidly and of which, consequently, the color becomes most rich and brilliant.

A question which is often asked is, "Why do lobsters, shrimps and certain other similar shellfish turn red when boiled?" It seems that the black coloring matter which colors the shell of the lobster during life is an iron compound. We know that iron rust is red. The effect of boiling is practically to turn this iron compound in the lobster shell to a highly oxidized rust.

The dislike of certain creatures for certain colors is strange. If a number of earthworms be placed in an oblong box, of which one half is covered with red and the other with blue glass, they will with one accord crawl away from the blue light and take refuge under the red glass. Many other higher creatures share the same dislike to blue rays.

A Terrible Mistake.

There are women who are smart and intelligent, yet they labor under the delusion that no man can tell them a lie and look them straight in the eye at the same time.

Joy's recollection is no longer joy while sorrow's memory is sorrow still.—Byron.

THE TAIL OF A COMET.

Its Ever Changing Mass and Why It Flees From the Sun.

The tail of a comet is not formed of the same particles which composed it yesterday or even an hour or a moment ago. It is constantly being renewed at the expense of the nucleus. As the long stream of black smoke from the neighboring factory or mill is being continually renewed by fresh particles of carbon released by the combustion going on in the furnace below, so is the wonderful luminous train of cometary bodies being constantly replenished by particles flying from or rather driven from the nucleus by the intense heat of the sun.

Then, again, how infinitely small and how intensely luminous must these particles that go to make up the tail of a comet be! This thought is suggested by the fact that it has been proved that in some cases the nucleus of comets which are only a few hundred miles in diameter will have enormous fanlike tails stretching across space for a distance exceeding 200,000,000 miles and having a bulk exceeding that of the sun by more than 10,000 times! Professor E. E. Barnard beautifully illustrates the formation of a comet's tail by "supposing" thus: "Suppose, for example, that

In some South American tribes the women draw the front teeth, esteeming as an ornament the black gap thus made.

In New Guinea the ladies wear nose rings, piercing the nose in the same fiendish way that civilized women pierce the ears.

His Working Clothes.

Lord Ellenborough once reproved a bricklayer for coming to be sworn in his usual habiliments. "When you have to appear before this court it is your bounden duty to be clean and decent in your appearance." "Upon my life, if it comes to that," said the bricklayer, "I'm every bit as well dressed as your lordship." "How do you mean, sir?" exclaimed the chief justice angrily. "Well, it's just this. You come here in your working clothes, and I come in mine."

It was very seldom, however, that anybody got the better of Lord Ellenborough. A witness dressed in a fantastical manner and who had given discreditable evidence was asked in cross examination what he was. "I employ myself," he said, "as a surgeon." "But does any one else," inquired the chief justice, "employ you as a surgeon?"

He Stooped to Conquer.

English newspapers tell of a young cabman in Birmingham who by his resemblance to her dead son attracted the fancy of a wealthy old woman. She bequeathed him a fortune on condition that he became an educated gentleman. The cabman studied the classics enough to fit himself for Oxford or Cambridge, but doubted whether he knew enough of the manners of young gentlemen to conduct himself properly in their society. So, putting pride in his pocket, he obtained a place as "scout" or servant, at one of those seats of learning and profited so much by what he saw and observed in this humble position that when he eventually proceeded to the other university as a student he was able to pass creditably.

Cast Iron.

Cast iron is extended the five thousand five hundredth part of its length for every ton of direct strain per square inch of its section. Its elasticity is fully excited when extended the one-thousandth part, and the limit of its elasticity is estimated to be found at the time when it is extended the one thousand two hundredth part of its length. The tensile strength of the longest piece of cast iron ever tested was 45,970 pounds to the square inch.

Breaking Her In.

Husband (newly married)—Don't you think, love, if I were to smoke it would spoil the curtains? Wife—Ah, you are really the most unselfish and thoughtful husband to be found anywhere. Certainly it would. Husband—Well, then, take the curtains down.

Not Altogether Unsuccessful.

Bobby—Went fishing yesterday instead of going to school. Tommy—Catch anything? Bobby—Not until I got home.

More Than Clever.

Ted—Is Sawyer a clever doctor? Ned—Oh, very! He can tell a woman patient she needs to take beauty exercises without offending her.—New Yorker.

Heart and Lungs.

The action of the heart, lungs and digestive system is involuntary, for the reason that it is indispensable to life and must be carried on under all circumstances. If a man had to think of his heart or had to remember that he

irritation—take away hoarseness—check the inflammation—strengthen the lungs—ward off the cough.
All the healing, soothing, curative properties of Canadian Spruce Gum—combined with aromatics. Pleasant to take. 25 cts. bottle.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

FROST LOCKS

Make a Fence of Strength

The heaviest, strongest wires made can't make a strong fence unless the locks are as strong as the wires. A fence, like a chain, is only as strong as its weakest spot.

The New Frost Lock and Frost Wedge Lock are the most unyielding parts of a Frost Fence. They make the whole fence as strong as the strongest wire.

We guarantee to repair—free of charge—any Frost Fence that goes wrong from any cause.

JAS. W. O'SULLIVAN, - Lonsdale
WALTER RUSSELL, - Selby
FRED. PERRY, - Chambers

How Red Rose Tea is Grown

TEA is a native plant of Northern India. Transplanted to Ceylon it lost much of its strength and richness, but gained in fragrance and delicacy.

That is why Ceylon tea is not a strong tea. That is why I blend Indian and Ceylon teas together—that is how the strength and richness, fragrance and delicacy of Red Rose Tea are secured—that is why Red Rose Tea has that "rich fruity flavor."

Red Rose Tea is good Tea
T. H. Estabrooks
St. John, N.B., Toronto, Winnipeg

Calcium was first made in minute quantities by Humphry Davy. In the new process chloride of calcium is placed in a receptacle and fused by electrolysis. An iron cathode forms a basis upon which the molten calcium deposits itself, and the once rare metal builds itself up into an irregular rod resembling a cabbage stalk. When the stalk has grown to the right length it is chipped off and dipped in paraffin wax to preserve it from the action of the air.

Three Strange and Remarkable Men.
As Dumas, the grandfather, prided himself more upon his wonderful strength and skill in athletics than his generalship, as Dumas the second prided himself more upon his knowledge of cookery than the authorship of "The Three Musketeers," so Dumas the third prided himself more upon his knowledge of art than upon the writing of "La Dame aux Camelias." They were three strange and remarkable men.

At Their Own Expense.

"Do you joke writers ever make jokes at your own expense?"

"For the first few years all our jokes are made that way. After that, if we're lucky, we get paid for 'em."

The Bargain.

"You ought to take this horse," said the dealer, "it's a bargain."

"Well, then, I don't want him," said the customer. "I want something to drive, and I never could drive a bargain."

The most beautiful sign of wisdom is a continuing foolishness.—Montaigne.

The Deputy Game Warden

By CLARA TAYLOR

Copyright, 1906, by E. C. Parcells

Harry Taylor, Yale graduate and all round good fellow and a general favorite, although it was known that he had no fortune, had gone into the Maine woods with a party of campers who, like himself, could not well afford the season at Newport. As it was the close season for all kinds of big game, they made little pretense of hunting. They had been in the woods for a week or ten days when Nick Barton, the game warden for that district, happened that way and was put up for the night. Before leaving in the morning he said to young Taylor:

"Look here, now. I have got to go out of the woods for a week, but it won't do to leave this district without a warden. There are plenty of campers coming in, and some of them will run any risk to secure the antlers of a moose. I've got to leave a deputy behind me to travel about and watch, and I'm wondering why you wouldn't fill the bill."

"I have never acted as a policeman yet," replied Harry, with a smile.

"But this is a far different thing. I shall give notice to all the campers I come across that a deputy has been left in the woods and that any interference with the game laws will be duly and rigorously punished."

"But suppose I find the law being violated and make an arrest."

"All you have to do is to take your prisoner before the nearest justice of the peace and state your case. It isn't over twenty-five miles to the nearest magistrate. It will beat fishing and dawdling around all hollow."

Further objections were made and combated, and the upshot of the matter was that Harry Taylor was duly and legally appointed deputy game warden in and for a certain district

until such time as relieved. He hadn't the slightest idea of bestirring himself as an official, and it never occurred to him that he would be called upon to exercise his official authority.

The unexpected was getting ready to happen, however. Four days after the departure of the warden his deputy took a stroll through the woods with gun upon his shoulder. It was simply a matter of conscience with him, and he did not intend to tire himself out. He had heard of no campers within a dozen miles, and he was therefore considerably surprised at hearing the report of a rifle a quarter of a mile from where he sat resting under a tree. He knew that the firearm had been discharged on the shore of a pond surrounded by thickets and known as the haunt of the moose. It was more than likely that, whoever the hunter might be, he had fired at a moose and violated the law.

There was a feeling of authority in the young man's breast as he started out to run down the violator. He did not have much trouble about it. As he neared the lake he heard a wounded animal thrashing about in the grass and water, and, getting still nearer, he could distinguish a person in a canoe. That person was holding the discharged rifle across his knees as he sat and watched the dying struggles of his game. The canoeist was wearing a nondescript garb, and it was three or four minutes before young Taylor made up his mind as to sex and muttered to himself:

"By jingo, but it's a girl camper, and she has surely shot a moose! What the deuce am I going to do about arresting her and conveying her twenty-five miles through the woods?"

Two or three minutes later the moose—for it was a moose, and a big bull at that—ceased his struggles, and the canoe was paddled to the bank.

"That's right—come ashore!" called Taylor. "Do you know that you have killed a moose in the close season and thereby subjected yourself to a heavy fine if not to imprisonment as well? I am a deputy game warden, and it is my duty to place you under arrest."

"Is it—Is it Mr. Taylor?" inquired a girlish voice as the canoe was slowly pushed through the grass to the firm shore.

"Yes, and you—you!"

Taylor stood there for the next two minutes and stared. He had at last recognized Miss Bessie Whitine daughter of the banker. He had met her half a dozen times in society, and it was whispered around the clubs and elsewhere that he had been more than attracted. But she was the last person he expected to meet in the deep woods of Maine.

"Our camp is only two miles away," she explained as he gave her a hand to help her out of the canoe. "I came up the pond hoping to get a shot at a wild fowl, but I have had great luck. While I was resting and looking around a great moose pushed his way through the bushes to drink, and though I fired only one shot, I brought him down. Such antlers! Why, all the girls in the city will envy me when I get back. Do you think they will have it in the papers?"

"I am very much afraid so," he said in a serious voice.

"Why, what is it?"

"Didn't your father or brother tell you that it is against the law to shoot a moose this time of year?"

"Why, no."

"Well, it is, and you have, as I said, laid yourself liable to a heavy fine. There may be imprisonment as well, but I am not sure about that."

"And what—what am I going to do?"

READ AND YOU WILL LEARN

That the leading medical writers and teachers of all the several schools of practice endorse and recommend, in the strongest terms possible, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, "liver complaint," torpid liver, or biliousness, chronic bowel affections, and all catarrhal diseases of whatever region, name or nature. It is also a specific remedy for all such chronic or long standing cases of catarrhal affections and their resultants, as bronchitis, throat and lung diseases (except consumption) accompanied with severe coughs. It is not so good for acute colds and coughs, but for lingering, or chronic cases it is especially efficacious in producing perfect cures. It contains Black Cherry bark, Golden Seal root, Bloodroot, Stone root, Mandrake root and Queen's root—all of which are highly praised as remedies for all the above mentioned affections by such eminent medical writers and teachers as Prof. Bartholow, of Jefferson Med. College; Prof. Hare, of the Univ. of Pa.; Prof. Finley Ellingwood, M. D., of Bennett Med. College, Chicago; Prof. John King, M. D., late of Cincinnati; Prof. John M. Scudder, M. D., late of Cincinnati; Prof. Edwin M. Hale, M. D., of Michigan Med. College, Chicago, and scores of others equally eminent in their several schools of practice.

The "Golden Medical Discovery" is the only medicine put up for sale through druggists for like purposes, that has any such professional endorsement—worth more than any number of ordinary testimonials. Open publicity of its formula on the bottle wrapper is the best possible guaranty of its merits. A glance at this published formula will show that "Golden Medical Discovery" contains no poisonous or harmful agents and no alcohol—chemically pure, triple-refined glycerine being used instead. Glycerine is entirely unobjectionable and besides is a most useful ingredient in the cure of all stomach as well as bronchial, throat and lung affections. There is the highest medical authority for its use in all such cases. The "Discovery" is a concentrated glyceric extract of native, medicinal roots and is safe and reliable.

A booklet of extracts from eminent, medical authorities, endorsing its ingredients mailed free on request. Address Dr. R. V. Pierce, Buffalo, N. Y.

ing," he truthfully answered.

Her eyes flashed for a moment, and then she blushed and smiled and said:

"I didn't think there was such a mean man in all this world."

A Sheridan Retort.

Richard Brinsley Sheridan always maintained that the Duke of Wellington would succeed in Portugal, while his friend General Tarleton had the opinion that he would fail. The matter was one of constant dispute between the two.

Tarleton, who had been wrong, grew obstinate. Consequently, when the news of the retreat of the French at Torres Vedas arrived in England Sheridan, by way of a taunt, said:

"Well, Tarleton, are you on your high horse still?"

"Oh, higher than ever," was the reply. "If I was on a horse before, I am on an elephant now."

"No, no, my dear fellow," said the wit; "you were on an ass before, and you are on a mule now."

The Chestnut Forests of Corsica.

The chestnut forests of the island of Corsica have for ages been the crowning glory of its mountains and valleys, just as at least once in its history they were its salvation by offering to its army of defense a secure fastness and a means of sustenance against invaders. Now disafforestation is in active progress on every hand, and over wide tracts the woods are disappearing, leaving the hills and dales nothing but bleak wastes. Strong protests are being made by many of the older inhabitants against this shortsighted devastation, which, besides destroying the attractions of the island as a resort for tourists, removes the most effective

Vapo-Cresoleum

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Crip, Asthma, Diphtheria

Cresoleum is a boon to Asthmatics

"Vapo-Cresoleum is a long established and standard remedy for all these ailments. It cures because the air rendered antiseptic is carried over the diseased surfaces of the nasal and throat tubes with every breath, giving relief and instant treatment. Those of a consumptive type, or who are sufferers from chronic bronchitis, find immediate relief from coughs or inflamed conditions of the throat."

Vapo-Cresoleum is sold by druggists and sent by mail on receipt of price. A Vapo-Cresoleum bottle containing a bottle of Cresoleum and a bottle of Vapo-Cresoleum for free trial and sample. Write to the manufacturer, J. H. P. Co., 100 N. 3rd St., New York, N. Y.

Lowell, Mass.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them."
M. E. PARKS,
Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely."
MRS. GEO. A. SMITH,
Hayworth, Quebec.

"After 14 years' experience in treating infantile ailments in our home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried."
W. C. WEIR, Pastor Baptist Church,
Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

the great seal empowering him to seize pirates and to take them to some place where they might be dealt with according to law."

The king's right to the goods found in possession of these malefactors was granted by letters patent to the supporters of the expedition, his majesty securing only one-tenth of the spoil. Kidd, however, soon finding that little was to be gained by the adventure, threw off all disguise and hoisted the Jolly Roger.

His rapacity and cruelty were unbounded, and in less than two years he amassed the sum of £200,000. With this he thought to make his peace with the authorities and end his days in luxury, but he was arrested at New York and brought to England, where he was tried and hanged at Execution dock in 1701.—London Saturday Review.

Prince Napoleon.

Prince Napoleon in 1870 was something of a prophet. When he heard of the emperor's declaration of war he hurried to St. Cloud and had a stormy interview with the emperor. He didn't hesitate to say, "It is the emperor who has brought this upon us," and the emperor, while offended at his frankness, admitted that "your presentiments perhaps correspond with mine." Then the prince fired his last shot and showed that, though he might go astray in many things, he knew of the weakness of France and the strength of Germany. He turned on his heel and, with that bitterness which he didn't hesitate to exhibit when occasion required, said: "So be it; so be it! Let us, however, make haste to pack our possessions, for we are already beaten." And so the result proved.

The Saltiest of the Salt Seas.

Some idea of the saltiness of the waters of the Dead sea may be gained from the comparison made below. The Dead sea is situated in Palestine, 20 miles east of Jerusalem. It is 35 miles long and from 10 to 15 miles wide, with an average depth of 20 fathoms (120 feet). Common ocean water contains but 30 parts of salt to the 1,000. Those of the Dead sea contain 250 parts to the 1,000, which makes the briny solution exactly one-fourth salt.

Echoes From Horses' Skulls.

Those curious twists and turns superstitions take are to be found in the introduction of horses' skulls in or about the church buildings in England and Scotland, the reason alleged being to help the sound in church. This habit is unquestionably a relic of heathenism where an animal was sacrificed. Some years ago, when an old meeting house in Edinburgh was pulled down, the sounding board space above the pulpit was found to be filled with horses' skulls. In some parts of England there still exists the idea that if a horse's head is buried in a field there will be an echo.

Success In Society.

The secret of success in society is a certain heartiness and sympathy. A man who is not happy in company cannot find any word in his memory that will fit the occasion. All his information is a little impertinent. A man who is happy there finds in every turn of the conversation occasions for the introduction of what he has to say. The favorites of society are able men and of more spirit than wit, who have no uncomfortable egotism, but who exactly fill the hour and company, contented and contenting.—Emerson.

An Artist's Whim.

In the church of Tasow, in the government of Kursk, Russia, the altar

WHAT OTHER PAPERS SAY.

Goderich Signal.

Pretty nearly every town of any pretensions in Ontario is after one of the normal schools to be established under the Government's new scheme for teacher-training. We see no reason why Goderich should not be in the running. Every town that asks will not receive, but it won't do any harm to file our request with the rest.

Brantford Expositor.

Writing to the New York Herald, Frank G. Carpenter reports that he finds the new towns of the Canadian West strongly in favor of municipal ownership, and that two years ago Regina took over its street lighting and is now furnishing a superior light at a reduction of twenty per cent. below former prices and is making a profit.

Toronto Star.

A New York Concern has got itself into trouble by selling water under a high sounding name for \$1 a bottle. The purchasers are sore, and not only want their money back, but want the dealer placed where he will have to live on the water for a few months with a small measure of bread on the side. However, by thinking about four hours steadily and consulting some of the recent magazines, you may be able to discover that worse things than water are being sold for \$1 a bottle.

Botanygeon Independent.

It is a great deal easier to make a rhyme for pie than to get the price to pay for it. Bliss Carman, a gentleman who figures as a poet, declares himself a bankrupt. The trouble with Bliss is that he is not in the right class. There is no money in pretty stuff about flowers and butterflies. Advertising rhymes pay better, and any kind of doggerel stuff on popular, every-day topics bring big money. As a sure money-getter there is nothing like the rhythm of the merry buck-aw. One dollar and a half per day, sleep like a top, and digest nails.

Ottawa Journal.

At Toronto Sir Wilfrid Laurier uncorked a vintage of as lofty sentiment as the mere human imagination could devise. If at Ottawa he lives up to these sentiments he may assure himself that he has the good old grit vote solid.

Temiskaming Herald.

New roads and better roads are imperatively necessary to the opening up of the agricultural land of Temiskaming. A better postal service, a cheaper and a more efficient telegraph system, less exorbitant express charges and reduced freight rates are vitally necessary to the manufacturing development of Temiskaming towns. It is from New Ontario that the bulk of the Provincial revenue is drawn, while the settlers bears with the firmly established his full, fair share of Federal taxation. Is Temiskaming unreasonable in asking that something be spent in return?

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

THE BACKBONE.

Its History Linked With a Theory of Animal Evolution.

The history of the backbone, like that of most life, is not altogether a majestic upward evolution. It has its tragedies and its setbacks, its hopes and failures. In the waters along our seashore are creatures, some sponge or jelly-like others with strange bulblike

CAPTAINS ON MANY SEAS NEVER WITHOUT PE-RU-NA

"Give Me My Compass and Pe-ru-na and I Will Steer Clear of All Wrecks."

Pe-ru-na Known and Praised on Land and Sea.

Capt. L. T. Carter, 128 10th Ave., Pensacola, Fla., writes:

"A sick sailor is a pretty helpless man. I have found that Peruna will do more to restore one than any other medicine I know, and I have carried a couple of bottles on board for many seasons."

"Seven years ago Peruna cured me of bronchial trouble in a few weeks and gave me such new life and nerve force that I certainly believe in telling you of it."

"Give me my compass and Peruna and I will steer clear of wrecks of all kinds and land in port safe and well with vessel and men."—L. T. Carter.

Capt. E. A. Watson, M. E., 48 Elizabeth street, Ottawa, Ont., writes:

"Peruna has my heartiest endorsement. If there is any place that you are helpless when ill, it is on board a steamer, at sea, miles away from any assistance."

"Sometimes two or three of my men would be sick at one time and seriously cripple the force, but since we have learned of the value of Peruna, by taking a few doses they recuperate very quickly."

"We use it for colds, lung trouble and kidney diseases, and have also found it very fine for a gripe."

"Peruna is always one of the most important supplies of my steamer."—E. A. Watson.

With a bottle of Peruna on board sailors have a remedy on which they can rely.

Commodore U. S. Navy.

Commodore Somerville Nicholson, of the United States Navy, in a letter from 1837 R street, N. W., Washington, D. C., says:

"I unhesitatingly recommend Peruna to all persons suffering from catarrh."—S. Nicholson.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

The Most Decisive Day In the History of the World.

The single day in the world's history which was fraught with the most tremendous consequences to mankind was the day on which the battle of Marathon was fought. The handful of tiny states that inhabited Greece had developed faculties which indicated that man had advanced another stage toward the highest ideals.

Foremost among those little nations was Athens, which state, too, contained the germs of human freedom. It was the forerunner of the democracies of the world. But the very existence of Athens and Greece was threatened by the huge barbaric empire of Persia. Darius had sent out his hordes of warriors to add the Grecian states to his vast dominions. Face to face his forces met the Athenians on the plains of Marathon.

Hitherto invincible in the field, the Persians looked upon the little army

wings in place of arms and always held them in an erect position, although ready to take flight at the slightest provocation. From the hip to the single knee the flesh was covered with large, well arranged feathers. From the knee joint to the foot the leg was scaled, like that of the common barnyard fowl, the spot where the feathers left off and the scales commenced being marked with a large red less eye, which seemed to be altogether incapable of voluntary motion. The neck, head and general outlines of the face were those of a woman, but the ears were large and set very low, almost on the neck.

The head was covered with a queer mixture of scales, feathers and hair but the oddity of the whole "upper story" was a pointed horn, which rose just in the edge of the hair on the center of the forehead. This horn was three inches in length, and, according to Zahn, "even a farmer would have

You can write Mrs. Pinkham about yourself in strictest confidence.

THE FATHER'S CARE

Like All Things Deep and Sublime His
Love Passes Comprehension.

Like as a father pitieth his children
so the Lord pitieth them that fear him.
—Psalm ciii., 13.

Formal creeds have little to say of the
Lief in the overruling care of the All
Father. Perhaps the belief is so nearly
universal as to be without the range of
debate so dear to creed makers. Yet at
all times, in all lands, man, whether
the savage, the oriental mystic, or the
cool headed Christian, in various ways
and with different phrases, has recog-
nized the hand that, from behind the
scenes, touched his affairs and often
seemed to order his life. Whether it be
the hand of force or of friend, the fact
has been felt.

True, the laziest man is apt to have
the readiest sense in the intention of
Providence to care for him, to send him
bread well buttered; the foolish and
thoughtless depend on heaven to do
their thinking, and many court bank-
ruptcy while praying for solvency. But
the improvidence of man does not dis-
prove the providence of God. So far
from encouraging sloth and recklessness
this truth provokes to progress by the
assurance of the corporation of infinite
powers with

OUR BEST ENDEAVORS.

It is a thought we cannot escape; the
all within the circle of his love; and that
all wish must be the all loving. The
when its objects are in distress, in per-
plexity, or need, when it might succor,
save, or suggest the way of success. If
there is a heart of love there is a hand
of help.

Yet it seems too great a thought. What
are we but dust on the wheels on the
universe. Often do our fainting hearts
question whether there be any, outside
our own little circle, who care whether
we suffer, whether we succeed. Can it
be that the petty affairs of a life that
passes like the hoar frost before the
morning sun can even interest, still less
call forth the aid, of the one in whom
we all live and move and have our be-
ing?

Despite all questionings men will ever
go on praying to that one; they will

turn to an ear that hears, they will seek
a heart that feels, and look for hands
reached out in hours of necessity. Ex-
perience indorses their faith. Nearly
all can look back and see where des-
tiny has seemed to breathe upon them;
their old plans willed, and new ones,
new ways sprung up, bearing other and
fairer flowers than they had ever dream-
ed; a mighty, mysterious power had in-
tervened.

What does it all mean? That we are
but puppets in these strange unseen
hands; that we can neither will nor
work for ourselves? No; it but means
but what poets sang long ago when,
seeking after that which far transcends
all thought and all imagery, they cried,
"Surely thou art our father." That
which was best in them, the holy fire
of fatherhood became a mirror in which

THEY SAW THE INFINITE

From the source of all life humanity
has learned the great lessons of family
care and provision. All that is good in
our families is true of this great family
of all mankind. The great purpose of
this family, as of all families, is the de-
velopment of the highest, fullest life in
its members. Fatherhood regards the
provision of food, clothing and shelter
but as incidental to the great purposes
of training the children.

This is the purpose of the father of
us all, to develop the best in us. When
our weak hearts cry for ease, for rest,
for pleasures, he sends the task, the sor-
row, the loss. When we think all life's
lessons well learned he sends us up to
higher grades with harder tasks. Yet
ever over all is the pitying, compassionate
yearning of a father's heart that
never forgets the weakness of the child.

Wisely the father's love seems to hide
its working. All the child can do is to
bend every effort to do his best, to work
out the father's plan so far as he knows
it, to know, through all, that God is
good. Then, when the child grows to
the man, the man toward the divine,
the things that seemed strange are made
plain in the light of the father's face.

HENRY F. COPE.

INTERNATIONAL LESSON, MARCH 4.

Lesson IX. Jesus Tells Who Are Blessed.

Golden Text: Matt. 5. 8.

LESSON WORD STUDIES.

Note.—The Text of the Revised Ver-
sion is used as a basis for these Word
Studies.

A Connected Discourse.—The fact that
the other gospels contain parallel ac-
counts of shorter portions of the passage
in Matthew known as the Sermon on the
Mount has led some to question whether
in reality Jesus did deliver these teach-
ings in the form of a connected dis-
course, the suggestion of some commen-
tators being that possibly Matthew
merely collected the teachings of Jesus
concerning the kingdom of heaven,
uttered at different times and under
different circumstances, into a con-
nected whole, not intending to give the
impression that he was recording what
he considered to be a connected address
or sermon. But a careful reading of
Matt. 5. 1, 2, ("And seeing the multi-
tudes, he went up into the mountain;
and when he had sat down, his disciples
came unto him; and he opened his
mouth and taught them"), with Matt. 7.

"a mean inclining to a defect." Chris-
tian meekness is based on humility,
and is an outgrowth of renewed nature
rather than being solely a natural
quality.

6. Righteousness—Rightness of life
and conduct in the sight of God.
Shall be filled—This verb in the ori-
ginal is very strong, indicating com-
plete satisfaction of hunger and thirst.

8. Pure in heart—Heart here refers to
inner soul-life controlling the entire
personality (comp. Gen. 42. 28; Psa. 19.
14; Prov. 4. 23; Luke 12. 34).

Shall see God—The development of
Christian character subsequent to the
cleansing of life's motives brings with
it a gradual unveiling of God, whose
power, holiness, and love appear more
and more plainly to those who are pure
in thought and life.

9. Peacemakers—Primarily those who
heal divisions, but also those whose
life because of its purity and loving ser-
vice is a benediction to all about them,
bringing, as it were, the peace of God
into the environment in which it is
spent.

Sons of God—Those most akin to the
divine nature, whose presence, like that
of God, brings peace and blessing.

10. Persecuted for righteousness' sake—All whose sincere effort to
live a godly life in this world is misun-
derstood and for that or other reasons
opposed and ridiculed may be said to be
persecuted for righteousness' sake.

11. Falsely—The mere fact that a
person is persecuted and evilly spoken
of, even if the persecution and slander

son, Lieutenant the Hon. F. H. S. Rob-
erts, who lost his life in gaining the V.
C. at the battle of Colenso.

There are some 200 odd recipients of
the Victoria Cross still alive. Among
them are three Field Marshals—Lord
Roberts, Sir George White, and Sir Evelyn
Wood, and the Admiral of the Fleet,
Sir Nowell Salmon. Among other well-
known names on the list of survivors
are General Sir Redvers Buller, Vice-
Admiral Sir A. K. Wilson, General Sir
Dighton Probyn, and three rear-admirals
(Lucas, Bythesea, and Raby), who were
among the first four to receive the decoration,
Rear-Admiral Lucas being actually
the first.

The decoration has stood the test of
fifty years, and still preserves its unique
character, and it is to be hoped that our
soldiers and sailors will always regard
as the most coveted distinction that
cheap-looking little bronze medal—the
Victoria Cross.

"HOUSE-CLEANING A SHIP

THOROUGHLY OVERHAULED AT END OF EVERY TRIP.

Every Part of the Vessel, From First
Cabin to Steerage, is
"Touched Up."

"There is a general impression held
by many people," said the head stew-
ard of a big Atlantic liner to the writer
recently, "that just as soon as a ship
docks and the passengers have passed
down the gang-plank the crew make a
bee-line for their relatives or friends,
and have a good time on shore until
the return trip begins. This, I can as-
sure you, is far from being the case, for
our hardest task begins almost the hour
the vessel casts her anchor. When I
tell you that between docking and de-
parture a liner has to be thoroughly
overhauled and cleaned from stem to
stern, inside and out, and all within
thirty-six hours or less, you will per-
haps begin to realize that our job is not
a light one.

"On the completion of each trip the
hull of the vessel is entirely re-painted,
the funnels scraped and brightened with
a fresh coat of color, every bit of the
machinery overhauled, and even the
masts and rigging 'touched up.'

"There is accommodation in our ves-
sel for close on 3,000 souls, the greater
portion, of course, being stateroom pas-
sengers. But the mere cleaning of the
first cabin dining saloon, where we can
seat nearly 500 guests without any re-
lay, is in itself a big task. The carpets
have to be taken up and beaten, each
table has to be re-polished, the floor
has to be cleaned until it

SHINES LIKE A MIRROR.

every bit of paint and gilding has to be
carefully washed, all the chairs inspected
and re-polished, and a hundred other
things done before it can be passed as
ready for the passengers. And a similar
performance has to be gone through
with a second dining saloon, the din-
ing-rooms, the library, the smoking-
rooms, etc. Then there are, perhaps,
400 state-rooms which have to be treat-
ed in the same way, as well as forty
bathrooms.

"But, perhaps, the biggest order of the
lot is connected with the 'furnishings.'
How would you like to have to sort,
count, and check over 30,000 pieces of
linen? It takes time, I can tell you,
though we get so used to it that the
work is performed marvelously quickly.
As you are probably aware, no linen
is ever washed on board, and any man
found laundering even a duster would
be dismissed as soon as we reached
port. When the linen has been sorted
and counted it is placed in sacks, each
sack containing from 200 to 250 pieces,
and then sent in vans to the laundry.
On coming back it has all to be gone
over again, carefully re-counted and
stored.

"Next comes the silverware, which
also has to be stored and counted, and
which may number anything from 15-

The Strike at Benton's

No one ever questioned old John Ben-
ton's courage or strength of will; as the
townspeople were wont to say, his nerve
and his will were forged in his own
foundry—he was twice a man of iron.
But never was the strength of his char-
acter more apparent than when he sat
at his office table, facing the striker's
deputation. He sat there alone, idly
strumming his fingers on the blotting-
pad, with as little show of concern as if
he were waiting while someone "looked
up a train" for him. And yet he knew
that the men who stood whispering to-
gether at the farther end of the room
were desperate, and represented 300 men
who were more desperate still.

"Come, make up your minds," he said,
quietly, after waiting silently for some
time. "You know the terms. Surely it
does not take so long to decide whether
to accept or reject them?"

The men looked at him with gleaming
eyes, and one of the youngest of them,
a handsome, stalwart fellow who had a
certain indescribable air of refinement
about him, took a step forward and
answered, hotly: "We are not consider-
ing them, sir, for they are the same as
drove the men on strike seven weeks
ago. If we rose against them then, how
much more certainly shall we reject
them now, after what we have suffered?
We expected you would offer some con-
cession. If we have suffered in mind and
body, you have suffered in pocket.

"I have no thought of pocket now,
Hemstoun—none at all, said the iron-
founder. "I am fighting you on princi-
ple. I could not run the foundry on
your terms but at a heavy loss."

"It 'as bin shut down at a loss for
seven weeks, so come now!" cried one
of the older men. "An' it'll be blown up
at a bigger loss if this goes on!"

Mr. Benton glanced at the speaker
with flashing eyes, and a grim smile
crossed his face.

"You will not obtain by threats what
you cannot secure by arguments," he
said sternly.

"Hill didn't mean to threaten, but to
warn you, sir," said the young man,
Hemstoun, gently. "The men are des-
perate. We are here because we are
moderates—men who have succeeded in
keeping our heads."

"Oh, I know," returned the ironmas-
ter, with a little gesture of impatience.
"You, Hemstoun, are a man of good edu-
cation, and I respect you for your mod-
eration, and I fully understand how you
have dominated the unruly spirits you
represent. But whether the men are
desperate or not is beside the question,
for simply on principle, I say—and now
let me have a final answer—do you
agree or refuse to come back on my
terms?"

"And are we to return to the men and
tell them you refuse on principle to con-
cede a single point to meet them?" cried
the young man. "And desperate men
do desperate deeds. Give us some offer
we can carry back to the men—if only
a penny a day! Some of us have beggar-
ed ourselves, spent all the savings of
years, to keep the men and their fam-
ilies from starvation."

"Who has—which of you?" demanded
the ironmaster, incredulously.

"I have," answered Hemstoun, evi-
dently surrendering reluctantly to the
necessity of supporting the statement
he had hastily made.

"So you have been aiding the strikers
out of your wages of £3 something a
week? Or have you disposed of one of
your wonderful inventions?"

"It can serve no useful purpose for us
to quarrel, sir," Hemstoun responded in
a low voice. "I am ambitious; and my
ambition is nearer to your heart than
you suspect. Because I am ambitious I
have saved and yet given away all my
savings to feed the families of your men
in the hope of keeping back the tide of
their violence. I have jeopardized my
ambition. Will you with all your

he considered to be a connected address or sermon. But a careful reading of Matt. 5, 1, 2, ("And seeing the multitudes, he went up into the mountain: and when he had sat down, his disciples came unto him: and he opened his mouth and taught them"), with Matt. 7, 29, ("And taught them as one having authority, and not as their scribes. And when he came down from the mountain, great multitudes followed him"), makes it plain that the author of the gospel himself meant to convey the impression, and consequently that he himself believed, that what he recorded in that part of his narrative which we now know as chapters 5, 6, and 7, was a connected discourse of Jesus.

It is not unlikely that Jesus, having clearly set forth in one connected sermon certain principles referring to the kingdom of heaven, repeated under other circumstances and before other audiences parts of this longer sermon, as occasion demanded that separate truths already offered be emphasized. A study of the sermon itself indicates that it is a connected whole, with a definite theme and method of treatment. Its theme is the Kingdom of Heaven, in verses 3-10 of chapter 5 Jesus speaks of the subjects or citizens of this kingdom, and of their character and courage, and their responsibility. He next speaks of the kingdom of heaven in its relation to the law, and to the Pharisees, rules with which that law had been hedged about. In the last part of the sermon he speaks of the characteristics peculiar to the kingdom; the principles on which judgment is administered, the Father's love for the children of the kingdom, and the narrow entrance thereto, the danger of false guides, and a parable of the subjects of the kingdom as distinguished from those who are not.

Verse 1. The multitudes. In the last verse of the preceding chapter Matthew mentions the multitudes which were following Jesus everywhere as he went from place to place in Galilee. With a reference to these multitudes he now introduces his narrative of what occurred on one special occasion.

The mountain. The use of the article indicates that a definite well-known hill or mountain was intended, but which one it is not possible to say. Deitzsch calls the mount of beatitudes the "Sinai of the New Testament."

His disciples. The word "disciples" means literally learner, and is here to be taken in its broader sense, as not restricted to the twelve.

2. Taught them. That is, he discipled and the multitudes with them.

3. Blessed.—The word translated "blessed" is thought to come from a root word meaning good, in the sense of outward prosperity. In early classical Greek it was applied more especially to the gods who were considered great because of their power and dignity rather than because of their goodness or holiness. A little later it was applied also to the dead, especially to heroes who had died in battle. The Greek philosophers from Socrates onward use it in a sense including the moral element, but in the Bible alone is the word lifted into the region of the spiritual as distinguished from the merely material and intellectual. Even in the Old Testament usage of the term there remains more of the sense of outward prosperity than in the New Testament. It is interesting to note how this word, "passed up into the higher region of Christian thought and was stamped with the gospel signet and laden with all the richness and significance of gospel blessedness."

Poor in spirit—Those conscious of their deep spiritual needs.

4. They that mourn—There is nothing in the meaning of the word "mourn" or of the sentence in which it occurs that would limit this phrase to those who mourn on account of their spiritual poverty or sinfulness, though it is not improbable that Jesus had such especially in mind.

5. The meek—We have here another word which Christianity has lifted to a higher plane. Literally, the word means mild or gentle, but the quality of meekness in human character was not considered praiseworthy by heathen philosophers. Thus Aristotle calls meekness

sake.—All those sincere effort effort to live a godly life in this world is misunderstood and for that or other reasons opposed and ridiculed may be said to be persecuted for righteousness' sake.

11. Falsely—The mere fact that a person is persecuted and evilly spoken of, even if the persecution and slander is out of all proportion to the offense, is not sufficient; only when all this is brought upon a person wholly unjustly, that is, when the person is entirely innocent, is there cause on his part for the rejoicing mentioned in the next verse.

12. The prophets that were before you—Jesus thus seems to place his disciples on an equality with Old Testament prophets. We have here a hint at the broader meaning of that word "prophets." A prophet was a teacher, one who proclaimed the truth, the term not being limited in its application to one who foretold future events.

13. Ye are the salt of the earth—As such, Christ's disciples are to mingle in human society, permeating its every part and preserving it from corruption through their wholesome influence.

14. The light of the world—Through Christianity comes the enlightenment of mankind as well as the purification and preservation of human society.

15. The bushel—The common measure found in every Jewish household. The use of the article again indicates that the reference is to a familiar object.

16. Glorify your Father who is in heaven—That is, give to him the credit and the glory for the goodness found in the Christian disciple.

THE JUBILEE OF THE V. C.

Most Coveted Decoration a British Subject Can Wear.

Fifty years ago the Victoria Cross was instituted by Queen Victoria. A little bronze cross, made out of cannon taken at Sebastopol, intrinsically worth nine cents, it is, nevertheless, the most coveted of all decorations that a British subject can wear. The reason for the high value set upon it is to be found in the simple legend on its face: "For Valor." The cross, which is awarded to soldiers and sailors for valor in the face of an enemy, has been won 522 times; and as it is awarded impartially to officers and men, being thoroughly democratic in its regulations, the men have won slightly more than the officers.

It is interesting to pick out the regiments that have won the most V. C.'s. At the head of the list—if we accept the Royal Artillery and Royal Engineers as being too large corps to be counted as regiments—are the South Wales Borderers, with sixteen to their credit. They won the greater number of them in Zululand, at Isandhlwana and Rorke's Drift. The Rifle Brigade is second on the list, with fifteen, and the 9th Lancers, the King's Royal Rifles, and the Gordon Highlanders come next with thirteen each, and they are followed by the Camerons and the Black Watch with ten each. The campaign which provided most V. C.'s was the India Mutiny, in the course of which 182 heroes won the decoration; the Russian War accounted for 111, and the late war in South Africa for seventy-eight, the Zulu War for twenty-three, the Afghan War (1878-80) for sixteen; the New Zealand Campaign for twelve, and the operations in the Northwest Frontier of India (1897-8) for ten. These wars accounted for 432 crosses, and the remaining ninety were distributed among the many other campaigns in Africa, India, and elsewhere, and have been fought during the past half century.

In a few rare instances the V. C. has been won by more than one member of a family. The most conspicuous case is that of the Gough family, which can boast of three V. C.'s—General Sir C. I. S. Gough, General Sir H. H. Gough, and Lieut.-Colonel J. E. Gough, all of whom are, happily, still alive. The first two were brothers, and the last named a son of the second. Major-General P. H. Sartorius and Colonel R. W. Sartorius are another case of brothers wearing the decoration. Another instance of a father and son winning the cross is seen in Lord Roberts and his gallant

and then sent in vans to the laundry. On coming back it has all to be gone over again, carefully re-counted and stored.

"Next comes the silverware, which also has to be stored and counted, and which may number anything from 15,000 to 20,000 pieces. During a trip hundreds of spoons and forks mysteriously disappear and are

NEVER ACCOUNTED FOR.

Passengers, I believe, think it perfectly legitimate to annex a spoon or fork as a souvenir of the trip, and though we sometimes catch them in the act we cannot say anything. But the loss to the company in this way during a year must be tremendous.

"The glassware on a big liner very seldom numbers fewer than 25,000 to 30,000 pieces, while the number of dishes, plates, cups, etc., often reaches 60,000. Every bit of this glass and china has to be washed and polished during the 'house-cleaning,' though they have been kept scrupulously bright during the voyage. There is a man in charge of each department—one for the silverware, one for the linen, one for the china, etc., and each of these men is in turn answerable to me, bringing me his report and informing me of the total number of pieces that are on hand, so that I can see at a glance what the loss has been during the trip.

"Our laundry-bill for a single 'house-cleaning,' you may be interested to learn, rarely falls below \$1,250, while the account for soaps, cleaning materials, paints, etc., always amounts to a high figure. Every sheet, towel, tablecloth, etc., which is found to be frayed or worn

IN THE SLIGHTEST DEGREE

is thrown aside and its place taken by a new one, for no 'tags' are tolerated on a first-class liner. During a trip we use something like 300 Turkish towels, each as large as a sheet, and a thousand smaller ones for the first cabin alone. "In the steerage the cleaning is conducted on somewhat different lines. Everything that might be damaged by water is taken out of the 'cabins,' if you can call them cabins, and then the hose is brought into play. The water penetrates every nook and cranny, and the whole place is scrubbed from top to bottom. You might suppose that this wholesale 'swabbing' would leave the steerage somewhat damp, and so it does, but by the time we are ready for leaving port everything is as dry as a bone. Altogether 'house-cleaning' on a liner is a bigger job than you might at first guess, and I sometimes think myself that it is rather remarkable that we are able to get through so much in so small a space of time."

NEW LIMIT IN MEASUREMENT.

Can Get Records up to One Seventy-Millionth Part of an Inch.

Dr. P. E. Shaw, physical science lecturer at University College, Nottingham, England, has constructed an instrument of marvelous delicacy, whereby measurements up to the one seventy-millionth part of an inch can be made. He has been experimenting almost nightly on this instrument for five years, working in vaults under the university. He had to work at night, when all the factories were closed and traffic in the street was suspended.

The apparatus has to be suspended by rubber bands from a specially-made frame in a box covered with thick felt. The delicacy of the instrument is such that the vibrations of an engine 100 yards from the vault make it impossible to work with it.

It has already been applied to practical use in the improvement of telephones. It will measure the smallest audible movement of the telephone diaphragm. It is also expected to benefit the wireless system, acting as the most delicate coherer, and will aid physicists in studying nature, possibly even the movements of the molecules of matter.

When a man says he will, he will if he can. When a woman says she will, she will if she wants to.

a new voice. I am ambitious, and my ambition is nearer to your heart than you suspect. Because I am ambitious I have saved and yet given away all my savings to feed the families of your men in the hope of keeping back the tide of their violence. I have jeopardized my ambition. Will you, with all your riches, and with your ambitions realized, do nothing?

"Well, well," muttered the ironmaster, rising and pushing back his chair. "Discussion leads us nowhere. I take it that, on behalf of the men, you finally refuse my terms?"

The young man hesitated. He looked penetratingly at his master's expressionless face, and drummed his fingers nervously on the crown of his hat.

"If I were you, sir," he said, in a grave voice, as the last of the others left the room, "I should send Miss Benton away from the town for a time."

"If you were me, sir," retorted the ironmaster, re-seating himself and picking up an unopened letter, "you would do nothing so flagrantly weak."

Hemstoun went out without replying. He was thinking of his own words, and wondering if Mr. Benton had inferred his secret from them. He was wondering the same thing three hours later, when he walked into the lamplight in the drawing-room on the ironfounder's house on the hill behind the town. It was natural enough that the question should have recurred to him as he looked into Kathleen Benton's face.

That young lady, although at home in her own room and accustomed to receiving visitors of different sorts, was visibly embarrassed as she stood in the glowing light of the lamp and half shyly extended her hand to one of her father's foremen. And during the moment that he held it her eyes searched his with a queer, nervous intensity.

"I can guess you have come, Mr. Hemstoun," she said, drawing her breath deeply as she withdrew her hand. "But it is hopeless; I have no power to move my father. He is a most generous-hearted man, but nothing can shake his determination."

"Oh, I know," he replied, gravely. "I have not come to ask your help, but to advise you to leave the town for a little while. The last straw was laid on the camel's back this afternoon, and—the men have resolved on violence."

"Sit down," she said, gently. He took a chair just beyond the radius of the lamplight, and she moved slowly to the sofa in a dark corner of the room. Neither realized that the other was seeking the shade, or they might have guessed something of each other's thoughts from their own feelings.

"Father would not leave," she said, "and I could not go without him."

"I expected you to say that, and I have no satisfactory arguments available," he answered, uneasily. "But don't you think you might beat Mr. Benton at his own game and take him away for a time. There's trouble ahead, I know."

"Never mind the strike," she replied, smiling; "tell me about yourself—your ambitions. My father speaks most highly of your abilities."

"I have a happy knack of getting over difficulties," he responded, somewhat shyly. "I have recently hit—palpably hit—upon a cheap process of hardening steel, which some of the cleverest men have been striving after for years and years. That is sheer luck, for there are fortunes in it; I can undercut the world for ship's plates."

"Really?" said Kathleen. "Listen!" she exclaimed, in a low voice, raising her hand to enjoin silence.

He paused, watching her. Slowly an expression of doubt stole into her fine eyes, while his face became grave.

"Soldiers?" she said, inquiringly.

"Is Mr. Benton in the house?" he asked, shaking his head in answer to her question.

"I scarcely know."

"Are you on the telephone?"

"There's a private wire in connection with the foundry. You think it is the men?" she said, rising and approaching him.

"Yes," he replied, jumping up and standing before her. "But it may not be anything—just a demonstration. Don't be uneasy."

"They must not find you here," she

he considered to be a connected address or sermon. But a careful reading of Matt. 5, 1, 2, ("And seeing the multitudes, he went up into the mountain: and when he had sat down, his disciples came unto him: and he opened his mouth and taught them"), with Matt. 7, 29, ("And taught them as one having authority, and not as their scribes. And when he came down from the mountain, great multitudes followed him"), makes it plain that the author of the gospel himself meant to convey the impression, and consequently that he himself believed, that what he recorded in that part of his narrative which we now know as chapters 5, 6, and 7, was a connected discourse of Jesus.

It is not unlikely that Jesus, having clearly set forth in one connected sermon certain principles referring to the kingdom of heaven, repeated under other circumstances and before other audiences parts of this longer sermon, as occasion demanded that separate truths already uttered be emphasized. A study of the sermon itself indicates that it is a connected whole, with a definite theme and method of treatment. Its theme is the Kingdom of Heaven. In verses 3-16 of chapter 5 Jesus speaks of the subjects or citizens of this kingdom, and of their character and courage, and their responsibility. He next speaks of the kingdom of heaven in its relation to the law, and to the Pharisee rules with which that law had been hedged about. In the last part of the sermon he speaks of the characteristics peculiar to the kingdom: the principles on which judgment is administered, the Father's love for the children of the kingdom, and the narrow entrance thereto, the danger of false guides, and a parable of the subjects of the kingdom as distinguished from those who are not.

Verse 1. The multitudes.—In the last verse of the preceding chapter Matthew mentions the multitudes which were following Jesus everywhere as he went from place to place in Galilee. With a reference to these multitudes he now introduces his narrative of what occurred on one special occasion.

The mountain.—The use of the article indicates that a definite well-known hill or mountain was intended, but which one it is not possible to say. Delitzsch calls the mount of beatitudes the "Sinai of the New Testament."

His disciples.—The word "disciples" means literally learner, and is here to be taken in its broader sense, as not restricted to the twelve.

2. Taught them.—That is, his disciples and the multitudes with them.

3. Blessed.—The word translated "blessed" is thought to come from a root word meaning great, in the sense of outward prosperity. In early classical Greek it was applied more especially to the gods who were considered great because of their power and dignity rather than because of their goodness or holiness. A little later it was applied also to the dead, especially to heroes who had died in battle. The Greek philosophers from Socrates onward use it in a sense including the moral element; but in the Bible alone is the word lifted into the region of the spiritual as distinguished from the merely material and intellectual. Even in the Old Testament usage of the term there remains more of the sense of outward prosperity than in the New Testament. It is interesting to note how this word "passed up into" the higher region of Christian thought and was stamped with the gospel signet and laden with all the richness and significance of gospel blessedness.

Poor.—In spirit—Those conscious of their deep spiritual needs.

4. They that mourn.—There is nothing in the meaning of the word "mourn" or of the sentence in which it occurs that would limit this phrase to those who mourn on account of their spiritual poverty or sinfulness, though it is not improbable that Jesus had such especially in mind.

5. The meek.—We have here another word which Christianity has lifted to a higher plane. Literally, the word means mild or gentle; but the quality of meekness in human character was not considered praiseworthy by heathen philosophers. Thus Aristotle calls meekness

sake.—All those sincere effort exerted to live a godly life in this world is misunderstood and for that or other reasons opposed and ridiculed may be said to be persecuted for righteousness' sake.

11. Falsely.—The mere fact that a person is persecuted and evilly spoken of, even if the persecution and slander is out of all proportion to the offense, is not sufficient; only when all this is brought upon a person wholly unjustly, that is, when the person is entirely innocent, is there cause on his part for the rejoicing mentioned in the next verse.

12. The prophets that were before you.—Jesus thus seems to place his disciples on an equality with Old Testament prophets. We have here a hint at the broader meaning of that word "prophets." A prophet was a teacher, one who proclaimed the truth, the term not being limited in its application to one who foretold future events.

13. Ye are the salt of the earth.—As such, Christ's disciples are to mingle in human society, permeating its every part, and preserving it from corruption through their wholesome influence.

14. The light of the world.—Through Christianity comes the enlightenment of mankind as well as the purification and preservation of human society.

15. The bushel.—The common measure found in every Jewish household. The use of the article again indicates that the reference is to a familiar object.

16. Glorify your Father who is in heaven.—That is, give to him the credit and the glory for the goodness found in the Christian disciple.

THE JUBILEE OF THE V. C.

Most Coveted Decoration a British Subject Can Wear.

Fifty years ago the Victoria Cross was instituted by Queen Victoria. A little bronze cross, made out of cannon taken at Sebastopol, intrinsically worth nine cents, it is, nevertheless, the most coveted of all decorations that a British subject can wear. The reason for the high value set upon it is to be found in the simple legend on its face: "For Valor." The cross, which is awarded to soldiers and sailors for valor in the face of an enemy, has been won 522 times; and as it is awarded impartially to officers and men, being thoroughly democratic in its regulations, the men have won slightly more than the officers.

It is interesting to pick out the regiments that have won the most V. C.'s. At the head of the list—if we accept the Royal Artillery and Royal Engineers as being too large corps to be counted as regiments—are the South Wales Borderers, with sixteen to their credit. They won the greater number of them in Zululand, at Isandhlwana and Rorke's Drift. The Rifle Brigade is second on the list, with fifteen, and the 9th Lancers, the King's Royal Rifles, and the Gordon Highlanders come next with thirteen each, and they are followed by the Camerons and the Black Watch with ten each. The campaign which provided most V. C.'s was the India Mutiny, in the course of which 182 heroes won the decoration; the Russian War accounted for 111, and the late war in South Africa for seventy-eight, the Zulu War for twenty-three, the Afghan War (1878-80) for sixteen; the New Zealand Campaign for twelve, and the operations in the Northwest Frontier of India (1897-8) for ten. These wars accounted for 432 crosses, and the remaining ninety were distributed among the many other campaigns in Africa, India, and elsewhere, and have been fought during the past half century.

In a few rare instances the V. C. has been won by more than one member of a family. The most conspicuous case is that of the Gough family, which can boast of three V. C.'s—General Sir C. J. S. low voice. I am ambitious, and my ambition is nearer to your heart than you suspect. Because I am ambitious I have saved and yet given away all my savings to feed the families of your men in the hope of keeping back the tide of their violence. I have jeopardized my ambition. Will you, with all your riches, and with your ambitions realized, do nothing?"

"Well, well," muttered the ironmaster, rising and pushing back his chair. "Discussion leads us nowhere. I take it that, on behalf of the men, you finally refuse my terms?"

The young man hesitated. He looked penetratingly at his master's expressionless face, and drummed his fingers nervously on the crown of his hat.

"If I were you, sir," he said, in a grave voice, as the last of the others left the room, "I should send Miss Benton away from the town for a time."

"If you were me, sir," retorted the ironmaster, re-seating himself and picking up an unopened letter, "you would do nothing so flagrantly weak."

Hemstoun went out without replying.

He was thinking of his own words, and wondering if Mr. Benton had inferred his secret from them. He was wondering the same thing three hours later, when he walked into the lamplight in the drawing-room on the ironfounder's house on the hill behind the town. It was natural enough that the question should have recurred to him as he looked into Kathleen Benton's face.

That young lady, although at home in her own room and accustomed to receiving visitors of different sorts, was visibly embarrassed as she stood in the glowing light of the lamp and half shyly extended her hand to one of her father's foremen. And during the moment that he held it her eyes searched his with a queer, nervous intensity.

"I can guess you have come, Mr. Hemstoun," she said, drawing her breath deeply as she withdrew her hand. "But it is hopeless; I have no power to move my father. He is a most generous-hearted man, but nothing can shake his determination."

"Oh, I know," he replied, gravely. "I have not come to ask your help, but to advise you to leave the town for a little while. The last straw was laid on the camel's back this afternoon, and the men have resolved on violence."

"Sit down," she said, gently. He took a chair just beyond the radius of the lamplight, and she moved slowly to the sofa in a dark corner of the room. Neither realized that the other was seeking the shade, or they might have guessed something of each other's thoughts from their own feelings.

"Father would not leave," she said, "and I could not go without him."

"I expected you to say that, and I have no satisfactory arguments available," he answered, uneasily. "But don't you think you might beat Mr. Benton at his own game and take him away for a time. There's trouble ahead, I know."

"Never mind the strike," she replied, smiling; "tell me about yourself—your ambitions. My father speaks most highly of your abilities."

"I have a happy knack of getting over difficulties," he responded, somewhat shyly. "I have recently hit—palpably hit—upon a cheap process of hardening steel, which some of the cleverest men have been striving after for years and years. That is sheer luck, for there are fortunes in it; I can undercut the world for ship's plates."

"Really?" said Kathleen. "Listen!" she exclaimed, in a low voice, raising her hand to enjoin silence.

He paused, watching her. Slowly an expression of doubt stole into her fine eyes, while his face became grave.

"Soldiers?" she said, inquiringly. "Is Mr. Benton in the house?" he asked, shaking his head in answer to her question.

"I scarcely know."

"Are you on the telephone?" "There's a private wire in connection with the foundry. You think it is the men?" she said, rising and approaching him.

"Yes," he replied, jumping up and standing before her. "But it may not be anything—just a demonstration. Don't be uneasy."

"They must not find you here," she

cried, laying a hand lightly on his arm and looking anxiously into his resolute face. "They will think you are, perhaps, betraying them. Hark! They are shouting."

"Probably they have found the drive-gates closed," he suggested. "Send someone to tell the lodge-man to let them in. Stay! Will you come to them with me?"

"I think I am afraid," she murmured; "they seem so violent."

"You need not be afraid yet—not you, who have helped to feed their families."

"And you—you must not go!"

"Oh, yes; I'm not afraid of them. If they see you face to face, fearless of them, they will remember they are men."

He took her gently by the arm and led her to the door. As they passed into the hall, the door of the room opposite was flung open and Mr. Benton strode out.

"You here, Hemstow?" he cried.

"What does this row mean?"

"Keep out of sight, Mr. Benton, and leave it to us," said the young man, abruptly, opening the front door. "It's a demonstration which may become anything else."

As he stepped into the porch and Kathleen followed, a pistol-shot rang out.

"No!" he said, emphatically, pushing her back into the hall. "That makes a difference; this is only a man's job." And he stepped from the porch and began to hurry down the winding drive.

"Leave them to him, Kathleen," said her father. "He is used to herding those sheep."

She stood wavering on the doorstep and looked after Hemstow's disappearing figure. Then, suddenly, she darted out and ran after him. In a minute she caught him up; and at the same moment a man came running up the drive, explaining that the crowd demanded admittance.

"Go to the house and stop there," replied Hemstow. "And I think you had better return, Miss Benton."

"No," she answered, going forward. Her tone was her argument, and Hemstow did not debate the question.

They had not gone half-a-dozen yards farther when a loud shout and a great clatter of falling ironwork reached their ears.

"They've broken down the gates," whispered Kathleen, seizing the young man's arm. But her voice was drowned by the noise as the crowd ran up the drive.

"Stop!" cried Hemstow, as the foremost men approached. Awd by the suddenness of the cry and the sight of two solitary figures confronting them, the men came to a stand and the followers fell in sullenly behind.

"What do you want?" asked Kathleen, encouraged by the men's obedience to Hemstow's voice.

"We ain't got no quarrel with you, miss," answered a man, stretching out his arms to keep those behind him back. "A few words with the master's wot we want."

"But remember this is my home and that your master is my father," retorted Kathleen.

"Don't 'aggle with a woman, ye fool!" cried a voice from the thickest of the crowd. "Wot's Emstow doin' ere, eh?" "You can't get to the house but past us," said Kathleen, "and remember we have fed your children."

Silent, Hemstow was searching the faces that caught the moonlight, wondering who was the most dangerous of the men, who carried the pistol.

"Now let me say something!" cried Hemstow, with a movement forward. "One of you has a pistol. Throw it away at once! You are workmen, not murderers. Who started this movement? Someone with a game of his own to play at your expense, who knew I was coming up here this evening to see if anything further could be done. I think I could name him. But you cannot frighten the master—you all know that; and if you change fair means for foul, you will simply shut down the foundry for good and all. As Miss Benton has—"

"Shut up!" cried a man. "We've 'ad your gags for weeks." And the crowd began to press from behind.

"And my wages, too!" retorted Hemstow, hotly.

pay any such price as you named to me some time back—nothing like it. I'll be quite open with you; I've seen a side of you I like this evening, and I know I can speak confidentially."

At that moment a servant brought in the refreshment ordered.

"Let me help you," said Mr. Benton, when the servant had withdrawn. "Say when. Knocked you out a bit, that stone. And I shan't forget it. Might have killed my girl. Drink it up."

"Thank you, sir," said Hemstow, returning the glass to the waiter. "I'm all right now."

"Well, look here," resumed the man of iron, pacing about the room restlessly. "I say I've got to have that process—I've got to have it! But I can't pay your price for it. At present I'm on the road that leads to Queer Street. But if I can secure this Government contract—and I can if I tender for it on the basis of your process; aye, and make a big profit—I can easily borrow enough funds to carry me through."

"I am negotiating with the Welltons of Middlesbrough," Hemstow said, interrupting.

"The dickens you are!" cried the old man, stopping still. "Well, I can't help that. Listen to my terms! You told me this afternoon you were ambitious, and your ambition came very near my heart. You also asked me to send my girl away into safety. What does that mean? And I was watching you and her as you faced those brutes down the drive, and I saw it wasn't on your side only. Then take the way she cried out to me to retaliate on the thrower of the stone. But, hang it, Hemstow, my daughter can't marry one of my foremen, even though he came from good stock on his mother's side, for I know all about that. But if you were a partner in the firm—Now, look here, you put down your process and I'll put down the foundry and the necessary capital, and we'll establish the firm of Benton and Hemstow, and when Kathleen's willing—what?"

The young man looked into the old man's eyes bent anxiously on his face, and smiled. Then he laughed a queer little, nervous laugh.

"It's a grand structure, Mr. Benton," he said rising, "but it must fall to the ground, for the corner-stone won't fit."

"You mean Kathleen?"

Hemstow nodded.

"Wait here a minute," said the iron-master sharply; and he left the room.

Guessing his purpose, Hemstow started after him, but the door closed before he reached it, and he stood irresolute, hesitating to open it. He walked over to the window and stood there a minute. Then he returned to the door, opened it, and glanced into the hall. It was horrible to think the old man was, perhaps, persuading the girl to sacrifice herself to his scheme.

He went to the drawing-room door and, knocking gently, opened it.

Mr. Benton was coming towards him, smiling. Kathleen was standing before the fireplace, her back turned to the door and her head bent.

"Here he is, Kathleen," said the man of iron. "Go to her, Hemstow," he added, with a laugh, as he passed out of the room. "I think you'll find the corner-stone fits all right, d'you know." And he shut the door as Hemstow moved across the room and Kathleen turned round.—London Tit-Bits.

HEALTH

FRIGHTENING CHILDREN.

Too little heed is paid to the harm that may come to delicate children, of nervous organizations or imaginative minds, by unnecessary or brutal shocks to their sensibilities.

Well-meant attempts to "harden" children physically have caused much tragic suffering, but not nearly so much as mental or moral shocks administered with the same "hardening" theory in view, or in sheer thoughtless ignorance.

Fashion Notes.

ABOUT THE COMING HATS.

The old time derby hat is being pushed by milliners and bids fair to become one of the familiar models in ready-to-wear spring head coverings. Of course, it is tilted and mandeaved and otherwise feminized, but the shape does not materially differ from the man's derby. The satin crown is often seen. A model in pale blue straw with a satin crown has a very broad band of black panne velvet clasped in front with a wide gilt buckle. The hat was tilted from the back and the bandeau was covered with a curled black ostrich plume.

Another derby was in oyster white fine straw had a crown which rolled up on the left side. The velvet band was a rich shade of mauve, and the trimmings was a large cluster of very beautiful pansies caught in a buckle of old silver. Pansies it may be said in passing, are immensely popular, ranking next to roses as favorite millinery decorations. They are very cleverly made and are quite like the natural flowers.

HATS TO BE SMALL.

Small our new hats are to be, whether we wear derbies, plateaus, sailors, or other shapes. They are to be redeemed from insignificance by trimmings, and especially by bandeaus covered with huge bows and feathers. A late Paris creation is described as being the size and shape of a cheese plate turned upside down. The crown is low and the brim narrow, the hat being lifted in the back, where a large bow of ribbon covers the barrette. The trimming is a wreath of small roses or other small flowers. This is typical, but there are other shapes to choose from. A great many sailors are seen.

A lovely sailor in smoke-colored erin had an indented crown and a rather wide double brim. An ample scarf of lighter grey malines trimmed the crown of the hat, and a cluster of deep pink roses was arranged near the front on the left side. A large bunch of maiden-hair fern was included in the trimming. This was fastened behind the roses and extended back over the crown after the fashion of a paradise plume. Maiden-hair is a very popular flower novelty. One sees it in every millinery display.

ROSES WITHOUT FOLIAGE.

Another flower which appears prominently is the tiny rose without foliage. The most lovely color schemes are carried out in this flower, which is nearly always arranged in wreaths or garlands. Hydrangeas and lilacs are seen a great deal this season. They are flowers that allow of fine color schemes. All the new flowers are in natural hues and are copied very faithfully, except in the matter of size. Here the milliner allows herself considerable latitude.

There is a return to the finer straws. Leghorn, Tuscan, erin, etc. There is also a tendency away from the one-color hat, which we have been wearing. Color combinations are the rule. One sees, for example, a pale blue hat, with trimmings of violet, green, and perhaps a touch of pink. Some of the arrangements are charming. Feathers are to be used extensively. Aigrettes, ospreys, paradise, ostrich, and, for plainer hats, wings and quills.

WALKING HATS.

A group of walking hats for tailored gowns was admired this week. One was a light brown sailor of very stiff straw. The crown was trimmed around with a folded band of lighter brown velvet and a huge pompon and two long eagle quills trimmed the left side. The hat was raised on the back, the bandeau concealed under an ample bow of brown velvet ribbon.

A mignonette green derby, or bowler, as it is called in England, was trimmed with a crushed band of deep brown velvet. This was twisted in a round bow on the side, and a made feather of quills and aigrettes was thrust through the loops. The quills were bright brown in color, and were spotted with green and orange.

THE DRAPED PLATEAU.

YOUNG FOLKS

THIS LITTLE BOY WAS RIGHT.

Said Peter Paul Augustus: "When I am grown a man, I'll help my dearest mother the very best I can. I'll wait upon her kindly; she'll lean upon my arm. I'll lead her very gently, and keep her safe from harm."

"But, when I think upon it, the time will be so long,"
Said Peter Paul Augustus, "before I'm tall and strong, I think it would be wiser to be her pride and joy
By helping her my very best while I'm a little boy."

HOW THREE KITTENS WERE NAMED

Three little kittens were in the hay-loft, away back in the corner, in a box, but Sterling found them one morning, when his father was taking care of the horse.

"O, papa!" he said, his great earnest brown eyes opened wide, "Mittens has three kittens, and their eyes are right shut."

And away he ran to tell Ruth. She came in great haste, and despite her fifteen years, climbed the ladder into the hay mow. There sure enough were the soft, shining little things, with Mother Mittens purring over them. One beautiful Maltese gray, with white mingling, and here and there a spot of darker gray. One was striped with white paws, and the other was black and white and gray, softly mottled.

"O, what shall we name them, Ruth dear?" asked Sterling eagerly.

"I think," said Ruth, stroking the little glossy backs, "we had better watch them, and name them as we see them do something."

"All right," said Sterling. So every day they went out to see if they were doing anything that would entitle them to a name.

But for many days they were quite satisfied to sleep a great deal, and to meow pitifully if they were hungry, and Mother Mittens was away.

At last their pretty eyes were open, when they were not asleep, and they began to want to know where they were and what kind of things were around them, besides the pretty girl who took them up by turns in her arms and stroked them until they purred with sweet content.

So one day the gray and white began to investigate, and making a footstool of the back of the spotted one, he reached the top of the box and tumbled out.

But he did not care for the accident, and climbed in and out as he pleased after that.

Ruth and Sterling soon became aware of his feats, and they said: "O, he is the strongest; his name must be Samson."

Then the mottled one began to find his way out, but not merely to enjoy his strength; he nosed around everywhere hungrily. He was hunting for something good to eat, and Ruth said, "I tell you, he's a hunter from away back, and we'll call him Nimrod, won't we, Sterling?"

"Yes, that's just it," assented the little apple-cheeked brother. Just one was nameless. Now came watching. When the little kitten with the white paws walked around he lifted his feet daintily as if he were walking on egg shells.

"O, I know," said Ruth, "our Sunday school lesson said when Samuel sent for Agag, 'he came to him delicately,' and that's just the way that kitten walks. Let's call him Agag."

So all the kittens were named.

CARLO AS A WITNESS.

About a year ago a large grizzly St.

simply shut down the foundry for good and all. As Miss Benton has—

"Shut up!" cried a man. "We've had your gags for weeks." And the crowd began to press from behind.

"And my wages, too!" retorted Hemstow, hotly.

"Out of the way, miss; our quarrel ain't with you!" exclaimed a short, thick-set man, stepping towards Kathleen as if he would thrust her aside.

Instantly Hemstow sprang forward, putting the girl behind him with one arm, while he snatched a revolver from his pocket.

"Now," he said, grimly. "It's good for seven of you. Who'll have it first?"

It was a dangerous manoeuvre, as he very well knew, but he was hoping to intimidate the men individually by instilling in them that distinctly personal fear which is the weakness of the strongest body of undisciplined men. As he held the weapon loosely and ran his angry eyes from face to face those nearest him cringed back and looked askance at the glistening barrel.

"I shan't hesitate to use it," he added, "and the law will uphold me."

"Judas!" cried someone at the rear of the crowd. "Judas! Down 'im, mates!"

"Come forward, brave heart, and down him for yourself!" retorted Hemstow, scornfully. "Don't hide your heroism at the back there!"

Even as he spoke a stone cut into the flesh of his cheek. He stepped back, shivering with the sudden pain.

"You brutes!" screamed Kathleen, starting towards the men with her small hands clenched as if she would attack them.

"Kathleen, go indoors!" said a stern voice; and the ironfounder stepped out from the shrubbery on to the drive. "Hemstow, take her up to the house and leave these men to me."

Hemstow brushed the blood from his face and glanced at the girl.

"Father!" she cried, with an imperious gesture toward the crowd, which seemed to hold its breath in surprise at the old man's sudden appearance. "Tell these men that unless they name the wretch who threw that stone you'll never open the foundry again."

"There is no need for that," replied her father, promptly; "I have been watching, and I saw who threw it." Then he turned to the men. "Go home," he said, with impressive quietness. "The foundry will start work on the old terms to-morrow morning to all but Sam Wallace, who threw that stone."

"But don't think you have intimidated me!" he added, defiantly. "You have not, and I stand by the same principle I have stood by all along. But certain things have occurred since I met your deputation this afternoon."

"The old terms?" cried Hemstow and two or three others.

"Yes, to all but Sam Wallace, who is dismissed."

"Serve 'im right, too," shouted a man in the front. "E'd no business to use stones at a peaceful meetin'. Three cheers for the master, boys! Three cheers for Mr. Benton!"

"An' 'Emstow!" shouted another. "I don't want your cheers!" returned the ironmaster, angrily, holding up his hands. But his words were lost in the shouting.

"Three more for the young lady!" cried the short, thick-set man who had caused Hemstow to draw his revolver.

"Come, Kathleen," said her father, turning his back on the men. "And Hemstow—I've business with you."

"Father, what does it mean?" she said, eagerly, as the three, leaving the crowd to disperse, went towards the house.

"Many things," he replied, glancing at Hemstow's white face. "Since I met the deputation this afternoon I have received a request from the Admiralty to tender for armour-plates for immediate delivery, and, as I can rely on the contract, I shall start work again to-morrow."

"How can you rely on it?" she inquired, dubiously. "Your tender may not be accepted."

"It will be. Come into my room, Hemstow. Send Tuke with some brandy and soda. Kathleen—our demagogue is faint. Sit down, Hemstow, added Mr. Benton, as he closed the library door. "Now, look here. I've got to have that hardening process of yours. But I can't—I tell you straight—I can't

minids, by unnecessary or brutal shocks to their sensibilities.

Well-meant attempts to "harden" children physically have caused much tragic suffering, but not nearly so much as mental or moral shocks administered with the same "hardening" theory in view, or in sheer thoughtless ignorance. Salt-water bathing, for example, may be a good tonic, but to force a clutching, shrieking three-year-old into the surf, as is often done, may not only do great harm at the time, but may turn the child into a lifelong dreader of the sea, which seems a big price to pay for a mistaken act on the part of its father.

Many books are published to-day, presumably for the child world, yet containing illustrations in which the artist has allowed his fancy to run riot with little regard to the susceptibilities of his small audience. Of course, the rugged, stolid child is in no danger from this sort of thing; but it is not the rugged, stolid child for whom this plea is made.

Many children come into the world with frail nervous systems, which are still further weakened and rendered irritable by a system of deliberate overstimulation. The child is played with too much, tossed about and fondled too much, on the plea that its little amused chuckle is so adorable; and so it is, but speedily degenerates into something very like hysteria, and ends in the fit of exhausted crying which shows that the entertainment has been carried too far.

It may be accepted as a safe axiom that small infants do not need to be amused; they need only to vegetate. With older children the less the gruesome element is allowed to creep into their work or play, the better. The writer has known cases where the whole moral outlook has been colored and distorted by some frightful picture of a supposed future judgment day with its realistic portrayal of horrors, or where a child has been jarred into a condition of nervous irritability lasting for months by a sudden jump from a dark corner, or by silly boggy-talk on the part of an ignorant nurse.

One of the most harmful errors in this direction is that which represents the doctor to the child mind as a monster, only waiting to cut people up. The day will surely come when the physician will be needed, and he should be presented in an amiable light from the first, thereby saving much anguish both to him and to his small patients.

FRESH AIR IS LIFE.

Air is a life preserver. It is the particular friend of men, and he who barricades the doors and windows against this life saving friend gives a cordial invitation to disease and death to enter.

Open the doors and windows and let the sunshine in and let wind blow through the rooms every morning, for they are disinfectants performing labor of a sanitary nature.

Breathe long and deep. Fill the lungs to their utmost capacity with pure air several times each day and keep the home well ventilated night and day, and remember that when night comes or all the air you have in or out of the house till the next morning is "night air" and you cannot bottle day air enough within the sleeping room to last through the night, so by all means let the air circulate through the room and thus keep a fresh supply of this life giving element constantly with you.

More fresh air is required during sleep than when awake, for increased quantities of poisonous product are given off from the lungs and skin at this time, so each respiration renders the air in an unventilated room more unfit to be breathed again.

Keep the windows sufficiently open so the fresh "night air" can come in from one side and the impure air can go out through the other.

PREVENTION OF CHILBLAINS.

Wear woolen underclothing, warm stockings, and comfortable, strong, but not tight, boots. Tight boots, which compress the feet, are likely to cause chilblains. Take plenty of exercise, outdoor if possible, lots of nourishment—such as butter, fat bacon and milk—and cod-liver oil if delicate. Do not wash in cold water, nor go straight to a hot fire if the hands and feet have been thoroughly chilled.

round bow on the side, and a made feather of quills and aigrettes was thrust through the loops. The quills were bright brown in color, and were spotted with green and orange.

THE DRAPED PLATEAU.

Quite another type of hat is the draped plateau. This will be used for elaborate dress hats. A black Neapolitan afforded a good example. The large plateau is folded in the middle, and caught in four large plaits. The back of the hat rested on a tulle covered bandeau, which was trimmed with a mass of small pink roses. These extended under the front brim and showed becomingly on the forehead of the wearer. Black chiffon velvet in large looped bows showed in the back, and the top of the hat was almost concealed under a mass of pink roses and green ferns.

A novelty in mourning millinery attracted attention in a shop famous for this class of hats. This was a combination of white crepe, or nun's veiling, with black. This combination is offered for deep mourning, whereas it has always been considered half mourning. A fashion trade journal correspondent describes the new mode in a recent letter.

"A Parisian conceit, of course, and very extreme at that, is doubtful if the idea will appeal to the more conservative American taste. However, it must be confessed that the use of white lessens the gruesomeness of the mourning habit."

"One model is developed entirely in white with the long crepe veil attached in the unusual fashion at the back. Other models show a hat of white crepe simply trimmed with black, while the veil is white with a black crepe border."

AFRICAN MILLIONAIRE'S FEAST.

London Entertainment in Which a Pony Played Part of Waiter.

In fulfilment of a promise to his friends that on the conclusion of peace between Russia and Japan he would entertain them at dinner, Mr. H. Barnato, who has only just returned to England, was the host at a remarkable celebration at the New Gaiety Restaurant, London.

He had given Mr. Noble, the manager, absolute freedom to prepare a banquet worthy of the occasion, and although Mr. Noble had only twenty-four hours' notice, he achieved remarkable results. Mr. Barnato and his thirteen guests—every one of them millionaire diamond merchants—sat down to a dinner of a costly and novel character.

A circular table, specially made for the occasion, enclosed a huge tank, in which floated model Japanese warships, overlooked by a miniature Port Arthur. When the guests entered the dining-room was in semi-darkness.

At the moment of their entry beautiful fireworks blazed out from the warships and fort, eliciting a round of applause from the delighted guests.

Then the lights were turned up, and the most beautiful decorations were revealed, English and Japanese flags and flowers being artistically arranged over the table and round the room.

The piece de resistance was a lamb, roasted whole, brought into the room by a small black pony, who walked round the table while each guest selected a portion to his liking. Even the pony enjoyed the proceedings, and showed great reluctance to quit the room.

At the end of the dinner two ships, carved out of real ice, over which real fireworks beautifully played, were wheeled in on a trolley.

Among the dishes may be mentioned: Whitebait a la Port Arthur. Coupe a la Mikado. Gobelets des fruits frappees la Russe. Mr. Barnato himself was astonished and delighted at the novelty and appropriateness of the entertainment.

A MUTUAL SACRIFICE.

Mrs. Klubbs (severely)—"I've been lying awake these three hours waiting for you to come home."

Mr. Klubbs (ruefully)—"Geel! And I've been staying away three hours, waiting for you to go to sleep."

walks. Let's call him Agag." So all the kittens were named.

CARLO AS A WITNESS.

About a year ago a large grizzly St. Bernard dog was kidnapped from a Revere farmer, and subsequently sold to a Brookline livery stable keeper for fifty dollars.

The Revere farmer advertised, but to no purpose. Business one day took him to Brookline. He was accompanied by his six-year-old daughter. They were driving slowly through the main street suddenly the child uttered a cry.

There on the green with tall foxglove and eye dilated, his great body trembling with excitement, caused by that voice he loved, stood kidnapped "Carlo."

"Oh, come, Carlo!" cried the child eagerly. There was a merry bark, and the dog was by the side of the wagon in a twinkling, wagging his bushy tail and prancing in doggy glee. The farmer, of course, took possession of the dog. The Brooklineite laid his grievance before the court. It took two days to hear the case. The complainant put in evidence to show that he purchased the dog of the man who reared him. On the other hand, the defendant described every mark and scar on the dog.

"I think I'll postpone the trial in order to have the dog in court as a witness," said the judge.

A deputy sheriff brought the canine to court the day following.

"Carlo!" called the livery stable keeper. The dog only sniffed and moved uneasily.

"Oh, Carlo! Carlo!" cried the farmer's child.

The huge St. Bernard's tail went round. In another second he was bounding down the corridor to his mistress. The case was then submitted to the jury, and after five minutes' deliberation the jury returned with a verdict for the farmer.

STORIES OF CHURCHILL.

Lord Randolph as He Appeared to His Son.

Here are some extracts from Winston Churchill's recently published life of his father, Lord Randolph Churchill:—"One night Mr. Disraeli was among their guests, and an anecdote of his visit may be preserved. 'I think,' said Lord Randolph, discussing with his wife their party after it had broken up, 'that Dizzy enjoyed himself. But how flowery and exaggerated is his language! When I asked him if he would have any more wine he replied: 'My dear Randolph, I have sipped your excellent champagne; I have drunk your good claret; I have tasted your delicious port—I will have no more!' 'Well,' said Lady Randolph, laughing, 'he sat next me, and I particularly remarked that he drank nothing but a little weak brandy and water.'"

Another: One day, early in the winter of 1868, when Lord Randolph was nearly 20 years old, he had the misfortune to ride too close to the Old Berkshire hounds, and to incur the displeasure of their master, who rated him in a violent fashion before the whole company. Lord Randolph was deeply offended. He went home at once; but, as he said nothing at the moment, the incident was forgotten. Toward the end of the season, however, a hunt dinner was held in Oxford, to which Mr. Duffield and many of the Old Berkshire field were bidden, and at which Lord Randolph was called upon to propose the toast of 'Fox Hunting.'

"He described himself as an enthusiast for all forms of sport. Fox hunting, he said, in his opinion, ranked first among old field sports; but he was himself very fond of hare hunting, too. 'So keen am I, that if I cannot get fox hunting and cannot get hare hunting, I like an afternoon with a terrier hunting a rat in a barn; and if I can't get that,' he proceeded, looking round with much deliberation, 'rather that dwindle indoors, I'd go out with Tom Duffield and the Old Berkshire.'"

Fortune knocks once at every man's door, but misfortune frequently crawls in at the window.

AMUSEMENTS OF SOME

A DUKE EXPERIMENTS WITH AN ARMORED TRAIN.

As M. P. Knits Stockings — Lawyer Spends His Time Proving He is King of England.

The Duke of Bedford has one of the most peculiar amusements imaginable. This is the driving of a miniature armored train. His latest investment consists of a truck painted brown, after the style of the duke's livery, and is drawn by a small steam motor. The real reason that the duke has invested in this miniature armored train is that it is of great use when he goes to his zoo at Woburn. There he keeps a number of wild animals. By means of his armored train it will be possible to go into the inclosure where he keeps the wilder animals. Of course, both the motor and the truck are strongly protected by high sides.

A well-known Scotch M. P. once caused considerable consternation in the House of Commons by practising a very queer pastime. He was found in the smoke room, calmly at work with yarn and needles, knitting a stocking while waiting for the division bell. It need not be added that this innovation was not looked upon with any favor by the other members.

AT \$40 A KISS.

A really most peculiar pastime is that of a young lady who recently won a breach of promise case, obtaining a verdict for \$3,000 damages. During the trial she announced that for pastime she had kept a record of her lover's kisses in a diary which she possessed.

To prove her statement, she produced a book, in which she entered every night the number of salutes the lover had bestowed upon her during his call. She proved by this that the defendant had kissed her 1,236 times in fourteen years' courtship. The damages she obtained works out at somewhere about \$250 a kiss, but she claimed \$50,000, or nearly \$40 for each kiss.

Mr. John Vanderbilt, a member of the wealthy New York Vanderbilt family, has a favorite pastime in posing as a hermit. Amongst his own people he is called the "Hermit of Hexenkopf." Very few people ever see him, for he neither travels nor works, nor writes, nor anything, in fact. He is enormously rich, but still he lives in a tiny crevice-covered hut on the summit of a Pennsylvania mountain. This is amidst beautiful scenery, and he is quite alone from one year's end to another. In fact he is to do all his own cooking and housework, washing, and so forth.

LIVING WITHOUT EATING.

He catches his own trout, shoots his own game, cultivates his own fruit and vegetables, milks his own goat, and makes his own bread. Of course, being so isolated, he never receives any letters, periodicals, or newspapers, and at the same time he never sends any. To all practical purposes he is cut off from the world.

Another New York man had a peculiar pastime in seeing how little food he could possibly live on. He was an Englishman, Joseph William Sheppard, by name, but had lived in the United States for the last forty years. Although he was an inventor and a man of means, he had the belief that he could so spiritualize his life that he could exist without eating.

For a considerable time his only nourishment was a little wine, and sometimes a little honey in it. He declared that his fasting had made him spiritually and mentally considerably the superior of those around him. He thought that by prolonged abstinence from food he would be able to solve the mysteries that are now beyond the reach of human intelligence. He also thought that if he died in this state his exalted existence would go on in some other form. All who knew him, including his son, who

of jewels. But she lived to suffer from paralysis, to become abnormally stout, and to lose the whole of her good looks.

During the latter portion of her life she could not bear to look upon the treasures of her jewel-caskets. She had these heaped up to form a sort of altar in front of a table, on which was placed a portrait which formerly closely resembled her. Over the whole she caused a veil to be thrown, and thus they remained until her demise.—Pearson's Weekly.

BECAUSE MOTHER KNOWS.

A Custom in Most Households Which Should be Abolished.

The mother of the household sank into her rocking-chair, and folded her tired, patient hands in her lap. "I hope I shan't have to move for an hour," she said to the father of the family, in whose hands she had just placed a magazine he had hunted for in vain.

"I've done nothing but trot, trot, all day long, it seems to me. I wonder if every mother in this land is expected to know where everything is, and find it if she doesn't know?"

"I believe it is the usual custom," said her husband, dreamily, already more than half lost in the article on X-rays.

"Well, it's a poor custom," said the mother, wearily. "All day long I hear, 'Mother, where's my hat?' 'Mother, where did I leave my drawing-pencils?' 'Mother, what have you done with my music-roll?' 'Mother, where's my fishing-rod gone?' 'Mother, where did you put my fancy-work?' 'Mother, what magazine was that story in, and who had it last?'"

The leaves of one magazine rustled, and the father's face was hidden behind them.

"I believe they think I have some way of knowing where things are that I've never even seen," the mother went on, smiling in spite of her wrongs, "for they ask me—"

"Mother!" came a boyish shout from the head of the stairs. "Ed and I are in an awful hurry to go in town, and we can't find our heavy gloves. Do you know where they are?"

"Ed's are in his second drawer on the left, where they belong; he left them in the dining-room," called the mother, without a second's hesitation. "I haven't seen yours, but why don't you look in the pockets of your old coat that you wore on that long drive with your father the other night?"

There was a sound of hurrying feet overhead, and then a joyful whoop. "Got 'em all right, mother!"

The father's face appeared above his magazine.

"Does it ever occur to you that you give the family some slight reason to think you have an inexhaustible fund of wisdom as well as a bureau of information in regard to articles lost, strayed or stolen?" he asked, in a carefully impartial tone.

HOW IS YOUR HAND SHAPED?

A Few Simple Rules by Which You Can Reveal Nature.

Palmyristy is divided into two branches — chiromny, the study of character by the general shape and proportions of the hand, and the older, chiromancy, the reading of the lines and surfaces of the palm.

That the hand indicates the character is a matter of every-day experience, though some doubt the relation of the various lines to the events of one's life, despite most convincing evidence to the contrary.

To read characteristics in the hand is not a difficult matter, and the study is interesting and profitable. Here are the principal types:—

Large hands are the hands of people fond of very fine work, or intent upon the minutiae of life; they generally write a small hand; are great sticklers for etiquette; are easily offended by little breaches of courtesy.

Small hands show the opposite. Their

WOOTINGS OF ROYALTIES

ROMANCE RARELY ASSOCIATED WITH THEM.

How Queen Charlotte Came to England — Elizabeth Farnese's Arrival in Spain.

The romantic wooing of the King of Spain reminds one how rarely the element of romance has been associated with royal marriages.

What could have been more brutally inconsiderate than the arrangements for the marriage of Queen Charlotte, wife of King George III.? This Princess, just 17, was selected as consort for the King of England. Her life at Mecklenburg, writes Lady Violet Greville in the London Daily Chronicle, had hitherto been of the simplest. She dressed "en robe de chambre" every day except Sunday, when she put on her best gown and drove out in a coach and six. The Ambassador sent to demand her hand having arrived, she was told nothing of his mission, merely that she was to dine downstairs that night for the first time.

"Mind what you say, et ne faites pas l'enfant," was the warning of her eldest brother. After dinner, at which she was naturally very shy, she beheld the saloon illuminated, a table and two cushions prepared for a wedding, her brother again saying, "Allons, ne faites pas l'enfant, tu vas être reine d'Angleterre," led her in.

Some kind of ceremony then took place; she was embraced by her family, and presented by the ambassador with a beautiful parure of diamonds, including the little crown of diamonds which so often appears in her portraits. She was pressed for an immediate departure, but pleaded for the respite for a week, in order to take leave of everybody. During this time she ran about visiting the poor and the little garden of medical herbs, fruit and flowers which she cultivated herself for the benefit of the poor. She afterwards introduced the same practice at Kew and Richmond.

THE POOR LITTLE BRIDE

suffered a terrible crossing to Harwich, the royal yacht being nearly driven on the coast of Norway. The Duchess of Ancaster and Hamilton, sent to conduct the Princess of England, were both much indisposed, but Charlotte herself remained quite well and cheered the company by singing Luther's hymns to her harpsichord in her cabin with the door open. Perhaps she remembered the saying attributed to Henrietta Maria, the wife of Charles I., who was also nearly wrecked on her crossing, "Les reines ne se noient pas."

Arriving in London at about 3 o'clock, having travelled since 12, she was met by the King in the garden of St. James's Palace. Attempting to kneel, she was caught by the enthusiastic monarch, who embraced her kindly and nearly carried her upstairs. That very evening the wedding ceremony took place. Horace Walpole writes of the new Queen: "She looks very sensible, cheerful and is remarkably genteel" (that favorite epithet of the period).

Her tiara of diamonds was very pretty, her stomacher sumptuous, her violet velvet mantle and ermine so heavy that her clothes were dragged almost down to her waist. The wedding over and supper not being ready, the Queen sat down and obligingly played and sang to her harpsichord. The royal party never separated till between 3 in the morning, no slight trial for a bride of 17 who had employed the few moments she passed in her room after her arrival in trying on her wedding gown and the rest of her trousseau.

When first she caught sight of the palace she became very nervous, and, being told that she was to be married that evening, she, in fact,

FAINTED IN THE CARRIAGE.

The Duchess of Hamilton, one of the beautiful Miss Gummings, smiling at her fears, Charlotte said: "You may laugh

She summoned him to her boudoir, where he found her alone. After some desolatory talk due to her shyness, she suddenly said: "Could you forsake your country for me?" The Prince answered by clasping her in his arms. In such simple fashion did a young sovereign woo and win the husband of her choice.

WENT BACK FOR HER CHILD.

A Woman's Sad Story Told in an English Police Court.

Eighteen months ago a farmer by the name of Leadley, in passing along a side street in the town of Cloughton, near Scarborough, England, heard the cry of a child, coming, as it were, from the ground at his feet. Looking down, his astonishment was great to find that he had very nearly stumbled on a bundle that lay on the pavement. Examining the bundle more closely, his astonishment was still greater on finding that the bundle contained a fine healthy child. Picking the child up, he carried it to the police station, where, after stating the manner in which he discovered it, he took the baby home.

The police soon discovered who the mother was and placed her under arrest. Her tale of woe so worked upon the feelings of the magistrate that he discharged her. Weeks afterward the magistrate received a letter from a workman in far-distant British Columbia, who, having read the story in a newspaper, the British Columbian's heart had been touched, and in his letter to the magistrate he offered his heart and hand to the woman about whom he had read in the newspaper. He meant what he said, and to make it more binding he enclosed one hundred dollars to pay the passage to British Columbia of the woman, who, though he had not seen, yet he loved.

The woman was found. The man's proposal was made and she accepted the offer. To British Columbia she went and 24 hours after she met her lover they were married.

The baby had been adopted, but the mother, to be completely happy, must have her child with her, so back to Scarborough she went in search of her offspring. She had no difficulty in finding the infant, and with her precious burden she left Liverpool last Saturday for a new home in the very far west, when by the time she reaches it she will have travelled nearly 12,000 miles for her child.

CURATE WEDS HEIRESS.

Meeting in Church—Case of Love at First Sight.

When in London some time ago, Miss Mary Copeland, of Otago, New Zealand, went with relatives to St. Clement Danes Church, in the Strand. The other day she was married to the curate of St. Clement Danes, whom until her visit to the church she had never met. Miss Copeland is heiress to a considerable fortune.

The curate of St. Clement Danes is the Rev. William Earle, a native of Ballynahinch, County Wexford, Ireland, who is 48 years old. Dobrett tells us that in 1801 he assumed the title and baronetcy of Stragelhorpe County, Lincoln, which was believed to have become extinct in 1697. His right to the dignity has not yet been established and recorded at the Herald's College.

Among the interesting events in the career of the Rev. William Earle may be mentioned his candidature for the vicarage of the Parish of Clerkenwell in 1898, when he imported an element of humor into an otherwise portentously solemn contest by issuing a bill inscribed:

"Vote for Earle, B.A., M.A., B.D. Irishman. Gentleman. Private means. Sixteen years' experience."

In his address to the 10,000 electors of Clerkenwell, Mr. Earle appeared to the Roman Catholics "because I am Irish," to foreigners "because they love Ireland," to Nonconformists "because I have stated in my pamphlets on reunion that they are the salt of the earth and the light of the world," to the Jews "because my love for the Children of

that by prolonged abstinence from food he would be able to solve the mysteries that are now beyond the reach of human intelligence. He also thought that if he died in this state his exalted existence would go on in some other form. All who knew him, including his son, who is a physician, declare that he was far from being insane.

DODGING THE SUNLIGHT.

One time he had the fad to eat none but such fruits and vegetables as grew in the sun, afterwards he ceased to drink water. Gradually he cut down his supply of vegetables, and ate only very small quantities of rice, and even then he did not seem to suffer from any physical inconvenience. At last, however, he starved himself to death as a result of this foolish pastime.

Many people have heard of Senor Yturbe, whose great pastime is spending his life in dodging the sun. His great fear that a ray of strong daylight or a breath of fresh air, should strike his body. Even in his palatial villa at Cimiez everything is closed, curtained, and shuttered. The apartments are darkened and heavily draped. His manoeuvres to avoid sunlight are most extraordinary in their character.

The great French millionaire, M. Lebaudy, was not long ago the defendant in a case in which his yacht's crew claimed money for food. When his yacht, La Frasnita, arrived at Cowes after a long cruise it was in a deplorable condition, being entirely out of provisions, while the men had had no wages for some time; in fact, there was not enough money to pay the pilot's fee.

The captain was perfectly penniless, while the crew had nothing to eat and no money to buy food with, although the captain had several times communicated with M. Lebaudy. Afterwards a shipping agent advanced the money on the power of attorney obtained from the captain, who was

SUBSEQUENTLY DISMISSED.

His Honor gave judgment for the amount claimed, and he described the case as a most cruel one. He said that he thought it was abominable that a rich man should allow his crew and vessel to get into such a condition.

Mr. John Hope Hodnett, a Brooklyn lawyer, possesses the fad, that he is "Duke of York of the House of Lancaster," and is by right heir to the throne of England. He claims to be a King Edward's place. He says that his family, being Roman Catholic, were disfranchised in 1691, and the estates transferred to the House of Hanover. He says that he will claim a division, but will not come to England for fear of arrest.

Another peculiar pastime is that of Andrew Blair, a Dundee barber. He was seen wandering about Barnet not long ago, and he was watched by a police-constable. The constable watched him trim the hedgerows with a pair of scissors and comb, and then proceed to stop a razor, with which he shaved an adjacent milestone. All the time he kept up a conversation with an imaginary customer. He has now full opportunities for indulging in his pastime in the Hertfordshire County Asylum.

THE GREAT SINGER AND HER JEWELS.

John Light, who recently died in the Whittington Hospital was one of the most interesting figures in the Manchester streets. He was an Armenian, who sold wax-lights, and he had the curious pastime, for a man in his position, of learning foreign languages. He adopted the name of John Light in preference to his Armenian name. His scanty earnings sufficed for all his wants.

His leisure was given to studies which made him a connoisseur of very remarkable attainments. He was thoroughly conversant with most European languages, including Russian, and was very well acquainted with Sanscrit and other Oriental languages.

Very pathetic was the pastime of Sybil Sanderson, the great singer, whose life ended in somewhat of a tragedy. During her youth she was a beautiful woman of hundreds of operatic triumphs. She became enormously rich, was fond of luxury, and clothed herself in a blaze

of large hands are the hands of people fond of very fine work, or intent upon the minutiae of life; they generally write a small hand; are great sticklers for etiquette; are easily offended by little breaches of courtesy.

Small hands show the opposite. Their owners write a large hand, look at things in a broad, quickly satisfied manner, are easily pleased and slowly offended, are not fond of delicate work, and prefer the bustle of life to its smaller duties.

The soft hand is that of the poetic temperament, one ruled by imagination, nerves or the senses. Hence it is more frequently a woman's hand.

If soft to flabbiness these characteristics are increased till they become laziness, selfishness, heartlessness. These are often the hands of the traitor and thief.

The hard hand denotes a practical and generally imaginative nature. If the hardness is not exaggerated it is the sign of a straightforward disposition, fond of activity and even hard work.

An exceedingly hard hand will show lack of intelligence, brutality and indifference to pain in others as well as in one's self.

If the palm is thin, skinny and narrow it indicates timidity, meanness and poverty of intellect; also a lack of energy.

A very thick palm, in a soft hand, sensuality, material instincts, over-confidence and selfishness.

A very thick palm in a hard hand with short fingers is that of the unskilled, unambitious laborer; with a bad thumb the brutal criminal.

A very hollow palm invariably denotes failure in life.

LION ATTACKS A GIRL TAMER.

Terrible Scene Enacted in a London Music Hall.

There was a scene of wild excitement at the Canterbury Music Hall, London, the other night, when a lion made a sudden and savage attack upon a girl tamer.

One of the attractions in the programme is a troupe of forest-bred lions, exhibited by Herr Prinz, who is assisted by a girl.

An eye-witness said later that Herr Prinz entered the cage as usual with the girl tamer.

"Immediately," he said, "a large lion seized hold of the girl's dress in its mouth. She, taking a piece of meat from a tray in the cage, coaxed him off. Another large lion, evidently jealous because he had been given no meat, suddenly sprang on the girl's back and knocked her down."

"She shrieked loudly, and then seemed to swoon. The people in the hall cried out, and a scene almost of panic followed. Women fainted, and there was a general run for the street."

"Then the curtain slowly fell on the sight of the lion, with open mouth, standing on his victim's chest, which it clawed savagely, while Herr Prinz was doing his best to beat it off."

"It was a terrible scene. I rushed round to the stage door, and learned that the poor woman was badly torn. There was a large crowd of anxious enquirers waiting to hear the news, for the young woman is a great favorite with the people of Canterbury."

Lat's enquiries showed that the victim, though suffering severely from some bad lacerations, was progressing favorably.

SANDY BEACH ON LINER.

A special playground for children is provided on the Canadian Pacific Railway Company's new steamer Empress of Ireland. It consists of a wide space on deck set apart for their exclusive use. Here trees have been planted in pots, and heaps of sand and numbers of buckets and spades provided, so that the youngsters may enjoy themselves just as they would at the seaside. Parents will welcome the innovation as a relief from devising all sorts of games for the edification of their young charges—no light task on a long sea voyage.

ing told that she was to be married that evening, she, in fact,

FAINTED IN THE CARRIAGE.

The Duchess of Hamilton, one of the beautiful Miss Gunning's, smiling at her fears, Charlotte said: "You may laugh—you have been married twice—but to me it is no joke." It is pleasant to think that after being so highly tried Charlotte's married life proved perfectly happy.

Very different was the arrival of Catherine of Braganza, who, when first seen by Charles II., was laid up with a cough and a little fever in bed. He was not favorably impressed by his new consort, and remarked as much to his attendants.

Elizabeth Farnese, who married the King of Spain, son of Louis XIV. of France, as his second wife, celebrated her arrival in Spain by quarrelling with and summarily dismissing the lady in waiting sent to receive her, the famous Princesse des Ursins, who had ruled the late Queen, and by whom she herself had been chosen as successor. Elizabeth's future life was passed in slavish attendance on her husband that she might secure her influence over him and prevent any State affairs being transacted without knowledge. Twenty minutes only of the day and night was she permitted to be alone. Elizabeth was an ardent sports-woman and followed the King even at the chase; the rest of her existence was passed in a routine of arduous etiquette and monotony.

George IV.'s reception of his bride, Caroline of Brunswick, is well known—how the blue eyed, bouncing, buxom girl was implored by Lord Malmesbury to be very particular about her person and her toilet; how the Prince pretended to be overcome at their first meeting and called for a dram of brandy, and how the Princess afterward declared that he was drunk on her wedding night. Not much chance of happiness there!

Until quite recently very little liberty was accorded to princesses. Queen Charlotte, even after her marriage, was for several years in thrall to the Dowager Princess of Wales and denied all diversion and pleasure. She told Miss Burney that even her jewels had ceased to dazzle and interest her. "Believe me," she said, "it is the pleasure of a week, a fortnight at most, and then returns no more."

ONE OF HER GREATEST GRIEFS.

and one which caused her bitter tears, was the determination of her mother-in-law that Charlotte should wear her jewels when she received the sacrament for the first time after she became Queen. She had promised her own mother never to do this—it was an act of humility which had been strictly inculcated on her; and it proceeded from the same devotional impulse which caused King George to take off his crown when he knelt at the altar during the coronation.

The courtship of Queen Victoria brings us into a pleasanter atmosphere. On Prince Albert's first visit to England she liked and appreciated him at once, and his tastes agreed with hers. "Every grace had been showered by nature on this charming boy," says Baron Stockmar of him at this time. The Baron judged him critically, calmly and impartially until he finally became his most attached and devoted friend and adviser.

Queen Victoria and her cousin met at first unconscious of the object of their acquaintance, and when the desired impression had been produced, the young Prince, like a second Sir Galahad, was sent away to travel and fit himself by study and careful education for his great position. On his return to England the Queen writes: "Albert's beauty is most striking, and he is most amiable and unaffected—in short, fascinating."

The young couple were genuinely in love, and the Queen informed Lord Melbourne that the conquest of her heart was complete. So serious, so dignified, so studious and so excellent a young man would infuse an element of poetry and deep feeling into his love making; but by the rules of etiquette the proposal itself had to come from the young Queen, whose maidenly modesty was somewhat embarrassed at the prospect.

her mother-in-law, who had applied to the Roman Catholics "because I am Irish," to foreigners "because they love Ireland," to Nonconformists "because I have stated in my pamphlets on reunion that they are the salt of the earth and the light of the world," to the Jews "because my love for the Children of Promise is well known."

He is exceedingly popular in his Strand parish, and the couple were enthusiastically pelted with confetti as they drove away from the church.

KIDNAPS HER PUPIL.

Teacher Travels With Him Five Years and Then Abandons Him.

A schoolboy named Szepsan disappeared from his home in an Austrian town in 1901, at the age of 14, and all search for him proved futile until the other day, when he was found in the Town of Nendeln, in the principality of Liechtenstein.

It has been discovered that he was kidnapped by a school mistress named Buehl, who had a strong affection for her pupil. She took him with her on a tour through Belgium, and afterward to Italy, Constantinople and Jerusalem, finally abandoning him, at the age of 19, in Nendeln.

When first questioned Szepsan energetically denied his identity, and attempted to escape from his father, who came to claim him. On being examined by a judge, however, he confessed, and gave details of his wanderings, with Buehl, who, he said, supplied him with money and false papers, and made all arrangements for their journeys. He was placed by her at different times in convents at Rome, Constantinople and Jerusalem.

Szepsan's disappearance has been the subject of numberless interpellations in the Reichsrath, and his return has caused general astonishment.

SCHOOLS IN JAPAN.

Over Five Million Children are Getting Instruction.

The number of Public schools in Japan is at present 2,138, in which 5,084,099 children are taught by 108,360 teachers. Ninety-three and twenty-three hundredths per cent. of all children of school age go to these schools. In 1873 29 per cent. of school age children went to the Public schools, in 1883 51 per cent., and in 1893 59 per cent. A rapid increase in attendance is noted after the Chinese war. The percentage of attendance of boys compared with that of girls was 40 to 15 in 1873; the difference now is only 7 per cent. The attendance at the various commercial and industrial schools was as follows: In 1901, 36,000; in 1902, 95,000—i.e., only 2,000 less than the number in the intermediate schools. The university for women held its commencement exercises recently, 86 graduates receiving the so-called academy diploma and 132 the university diploma.

BEYOND THE LIMIT.

"I don't mind folks borrowing," said Miss Hodges, plaintively, to an old friend who was paying her a visit, "but I've got an awful trying woman for a neighbor just now. She borrows such queer things I'm most out of patience with her."

"Shears and brooms and the flour-sifter and ironing-board, I s'pose," said the guest, who had known life in a country town.

"Mercy me, I don't count such things," said Miss Hodges. "Nor my best umbrella nor my carving-knife. I can make shift to get on without 'em for a while any time. But when she come over to borrow my diary the other day, so's she could keep account of the weather and her hen's eggs and so on till her husband came back from California, she having given him hers to put down his expenses and sights in, so's she could copy her record in from my book in the right place—I declare I called it the cap-sheaf!"

REMARKABLE HEIRLOOMS

THEY HAVE COME DOWN THROUGH LONG AGES.

Two of the Most Famous Are the Bruce's Sword and the "Brooch of Lorne."

If heirlooms that are so jealously treasured in the stately homes of Britain could only be brought together they would make one of the most fascinating museums in the whole world, says London Tit-Bits.

Lord Elgin has among his many ancestral treasures at Broomhall the very helmet the valiant Robert Bruce once wore and the huge two-handed sword which wielded with such deadly effect in many a hard-fought fray; while the Douglas banner which floated in the thickest of the fight at Otterburn has come down to our times through nearly twenty generations of descendants of Archibald Douglas, who bore it so gallantly.

The brooch of Lorne, too, which was taken from Robert Bruce at the battle of Dalrigh, has been preserved ever since at Donnelly Castle by the family of McDougall. Another most interesting relic of Bruce days is

THE FAMOUS LEE PENNY.

which was the inspiration of Scott's "Talisman." The magical coin, which is a silver groat of Edward III.'s time, with a cornelian set in it, was brought from the East by Sir Simon Lockhart and is credited with wonderful powers of healing the sick and curing those who had been bitten by mad dogs.

Among the many memorials of Sir Francis Drake to be seen in private houses is the very sword which was presented to him by the burgesses of Plymouth, and which now belongs to Sir Francis Elliott Drake of Buckland Abbey. At Buckland Abbey also are the drum which accompanied the great naval hero on his voyage in the Pelican; a coconut cup mounted in silver gilt, given by Queen Elizabeth to Sir Francis; and also a silver gilt standing dish and cover. At Kimberley Hall, the Norfolk seat of Lord Kimberley, are many valuable memorials of old days, notably the silver hilt of the sword, which his lordship's ancestor, Sir John Wodehouse, wielded at Agincourt, and a rosary of coral and gold presented to Sir Philip's wife by Queen Catharine of Valois.

At Lyme Hall, in Sheshire, is a very ancient bed, with a canopy of carved black wood, in which the Black Prince used to sleep; at Oxburgh Hall one may look on the bed in which Henry VII. was wont to take his rest; at Nappa Hall, the ancestral Yorkshire seat of the Metcalfes, there is, or was within recent years.

A MASSIVE FOUR-POSTER

which the beautiful and ill-fated Queen of Scots occupied for a few nights; and at Sizergh Castle the Stricklands proudly exhibit a magnificent counterpane and toilet cover of the richest white satin embroidered by the hands of Queen Catharine Parr during a visit she paid to the castle as a young girl.

The centre of the pattern on both counterpane and toilet cover is a medallion surrounded by a wreath of natural flowers wrought in twisted silks and bullion; a spread eagle in bold relief, gorged with the Imperial crown, forms the middle, at each corner is a dragon glowing with purple, crimson and gold. The colors are almost as fresh and vivid to-day as when they left the hands of Catharine centuries ago.

At Rug, near Bala, are preserved a knife, fork and dagger, once the property of Owen Glendower, the famous Welsh chieftain; Lord De L'Isle and Dudley has a magnificent two-handed sword, which was once worn by Robert Dudley, Earl of Leicester and the Earl of Pembroke is very proud of the suit of russet and gilt armor which his remote predecessor, William, Earl of Pembroke, wore when commanding the English army at the battle of St. Quentin.

SECRET OF HAPPINESS

LADY HENRY SOMERSET SAYS IT IS SELF-CONTROL.

Essential to Happiness, Because We Are Masters of Our Whole Being.

The secret of happiness has, for all time, been the quest of humanity, and many and various, have been the methods employed to find this coveted treasure, and many the spurious wares put upon the world's market and labelled the genuine article. The fact is, it is an impossible subject on which to generalize, because true happiness for each one of us is made up in such varying ways. Nevertheless, there are certain underlying principles which form a universal basis under its many forms.

Happiness is a personal possession. To a very large extent it is independent of circumstances; indeed, the most favored lives are devoid of it, unless the quality of being able to be happy exists, and the most meagre existence can be full of a real enjoyment of life. If I had to write a prescription which I believed would, as far as the change and chance of life would allow, ensure happiness, I should place first and foremost the quality of self-control. The aspiration of every truly great people has always been to ensure this quality.

SELF-CONTROL THE FIRST ESSENTIAL.

In the Golden Age of every nation it has been sought after as the key to national success, and just in proportion as each nation has lost hold on this quality has it sunk in the scale of greatness and of power.

It is in the animal world, the difference between the trained and the untrained, this immediate answering to guidance and to duty. It is a habit that is acquired, and that grows, as does almost every other quality, easier in the using. The animal depends upon the continual guidance of man, whereas the quality once acquired is practised by man without any goading from without, and becomes in itself a pleasure.

To be unable to curb any part of ourselves must always involve humiliation and disappointment. If happiness consists in what we are, then it becomes apparent that we must command all our powers.

The splendid achievements of the Japanese are unquestionably largely due to the realization of this truth. I have heard on every hand that this nation is one of the happiest in the world, and yet the whole secret of their education lies in the cultivation of self-control. It has developed on the one hand, a discipline of fortitude, which has scarcely a parallel in the world's history, and a singular unselfish consideration of others which pre-eminent distinguishes that great race.

REASON OF JAPAN'S SUCCESS.

Boys and girls are brought up to shed no tears, to utter no groans, for the simple reason that in so doing they would be wounding the sensibility of others.

A witty Japanese said to an Englishman, "Your husbands kiss your wives in public and beat them in private. Japanese husbands beat them in public and kiss them in private."

Calmness and composure are the outcome of this self-control, and the equilibrium is not overthrown in moments of unexpected vexation or disappointment.

To those who have not acquired this habit, how many bad moments succeed a sudden gust of passion or a spell of anger? I remember two Italian maids in Southern Italy having one day a violent quarrel. They nearly came to blows, as they screamed and gesticulated, livid with rage. I endeavored to make peace without success. An hour later I met them leaving the house.

"Where are you going?" I asked. "To the chemist, gracious lady," they answered, "to have our blood drawn, as

SUNLIGHT SOAP

Clothes washed by Sunlight Soap are cleaner and whiter than if washed in any other way.

Chemicals in soap may remove the dirt but always injure the fabric. Sunlight Soap will not injure the most dainty lace or the hands that use it, because it is absolutely pure and contains no injurious chemicals.

Sunlight Soap should always be used as directed. No boiling or hard rubbing is necessary. Sunlight Soap is better than other soap, but is best when used in the Sunlight way.

Equally good with hard or soft water

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Lever Brothers Limited, Toronto

MORIBUND PALAIS ROYAL

PARIS BAILIFFS TO BE HOUSED IN THE GRAND VEFOUR.

Sad Fate of Cafe Where the Gallants of the Restoration Used to Feast.

In the Paris of our grandfathers there was a cafe that was the resort of the beaux and gallants of the day; it was the "Grand Vefour." Its situation was the Palais Royal, that moribund region in the heart of Paris so instinct with the life of the past. Now they are going to open the doors of the Grand Vefour; but, alas, says the Paris correspondent of the Pall Mall Gazette, with the most banal object. The rich and the "chic" of the world will not feast there; neither will it be the resort of the gay and witty; it is simply the headquarters of the Corporation of uissiers.

The huissiers are those dreadful persons that embody the terrors of the law. They carry out the orderings of the court; hence they are not overwhelmingly popular that class of citizen that shortness of means and length of expenditure bring face to face with his creditors before a presiding judge. The bailiffs, then, will people in permanence this old restaurant. Is it not significant of the changing spirit of the time, the utter descent of this Palace of the Cardinal into the abyss of things forgotten?

Far away, indeed, are the days when its shady court rang with the noise and gossip of

A KING'S ENTOURAGE.

Even a half a century ago the Parisian found the Palais Royal an excellent spot in which to disport himself, and to lose a great quantity of cash, as gambling dens abounded. Since then various have been the projects to resuscitate the Palace, to bring back the life and laughter of other days to its now silent colonnades. The most attractive of the schemes was to turn the great building into an encampment of sport—a headquarters for all the athletic societies of France. Apparently the idea has not borne fruit any more than the suggestion to establish an American exhibition, where all that pertained to

FROM BONNIE SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

The death rate of Glasgow last year was the lowest on record.

Leith is thinking of trying emigration with some of its unemployed.

The Glasgow corporation is offering to supply electricity for power purposes at 2d. per unit.

Since the New Year 29 joint stock companies have been registered, with a total capital of £793,700.

During 1905 Musselburgh police dealt with 574 persons, being a decrease of 174 compared with 1904.

The average attendance at the 73 board schools in Glasgow last year was 66,511. The grant earned was £266,784.

On the 19th ult. a draft of the 2nd Battalion of Scottish Rifles left Maryhill (Caledonian) station en route for India.

The police statistics for Aberdeen show that during the past year there was a marked decrease of crime in the city compared with 1904.

Plans have been prepared by the Commissioners of H. M. Works and Public Buildings for the enlargement of the head post-office in Ayr.

The statue of Alexander and Bucephalus, situated in St. Andrew Square, Edinburgh, opposite the Melville monument, is to be shifted to Nicolson Square to make room for the Gladstone statue.

On the 26th ult. damage to the extent of £500 was done by fire in the drying flat of Logie Spinning Mill, Dundee. There was a good deal of excitement before all the women workers were got to the outside.

Sir Archibald Alison, Bart., the distinguished general, celebrated his 80th birthday on the 21st ult., having been born at Edinburgh, January 21, 1826. He was the elder son of a late sheriff of Lanarkshire, the author of the "History of Europe."

The funeral of Mr. James Robertson, the late Deputy Town Clerk of Edinburgh, took place a few days ago to

which was once worn by Robert Dudley, Earl of Leicester and the Earl of Pembroke is very proud of the suit of russet and gilt armor which his remote predecessor, William, Earl of Pembroke, wore when commanding the English army at the battle of St. Quentin.

Better known, and of exceptional interest, is the ancient glass goblet known the world over as the

"LUCK OF EDENHALL,"

which bears the legend: "When this cup shall break and fall, farewell the luck of Edenhall," and which has been so long treasured by the Musgraves. A similar heirloom is the "Luck of Munceaster," a quaint enamelled glass vase, presented by Henry VI. to Sir John Pennington when he sheltered the King at Munceaster, after the battle of Hexham in 1463; while in the drawing-room of Worthington Hall, the seat of the Curwens, is a small drinking cup of Scotch glass given by Mary Queen of Scots as a parting gift to her friend and host, Sir Henry Curwen.

At Hesleyside, Durham, is a very remarkable memorial of past centuries in the form of a formidable spur, six inches long, which, we are told, the "lady of the family used to serve upon a dish to her husband and sons, as a hint that the domestic larder needed replenishing." At Colleshill House is a wax image of an infant, the last hope of the Fleydells, which is credited with remarkable influence over the fortunes of the Bouvieries; and at Maffen one may see the Socburne falchion, the identical sword with which Conyers of Socburne is said to have slain the Serpent.

THE FRENCH PRESIDENT.

He is a Total Abstainer and Also a Foe of Tobacco.

France's new President, M. Fallieres, differs from all his predecessors in office in that he is not only a total abstainer but also a foe of tobacco. President Loubet loves his pipe, as did the late President Faure. But Fallieres is averse to tobacco in any shape or form, and while he makes excellent wine, which he sells and gives away, he never drinks. On the other hand, he is passionately fond of music, for which Loubet has as little ear as had Faure, Grevy, Marshal MacMahon and Thiers. He is as good a shot as President Loubet, and an infinitely better one than poor Sadi-Carnot.

President Fallieres, who is an agnostic, is deeply attached to his umbrella, which accompanies him on all and every occasion, and which will from now on become a favorite subject for French political caricaturists. The only other ruler who has ever been given to umbrellas was King Louis Philippe, who was rarely seen without one, and in whose hands it took the place of both sceptre and sword. Yet, in spite of this analogy of tastes, it was Fallieres who, as Premier, was responsible for the expulsion from France of King Louis Philippe's grandson, the late Count of Paris, and of the Duke of Orleans.

M. Fallieres is married, and the couple have two children, a son practising at the Paris bar, and an unmarried daughter. Madame Fallieres is described as "kindness personified." The worthy lady is a pattern housekeeper, and it is even said that she is not above paying an occasional visit to the nearest market. She is extremely charitable. M. Fallieres has always been extremely accessible to callers, is well known for his hospitality, and, altogether, has the making of as capable and popular a President as M. Loubet has shown himself during his seven years' term of office.

JAPS PAID THE PRICE.

The Manchuria Daily Report, the Japanese paper published in New-Chwang, Manchuria, recently said editorially: "We repeat that every inch of Manchuria under Japanese occupation now has been bought for a dear price in blood and money. Hence Japan is its legitimate owner. China has forfeited her suzerainty over it by once making, so to speak, a present of it to Russia."

they nearly came to blows, as they screamed and gesticulated, livid with rage. I endeavored to make peace without success. An hour later I met them leaving the house.

"Where are you going?" I asked.

"To the chemist, gracious lady," they answered, "to have our blood drawn, as passion is dangerous in the hot weather."

What happiness is there for any household when the master or mistress loses self-control, and scenes take place which must lower them in their own estimation when sober thought returns? But self-control must be taught early, and it is only too rarely looked upon as a cardinal principle in education.

MAKING EXCESSES IMPOSSIBLE.

I remember reading in the late Mrs. Booth's life that she saw this so clearly that when one of her children cried inordinately as a tiny baby, in order to be lifted out of its cradle, she bent over the baby for four hours and held it there, and never in after years did the child believe that it could get its way by this resort of infancy.

Self-control would make excessive eating and drinking impossible; would curb unruly passions and still inordinate expressions of anger or of unseemly merriment. It is the lever which regulates the whole being and makes it of use to its possessor. It is interwoven with all qualities which make man useful and great.

No one can be really happy who has that greatest of physical curses, constant ill-health; but if each one gave a little pains to ascertain what keeps him in good health, we could go a long way towards ensuring its possession. Over-eating is undoubtedly to-day one of the causes of much unnecessary suffering, and if we each determined how much food—or, rather, how little food—was necessary to our well-being, we should not have to search far and wide for new fads, but we should quietly pursue the regime which we found successful.

SOCIAL EVILS.

If this is true in the matter of food it is more so in the matter of drink. I am naturally especially interested in this phase of our social habits, but I clearly see that the evil begins and ends with want of self-control.

The entire absence of self-control in our slum population is one of the most salient characteristics. If the children are angry or hurt, they howl without ceasing. If the women are vexed they will cuff and shake a child unmercifully. A man gets sick of his work, and even in these hard times without thought he "chucks it," although starvation stares him in the face.

But if self-control in action is the secret of happiness, the same quality in thought is essential. Jealousy, undue worry, anger, and evil passion, are all qualities born in thought and matured in action, and the self-control required is to make oneself turn from such at once and command the presence of nobler things. Content, which is the very essence of happiness, is, after all, but the outcome of control. To learn "to do without" is one of the fundamental principles of happiness.

We hear now-a-days a great deal about the "simple life," but the radical mistake appears to be that there is no intrinsic value in simplicity, as there is no splendid duty in striving after happiness. Both ought to be the outcome of a sincere desire to help others. — London Answers.

SWAN NECK MARK OF BEAUTY.

Among the Padaungs from the Karen and Shan States, recently inspected by the Prince and Princess of Wales, the swan neck is esteemed so great a mark of beauty that extraordinary pains are taken to acquire it. As early as possible in the life of the female infant, brass rods, about a third of an inch in diameter, are coiled around the neck and are added to periodically so as to keep the neck in a constant state of tension. The longer the neck the greater the beauty, and some of the Padaungs carried from twenty to twenty-five coils.

and laughter of other people to a silent colonnade. The most attractive of the schemes was to turn the great building into an encampment of sport—a headquarters for all the athletic societies of France. Apparently the idea has not borne fruit any more than the suggestion to establish an American exhibition, where all that pertained to the products of the New World would be on show to the Parisian.

There was something a little shocking in turning a public monument to pure commercial uses, even though we were promised an American hotel run on strictest American principles—a living example of how it should be done in public catering. Perhaps this is why this attempt at regeneration appears to have had no more success than the other. Not the Palais Royal is left alone in its glory, to its memories, to its huiusiers. The footfall of the rare tourist, or of the Parisian making a "short cut," is the only music of the outer world that reverberates through its historic galleries. True, there are the shops, whose merchandise has sometimes signs of degeneration in it, too; there, is the colonial office, that has something very hopeful in it, as the symbol of an advancing empire; but these are the solitary swallows that do not make a summer of prosperity.

THE FATE OF VEFOUR.

which, as the Cafe de Chartres, gave rest and refreshment to the great of the earth, is not only symbolical of the ruin of the Palace, but of the great restaurant. People are less gastronomical than of yore, or they dine in clubs rather than in the restaurant. The history of the great eating houses of Paris is a history of change and decay. Regard Torton's, completely gone; the Malson d'Or, converted into a "brasserie," flaunting its striped awning in the face of its aristocratic vis-a-vis; the Cafe Anglais, one of the few survivors of the brave old times. Again the Cafe d'Orsay is a changed creature, inside and out.

Nor does the spirit of demolition or innovation stay here. Take the cabarets—the queer scandalous cabarets, where they sang and danced and amused the grand dukes and their bourgeois imitators by all manner of eccentricities. They are doomed and all disappearing one by one. Today it is the old "Pere Lunette," the resort of stage brigands and artists. Apaches, which is under sentence of death; to-morrow they whisper that the list for the tumbrels will include the "Angel Gabriel," a very unlovely and unangelic angel, but a picturesque personality, whose acquaintance is not without peril for the unguided visitors. The truth is, high dining and high rioting march together. When one goes the other receives notice to quit. Public morality is the better, no doubt, still.

GREENLAND'S ICE CAP.

Enough to Cover the United States Quarter of a Mile Deep.

The largest mass of ice in the world is probably the one which fills up nearly the whole of the interior of Greenland, where it has accumulated since before the dawn of history. It is believed to now form a block about 600,000 square miles in area, and averaging a mile and a half in thickness. According to these statistics, the lump of ice is larger in volume than the whole body of water in the Mediterranean; and there is enough of it to cover the whole of the United Kingdom of Great Britain and Ireland with a layer about seven miles thick. If it were cut into two convenient slabs and built up equally upon the entire surface of "gallant little Wales" it would form a pile more than 120 miles high. There is ice enough in Greenland to bury the entire area of the United States—a quarter of a mile deep.

Second (to duellist, who, on confronting his adversary, has suddenly grown pale, and is only just prevented from falling)—"Take courage, man. I know your opponent is going to fire in the air." Duellist—"That's just what makes me afraid. He's such a notoriously bad shot."

birthday on the 21st ult., having been born at Edinburgh, January 21, 1828. He was the elder son of a late sheriff of Lanarkshire, the author of the "History of Europe."

The funeral of Mr. James Robertson, the late Deputy Town Clerk of Edinburgh, took place a few days ago to Morningside cemetery. There was a large attendance of mourners, including several members of the Town Council and the heads of members of various city departments.

A handsome addition to Glasgow Victoria Infirmary was opened recently, before a large gathering of ladies and gentlemen, by Lady Blyswood. This addition consists of a new ward pavilion, four storeys in height, giving accommodation for eighteen beds on each floor, and an extension of the nurses' home, comprising thirty-seven additional beds and six parlors. The cost was £30,000.

One of the oldest religious sects in Scotland does not permit its members to avail themselves of the franchise. This is the Reformed Presbyterians or Macmillanites, as they are sometimes called, who date from the Revolution of 1688, when they refused to join the National church because the Solemn League and Covenant was no longer considered binding.

\$500 PER DAY FOR ORCHIDS.

Wealthy Frenchwoman in Debt—Owes Coachman \$3,000.

The Marquise de la Roche-Fontenille, of Paris, is a woman of expensive tastes. When she married in 1888 she had a fortune of \$185,000 and her father, since that date, has been generous in the matter of presents. She spent so wildly that her relatives intervened, summoned a family council and got the remains of her fortune put into the hands of the Court of Chancery. She has applied for leave to manage her own affairs, and the case is now under consideration.

The other day it came out that the principal consequence of judicial interference was that, instead of paying cash for her expensive caprices, she has been getting into debt. She owes her coachman \$3,000, and is on the books of various fashionable restaurants to the tune of \$5,500.

When unwell recently she decorated her bed with costly orchids, renewed three times a day, at a cost of \$500 per diem. Judgment has been reserved until the end of next week.

DROWNED HIS BROTHERS.

Crime to Save Reputation of a Family—Feared Insanity.

A young man named La Margueresse has been arrested at Lorient, France, for drowning his younger brothers, Joseph and Francois. The bodies were found in the river recently, and it was generally supposed they had fallen in while playing on the bank. At the funeral the behavior of the eldest brother was so extraordinary that the suspicions of the parents were aroused, and they questioned him closely.

He admitted throwing the boys into the river, and said he did so because Francois was an idiot. He was afraid, he added, that Joseph might grow up an imbecile also, and that a stigma would always be attached to the family. Francois sank immediately, but Joseph swam ashore. His brother pushed him back and held him under water until he was dead. When the news of the confession spread the police had great difficulty in saving La Margueresse from an angry crowd, who wanted to lynch him.

The proprietor of an hotel, hearing of the whereabouts of a guest who had camped from his establishment without going through the formality of paying his bill, sent him a note: "MR. —, Dear Sir,—Will you send amount of your bill and oblige?" To which the delinquent replied—"The amount is \$40 — Yours respectfully."

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafeo's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

The Reliable Clothier.

The Salvation Army Emigration.

Blank application forms for farmers who wish to apply to The Salvation Army for farm help may be had at this office.

ecture.

A lecture will be given in the Western Methodist Church by the celebrated Colored Orator, Rev. H. Hector on Wednesday evening, March 14th.

The Normal School.

A movement is on foot to have representation made to the Provincial Legislature with a view to having one of the projected Normal Schools located at Napanee. There is no better or more central place in Eastern Ontario, for such a school. The township, town and county authorities should unite in their efforts and by working together try and secure a Normal School for Napanee.

W. M. S.

A union meeting of the W. M. S. Auxiliaries of the town will be held in the Presbyterian church, on Thursday 8th. March, at 3.30 p. m. Miss McKinney, of the Zenana Bible and Medical Mission, a society which is entirely interdenominational, will address the meeting. Miss McKinney is a fine speaker and never fails to create an interest. A short musical program will also be provided, and a collection taken. All, including gentlemen, are cordially invited to be present.

Pocket Electric Flash Lights will sell at \$1.00 each.

BOYLE & SON.

Ernesttown Wedding.

A quiet home wedding took place on Tuesday evening, February 20th, when Rev. Mr. Sexsmith, Bath, united in marriage. Miss Petronella, youngest daughter of Mr. and Mrs. Daniel Woodruff, Ernesttown, and David H. Purdy, Medora, Man. The bride entered the parlor leaning on the arm of her father, and took her place beside the groom. She looked charming attired in a gown of cream silk crepe de chene, with trimmings, knife-pleated chiffon and ribbon. She was attended by Miss Lillian Woodcock, Deseronto, beautifully gowned in crepe de chene with silk trimmings. Durlin Woodruff, brother of the bride, acted as groomsmen. At the conclusion of the ceremony the guests sat down to a sumptuous repast. The bride's travelling gown was of nickle grey ladies' cloth with hat to match. The gifts re-

Don't Dye the Old Way.

The same package of **DY-O-LA** can be used for silk, wool, cotton, mixed materials, etc.

It's a new and better dye. Absolutely fast colours—rich and beautiful.

"DY-O-LA dyes more and better than any other dye I have ever used," writes Mrs. J. Webb, Mill River, P.E.I.

No poisons or acids in DY-O-LA. Use with common salt—and common sense.

Easy as washing. Same directions apply to every colour. (Be careful about discharging the old colour.)

At the druggist's insist on getting DY-O-LA.

One package instead of three. Price, 10c.

A. E. PAUL.

In Loving Memory of Mrs. Agnes Rock Who died December 17th, 1905.

Dear Aggie's toil and cares are o'er,
She is laid away to rest
We hope to meet on the other shore
Where she is ever blest.

It was upon a Sabbath eve
She gently fell asleep,
How sad were those that she did leave
For her, their loss did weep.

When in the casket she was laid
A smile was on her face
We wish with us she could have stayed
There is none to fill her place.

The one that is gone is so much missed
Long had she for us cared
The tired ones loved to assist
Their joys and sorrows shared.

There's many things she left behind,
On which we fix our eyes upon
They tend to put us all in mind
That one we loved is gone.

Her picture that hangs on the wall
Is all that now to us is left
She was a loving friend to all
Of that dear friend now are bereft.

—Con.

Getting Settled.

Messrs. Madole & Wilson are getting pretty well settled in their new quarters, one door west of their old stand and are now in a much better position than form early to cater to the hardware trade of this district.

Their stock is the largest and most varied of any in their line in Napanee, making it almost unnecessary to look anywhere else to be supplied with anything you need in hardware.

They carry also a large and well assorted stock of nickle goods, agate tinware, and dairy supplies; and employ a large and efficient staff of plumbers and tinsmiths, and will be pleased to prepare estimates and give prices at any time.

Death of Mrs. Leonard.

The second bereavement, within two weeks, has been the sad lot of the family of John Leonard, Glenvale, with the death, Friday evening, of Mrs. Leonard. Mrs. Leonard was sick but a week with pneumonia. Thursday afternoon she had a hemorrhage which caused her sudden death. Two weeks ago Miss Annie Leonard, the youngest daughter, died very suddenly.

Mrs. Leonard was the wife of John Leonard, the well-known and well-to-do farmer, and was aged sixty-eight years. She was a member of the Methodist church. Beside her husband, one daughter, Mrs. (Dr.) Wartman, Napanee, and two sons, Briden, Glenvale, and Oscar, Saginaw, Mich., mourn their loss.

Canadian and American Coal Oil.

MADOLE & WILSON.

Scholarships.

Fourteen scholarships to the value of \$75 for male teachers and \$50 for female teachers will be granted by the Minister of Education to teachers who will take a course in Nature Study at the Macdonald Institute, Guelph. The teachers must hold at least 2nd Class Professional certificates. There is also granted from the Macdonald Rural School Fund five cents per mile for traveling expenses. The Nature Study course commences on the 5th of April and extends over a period of three months. It is desirable that the different portions of the Province shall be represented, and that not more than one teacher should come from one county. Applications should be addressed to the deputy Minister of Education, Toronto, not later than the 10th of March.

BOYLE & SON.

PRIZED HAIR ROPES.

Those Used by the Daring Egg Gatherers of St. Kilda.

An Irish paper not long since offered \$150 for a genuine St. Kildan hair rope, such as is used by egg gatherers. On the lonely island of St. Kilda the most appropriate present a young woman can give to her fiancé is a rope made of horsehair, or, better still, of human hair. The rock scalars of this island consider themselves rich above mention if their brides are able to make them such gifts. The ropes are of various lengths, a good one being forty or fifty feet long.

According to a woman traveler who has spent much time at St. Kilda, the ordinary rope consists of a stout hempen cord wrapped round and round with sheep's wool, then with horsehair and finally on the outside with human hair.

It is the work of years to manufacture such ropes—and the maiden of St. Kilda begins very early in her childhood to save her hair combings—and also to dry and bleach certain rough grasses that grow on the wind swept island. The fibers make the cable stronger, and the elastic quality of the hair prevents chafing against the rude cliffs during the rock scalar's descent.

A curiosity collector wanted to buy one of these ropes, which are used by the St. Kilda egg gatherers. He offered \$100, but the amount was refused scornfully.

AN INDIAN LEGEND.

The Grandfather of All Mosquitoes

Any Kind of Dye.

At WALLACE'S DRUG STORE you can get 3 packages of Diamond Dyes, Turkish Dyes, Standard Dyes, Rexall or Dyola for 25 cents. We have a cheap Brown for Carpet Rags which gives excellent results. Everything Fresh and Good at the Red Cross Drug Store.

AN INDIAN LEGEND.

The Grandfather of All Mosquitoes and His Giant Descendants.

There are pretty big mosquitoes in the world, but if report be true they have greatly degenerated in size and strength since the days when this legend was believed by many tribes of Indians.

The grandfather of all mosquitoes lived in the neighborhood of Onondaga, N. Y. When he grew hungry he would sally forth and eat an Indian or two and pick his teeth with their ribs. The Indians had no arms that would prevail against this monster, so they called upon the holder of heavens to come down. Finding that he had met his match in this person, the mosquito flew away. He flew around the great lake, turned eastward, sought help from the witches that inhabited the Green lake and had reached Lake Onondaga when his pursuer came up and killed him.

As his blood poured forth on the sand each drop became a smaller mosquito. They gathered about the holder of the heavens and stung him so cruelly that he half repented the service he had rendered to the Indians.

The Tuscaroras say that two of the mosquitoes stood on opposite sides of the Seneca river and slew all who passed. Hiawatha killed them. A reservation stone marks the place where the holder rested during his chase, and tracks were until lately seen south of Syracuse alternated with the footprints of the mosquito. These footprints were shaped like those of a bird and were twenty inches long. These marks were revered by the Indians for many years.

THE GOLD STANDARD.

England. In 1816, Was the First of the Nations to Adopt It.

The first nation to adopt the gold standard was England. She adopted the gold standard nominally in 1816, but practically not until three years later, for in 1816 England was on the paper basis. Germany, which adopted the single silver standard in 1857, took steps toward the establishment of the gold standard in 1871, but it was not until July, 1873, that she demonetized silver, undertook to melt down her silver coin, sell it for gold and establish the single gold standard. The Scandinavian nations adopted the single gold standard at the same time. In September, 1873, France restricted the free coinage of silver and three years later entirely suspended such coinage, but has never undertaken to discard the silver coin she has in use or to treat it otherwise than as on an equality with gold. The action of France in restricting and then suspending the coinage of silver on private account was followed by the other nations of the Latin union—Belgium, Switzerland, Italy and Greece—and Spain suspended the coinage of silver in 1878. Holland, which had established the single silver standard in place of the bimetallic standard in 1847, suspended the coinage of silver in 1872 and opened her mints to the coinage of gold on private account in 1877.—Watson's Magazine.

The Leader Bioscope Co. appeared here for two nights and one Matinee, Friday and Saturday, December 22nd and 23rd, and is without a doubt the best Moving Picture Co. that ever appeared here. The pictures are extra large, clear and the best of all, free from flicker. The Moving Pictures are all new and up-to-date, consisting of such pictures as the "Bold Bank Robbery," "The Strike, Fun at Coney Island," "Down at the Farm, Burglar Caught in the Act," "Drama in the Air," "The Chicken Thief," "Rattles, Uncle Josh and the Green Goods Man," "Trump's Revenge," "Lost a dog, A Clever Baker," "A Sweet Kiss, Scenes at Every Floor," and a number of other very interesting pictures. Would You Care, The Out Cast and The Bride, Just For To-night, and Keep A Little Cozy Corner In Your Heart For Me, are the Beautifully Colored Illustrated Songs that Miss Edna Williamson rendered in a clear sweet voice with much ability, which was roundly applauded. This Company will appear at the Opera House, Napanee, March 5th, and 6th, at Popular Prices 10c, 15 and 25cents. Change of Program every night. Ladies free Monday night, if accompanied by one Paid Ticket.

Horse Clippers, best makes guaranteed to work or returnable, curry combs, horse brushes and cattle cords.

The Deseronto Hockey team went to Picton on Thursday to play the Picton team.

The town's private bill re Electric Light By-Law was presented to the Legislature by Mr. T. G. Carscallen, M.L.A., on Monday.

Messrs. T. F. Ruttan, Napanee, and S. J. Collier, Picton, have purchased the business in Picton, formerly conducted by the late, Geo. D. Hart.

The death occurred on January 25th in Olden township, of one of the pioneer settlers, in the person of Mr. Gordon, son of the late John Johnston and grandson of Sir William Gordon, Bart. Deceased was a highly educated scholar receiving his education at the Belfast and Edinburgh Universities. One sister is left to mourn, Mrs. John Douglas, Plevna, Ont. Interment took place at Mountain Grove cemetery.

A serious accident occurred to Mrs. (Capt.) James Collier, last Thursday afternoon. She was attending to her household duties as usual, when she unfortunately fell in her own kitchen, with the result that one of her legs was broken above the knee. Medical assistance was at once summoned, and as soon as possible means were taken to reduce the fracture. Mrs. Collier has been peculiarly unfortunate, having broken one of her hips but a few years ago. The family have the sympathy of the community in their affliction.—Picton Gazette.

Carpets and Housefurnishing for Spring 1906

It goes without writing that we're not giving first-class room to second rate stocks or that with a clever knowledge of fashion's requirements, we haven't selected the best, we've counted on Stocks that'll appeal to everybody, from splendid luxury to modest economy. We know of nothing in Central Ontario that will match our assortments at any thing near the prices to say nothing of quality.

The latest in Wilton, Axminster, Brussels, Tapestry and Wool Carpets, Curtains. All the newest and latest designs in Lace, Silk, and Arabian Tapestry, Madras Muslins, Stripes, etc. Draperies, Silk Velours, etc. Our consignment of Lineoliums, this week consists of three tons of 16/4 in all the newest imported designs. Tapestry Rugs, size 3x4 at from \$9.00 to \$16.00 each.

(We do all kinds of Artistic Draping.)

LETTER TO EDITOR.

Dear Sir—Some time ago it was asked through the public press, of the Town, the names of the gentlemen being given, from whom the answers were required, and the names also of the several gentlemen of the County, asking the question and requesting the answers, were, if I remember, not having their names before me, all respected, influential and well deserving citizens.

Up to the time of this writing, as far as I am aware no reply has been given. I had expected that the M.P. would lead in reply, and then if he did not the M. P. P., to be followed by others.

Neither having been pleased to take up the matter or other of the gentlemen named. I think it no more than just that some one should lead in reply.

To the first question—"What is your opinion of the amount paid each member of the House of Commons, viz: \$2500.00"—I have no hesitation in saying most emphatically the amount is in excess by at least \$1000.00 per session and that in a young country as ours, the members of the House of Commons did the Electorate a great injustice by donating to themselves this excessive amount and that no time should be lost, when the House meets of placing the amount at \$1500.00. Whilst it may be true that a certain per cent of the members go to parliament at a sacrifice it is nevertheless true, that ninety per cent of them would not earn \$2500.00 at some other business in five years, let alone six months.

As to the second question—"The pension to the Senators" that should be blotted off the statue book with the darkest red ink that can secured, and at once.

I have given as briefly as possible, my view on these requests, having been one of the names suggested for a reply, believing now, as I have always, in standing for the rights of the people.

Yours Truly,
M. S. MADOLE.

International Stock Food, Heave Cure and other remedies. Three feeds one cent.

TOWN COUNCIL.

Council Chamber
March 5th, 1906.

Council met in regular session. Mayor Lowry presiding.

Councillors present Messrs Kimmerly, Ming, Graham, Simpson.

Minutes of previous meeting were read and on motion adopted.

COMMUNICATIONS.

From The Carswell Co. re index of Municipal Act, was on motion filed.

From R. Mill, Treasurer, re butchers Licenses. Referred to Printing and By-law Committee with power to act.

From G. R. Haney, Montreal, re Fire Hose was on motion filed.

On motion Mr. Alpine Wood was heard in reference to taxes on his box factory, asking remission of taxes on west half of Luffman property on Water street. On motion the matter was referred to the Court of Revision.

REPORTS OF COMMITTEES.

The finance Committee reported the Auditor's Report correct and recommended the payment of the Auditor's salaries. On motion report was adopted.

The Fire Water and Light Committee reported that the Town's private bill had been introduced into the house and would come up Wednesday.

at from \$9.00 to \$16.00 each.

(We do all kinds of Artistic Draping.)

Ready-to-Wear Arrivals for Spring.

The new coats in Covert one-check Tweeds, rain and Dust Coats, Ready-to-wear Suits, and separate skirts. Introduced in these smartly tailored garments is New York's best style effect, coupled with most reasonable prices, without fear of valid contradiction in asset, that our range of Spring Ready-to-wears is one of the most comprehensive in the matter of style and value. We invite you to see these new garments and judge for yourself the correctness of our statement.

Dress for the Dressy.

The Idea is not complete, of course without embodying the name of this store, but the complete phrase—Madill's new Spring Dress goods—is an expression upon many a lip just now. The spring of 1906, eclipses any previous spring in the wealth of beauty, quality and quantity shown in our Dress goods Department. It will please us for you to allow our thoroughly experienced and capable salespeople to conduct you through our Dress Goods Department and show you the materials out of which the new styles can best be fashioned. Such information will be decidedly correct.

Wash Goods of Quality.

The actual demonstration of their beauty can only be achieved by personal inspection. Words fail to convey any adequate idea of the many handsome exclusive designs, we are showing this season. The most noticeable characteristic of our stock just now is newness. The new Dress Linens, the novelty Dress Muslins etc., are amazingly attractive. We extend an invitation to visit this Section.

MADILL BROS.

Roses In the Snow.

It seems almost impossible that there should be a plant that flowers naturally outdoors in the depth of winter. But it is a fact. The Christmas rose answers this description. From the end of October until February its white flowers (about three inches across) may be gathered at almost any time, and even when the ground is covered with snow the Christmas rose is producing its flowers. We don't often see them in December and January because we never think of brushing off the snow to look at the plant that is growing underneath. The flowers are of a dazzling whiteness when young, but become faintly tinged with pink after

IN THE HIGH COURT OF JUSTICE

Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A.D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Napanee at his Chambers in the Court House, Napanee, on

FRIDAY THE 9TH DAY OF MARCH, A.D. 1906.

at 2 p.m., the following valuable farm lands, Parcel No. 1.—The Northwest 1/4 of Lot No. 11 in the 5th Concession of the Township of Camden, in the County of Lennox and Addington, containing 10 acres more or less.

Parcel No. 2.—The Northwest 1/4 of Lot No. 11 in the 6th concession of the said Township of Camden in the County of Lennox and Addington containing 10 acres more or less.

Parcel No. 3 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds.

Parcel No. 2 is pasture land without any

It is announced that the Dominion Steamship Company have contracted with old country firms for five large ocean freighters.

A deputation from Kingston, asked the Government for the establishment of a Normal school there.

The International Waterways Commission adjourned till April 21, at Washington, without coming to any arrangement regarding Niagara Falls.

There is a rumor that the Legislature will be asked to sanction a measure authorizing the Government to undertake the distribution to municipalities requesting it of electric power.

Mr. Robert Jaffray, Dr. Douglas, Dr. Deveber, Mr. Peter Talbot and Dr. Roy were appointed to the Senate yesterday.

The C. P. R. are experimenting with what is said to be the largest locomotive ever built. It is designed to haul the transcontinental trains, and to handle trains of twenty passenger coaches.

Liverpool will petition for the removal of the embargo against Canadian cattle. The trade of the port demands it, they say.

Having said uncomplimentary things about the pills that make pale people pink, the proprietors of Colliers are being sued for \$600,000. If the case goes against them they will have no trouble looking blue without taking an overdose of anybody's cure-all.

THE PICTON SHOOTING CASE.

Pictou, March 5.—The shooting of Mrs. Brown, which recently occurred here, was investigated before Coroner M. Curry and a jury of fifteen men this afternoon. A number of witnesses were called, who gave evidence to the effect that the fatal shot was fired by young Nelson, but without any malice and the unfortunate result was in no way anticipated. The evidence of Drs. Wright and Heaslip, who made the post-mortem examination, was in effect that death was caused by a bullet wound, but they failed to find the bullet. The verdict of the jury was that the death of Mrs. Brown was caused by a bullet wound; that the rifle which caused such wound was discharged by Frank Nelson, and they expressed the belief that the shot was not intended to do bodily harm, and a condemnation of the practice of permitting minor under the age of eighteen years being permitted to use firearms within the corporation limits. The prisoner was remanded.

Belleville, Ont., March 6.—Near this city, yesterday afternoon, about five o'clock, as the result of a quarrel, Fred Kleingbeil, a farmer, seventy years of age, beat his aged wife so severely that she died about eight o'clock this morning. The couple lived on the Thomas farm, about two miles from this city.

The crime was discovered by a boy who went after his wages. Kleingbeil came to the door with blood all over his hands and arms, and the boy looked through the window and saw the old woman in a terrible state. Then the boy informed the authorities. County Constable Duffin went out and arrested Kleingbeil, and brought him to the county jail.

The old man is said to have been in delirium tremens since Saturday last. He says he and his wife had a quarrel and he beat her with his fists, but Dr. Yeomans, corner, it is alleged, does not think the injuries could have been all inflicted with fists.

Kleingbeil is seventy years of age and his wife was about seventy-two. The couple had two children, a son and a daughter. The awful affair has created great excitement in this city. Kleingbeil served in the United States army in the war of the rebellion.

See Too Much.

Some people see too much, others cannot see enough; but we feel confident that if you test the ability of the expert optician in charge of the new optical department at Medical Hall, you will see perfectly. We guarantee satisfaction.—Fred L. Hooper.

Toronto, March 3.—Joseph Phillips manager of the York County Loan, was before Police Magistrate Denison yesterday after many remands. Phillips' counsel made a protest about going on until such times as the crown consented to supply him with a bill of particulars upon which the charge of conspiracy to exhort money from people by fraud was based. Crown Attorney Curry and the magistrate said particulars would be given as they went along, by witnesses. Mr. Curry became generous and supplied the solicitor with one particular, which was that Phillips was charged with having secured from Mrs. Jackson, a widow, of Ottawa, the sum of \$1,500 on the 15th of August, at a time when he knew the York County Loan to be in a condition of collapse. The trial will be proceeded with on the 8th before Magistrate Denison.

Is one of the best friends that any family has, but there are often sudden and acute attacks of some painful disease that require immediate treatment, such, for instance, as rheumatism, neuralgia, lame back, etc. Tuck's Rheumatic Bone Oil makes the calling of the doctor unnecessary. It will give relief before he could answer the call, and if faithfully used will cure the most stubborn attacks of rheumatism, neuralgia, lumbago, pain in the chest or back, soreness, sprains or strains. It is a powerful penetrating oil that goes straight to the seat of the trouble and roots out the cause. It relaxes the stiffened joints, soothes the affected part and allays the inflammation which produces the torturing pain. It is therefore a valuable remedy not only for rheumatism and kindred diseases, but is equally good for croup, bronchitis and quinsy. One father writes that it cured his child of a violent attack of croup in five minutes. A mother writes that her boy was subject to quinsy and two or three times each year was confined to his bed and could not speak. When threatened with another attack this fall she rubbed his throat and chest with the Bone Oil and by the three applications ward off the attack. The wonderful curative powers of this remarkable remedy are being talked about by everyone. A bottle should be in every home. For sale by all medicine dealers at 50c. a bottle or will be sent prepaid on receipt of 50c. by the Tuck Bone Oil Co., Limited, Smith's Falls. Money refunded if not satisfied.

The Family Doctor.

show the Christmas rose is producing its flowers. We don't often see them in December and January because we never think of brushing off the snow to look at the plant that is growing underneath. The flowers are of a dazzling whiteness when young, but become faintly tinged with pink after about a week.—Country Life in America.

The Preparation.

William O'Brien in his "Recollections" tells this story of Dr. Coke, the archbishop of Cashel: "Once on one of his examinations of the children for confirmation the archbishop put to a little girl the question from the catechism, 'What is the preparation for matrimony?' The little one blushed and giggled and put the corner of her bib in her mouth by way of answer. The question was repeated. 'Oh, sure, your lordship knows it yourself,' was the timid reply. 'Yes, but you must tell me, my child. What is the preparation for matrimony?' 'Well, my lord, a little courting, of course,' at last came the reluctant answer from amid a rosary of blushes."

Declining a Present.

Sir Henry Irving made it a rule not to accept presents from strangers and was often hard pressed for sufficient excuses for declining. During the Russo-Japanese war a wealthy admirer of the great actor approached him with: "Pardon me, Sir Henry, but I want to give you a present." "What is it?" asked the actor. "A Russian wolf hound." "Awfully sorry I can't accept it," replied Sir Henry. "But I'm a lover of peace, and I have a Japanese valet."

The Instinct.

All our progress is an unfolding like the vegetable bud. You have first an instinct, then an opinion, then a knowledge, as the plant has root, bud and fruit. Trust the instinct to the end, though you can render no reason.—Emerson.

Misunderstood.

He—I have a sweet little home in which I would like to install you as its mistress. She—Indeed, sir, I'll go into no home on the installment plan.—Baltimore American.

Camden, in the County of Lennox and Addington, containing 10 acres more or less. Parcel No. 2.—The Northwest 1-4 of Lot No. 11 in the 6th concession of the said Township of Camden in the County of Lennox and Addington containing 10 acres more or less. Parcel No. 1 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds. Parcel No. 2 is pasture land without any buildings and well fenced with a patent fence. The 2 parcels will be sold separately or en bloc at the option of the Master, and subject to an annuity of \$30 a year against the 2 parcels payable to Eleanor McKewen and subject also to a reserve bid fixed by the Master. The purchaser shall pay down a deposit in the proportion of \$10 for every \$100 of the purchase money, and the balance in one month thereafter without interest. In all other respects the terms and conditions of sale will be the standing conditions of sale of this Court. For further particulars, apply at the law offices of Messrs. Herrington Warner & Grange and Morden & Rutten, Nanawau. Dated the 5th day of February, A.D. 1906. (Sgd.) S. S. LAZIER, Master. Herrington, Warner & Grange, Pltff's Solicitors.

WANTED, by Chicago wholesale house, special representative (man or woman) for each province in Canada. Salary \$21.00 and expenses paid weekly. Expense money advanced. Business successful; position permanent. No investment required. Previous experience not essential to engaging. Address Manager, 132 Lake Street, Chicago, Ill., U.S.A.

TO LET

That very desirable property in Salem, consisting of four acres of the choicest garden land, underdrained, with excellent frame house, drive house, barn, stables, henhouse and smokehouse. For further particulars enquire of FRANK H. PERRY. Will rent house separately, if desired.

FARM FOR SALE.

Owing to the wish of the owner to move west that desirable farm comprising parts of lots 11 and 12 in the 7th, co. cession of the Western Addition of the Township of Kingston, known as the NELSON WALKER FARM, containing 85 acres more or less, and situated three miles East of Wilton on Mud Lake, is now offered for sale. Good buildings—possessed March 1st, 1906. Owner values farm at \$3,000.00, but will sell at \$2,500.00—\$1,000.00 cash and Mortgage at 5 per cent. Apply to Frank Martin, Wilton, P. O., or to Harvey Warner, Nanawau. Wilton, January 24th, 1906.

CONFIDENCE IN ONE ANOTHER

It Will Be a Very Dark Day For Us When We Lose That.

Who shall abide in thy tabernacle? . . . He that sweareth to his own hurt and changeth not.—Psalms xv., 1-4.

It is a good deal easier to admire that man than it is to imitate him. Truth is a jewel seen afar, but, coming near, and cutting its keen way into our tender places, separating us from well-loved gains, robbing us of the masks of conventional righteousness, tearing away our veneers, or shining with its clear, cold light so that all things become visible in their naked characters, our admiration is likely to be tempered with other considerations.

Even the most determined optimist must sometimes wonder whether David would not say with deliberation what he tells us he once said in his haste, "All men are liars." Whether in buying or selling, in word or deed, with tongue or pen, the man who deliberately endeavors to lead to a conclusion other than that he knows to be right is found everywhere.

Words are largely the currency of life. The value of the currency issued by any man depends on its stability. Back of it, establishing its value, must stand the unvarying integrity of the man. This priceless reserve it is that keeps men from moral bankruptcy. Few, if any assets, are of greater worth than the treasures of integrity and the approval of

A GOOD CONSCIENCE.

But we are told by many that we are under another system to-day, under the law of smartness which thinks of truth and honor only as the servants of personal, selfish success. This gross code demands that we should lay aside the scruples that have purged the soul in the past, that we shall ridicule the virtues that made our fathers clean, stalwart, clear eyed, large souled, those virtues that, somehow, as we look at them, set out of sight their poverty and limited circumstances and place them in a temple whose glory is simple, rugged, godlike manhood.

But even if this is a lying age, the

price of conformity is more than you can afford to pay. And there never was a greater mistake than to believe that in order to get on in the world it is necessary to get off the track of truth and right. This is not the age of moral anarchy; above all, after all, right rules. Sporadic rebellions there may be and they may seem to bring power to their promoters, but you have no more right to judge the tone of an age by the moral obliquity of a few than to pronounce a verdict on a government on the evidence of the misdeeds committed under its rule.

We judge too often without perspective. We gaze in wonder at those who go up with the glory of the rocket, forgetting to ask the past whether any of the constellations came to their places in that manner. In the night of our yesterdays we can discern but a few of those who lived for

WEALTH AND SUCCESS ALONE:

they glimmer but as warnings, while about them, clear over all, shining unmoved by panics and fears, undimmed by time and changes, are the lives of those that have lived for love, for truth, and right, who obeyed the great moral law of the universe and found their place in the temple of God.

The test of a man's veracity is not alone in the exactitude of his statements; he may always tell the precise verbal truth and still be at heart a liar and in fact an outcast from the house of honor. The test is in whether he is using this currency of words solely with a selfish purpose or with it seeking ever to serve men, to enrich the world, willing to meet loss if love may win.

These are they who abide in his tabernacle; a white name purchased by the loss of much that lesser souls counted gain is theirs. They found the true and unfading riches, the lasting success of the soul. And while they yet lived they walked the way of truth and entered into their heritage, the heritage of the pure in heart, the clean of hand, the world enriching life.—Henry F. Cope.

THE S. S. LESSON

INTERNATIONAL LESSON, MARCH 11.

Lesson X. The Tongue and the Temper. Golden Text, Psa. 141. 3.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

"I say unto you."—Perhaps the most pronounced characteristic of the teaching of Jesus was the authority with which he spoke. His was no borrowed philosophy of life, his no conception of the kingdom of heaven to which he had fallen heir as a member of his own generation and nation, his no wisdom gained from books or human teachers. His teaching was his own, and his knowledge of men and of God he obtained firsthand; the former, largely at least, from sympathetic contact with, and keen observation of men; the latter, from the hidden wellspring of divinity in his nature. In contrasting the fundamental principles of his teaching with the Old Testament law and tradition, as he does in verses 21-48 of this chapter, and especially in asserting the superiority and higher authority of the principles which he enunciated, Jesus placed himself on

stance, the suffering and death of Christ, which he resisted not—and meek submission to all forms of personal indignity heaped upon one by the vulgar and the wicked, as is indicated by our Lord's personal example in resenting the action of the officer who in the presence of the high priest struck him while on trial (comp. John 18, 22, 23).

41. Compel thee to go one mile.—The verb in this sentence is of Persian origin, and signifies literally "to press into service, as a courier" for the royal post, and in its more general usage also "to force to be a guide." Thus a man travelling past a post-station was liable to be seized by the officers of the station and pressed into service of the king or emperor and forced to carry a letter or accompany another person back to the next station along the road over which he had come in his journey, or in some other direction, and this to the delay and detriment of his own errand and business. This custom was one of the exactions suffered by the Jews under the Romans, by whom it had been borrowed from the Persians. Jesus exhorts to a cheerful submission to the law of the land, and a general willingness to serve even beyond the legal requirement.

43. Neighbor.—This is one of the many words to which Christianity and the New Testament have given a broader and a higher meaning. In the parable of the good Samaritan (Luke 10, 29-37) Jesus makes plain this broader meaning of the word as used by himself.

45. Sons of your Father.—Sons in truth, having his spirit and akin to him

DUKE GAVE AWAY PALACE

BUT HE WON REVENGE THROUGH THE GIFT.

Duke of Sutherland Has More Land Than Any Other of the King's Subjects.

Most people find a lot of satisfaction in getting square with folk who have injured them, but only an enormously wealthy man could have afforded to turn the tables on the county council of Staffordshire as the Duke of Sutherland has done, writes a London correspondent. He enjoys the double gratification of putting its members in a hole and at the same time heaping coals of fire on their heads.

Some months ago, it may be remembered, the duke publicly announced that owing to the polluted condition of the river Trent which flows past Trentham Hall, his magnificent Staffordshire seat, physicians had pronounced it an unsafe and unsanitary abode for himself and his family, and, therefore, he had decided to close it up. The condition of the river is due to the use made of it by the potteries which are centered at Stoke-on-Trent. The duke had appealed in vain to the Staffordshire county council to adopt measures that would abate the nuisance. That democratic body would do nothing. It did not propose to interfere with any industry which provided many poor people with a living, just to make things more comfortable for a duke and his family. If he could not put up with the stench and run the risk of typhoid, as humble folk had to, why he could go and live somewhere else. So the duke turned out, the county council triumphed and the Trent continued to flow its polluted course.

But the duke had a card up his sleeve and he has just played it. He has presented Trentham Hall to the county council for the purpose of establishing there a college for higher education. The gift is a princely one. It cost \$750,000 to build it many years ago and at present prices it would cost considerably over \$1,000,000 to duplicate it. Standing in the midst of a spacious park, and surrounded by beautiful gardens and conservatories, it is one of the finest show places in the kingdom. Of course, the county council cannot reject such a magnificent gift. If it did it would cause no end of a howl. Metaphorically speaking, it will have to go on its knees and humbly thank the duke for it. And after doing that, it will have to take proper steps to secure the purification of the Trent before the college can be set going, for obviously, in these days at least, the most humble of students could not be expected to pursue their studies in a place that had been pronounced unsafe for a duke to live in. And that is where the duke's triumph will come in.

It is uncharitable to estimate the value of a gift by what it costs the giver to part with it. But it is a fact that the duke makes no great sacrifice in parting with Trentham Hall. He has several other homes, three of which at least—Stafford House in London, Dunrobin Castle in Scotland and Lilleshall in Shropshire—kings might count themselves fortunate in owning. The duke has more land than any other of the King's subjects. His estates exceed in area that of any county in England except Yorkshire, Lincolnshire and Devonshire. He owns about one-sixteenth of Scotland—1,176,343 acres, to be exact as Doomsday book permits—besides 30,000 or 40,000 acres in Staffordshire and Shropshire. From Dunrobin Castle, his seat in Sutherland, he can walk 50 miles in a straight line without stepping off his own property. But he generally prefers using his own private railway and enjoys acting as his own engine driver.

The late Shah of Persia was once staying at Trentham Hall and on his Oriental mind the wealth and power of the owner made a profound impression. King Edward, then the Prince of Wales

House of Commons. There he brought in a crofter's bill of so radical a nature as to arouse his friends, and they marvelled how he would act when he came into possession of the family estates. So well has he redeemed his promises, placing great stretches of land at the disposal of his tenants, that he is now one of the most popular landlords in Scotland.

For all that, he cuts a small figure in public estimation beside his much more brilliant wife. His ancestors distinguished themselves chiefly by marrying beauty and broad acres. They accumulated by that process such vast possessions that the present head of the family felt free to vary that practice a bit. He wedded beauty and brains. And, although it has ended in his being generally known merely as the husband of the duchess, he has never had cause to regret his choice. He owed his introduction to Lady Millicent Saint Clair Erskine to the superstitious dread people have of sitting thirteen at table. To break the evil spell she was brought on one occasion from the schoolroom to the dining-room, where her originality, vivacity and striking good looks so captivated the shy, almost bachelor-confirmed Marquis of Stafford, as he then was, that he determined to win her for his bride. They were married on her seventeenth birthday. The romance of love at first sight has had the fairy-story ending of "happy ever after."

The literary achievements of the duchess are well known. Though her play, *The Conqueror*, which was produced last year, was a failure, it was a failure big with promise of success later on. From some remote ancestor she has inherited a love for wandering. As she herself confesses it is in her blood. Her first essay at bookmaking, *How I Spent My Twentieth Year*, showed plainly how alluring for her were fresh field and pastures new; and even to-day she would rather dwell in some draughtily shanty in Caligarnia, a tent pitched on the banks of the Nile, or a log cabin in Norway, than in any of her sumptuous palaces.

Though, as far as pedigrees go, with the blood of 30 generations of Campbells in Argyll in her veins, she might claim to be an aristocrat of aristocrats, she is the most democratic duchess in the kingdom. When she found that her own boys were learning little at the swell school which they attended, she sent them for a term to a parish school which she had founded in Sutherland for peasant children, that the young noblemen might get the snobbishness knocked out of them and discover for themselves that lads of humble birth were really better educated than themselves. No woman has done more to promote the crofter industries. When she went to Russia a few years ago with the Duchess of Marlborough she packed her trunk with samples of Highland tweed and turned herself into a commercial traveler for the good of the cause. Both in Moscow and Saint Petersburg she spread out her wares in a big room and invited the leading tailors to drop in and examine them.

No one can accuse the duchess of being penurious, but that does not prevent London society from complaining loudly because she does not do more entertaining at Stafford House. She throws it open freely for charitable purposes.

ONE DECIDES THE OTHER

POINTERS ON YOUR BIRTHDAY AND CHARACTER.

Your Disposition Depends on Date of Birthday — This List Gives Pointers.

One's characteristics, formed by the position of the planets at the date of one's birth, according to astrologers, are as follows:—

Born Between Jan. 18 and Feb. 17.—Agreeable companions, good-natured,

"Yes; regular kitchen range, with all the flues open."

principles of his teaching, which he found in the Old Testament law and tradition, as he does in verses 21-48 of this chapter, and especially in asserting the superiority and higher authority of the principles which he enunciated, Jesus placed himself on record as one who believed in the progressive character of revelation. The old law and the ancient tradition had to be superseded by these higher standards of life and action set by himself and exemplified in his own life. When now we consider what is implied in this assumption by Jesus of authority superior not only to that of all other teachers of the Jewish nation in his day, but of authority superior to that of the Old Testament law itself, we are confronted by an alternative from which we cannot escape. Either Jesus was all that he claimed to be, divine Son of God, and only Revealer of the Father, or he was self-deceived and a deceiver of others. But the ethical purity of his life and the unparalleled quality of his teaching, together with the historical fact of the great Christian Church, representing the rich fruitage of that life and that teaching, make it impossible for any candid and thoughtful person to accept the latter of the two alternatives.

Verse 33. Ye have heard that it was said—The great bulk of religious teaching among the Jews consisted of oral traditions and rabbinical interpretations, clustering about the written Old Testament law. The meaning of the written law on the points to which Jesus was about to refer had been distorted by the amplification and misapplication to which it was subjected at the hands of this oral tradition.

Them of old time—The Old Testament patriarchs.

Forswear—Swear falsely; commit perjury. Special reference to the third commandment may have been intended (comp. also Lev. 19, 12; Num. 30, 2; Deut. 23, 21).

34. Swear not at all—The Oriental even to-day makes constant use of oaths. In the following verses are mentioned some of the things by which the Jews were in the habit of swearing. Even to-day the natives of Palestine and adjoining countries are given to the use of similar oaths, none of which except the oath in which the name of God himself is used, being considered binding. The prohibition intended must be understood as applying to those frequent rash and careless oaths in daily conversation, not to the solemn oaths taken in courts of justice and which in those days were required as they are in our own time. Verse 45 presents the positive side of our Lord's teaching of which we have here the negative side.

Neither say, I have sworn—One of the rabbinical sayings was, "As heaven and earth shall pass away, so passeth away the oath taken by men." Jesus intended to point out both that a false oath by whatever thing taken is wrong because false, and that the false oath, taken by heaven, by the earth, or by Jerusalem, is, because of the necessarily intimate thought association between these and God, a profaning of God's name.

36. By the head—One of the most common forms of the oath.

37. Yea, nay—Yea, nay—A straightforward yes or no is sufficient. These in God's sight are just as sacred and binding as any form of oath can be. The mere repetition of the word is a sufficient emphasis of the promise or refusal involved to indicate that it has not been spoken carelessly.

The evil one—Satan, the father of lies. 23. An eye for an eye—The law in Exod. 21, 22-25 exacts "life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burning for burning, wound for wound, stripe for stripe," from the person inflicting an injury or death upon his fellow. The principle of equivalent retribution was recognized by the laws of all ancient peoples. The scribes, however, falsely interpreted the law when they made it an excuse for the gratification of personal vengeance, and deduced from the law that it was morally right for individuals thus to execute revenge.

39. Resist not him that is evil—There is a great difference between the resistance which Jesus here prohibits, which is a resistance against the evil wrongly brought upon the innocent—as, for in-

and a higher meaning. In the parable of the good Samaritan (Luke 10, 29-37) Jesus makes plain this broader meaning of the word as used by himself.

45. Sons of your Father—Sons 'n truth, having his spirit and akin to him in character.

46. Publicans—That is, tax collectors, though not in the sense in which that word is used in our country and in our day. It was customary for the central government of a large empire in olden times to sell the revenues of the different individual provinces composing the empire to the highest bidder, who then appointed his own officers to collect from the people as much as possible. The publicans mentioned in the New Testament are the lower or subordinate class of taxgatherers to whom the higher officers or contractors sublet the collection of taxes. These men as well as their superiors aimed to become wealthy by exacting more than the amount which they had paid for the privilege, and thus the system resulted in great cruelty and oppression of the common people, especially of the smaller property owners. A Jew who consented to become a tax officer of this kind and to extort taxes from his fellow countrymen to be paid to the hated Roman authorities was above all men despised by his fellow Jews.

48. Ye therefore shall be perfect—Nothing less, no national or other standard short of God's own standard of right and of love, shall satisfy you.

As your heavenly Father is perfect—Not, however, in absolute knowledge and power, nor yet in absolute ethical perfection, in sinlessness; but in purpose and aspirations rather, having the ideal of God's own goodness ever before you as the ultimate goal of that purpose and of those aspirations.

PROTECTION OF TRAVELLERS.

Scotland Yard Is Making Elaborate Arrangements.

Elaborate arrangements have been made by Scotland Yard, London, acting in conjunction with the American Detective Department, to cope with the American "sharp," who annually journeys to England from America.

For many years past these gentlemen have caused the steamship companies, who have the carrying of the thousands of American trippers to England, the greatest annoyance. They travel by the boats, and succeed by their polished manners in ingratiating themselves with millionaires for the purpose of fleecing them.

The usual method has been to propose cards, and the high playing that takes place generally results in the loss of thousands of pounds to the victim. Warnings have been given to passengers to avoid strangers who with plausible tales of badly wanting to find something to do suggest cards, but this has always had to be done in a most cautious manner, as the American millionaire on a holiday trip is inclined to resent any suggestion that he is not capable of managing his own affairs.

In one case last year no less than \$65,000 was lost by a passenger on the trip from New York to Liverpool.

It is estimated that 400 of America's finest confidence tricksters, card-sharps, forgers and blackmailers come over during the season, and when in England pursue their nefarious schemes with the greatest audacity.

An entire reorganization of the system of watching these gentlemen is now to take place, as the American police have arranged with Scotland Yard. Many trained detectives will travel backward and forward to America, shadowing all the well-known characters, whom they will hand over to the charge of the detective force of Scotland Yard on arrival in England.

The importance of the scheme can be easily realized when it is pointed out that at least 50,000 wealthy Americans yearly pay Great Britain a visit.

On enquiry at the office of the companies it was ascertained that the bookings this year have been enormous, and there is hardly any room on any boat from America to England for weeks ahead.

boys acting as his own engine driver. The late Shah of Persia was once staying at Trentham Hall and on his Oriental mind the wealth and power of the owner made a profound impression. King Edward, then the Prince of Wales, was of the company, and the Shah, after having listened attentively to the story of the duke's possessions, asked the prince if, when he came to the throne, he would behead the powerful man under whose roof they were staying, adding that that was the way they dealt with noblemen in his country when they accumulated too much property. "There are so many other nobles in the land," replied the prince, "that I should be afraid to attempt to get rid of any of them in that way." Whereupon the Shah expressed his conviction that some things were better managed in Persia than in England.

Some ducal families owe their rise to one cause, some to another. A royal descent without a wedding ring has been in several cases the source of great possessions and honors; in others, it career of successful statesmanship; in others, again, achievements on the battlefield; and in one, at least, the old romance of a city apprentice in love with his master's daughter. But the swift and brilliant advance of the Lovelock-Gowers from the position of simple Yorkshire squires 1½ centuries ago to their present proud eminence may be attributed practically to the one cause alone, and that is the unflinching fortune which has followed them in the choice of wives. Like the Trentham family in Disraeli's *Lothair*, they have had for generations an unrivalled attitude for "assimilating heiresses," and to-day a dukedom, five baronies, four viscounties, five earldoms, a marquise, and almost beyond enumeration, wealth beyond the dreams of avarice and palaces stored with priceless treasures are the agreeable results.

The million-acre and multi-titled duke is not a bit like the popular ideal of a rich aristocrat. He gives himself no airs and hates being fussed over. He has no tastes for ceremonial and is all but unknown in high court circles. Sport, country life and the duties of a great landlord suffice for his happiness and his occupation. He loves, in the homely Scots phrase, to "dwell among his folk," caring nothing for society and its ways. For a time before he succeeded to the title he occupied a seat in the

One's characteristics, formed by the position of the planets at the date of one's birth, according to astrologers, are as follows:—

Born Between Jan. 18 and Feb. 17.—Agreeable companions, good-natured, rarely passionate or quick-tempered, successful among and in dealing with others, quiet and dignified.

Born Between Feb. 17 and March 21.—Restless, anxious, affable, kind, honorable and just; are often depressed, and should seek jolly company as an antidote; are found in positions of responsibility and trust.

Born Between March 21 and April 23.—Are natural reasoners and leaders, cannot be forced or driven; love to excel, love order, elegance and beauty; make good lawyers, teachers, etc.

Born Between April 23 and May 23.—Have strong likes and dislikes, splendid memory, great physical and mental endurance, apt to be jealous, fond of the opposite sex.

Born Between May 23 and June 22.—Are very restless, never satisfied, changeable, impetuous, sociable, adjusted to the times.

Born Between June 22 and July 21.—Great lovers of home and family, inclined to be talkative, if women; if men, quiet, inclined to be close in money matters.

Born Between July 21 and Aug. 21.—Can readily adapt themselves to almost any condition in life; will bear trouble rather than fight it; impulsive, love nature.

Born Between Aug. 21 and Sept. 23.—Lovers of singing, admire elegant surroundings, happy and agreeable, make good critics.

Born Between Sept. 23 and Oct. 26.—Have great foresight, guided very perfectly by their intuitions; good, practical judgment; originators and inventors in mechanical matters.

Born Between Oct. 26 and Nov. 25.—High temper, silent, dignified, appearance, strong will, love book knowledge, love to be praised and looked up to as superiors.

Born Between Nov. 25 and Dec. 22.—Are bold, fearless, and easy to get acquainted with; people of action rather than words, have great fidelity in love relations.

Born Between Dec. 23 and Jan. 18.—Natural heads of large corporations, proud, independent, talkative, versatile, competent to bear great responsibilities.

SHOULD DRAW WELL.

"Big range her voice has, eh?"
"Yes; regular kitchen range, with all the flues open."

YOUNG FOLKS

THE CHICKEN OF PERUGIA.

One day, in one of the back streets of the old town of Perugia, in Italy, some children were having a good time. They sat on the ground and laughed, and shouted "Vival!" and made merry together, and because I always like to learn a new game, I went and joined in, relates the Rev. J. G. Stevenson. They made room for me at once, but when I saw what they were doing, I was not at all sure it was the kind of game for a minister to play. In the middle of our little group was a grey chicken, who must have been almost four months old, and it looked as though he was having the worst time of any of us. For a small boy held him by the back while a little girl tied a string in three loose knots around his right leg just above his foot. I had often heard that Italian children play cruel games with live birds, and it hurt me to think that the poor chicken might be treated badly. But I did not go away. I decided to wait and see, and to interfere if the bird was not given fair play. It is not really good fun when children get sport out of the pain of animals. Even pulling the cats tail seems nicer to you than it does to pussy.

When the small girl had finished tying the string the boy let the chicken go, and I expected to see him flutter and flap his wings and try to escape. But he did nothing of the sort. Amid the delighted cries of the children he cocked his head on one side and looked round. Then he bent his head down on one side and had a good look at the leg round which the string had been fastened. Next he lifted up his foot and looked hard and close until he saw just how things were. Then he put his foot down and gave a sudden peck and one of the knots was untied. This excited us very much, and the children clapped their hands and said words that, being translated, meant "Long live the chicken." He, however, took little notice of our applause. He was busy pecking, and soon another knot was untied. "Bravo!" cried out the boys and girls. The chicken gave us one look and then made an extra powerful peck and the string fell off his leg. As soon as he was free he never even waited to say "Good-bye!" He just ran, and the children laughed again to see him go. Then we had chocolate all around, and I went away.

I was very sorry I could not speak the same language as the boys and girls, for there was something I should like to have said to them. Suppose I say it to you. Have you got a string tied round your leg? There are all kinds of string. When boys and girls are lazy and shirk lessons and errands, it just means that round one leg is tied the string of laziness. Children who never take trouble, and who add up without thinking, or are slovenly in dress, or have untidy hair, are really held by the string of carelessness. Boys who scowl when things are not as they like, and who will not speak to others unless they do as they want, are tied tight by a string called sulks. Small girls who "prink" before a looking-glass and admire their silly little selves, are held by the string of vanity; and there are many other kinds of strings. When you undress yourself to-night, you look and see whether there is a string round your leg. And if you cannot find one ask mother what the question means. Then when you know what string holds you, remember the chicken of Perugia and do two things. First, try hard to untie the knots. Second, as soon as you are free, get as far from the string of laziness, or carelessness, or sulks, or pride, as you can.

THE SUNSHINE GIRL.

One day everything seemed to go wrong with Helen. To begin with, when she got up in the morning, she put the left shoe on the right foot, then she tangled the shoe laces and broke one in her

TOLD BY THE TEA CUPS

GOOD OR BAD FORTUNE MAY BE FOUND IN THEM.

Here are a Few Hints That May Help You to Get a Line on Your Future Life.

Reading fortunes from the tea leaves left in the cup, with the exercise of a little imagination and humor produce much merriment. It comes in opportunely at the doubtful half-hour just after a "company," when the machinery of pleasure-giving is not always running quite smoothly.

After the tea has been drunk—leaving but a few drops to "carry the grounds"—the enquirer must make a wish, repeating it in mind three times, after which the tea cup must be whirled around vigorously to throw the grounds as much as possible into the upper part of the cup. This must be done three times from left to right, when the cup is turned over into the saucer to "settle the affairs of the future," given three turns again from left to right, and then handed to the fortune-teller, without looking into the cup one's self, or else, so the oracle says, the spell will be broken.

The prophet or prophetic then picks up and begins reading from the bottom of the cup (the past) and then around spiral fashion until the top (present or near future) is reached; or three cups may be used—one for the past, the second for the present, the third for the future.

A man is indicated by a long, hard leaf, with something that suggests a hat or cane, or legs that fork.

A woman by a light-colored leaf that spreads to indicate a gown, or with something atop that may be imagined to represent a woman's headgear.

A figure in kneeling posture denotes an offer of marriage, either made or received. Groups of dots near mean acceptance. If these are absent the suit will be rejected.

One figure alone, surrounded by a group of grounds, promise a lover or sweetheart.

A figure alone with no grounds near means single blessedness at the time indicated by its position in the cup.

A heart promises a love affair and much pleasure.

Two hearts, a marriage.

Two figures near together, with no grounds very near, means an engagement.

Three figures together is a sign of a speedy marriage.

A love letter is indicated by four dots forming a square. If near the top, it will be received in a short time. An extra dot within the square, or just outside, means good news.

Three dots in a group promises the granting of your wish, as does a triangle.

A number of tea leaves, short and tall, means a company of great and small. Crosses, adversity. A ring, a happy marriage.

Dots in the form of a parallelogram, sickness or bad news.

Fine dots, reaching in a long line, a journey. Many dots clustered about the end of the line means many new friends and pleasures.

An anchor, if at the bottom of the cup, means success; at the top, love; in the middle, constancy. If surrounded by "clouds" the course of true love will not run smooth.

A star, if not surrounded by "clouds," means happiness; if circled by dots, long life.

Mountain, favor of persons of high position, social success. If clouded on its summit, ill-success in society.

Serpent, an enemy. If near the top of the cup, you will be successful, and, finally, turn him or her into a friend. If near the bottom and clouded around, the enmity will cause you sorrow.

Fish, lucky news from over seas. If clouds are near, the reverse.

Seven dots in a row, great prosperity. A straight line, if surrounded by many

Fashion Notes.

SUMMER FABRICS.

The wise woman plans to make her purchases of summer materials just as soon as they are displayed. The leading dressmaking houses make it a point to purchase such foreign novelties as will not be duplicated in less expensive goods later in the season. Although the white linen frock—and this broad and generic term will include the heavy and somewhat coarse German linens, the crashlike Russian production and the far finer Irish weave—is to have a most triumphant inning in all sorts of designs, it is to be noted that the printed goods are being eagerly bought up by those who aim at something different from the ordinary. The better class of those are priced fully as high as silk; and, indeed, when one comes to consider that they are made up altogether by hand, that a whole dozen bolts of lace oftentimes are consumed in their adornment, that ribbon accessories are planned lavishly, their price seems a high one when the result is merely a cotton tub frock, no matter how you look at it.

SEPARATE SKIRTS.

The plaint against the separate blouses according to their detractors, was that they looked cheap and economical; that they did not begin to show up what they cost, as an entire gown of the same materials is bound to. But now even the best and most expensive tailors are booking orders from their most fastidious clients for separate skirts to accompany those same dainty waists. The great majority of these skirts are ordered in white, and broadcloth, schiener, serge, mohair and henrietta are about equally favored when it comes to materials.

Those new presentations in separate skirts are to be cleverly trimmed, if they expect to be included in the catalogue of modish effects. The plainer ones make use of self folds and tucks; but the more elaborate designs display broad and really costly, braids—false folds, as they are termed in the trade—of silk of many kinds; little upstanding pleatings of lace or narrow ribbon in the most unexpected connections; and velvet in both piece and ribbon weaves is counted upon for effective trimming designs. Gored, ombrelle and circular designs prevail; but the ingenuity of the designer frequently makes a combination of two or three of those and

THE RESULT IS CHARMING.

Those convenient short skirts seem to be doomed. The Parisienne never took kindly to them. At the most, they were merely tolerated, and then mainly by those who aped American styles and fashions. All of the new skirts must touch the floor at the very least, and those that lie on the floor for a few inches, at the sides and back are considered the better models. A broad facing of velvet is employed by the best tailors, this either lying flat upon the hem or else taking its place altogether. Where the material is very sheer, as in the case of those chiffon quality skirts and voiles, and such like mousseline weaves, then it is the five or six inch wide facing of velvet that yields the best effects.

There is quite a revulsion of taste against those plain but serviceable colorings and mixtures that have done duty for rough and ready wear for so long, and the latest fad calls for the faintest and most delicate colorings for all sorts of purposes, even for raincoats and traveling garments. In fact, those two latter terms are interchangeable, if they do not entirely mean the one and the same thing. There are some fetching designs in a certain rainproof material that comes in attractive shades of grays, tans, greens, browns and blues. The fact that this cloth is rainproof and spotproof saves its wearer many cleaner bills, as well as protecting the costume in rainy weather.

THE SHORT SLEEVE FAD

has not run itself out by any means. True it is that the models imported from France mostly show long sleeves; but it is to be remembered that those are intended for warm weather year, and a

HEALTH

SCURVY IN INFANTS

Most persons think the scurvy only in connection with the privation and distress that were so often endured by soldiers and sailors a century or more ago, for the disease has become so rare as to be but little known. But a very similar affection occasionally attacks infants at the present time, especially the bottle-fed babies in large cities.

It almost always appears during the first year of life. It is not peculiar to any climate or season. Liability to it is increased by overcrowding, uncleanness and neglect of ventilation, but the disease is not restricted to the children of the poor. Possibly it is infectious, in which case deficient or improper nourishment acts only as a predisposing influence.

The illness begins gradually with peevishness and restlessness. The appetite is lost and the digestion becomes defective; the tongue is dry and coated, and the breath is foul. If the little one has teeth, the gums become inflamed. Very soon there is an infusion of blood beneath the periosteum, the membrane that envelops the bones,—producing swellings near the joints, particularly about the ankles; and with the development of these the restlessness and suffering are greatly increased. The pain is often so severe that the legs are drawn up and held rigid, as if they were paralyzed. Visible hemorrhages seldom occur, but the eyes protrude in severe cases, and the eyelids may be puffed up and discolored by blood within the orbit.

It is not to be inferred, from what has been said concerning the influence of diet in causing the disease, that a healthy infant, thriving on artificial food, must be provided with some other form of nourishment in order to protect it from the scurvy. A change of diet is often hazardous to an infant, and the scurvy is believed to be preventable to a great extent by adding to any of the foods, once or twice a day, a teaspoonful or two of freshly expressed beef-juice or the same quantity of egg albumen beaten in a little water.

Fortunately the disease yields promptly to the administration of fruit-juices. Instead of medicine, the physician prescribes one or two teaspoonfuls daily of orange-juice. Lemon-juice may be employed, and when the child is more than a year old it can be given baked apple and potato.

HANDS OFF THE EYES.

A habit which many people have unconsciously acquired is that of rubbing the eyes with the hands or picking at them with the fingers, whenever the eyes feel in the least irritated. The harm done by this common habit can never be estimated. Occasionally painful realities remind us forcibly of its danger.

A few weeks ago a man was riding in a Chicago street car. As the seats were filled he stood and held to a strap. His eye itched and several times he took his hand from the strap and rubbed the eye with it. Soon after he reached home his eyes became badly inflamed, and in a short time he was unable to see. Upon examination, the physician came to the conclusion that the strap to which the man had been holding had been in contact with the hand of a diseased person previously and that the disease germs had been carried by the hand to the eye, causing blindness. At present the man is totally blind and it is a question whether he will ever be able to see again.

No matter how cleanly we are, the hands are continually coming in contact with foreign substances and to rub the eyes with the hand means that we are deliberately carrying the impure matter to one of the most delicate and sensitive organs of the body. Besides the danger from injurious germs, the irritation which the rubbing alone causes is harmful. Often the eyes itch or seem to burn because dust has accumulated

One day everything seemed to go wrong with Helen. To begin with, when she got up in the morning, she put the left shoe on the right foot, then she tangled the shoe laces and broke one in her hurry.

She was late for breakfast, so her oatmeal was cold. And, just as she was ready to go to Nannie Gray's to play for an hour, it began to rain, and she had to take off her hat and jacket and slay at home.

"There never was such a day," she cried. "Everything is wrong."

"I'll tell you how to make everything right," said her grandfather.

"How, grandfather?" asked Helen, who felt quite sure that he could do almost anything.

"Just be a sunshine girl."

"Oh, grandfather, how can I? It's raining."

"The rain needn't make any difference with you," he replied.

"Well—I'll try—to be a sunshine girl. Helen spoke doubtfully. "How do I begin?"

"First you learn the rule for sunshine. Get your slate and write it down."

Helen took her slate and pencil, and he told her to write—

"When things go wrong, smile, and find a better way."

Helen was smiling already. That came easy enough, for no one was ever very gloomy where her grandfather was.

"I can't go to play with Nannie 'cause it's raining, but I can do something better right now," cried Helen, when she had finished writing. "I can begin a birthday present for grandmother, and you can take it home for her next week when you go."

"Of course I can; that's just the thing for you to do."

"And do you s'pose she'd like a motto painted with pretty letters on bristol board?" asked Helen.

"I suppose she would be delighted," replied grandfather. "And, if you paint it I'll have it framed."

And the motto that Helen chose was, "When things go wrong, smile, and find a better way."

After that, when things did not go right Helen would smile and look for a better way, and she almost always found it, too.

It was such a simple rule, not a bit hard to remember; and, because Helen thought about it and put it into practice, she earned the name that grandfather gave her, and in time her mother and father, and even big brother Harry, called her Sunshine Girl.

STRIDES OF TEMPERANCE.

Britain's Outlay for Intoxicants Less by Millions.

London societies interested in temperance reform have received recently a number of encouraging reports from various parts of the country indicating a considerable decrease in the aggregate of habitual inebriates.

A typical case is that of Stockport, where the Police Court prosecutions for this offence were, during the last twelve months, 88 fewer than in the previous year. "I have come to the conclusion," remarked the chairman of the Stockport Licensing Sessions, at which these figures were presented, "that the habitual drunkard is passing away."

Statistics which have been brought up to date by the Church of England Temperance Society are corroborative of this statement. They show that the expenditure on alcohol per head in England has diminished by nearly nine per cent., in Ireland by three per cent., and in Scotland by two per cent. The decrease for the United Kingdom averages tenpence a head, the total compared with that of 1904 being less by \$27,500,000. The reduction in the consumption of spirits is much greater than in that of beer.

At the same time, \$845,000,000 comes out of the pockets of the working classes, or an average of about \$150 a year for each household.

The society in its report shows that Great Britain has a drinking population numbering 24,000,000, and estimates that the weight of the annual drink bill in sovereigns is 1,355 tons. If the coins were arranged face to face they would make a golden rope 164 miles in length.

Finally, "turn him or her into a friend. If near the bottom and clouded around, the enemy will cause you sorrow. Fish, lucky news from over seas. If clouds are near, the reverse.

Seven dots in a row, great prosperity. A straight line, if surrounded by many grounds, foretells an illness.

Wavy lines, if circled by dots, money; if cloudy, reverse of fortune, either past or to come—according to their position in the cup, near the bottom or top.

Tears are indicated by drops at the bottom of the cup, or by many thick dots there.

A succession of large dots in a line foretells difficulties to be overcome. Many fine dots among them, unfriendliness will be superadded.

A leaf folded over the rim promises something unpleasant.

If the rim of the cup is clear a happy future is assured.

ENGLISH TRAVELLING SALESMEN.

How Their Comfort is looked after at the Hotels.

"Travelling men in England have special dining rooms, special lots of things," said E. K. Simmons of Manchester, England.

"When you go into the lobby of an English hotel you may be surprised to find a great open fire burning in one end of the room. Great comfortable chairs will be found about the lobby and you need not exclaim if you see several salesmen smoking long pipes and reposing their stockinged feet upon large footstools. Empty shoes can be found in many portions of the room.

"The English lobby is a parlor or sitting room, a place of comfort, and in no instance bears the stiff, varnished, emblazoned appearance of your hostilities. When you go to the dining room you may be surprised to hear the clerk ask if you are a travelling man. If you are you are ushered into a simply but homely furnished room containing one long table. The apartment is more like a private dining room, and everybody is everybody else's friend.

"The meal is specially served, the waiters show especial deference and everything bears a tone of home life. As each man leaves the table he is seen to drop a halfpenny in a little box. This is an unwritten law of the land, and the money thus collected goes to pay for schools and orphanages for the children of travelling salesmen who die without leaving sufficient means for their support. Several of these schools and orphanages are maintained throughout England.

"English travelling salesmen take life easier than do the men following a similar occupation in this country. They never think of entering a man's store with a lighted cigar, and they would as soon forget to wear a collar or coat as to expect to do business with a man without having their shoes carefully polished. All hotels look to this and a 'boots' gets your shoes each night, marks them with chalk, polishes them and returns them before you are awake the next day."

SECRET SOCIETY CRIME.

Roumanian Shot Dead on the Streets of Paris.

A mysterious crime was committed in the Rue Mogador, Paris, the other night.

Two men dressed as motor drivers were walking up and down the street when another driver named Iskum approached them. The elder of the two men at once drew a revolver, and Iskum fell to the ground wounded. The assailant was preparing to fire again when his companion stopped him, saying that Iskum was mortally wounded, and the two walked quietly away.

Throughout the incident there was no sign of haste. Some people who saw the occurrence ran for the police, but the two men got away.

The attack was entirely unprovoked, and as Iskum has not recovered consciousness, it is impossible to say what motive dictated the crime.

The police believe it to be a case of a secret society. Iskum is a Roumanian by birth.

THE SHORT SLEEVE FAD.

has not run itself out by any means. True it is that the models imported from France mostly show long sleeves; but it is to be remembered that those are intended for warm weather wear, and a long and much bewrinkled arm covering of glace kid is bound to be anything but cool when the dog days arrive. Coats, however, present the short sleeve fad at its best, and the presence of a dainty lingerie sleeve, or perhaps a separate undersleeve, showing itself below the abbreviated coat sleeve, is bound to prove effective, as well as being far more comfortable to the wearer than would the long and wrinkled glove.

CHAPEL FULL OF SCULPTURES.

Wonderful Results Achieved by Egyptian Explorers.

The excavations made by the Egyptian Exploration Fund at Thebes this year have produced wonderful results. The explorers for the last two years have been excavating the oldest temple known in Thebes, it belonging to the eleventh dynasty.

Working at the back of the temple, the explorers found the remains of a shrine of the eighteenth dynasty. Their first encouragement was the discovery of a fine statue in quite perfect condition. Then suddenly the removal of a few stones revealed a chapel covered with sculptures, the colors of which were absolutely fresh. The chapel is about 10 by 5 feet. The roof is vaulted and painted blue, with yellow stars. The chapel was dedicated to Hathor, goddess of the Mountain of the West, who was generally worshipped in the form of a cow.

In the chapel is a beautiful life-size cow of painted limestone. It is reddish brown, with black spots. The horns had evidently been overlaid with gold. The neck was adorned with papyrus stem and flowers, as if the cow was coming out of the water.

The statue is uninjured, except that a small piece of the right ear is gone. The cow wears the special insignia of the goddess, a luner disc between the horns. There is so much life in the head that the cow appears as if about to step out of the sanctuary.

Soldiers were immediately placed on guard night and day, and the statue was removed to Cairo as soon as possible. The shrine will probably be taken down and rebuilt in a museum. Its value is so enormous and the difficulties of guarding it so great that it would be too serious a risk to leave it in its present position.

WORLD'S LARGEST LINER.

Now Under Construction at Queen's Island, Belfast.

Another shipping record is being established by Messrs. Harland & Wolff, of Belfast. The White Star liner Adriatic, now under construction at the Queen's Island, will have a tonnage of 25,000 and a length of 710½ feet, a breadth of 75 feet, and a depth of 50 feet. She will be the largest vessel in the world.

The record was previously held by the Baltic, also built for the White Star Line by Messrs. Harland & Wolff. She has a tonnage of 23,876, 1,124 tons less than the new vessel, which she exceeds in length, however, by 15 feet. The nearest approach in size to these vessels is the Amerika—23,000 tons, belonging to the Hamburg-American, but with their new vessel the White Star will again be well ahead of all rivals.

The following table gives the tonnage of the world's largest vessels:—

	Tons.
Adriatic (White Star) building ..	25,000
Baltic (White Star)	23,876
Amerika (German)	23,000
Cedric (White Star)	21,000
Celtic (White Star)	20,904
Minnesota (United States)	20,716
Carmania (Cunard)	20,000
Kaiser Wilhelm II. (Germany) ..	20,000
Caronia (Cunard)	19,594
Oceanic (White Star)	17,271
Deutschland (Germany)	16,502
La Provence (France)	15,000
Kronprinz Wilhelm (Germany) ..	14,800
Campania (Cunard)	12,950

are deliberately carrying the impure matter to one of the most delicate and sensitive organs of the body. Besides the danger from injurious germs, the irritation which the rubbing alone causes is harmful. Often the eyes itch or seem to blur because dust has accumulated in the lashes and on the lids. Take a clean, soft, white cloth, dampen it in tepid water and wash off the eyes gently. Or make a weak solution of salt water and bathe the eyes in this. Be sure the hands have been washed clean before using them in bathing the eyes. Wipe the eyes on a clean towel which has not been used for any purpose. It seems an almost criminally careless habit to dry eyes on a towel which we use for other parts of the body and sometimes on one which the whole family is using.

HEALTH HINTS.

Value of Fresh Air.—If you wish to keep health and well, have plenty of fresh air; don't think you will catch cold by it; on the contrary it will do you good, and fit you for your work. Always sleep with your window open at night, it will not harm you; the fresh air will make you sleep sounder, but at the same time you must have sufficient light clothing on the bed to keep you from catching cold.

A Good Shampoo.—The best shampoo for the hair is made by breaking up bits of toilet soap and bringing them to a boil in hot water. To this should be added a teaspoonful of borax to a pint of shampoo mixture, and, if the hair be oily, a dash of alcohol. This can be rubbed into the scalp, and it is warranted perfectly harmless.

Soft Hands.—The hands may be softened and whitened by the use of the following paste: The yolks of two fresh eggs, two tablespoonfuls of oil of sweet almonds, thirty grammes of rose-water, and eight grammes of tincture of benzoin. Beat up the yolks with the oil, then add the rose-water, and, lastly, the tincture of benzoin.

Chilblains.—Rub the part affected with spirits of rosemary, or aromatic camphorated cream; afterwards apply pieces of soft linen moistened with camphorated spirits soap liniment, or camphor liniment. When the swellings break or ulcerate, apply poultices and emollient ointments for a few days. Another equal remedy is quantities of sweet oil, lime-water, and proof spirits.

CHATHAM'S HARD CHARACTER.

Most Immoral of all England's Naval and Military Centres.

"Darkest England," or "The Plague Spot of the Medway," is the title which has been bestowed on Chatham. Chatham is declared to be the most unsavory of all the naval and military centres in the United Kingdom. A Church of England mission has been carried on during the past few weeks at this place. The missionary engaged was the Rev. A. J. Waldron of Brickston, who determined to find out for himself the exact situation. Dressed as a workman, he visited the different dens of vice, and was appalled at the immorality. So emphatic and pronounced were his statements that a citizen's league was this week organized for the purpose of attempting the renovation of the place. One of the clergymen interested declared that he had worked in the slums of London, and that his clerical duties had called him to the very worst sections of the city. He said that never before had he witnessed scenes to equal those in Chatham, drunkenness among women being especially prevalent in that town. He said that where nearly 20,000 soldiers and sailors were gathered together it was to be expected that vice would prevail.

"It is as perfect an imitation of Hades as can be found anywhere," he added. "At any time of the day one can see dozens of women staggering from one drinking shon to another. Young girls, not out of their teens, women with babes in their arms, old women hideous with sin, drink heavily from morning till night."

DAILY PAPER ON LINERS

SHIPS ARE NEVER ISOLATED NOW—
A-DAYS.

News, Warnings, or Messages Sent or
Received From
Mid-Ocean.

Conservative steamship men viewed with some incredulity the first installation of wireless apparatus aboard a liner less than five years ago. Now there is no steamship of any of the great companies that is not equipped with the system. What was looked upon as mere luxury of ocean travel, something in the nature of an electrical toy for the amusement of sea-goers, is recognized as a necessity in the equipment of all first-class vessels. As an official of the Cunard line, the pioneers of the wireless fleets put it "Marconi reads for safety and the convenience of passengers."

IN SIXTY-FIVE SHIPS.

No longer are the precious hours in which ships may be in touch devoted to games of chess. The equipment is used for serious and expensive business. Sixty-five Atlantic cruisers can now flash greeting, exchange news, warn one another of danger in the shape of fog-en-shrouded berg, low lying derelict in the lane of traffic, and in emergencies lend aid.

Agents of the lines that have the most expensively equipped ships say that, commercially considered, wireless does not quite pay yet, but that it is worth more than it costs as a means of protection, and because of the tremendous advantage of enabling the ships to keep in touch with the world ashore. On this side of the Atlantic an overdue liner with hundreds of passengers may no longer remain for days unheard of, as was the disabled Cunarder Umbria years ago.

SHIP IS NEVER LOST.

Information of arrival can be given now with absolute seriousness, if not in the minute, at least on the hour. Capt. Hogemann of the North German Lloyd steamship Kaiser Wilhelm II., as he got into wireless touch with Cape Race on a recent trip to New York, telegraphed his agents that they might expect him at the line's dock in Hoboken at a certain hour two days later, and he was there.

There are few hours on the trip of a wireless ship in the summer season when she is not in communication with either ship or land station. After the westbound liner gets out of range of the station at Poldhu, on the coast of Cornwall, she is sure soon to pick up another ship with news. Then she takes aboard the electrical hawser of the Cape Race station, about 1,500 miles from Sandy Hook. Before she drops Cape Race she gets Sable Island, off Nova Scotia. Then she signals Nantuxett and, successively, Cape Cod, Sagaponack, L.I., Babylon, and finally Sea Gate. Thus, in the fog region, ships can always find land stations and through them can notify one another of peril that may lie in the line of travel.

NOTICE TO AVOID DANGER.

When equipped only with short distance plants a liner practically may be in touch with all the world ashore even when three days out from New York. When she is fitted with a long distance receiver she can feel the pulse of two continents while midway between them. There have been many instances where wireless messages have caused a liner to shift her course to the southward to avoid bergs passed by other liners. A change of course of merely half a degree may permit a ship to avoid heavy weather that is the rule in winter in high latitudes, and many times liners that have themselves been pounded by sea and gale have told others bound into the storm in time to enable them to avoid it altogether.

DAILY PAPERS.

GIRL WITH FOUR SOULS

BOSTON DOCTOR TELLS ABOUT A
STRANGE PATIENT.

Struggle of Opposed Existences for One
Body — Behavior of Num-
ber Three.

A strange and uncanny record is told by Dr. Prince of Boston, in a book just off the press.

In the spring of 1898 Miss Beauchamp first came to Dr. Prince, a distinguished Boston physician, for his professional advice.

To a nerve specialist she must have presented a type common enough in great cities. A diligent student at her college, morbidly shy, a lover of books, unwilling to "inhibit" her personal affairs upon strangers. A tired girl, suffering from headaches and sleeplessness, under-nourished and shunning open-air exercise. Such was Dr. Prince's very strange patient as she first came to him.

Since that time she has been under his care, the subject of note-books and diagrams, of eager study and bewilderment.

For in Miss Beauchamp the four souls of four personalities have struggled for mastery of her body and will, and she has been driven to ask help from a physician.

THE FIRST TWO.

The first soul we may call "Miss Beauchamp," Miss Beauchamp who came first to the doctor's consulting room, Miss Beauchamp, the shy and sickly student.

The second soul may be called Miss Beauchamp II., being the first Miss Beauchamp in the passive hypnotic state, in which she could contemplate and be shocked and disturbed by the doings of her other personalities.

By hypnotic suggestion Dr. Prince had made great improvement in Miss Beauchamp's health. She ate well and walked more easily. Her headaches were relieved, and the doctor had become familiar with the hypnotic self which appeared at his suggestion.

Suddenly the personality of the hypnotized girl changed as the doctor spoke with her. The body of Miss Beauchamp was alive with an intelligence which spoke of the familiar Miss Beauchamp as she, denying any share in her.

WHEN SALLY CAME.

This was the third soul, the freakish thing which, calling itself "Sally," was to burden Miss Beauchamp's staid life.

"Sally" was as lively and vivacious as Miss Beauchamp was sad and reserved. She despised Miss Beauchamp as one who went about "mooning," who read stupid old books, who studied languages and science. Sally knew no foreign tongue, spelled badly and misunderstood difficult words. In her a playful and malicious imp was awake, without ache or pain, a tireless wanderer.

Long portions of Miss Beauchamp's time were unaccountably lost to her. She would awake to herself, dusty with a long country walk—Sally loved walking—and having a lighted cigarette in her hand—Sally loved cigarettes. Her purse would be empty, for Sally had lunched royally at her expense.

Finding that Miss Beauchamp had the nervous fears common to girl students, Sally would send her an envelope of spiders, and would threaten mice and snakes to follow.

Small wonder that Miss Beauchamp writes to Dr. Prince, "No one has the slightest control over this devil that possesses me save you. You won't leave me to its mercy?"

Poor Miss Beauchamp's tale is not yet told. In 1899 a fourth personality was thrust upon her, and afterwards realized itself as a distinct soul—that of an average woman of good-health, selfish and self-concentrated, ambitious and ill-tempered, and sworn enemy to Sally, each being aware of the other's existence. Perhaps the crowning nightmare of Dr. Prince's book is the passage which describes "Miss Beauchamp" as

WORLD'S FINEST SAILOR

WHY "JACK" FISHER IS SO POPULAR
IN THE BRITISH NAVY.

Head of the King's Navy Admired by
the Great Admirals of Other
Countries.

"Give a boy these four things—self-reliance, fertility of resource, fearlessness of responsibility, and power of initiative," said Sir John Fisher, the other day, "and his manhood is safe. He'll always arrive, always be there"; and it is precisely these qualities which have made Sir John himself head of the King's Navy, and have earned for him the proud compliment of being termed by no less a judge than Admiral Togo, "England's twentieth-century Nelson," says London Tit-Bits.

It is now a year over the half-century since our new Admiral of the Fleet first went to sea and began that long, dogged climbing of the ladder which has landed him at the top. "There never was such a plucky little beggar," an old shipmate of his in the days of the Crimean War has said; "quick as a monkey, keen as a needle, hard as nails; would do anything, or go anywhere."

DIDN'T KNOW WHAT FEAR WAS

or that there was any such word in the language as 'can't'; and yet with it all he was one of the quietest, most modest fellows I have ever known."

Of course, such a boy could not fail to forge his way to the front. When quite a youngster he was one of the smartest gunnery officers in the service; he acquitted himself brilliantly in the Crimean, China, and Egyptian wars, and at the bombardment of Alexandria, when he was captain of the Inflexible; and mounted step by step until he reached admiral's rank while still in the forties—and this by sheer pluck, pertinacity, and conspicuous ability, without a scrap of influence to push him forward.

And what kind of a man is this admiral, who is by common sense the finest sailor in the world, a man whom the great admirals of other countries admire and envy? In appearance he is just a bluff sailor-man, thick-set, standing four-square to the winds of heaven, with a clean-shaven face, stamped with resolve. Out of his uniform he might pass for a country squire of no particular parts; but spend a few minutes in his company and you will soon fall under the spell of his strong personality and recognize that he is

NO ORDINARY MAN.

For half a century he has held his tongue, and no one knows how to hold it better; but when he speaks every word tells. No words carried such weight as "Jack" Fisher's as the Hague Peace Conference; and when he told his colleagues what would happen if he caught the officers and crews of any submarine boats trying to sink his ships they knew well enough that he would do it. In the Navy his slightest word is an inflexible law. When one, for instance, he wanted a ship under his command to go on a certain day to a certain place and the captain declared that he could not possibly get ready, "Tell—," was the answer, that if he is not ready to leave for — on the day named I will have him towed there." The ship went.

And yet this man of adamant can be a perfect courtier. When Admiral Gervais was visiting Portsmouth some time ago the late Queen sent for Fisher, and said, "Sir John, I am anxious that you should be specially nice to Admiral Gervais, as he was so very kind to me at Cimiez."

"Madam," answered the gallant admiral, "I will kiss him, if your Majesty wishes it."

Never, probably, has a naval officer crowded so much hard work into a lifetime as Sir John. For fifty years he has rarely been in bed after

FIVE O'CLOCK IN THE MORNING,

and from that hour to nearly midnight

FEATS OF MARKSMANSHIP

ASTONISHING PERFORMANCES WITH
RIFLE AND REVOLVER.

Shot Twenty Stags With as Many Bul-
lets — Playing a Piano With
Rifle-Shots.

The remarkable feat recently performed by the Prince of Wales in sending a bullet through the heart of a running tiger at a distance of a quarter of a mile, which has probably never been eclipsed since Mr. Walker, Deputy-Commissioner at Nimar, killed four tigers, some years ago, with five successive shots within the space of fifteen minutes, reminds one of many feats of marksmanship, some of which seem little less than miraculous.

It is not many years since Mr. Walter Winans, probably the deadliest shot of any time or country, stalked a herd of fifteen stags and, swift-footed though they were, actually brought down a dozen of them before they could get away; while his brother, Mr. Louis Winans, in a single day, once shot twenty stags with as many bullets, not a single bullet of them all failing to find its target. Lord Walsingham, one memorable day, killed 842 grouse to his own gun, fifty of them falling to as many consecutive shots; and a few days earlier Mr. F. A. Millsbank accounted, single-handed, for 728 birds.

IN PIGEON-SHOOTING

some most astonishing records have been made, notably in a match which took place about a dozen years ago at New York between those champions, Mr. E. D. Fulford and Captain Brewer. The match covered three days, each competitor shooting at a hundred birds a day at thirty yards' rise. Out of (although one fell out of bounds and was thus disqualified), while Brewer missed only three of his birds. On the third day each killed ninety-four pigeons. Thus, out of 600 shots at as many birds, no fewer than 585 hit the mark, a combined achievement which, we believe, has never been approached and will probably never be beaten.

Another memorable match was that between Dr. Carver and Mr. Scott, each of whom has broken 500 glass balls with as many successive shots. On this occasion, out of 9,950 shots, Dr. Carver made a score of 9,737 hits, while his opponent was only two balls behind him. As a test of endurance this feat was almost as remarkable as an exhibition of wonderful skill.

SOME ASTOUNDING FEATS

In shooting are credited to an American cowboy, "Captain Hardy," who is certainly the kind of man one would like to keep on amiable terms with. Here are some of the feats of this deadly shot as performed not long ago at a meeting of the Lincoln (Nebraska) Gun Club. At a distance of fifteen yards, Governor Savage held an ordinary visiting-card between finger and thumb while Hardy sent a bullet clean through the centre of it. Another card, held at the same distance, was pierced by a bullet, and four other bullets were sent through the hole made by the first one.

The Governor then flung a handful of nuts into the air, one after the other, every nut being shattered before it reached the ground. As a crowning performance half-a-dozen hazel-nuts were placed on the ends of as many skewers and arranged, halo-fashion, round the head of a man standing twenty yards away. Within ten seconds Hardy fired six shots, every one of which removed a nut without disturbing the skewer to which it was attached.

Such feats remind us of that truly amazing feat credited to Chevalier Ira Paine. One day when he was practising with his revolver at a target twenty yards distant,

A BLUEBOTTLE FLY

settled on the white part of the target—a tiny speck barely visible even to keen

...and many times liners that have themselves been pounded by sea and gale have told others bound into the storm in time to enable them to avoid it altogether.

DAILY PAPERS.

One thousand messages, commercial and personal, have been sent from one ship to another and to shore stations on one trip in the busy season. This means an expenditure by the passengers of more than \$2,000. On a recent trip to New York from Hamburg the Amerika sent 700 despatches to ship and shore.

The first wireless daily published at sea was a mere pamphlet of a few pages. It was the precursor of the Cunard Daily Bulletin, the first turbine edition of which, printed aboard the Carmania, consisted of thirty pages, more than half of which was filled with advertising. Every important ship of the Cunard fleet publishes this daily while at sea. The first paper got out on the Mediterranean route appeared recently on the Caronia. The Cunard paper is edited by the purser, who sometimes sits up till 2 in the morning passing the final proofs.

STAFF OF PRINTERS.

Two regular printers are employed on each ship equipped with long distance receivers, and when there is very important news and much of it stewards are impressed in service as compositors. In war times extras are issued in sheet form and folded in the regular edition.

The only other ocean paper is the Atlantic Daily News, published aboard the Hamburg-American liner Amerika. There are two editions of the News, one English and one German. The editor is a German-American newspaper man with shore experience on two continents. The News is only two months old, but five of its ten pages are filled with advertisements. It is somewhat suggestive of a newspaper of a little American city. It is distributed free to all cabin passengers by a newsboy in the uniform of a Hamburg-American sailor.

PARLIAMENTARY COMPLIMENTS.

Round-about Ways of Saying What You Mean.

No member of the British Parliament is permitted to say bluntly and directly that another is drunk but he may hint at the fact in periphrase, as when Mr. Gladstone, replying to the unconventional speech of Disraeli, remarked: "The right honorable gentleman has evidently had access to sources of inspiration that are not open to me." A violent scene has been caused in the Parliament of Victoria, Australia, by a labor member saying of a legal colleague: "The honorable and learned gentleman was once on the bar and he has since gone gently without being called." The angry barrister retorted: "You teardrinking skunk!" Eventually both withdrew and apologized.

Sir Richard Jebb, when professor of Greek at Glasgow university, used, towards the end of his lecture, to be somewhat troubled by the boisterous "roughing" (stamping) of the class in moral philosophy above his class-room, when a well-known lecturer finished with his peroration. On one occasion a slab of plaster fell on Jebb's head and he quietly remarked to his class: "It is obvious, gentlemen, that my premises do not suit Dr. N.'s conclusions."

When William Mackenzie Thackeray was running for a seat in Parliament he chanced to meet his opponent a few days before the polling began. After a few minutes' friendly conversation, the obvious remark was made: "Well, may the best man win." "Oh, I hope not," was Thackeray's courteous reply as they shook hands and parted.

BEIT'S INCOME.

Alfred Beit, the South African mining king, is said to be richer even than Rockefeller. Half the mines in South Africa belong to him, including the fabulous wealth of Kimberley's diamond output. The aggregate of his wealth cannot be stated, but a rough estimate places it at \$1,000,000,000. His yearly income is \$52,500,000, which means that he gets \$100 every minute of his life, or, put another way, \$1,000,000 a week.

...as such as a distinct source of the average woman of good-health, selfish and self-concentrated, ambitious and ill-tempered, and sworn enemy to Sally, each being aware of the other's existence. Perhaps the crowning nightmare of Dr. Prince's book is the passage which describes "Miss Beauchamp" as fitfully seized by Sally and No. IV., each struggling for the muscular steering gear.

MATTERS ARE IMPROVED.

To bewilder still further the observer of these possessions, Miss Beauchamp (No. 1) became deeply religious, with a great desire for the life of a convent—a desire most repellent to her other personalities.

Dr. Prince is able to bring his wild story to something like the happy conclusion which should be demanded by those who have read of Miss Beauchamp's trials.

He claims to have amalgamated the first and fourth of these personalities. From January, 1905, "the real Miss Beauchamp has been in continuous existence." Her health, physical and mental, is good, and she has no hallucinations. Sally has been squeezed out of consciousness. But Dr. Prince's last words are, "The problem still remains: How far and for how long can Miss Beauchamp be protected?"

WINDMILL GIVES NOTICE.

In Holland, births, marriages and deaths, instead of being recorded in newspapers, are indicated by windmills. When a miller gets married he stops his mill with the arms of the wheel in a slanting position and with the sails unfurled. His friends and guests frequently do likewise with their mills, in token of the ceremony. To indicate a birth a wheel is stopped with the arms in a slanting position, but at a more acute angle than for a marriage, and the two upper sails unfurled. Should a miller die the sails of his mill are all furled, and the wheel is turned round until the arms form an upright cross, in which position they are left until after the funeral has taken place.

RELIC OF SCOTLAND'S KINGS.

An old cushion on which the Crown of Scotland rested was recently placed in the jewel room at Edinburgh Castle. The cushion has been presented to the nation by Sir Patrick Keith Murray, Bart., of Ochertyre, Crief. It has been in the possession of the Keith Murray family since the marriage of the late Sir William Keith Murray, eighth Baronet, to the heiress of the last of the Keith Marischals, and who thereby became owner of Dunnottar Castle and Ravelston House, near Edinburgh. It was sent in June last to the King's Remembrancer in Edinburgh, who, on receiving a certificate of authenticity from Sir Patrick Keith Murray, lodged the cushion with the regalia.

THE PRESIDENT PAYS.

The President of the United States, who receives a salary of \$50,000 a year, must pay for all the food consumed at the White House; and the expenses of getting up an elaborate State dinner are not small. Cigars and wines the President buys, and they must be of the best. He has to maintain his own equipage. The Government, however, allows him a valet, and also a clerk, who opens all his letters. All other personal servants must be engaged by the master and mistress of the White House.

BRITAIN'S OLDEST OFFICE.

The oldest office under the crown is that of lord high steward, which was in existence before the time of Edward the Confessor; indeed, some authorities say that it was instituted by Offa in 757. For a long period this official was second only to the King, and the office was for some time hereditary in certain noble families.

WORLD'S DIAMOND PRODUCTION.

The world's diamond production, summed up, shows that India has produced 10,000,000 karats; Brazil, 12,000,000; Africa, 57,000,000. All the diamonds in the world uncut would have a value of \$540,000,000.

...jesty wishes it."

Never, probably, has a naval officer crowded so much hard work into a lifetime as Sir John. For fifty years he has rarely been in bed after

FIVE O'CLOCK IN THE MORNING.

and from that hour to nearly midnight his day has been, and is, one almost unbroken round of work.

As a Fleet-commander Sir John has probably not a rival; indeed, his skill in directing the most complicated and daring evolutions is at once a marvel and a mystery to the world's admirals, while his achievement in raising the Mediterranean Fleet from an eleven-knot standard to a fourteen-knot standard within a year and a half was another product of his master mind.

In spite of his stern insistence on discipline and hard work, Sir John is one of the most popular men in our Navy. "Jack" may tremble before him, but he is very fond of him all the same—and he knows that his affection is reciprocated.

HOW TIGERS KILL THEIR PREY.

Always Make Attack Upon the Flank of an Animal.

I have taken considerable trouble to find out how tigers kill large game, writes an assistant controller of forests at Perah to the London Field. Some time ago I was asked to come and see a full grown bullock that had been killed by a tiger. On examining it I found the animal had its neck broken and there were claw marks on the neck and shoulder, but nowhere else. There was no doubt that the tiger had jumped at the bull and landed on the shoulder and when the bull turned his head to gore the tiger he must have put his claw out and with a sudden jerk broken the neck.

On another occasion I went to see a young buffalo which had been killed by a tiger and found the same thing had happened. There were similar marks on the nose and also on the near shoulder, which clearly indicated that this animal had been killed in the same way. Malays who have actually seen a tiger killing a buffalo told me they saw the same thing happen, also that in dragging off a heavy carcass such as buffalo or bull he gets most of the weight across his shoulder.

This must be fairly correct, as I have often followed a kill, and the marks left indicated that only a portion of the animal was trailing along the ground. I have known a full grown bull which ten men could not move dragged for two miles by a tiger in heavy jungle, where roots of trees and swamp had to be gone through. In no case have I seen the pug marks facing the wrong way except when stopping to feed, which proves he must carry a portion of the animal over his shoulder.

The old idea of a tiger killing large game by a blow from his paw is nonsense; besides, in this country a tiger never faces his prey but attacks him on the flank, unless charged. Another curious fact that may seem very like a fairy tale is that a tiger does not seem to mind a small lamp being tied over a kill about ten feet high but will come and feed. I have known three occasions when this has been tried, and each time a tiger has come to feed upon the carcass.

MILITARY FUNERAL.

When such a one takes place in time of peace, the ceremonial is exactly the same as it would be in camp or on the battlefield. A gun-carriage forms an improvised hearse, the drums are muffled out of respect to the dead comrade, and all arms are carried reversed, to show that the company deputed to perform the sad office count upon the forbearance of the enemy for the time being. In the case of a cavalry officer being buried, his horse is led behind the body; this is a survival of ancient times, when an officer's charger was universally sacrificed at the graveside and buried with its master. At the conclusion of the ceremony a salute is fired over the grave to show the enemy they are once more ready to act on the defensive.

...amazing feat created to Chevalier Ira Paine. One day when he was practising with his revolver at a target twenty yards distant,

A BLUEBOTTLE FLY

settled on the white part of the target—a tiny speck barely visible even to keen eyesight. "Just watch me move that fly," said Paine to a friend who was looking on; and, raising his revolver, he despatched a bullet which hit that fly in the middle of his back.

After such a feat as this one is quite prepared to hear of the marksman who makes light of signing his name with bullets fired at a board, what time he glides to and fro on his tricycle; or of M. Bordeverry, who, equipped with a number of repeating rifles, plays opera selections with his bullets on the keyboard of a piano.

We must not, however, forget the marvellous feats of Mr. W. Winans, the finest revolver-shot in the world, who thinks nothing of sending a score of consecutive bullets into a bull's-eyes not so large as the palm of one's hand at a distance of sixteen yards. Mr. Winans will place his watch on a table, put a glass ball on it, and shatter the ball with a bullet fired twenty yards away without touching the watch-glass; he will shoot a piece of sugar from between your finger and thumb without grazing your skin; if you have a mind to make the experiment; or if you hold up your visiting-card edge-wise he will cut it in halves with a bullet from the opposite end of a large room.

NO WHEAT FAMINE.

Artificial Production of Nitrates Will Enlarge the Grain Supply.

There is no danger of a wheat famine in the future if science can achieve what it claims.

Sir William Ramsay, reviewing the attempts made recently to put an artificial production of nitrates from the atmosphere on a commercial basis, shows in the London Times the high value of this scientific work in relation to the enlarging of the world's supply of wheat.

More than five years ago, he recalls, Sir William Cooke, uttered a warning note that the population of the world was increasing so rapidly that the supply of wheat would shortly not be sufficient to feed it, but before we were in the grip of actual dearth the chemist would slip in and postpone the day of famine.

Sir William Ramsay proceeds to explain how the chemist has been doing as was prophesied, first showing that the air over each square mile of the earth's surface contains enough nitrogen in a free state to afford plant food for over sixty years of the world's consumption if it were only combined, and its value would be about £500,000,000 (\$2,500,000,000) if it were in the form of saltpetre.

One of the attempts to cause nitrogen and oxygen to combine and furnish nitrates is being made in Norway, where works are being erected which will produce large amounts of nitrate of calcium for direct use as manure.

This nature of calcium may be brought to market in one of three forms—first, in a fused state, in which it contains 23.5 per cent of nitrogen; second, in crystals, and, third, as a basic salt, which forms a dry powder, not turning moist on exposure to the air.

The present sources of combined nitrogen are limited. It is doubtful if the deposits now obtainable from the eastern slopes of the Andes will last beyond 1950, and if wheat is to be grown in sufficient quantities to supply food for the western nations the artificial production of nitrates is an absolute necessity.

Its achievement prevents the threatened suppression of the wheat eaters by the rice eaters and maintains the supremacy of western civilization.

"May I wake the baby, mamma?" asked five-year-old Johnny. "Why. What do you want to wake her for?" asked the mother. "I want to see if she can cry loud enough to drown the noise of my new drum," replied the small investigator.

FROM ERIN'S GREEN ISLE

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irish-Canadians.

Mrs. Fanny Allan died in the Watford Union Infirmary on the 12th inst., at the age of 102 years.

Samuel Brown, a Belfast ragpicker, died suddenly from heart failure induced by an indigestible supper.

Mr. John Alexander, a widely known Ulster man, died in Belfast recently. Besides being a prominent business man he was prominent in sporting and formerly won many pedestrian events.

Miss S. J. Fulton, of Pembroke Lodge, Sydney parade, Merrion, Dublin, has left £17,000 to be applied to charities, one-half being set aside for the promotion and preaching of the Gospel at home and abroad.

Thomas Higgins, Irish Nationalist, who successfully contested North Galway against Col. John Philp Nolan, Irish Nationalist, was found dead in bed at his hotel at Taum on the 26th ult.

A pathetic case was heard in the Belfast Custody Court, when a respectable looking young woman, named Maud Kennedy, was charged by Harbor Constable Massey with attempting to commit suicide at the Dufferin Dock. The case was remanded.

The death of Mr. John Walter Bourke, solicitor, Cork, took place at Mount Clarence, Kingstown, the residence of his brother-in-law, Dr. MacDermott. Mr. Bourke was probably the oldest, if not absolutely the oldest solicitor in Ireland, having been admitted as a member of the profession as early as the year 1845, a little over sixty years ago.

In Beechfield street, Mountpottinger road, Belfast, a signalman named John Best, shot his wife through the neck with a revolver, and then took his own life with a second discharge from the weapon. The woman escaped with her life, although a terrible gaping wound was inflicted in her neck, in which the bullet lodged. He had asked his wife for money and she refused it.

A sensation was caused in Stephen's green park, Dublin, by a middle-aged man drawing from his pocket a razor, and, in the presence of a number of people, inflicting a wound in his throat. He then threw the razor under a seat and ran off in the direction of Grafton street, followed by a police constable, who captured him. He was found to be a plasterer named William Johnson, and had been drinking heavily.

The death of Mr. William Fry, sr., of Dublin, is announced. By his demise the solicitor's profession loses one of its oldest and most respected members and the leading Dublin charities one of their most earnest and whole-hearted supporters. Mr. Fry had attained the great age of almost 84, having been born at Athlone in 1882.

Mr. Robert McFeeter, a wealthy farmer near Limerick, died suddenly while attending to his farming pursuits. Early in the afternoon he was discovered in an unconscious state by one of his own workmen in his barn in the farm yard. He was at once taken to his residence, but deceased never recovered consciousness. The late Mr. McFeeter was a prominent Unionist, and took a lively interest in North Derry politics.

The Colonel magistrates remanded James Connell and his mother on a charge of killing the latter's husband. The women named Curran and Hamilton, who had also been arrested, turned king's evidence and swore that the Connells beat the old man, threw him on the bed, and struck him until he was all cut and bleeding. He died soon afterwards. The mother and son cleared away the blood marks, and the son threatened to do for the women if they told what had happened.

Coal consumers of all classes in the North of Ireland will welcome the great progress the North Antrim Mining Syndicate, Limited are still making in connection with the striking of the

IS A SUB-AMERICAN KIND FROM BONNIE SCOTLAND

LIFE OF THE CANADIAN AND THE YANKEE.

What An Englishman Sees In Our Cities—Influence From the South.

The difference between Canadians and Americans are mostly of degree, writes John A. Hobson in the London Chronicle. The superb self-confidence of the average American woman, as she walks abroad, the licensed obtrusiveness of children, the perpetual degeneracy of conversation into story-telling—these characteristics are less marked in Canada than in the States. In fact, Canada presents as yet a sub-American variety of civilization, though in some ways rapidly assimilating to the States.

Physically the Canadian seems to be a sturdier stock of heavier build, slower-moving, and less nervous than the American. This is particularly applicable to the women, whose movements and conversation are quieter, and who are without the hunted look in the eyes which marks so many Americans. The colder climate may exercise some moderating influence, but probably the chief explanation of these differences lies in the fact that most Canadians are country-born and bred; there are few large cities, and even the dwellers in the cities keep up a more constant contact with country life.

MILLIONAIRES AND OTHERS.

Nowhere in Canadian cities does one see the profusion of luxury and waste visible in New York or Chicago; though most persons seem to live in fair comfort, there is no class of millionaires dominating "society" and making the form and pace for servile imitation among the less wealthy classes. Hunting (in the American sense of shooting) and fishing, with their accompaniments of camping out, play a large part in the national life, sport not having degenerated into the merely gambling and spectatorial habits. Altogether the Canadian leads a healthier life, even busy cities like Toronto and Montreal conduct their business life more quietly than cities of corresponding calibre in the United States.

WILL COME FROM STATES.

At the same time it is evident that Canadian life is approximating more and more to that of her powerful neighbor, and, if the rapid manufacturing growth which she anticipates takes place, the qualities and defects, industrial and political, of the United States will also be those of Canada. For it is not merely a case of imitation and of common needs and growth; if Canada is really destined to quick development it will be achieved by a large influx of American

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

Mrs. Nicol, the wife of an Aberdeen restaurant keeper, has given birth to triplets.

Mr. James Anderson, retired manufacturer of Kilmady, died at his residence in Coal Wynd a few days ago.

Mr. James Robb, one of the oldest and most respected guards on the Highland Railway, has died at Inverness.

After an agitation of over ten years the Island of Bernera, Lewis, has been connected by telegraph to the mainland.

The death is announced at Inverness of Lady Macpherson, widow of the late General Sir Herbert Macpherson, V. C.

Shipbuilding in Dundee is so brisk that one of the firms are to work night shifts. This will be an innovation in Dundee shipyards.

The smallest school in Scotland is at Canich, Invernesshire, where a certified teacher is in charge of four pupils, the children of a ploughman.

The death occurred at his residence, St. John's Terrace, Mannofield, Aberdeen, of Rev. Alexander Esson, M. A., late schoolmaster, parish of Birse, in his 81st year.

The annual returns of the burgh of Elgin show that during 1905 there were 258 births, against 276 in 1904, 90 marriages against 88, and 181 deaths against 199.

An Aberdeen trawler, working off the coast of Morocco, as an experiment, for three weeks, took on board a catch of fish which realized £1,700 in Billingsgate market.

During the twelve months ended 31st December last, 38,869 passengers left the Clyde for places out of Europe. Of these 26,039 were bound for the United States and 12,817 for Canada.

A hole nearly six feet deep and a yard wide appeared, as the result of a subsidence, on the North British Railway, east of Joppa, near Edinburgh, over which all the London expresses pass.

There has been created in Corstorphine parish church, as a memorial to the late Dr. Alex. Matthew, a stained glass window. It was gifted by friends and parishioners as a token of the esteem in which the late doctor was held by all classes.

Though no definite announcement has yet been made, it is generally assumed that Lord Elgin, now that he has taken the responsibilities of office in the new Cabinet as Colonial Secretary will resign his position as chairman of the Scottish Churches Commission.

Mr. William Duncan, who was for many years sub-editor of the Newcastle Daily Chronicle, died in Newcastle rec-

WEATHER AND CRIME.

Variations Responsible for Disturbing Mental Balance.

"Crime has more than a casual or accidental relation to the falling barometer," said a well-known detective to the writer. "A low-pressure area on the weather map ought to be a signal for high-pressure activity on the part of the police in the region affected. The normal brain is constructed to bear with comfort and convenience an atmospheric pressure of nearly fifteen pounds to the square inch. If one lives on the mountain-tops one may become accustomed to a little less, and if one dwells in the valleys, to a little more; but any considerable variation in either direction from the accustomed means is likely to seriously disturb one's mental and moral, as well as physical, equilibrium."

"It is known that exhilaration comes from ascending a mountain—provided one doesn't climb too high. It is known that a little relaxation of the everlasting pressure exerted by miles of super-imposed atmosphere is life to men with weak lungs, but death to those with weak hearts. The effect on the mind and morals is just as great and just as obvious. The mechanism that preserves a man's mental balance is delicately adjusted. A little variation in pressure, or a trifling excess or deficiency in the amount of oxygen, nitrogen, ozone, carbon dioxide, or any other element or impurity in the air that sustains life, may cause a man to behave in a manner that would be quite impossible under strictly normal conditions."

BISMARCK THEIR GOD.

Tribe of South American Indians Worship German's Picture.

A missionary who recently returned from South America discovered on the route to Orurotutofagosta a tribe of fetish redskins worshipping Bismarck as a god. Last year, when the drought threatened their harvest, they offered up prayers to their usual idols, but all to no avail. Their chief, having seen at an emigrated farmers' hut the picture of the Iron Chancellor cut out from an illustrated German paper, asked the farmer to make him a present of the print, which request was willingly agreed to. Thereupon the Indians brought the picture in great procession to their temple, and, strange to say, a welcome rain watered the lands of the tribe. Since that time the deity of the chancellor, whom the Indians call Bimbarko, is firmly established, and all kinds of reptiles are offered up to him in sacrifice.

the dead, and struck him until he was cut and bleeding. He died soon afterwards. The mother and son cleared away the blood marks, and the son threatened to do for the women if they told what had happened.

Coal consumers of all classes in the North of Ireland will welcome the great progress the North Antrim Mining Syndicate, Limited are still making in connection with the sinking of the two pits, and equipment of their coal mines for an output of 1,000 tons of coal per day. The present company's monthly output is from 150 to 200 tons, which is being freely sold. Night and day men are employed to push on the work with all speed, and a large number of hands being employed for that purpose at the two shafts. It is hoped that the coal will be reached at a very early date.

GIVE CHANCE TO REPORT.

British Home Office Has Agreed to a New Criminal System.

A new movement in the direction of criminal reformation has been initiated by the British Home Office, acting with the Salvation Army. This is a movement to give to the very worst class of criminal a chance of repentance and of a new life.

We are told that the idea is based upon the theory that crime is a disease, and that short sentences and a change of surroundings are necessary for the "cure" of the "patient."

Recently the Salvation Army were notified by the Governor of Aylesbury prison that the authorities would be glad to hand over to their care a Mrs. Mary Meakin, who was convicted of murder committed under the influence of a fit of jealousy. The Home Office took the initiative in the matter but intimated that there would be no financial grant by the Government for the care of the woman.

Mrs. Bramwell Booth at once decided to accept the offer, and when an official of the Army was sent to see the woman at Aylesbury, where she had been confined for more than twelve years, she expressed her desire to be placed under the Army's care. As soon as the necessary details have been arranged Mrs. Meakin will be released and sent to one of the many country homes of the Salvation Army.

The Salvation Army, it is announced, are prepared to take charge of all the criminals that the Home Office will release regardless of the offence.

COFFEE DRINKING.

The United States is the greatest coffee drinker in the world, according to statistics just issued by the trade. The report shows an enormous increase in the cultivation and consumption of this stimulant. The world's production of coffee in 1904 amounted to 2,399,270,000 pounds, of which 960,879,000 pounds, or nearly two-fifths, was consumed in the United States. Germany came next, with a consumption of 396,205,000 pounds; France, with a consumption of 167,552,000 pounds; Belgium, with 125,411,000; Austria-Hungary, with 108,687,000; Holland, with 88,930,000; the United Kingdom, with 28,783,000, and Canada with 6,189,000.

THE THRIFTY GERMANS.

Scores of Germans who settle in London get the barest wages, but somehow they manage to live decently, and even to save money. The London Daily Telegraph tells of a young German who came to London nine years ago and secured a junior clerkship in the city at 16s. a week. His wages increased by slow stages, but even so, he has not as yet reached the figure of £1 10s. Nevertheless, without any assistance from any one, he has managed in that period to bank close on £120, and has just moved to a better lodging, and "furnished a room quite nicely" out of six months' savings.

"See here, sir," exclaimed the successful manufacturer to Mr. Adam Upp, the dilatory bookkeeper, "you are not as attentive to business as you might be. Now, it has been my rule in life to be at my desk early and late, and—"

"Me, too," interrupted Mr. Upp; "sometimes I get there early and sometimes late."

more to that of our powerful neighbor, and, if the rapid manufacturing growth which she anticipates takes place, the qualities and defects, industrial and political, of the United States will also be those of Canada. For it is not merely a case of imitation and of common needs and growth; if Canada is really destined to quick development it will be achieved by a large influx of American capital and labor, inventive and organizing energy. What is already happening makes this manifest.

BIRDS THAT CONSTRUCT PRISONS.

The Hornbills Have a Curious Habit of Hatching Their Young.

Among the hornbills of Southern Asia, the Malayan Islands and Central and Southern Africa most of the species have a curious habit of hatching their young in the walled-up hollow of the tree chosen for the nest. The birds have immense bills and horny crests.

The mother bird, the Scientific American states, is walled up by her mate and remains imprisoned until the eggs are hatched, and in some species until the young birds are able to fly. Meanwhile the mother has become temporarily incapable of flight, as she has moulted, or at least shed all her wing feathers, during her captivity. But the male is indefatigable in providing for his family, and is said to work so hard that he is reduced almost to a skeleton at the end of the brooding season.

According to the theory of many natives, the female is imprisoned to prevent her neglecting her duty of brooding, and if she has been unfaithful or negligent her mate closes the little window of her cell and abandons her to a painful death by suffocation.

The true story, perhaps, is this: The female walls herself in so that she cannot fall from the nest after losing her feathers, and also to protect herself from enemies. This version is less poetical than the other, but it is probably nearer the truth. It is supported by the statement that the female liberates herself as soon as the young birds are well grown, so that her prison is less formidable than it appears.

MOST SOVEREIGNS SMOKE.

Even the Pope Indulges in the Luxury of an Odd Cigar.

From a mass of interesting matter concerning the smoking habits of the rulers of the world, collected by a former diplomat in Washington, it appears that while King Edward and the Austrian Emperor prefer cigars, the Kaiser and the Czar are devotees of the cigarette.

The Sultan of Turkey, in spite of the popular idea to the contrary, is a non-smoker, and the King of the Belgians contents himself with a cigarette if he cannot indulge in his favorite briar pipe.

It is said that the King of Portugal smokes forty cigars a day, and he has been declared to be the most inveterate smoker of all the crowned heads. Pope Pius X. occasionally smokes a cigar.

With the exception of the Queen of Holland, the King of Bavaria and the Sultan, every reigning monarch is addicted to the use of tobacco.

SLANDER KILLS BRIDEGROOM.

Mother-in-Law Writes Incessant Letters Reflecting on Daughter.

A man named Luppini, of Berlin, Germany, has committed suicide through grief at the receipt of anonymous letters containing slanders on his young bride, whom he had only recently married.

The bride's mother had strongly objected to the wedding, but was persuaded to be present at the ceremony. Immediately afterward the letters began to arrive at the rate of several a day, each containing the worst accusations against the bride. They were believed to have been written by Luppini's mother-in-law, who, it is said, had expected to be in her daughter's place at the wedding.

Luppini became morose and depressed by the continual slanders on his wife, and shot himself, leaving a letter explaining the reason of his suicide.

Though no definite announcement has yet been made, it is generally assumed that Lord Elgin, now that he has taken the responsibilities of office in the new Cabinet as Colonial Secretary will resign his position as chairman of the Scottish Churches Commission.

Mr. William Duncan, who was for many years sub-editor of the Newcastle Daily Chronicle, died in Newcastle recently. Mr. Duncan was born at Aberdeen sixty-nine years ago, and was educated at the Aberdeen Grammar School and Marischal College.

The death occurred at his residence in Regent Terrace, Edinburgh, of Rev. Dr. J. P. Glog, who for some years acted as interim professor of Biblical criticism at Aberdeen University. Rev. Paton J. Glog was a native of Perth, where he was born on May 17, 1823.

The results of the year's work of the Edinburgh Savings Bank show that there has been a marked advance in all branches of the bank's operations. The amount at the credit of 86,286 depositors and investors is now £3,656,842, and the total funds of the bank reach £3,711,851, the highest point yet reached.

Mr. J. B. Black, lecturing to a Glasgow Insurance Society, mentioned the most remarkable escape of modern times—the man who got out of the train on the night of the Tay bridge disaster to run after his hat, and who by losing the train in consequence was the sole survivor. Mr. Black calls that a million to one chance.

Lieut.-Col. J. M. Campbell, of the 2nd Renfrew Volunteers, died recently at Ullintown, Newlands, after a very short illness. The deceased officer, who was an enthusiastic volunteer, was a well-known writer in Glasgow. He took a prominent part in football legislation in Scotland in the amateur days.

The Clyde shipbuilding annual returns will show that Clyde firms have beaten all records, both in output and in orders placed. The output for the twelve months was 550,000 tons, as against 418,000 a year ago.

SCOTLAND'S BIRTH RATE.

Average Per Family is Four as Compared to Four and a Half Once.

According to the reports to the Registrar-General of Scotland the average Scottish family nowadays included only four children as against four and one half a generation ago. And what is perhaps even more remarkable is the fact that this loss is observed among the countryman's family, not among the dwellers in the towns. Two generations back the average family was still larger. The statistics also showing that the shepherd and the gamekeeper are among the healthiest and the longest-lived of men. Compared with them the residents of the towns die young. The reason for this is believed to be in the open air life of the shepherds.

The decrease in the birth rate is even more remarkable when taken in connection with the statistics upon the subject of marriage. It appears that 298,664 marriages have been registered during the last decade, and of this number 39,276 is in excess of the marriages of the decade previous. All of these things are regarded as evidences of a higher standard of comfort demanded by the younger generation, the proportion of males marrying between the ages of twenty and twenty-five was relatively greater than in the previous decades, while the proportion of those married under twenty and over forty was relatively less. From all of this the Registrar-General concludes that the average number of births per marriage is so markedly decreasing that it may be assumed that there is a true falling off in the fertility of marriage.

STILL HANGS ON.

"Ever notice it?" queried the man who asks questions on the installment plan. "Did I ever notice what?" queried the party of the other part.

"That when a man says he's tired of living he is just as careful to avoid accidents as before?" continued the party of the prelude.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is out-classed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raises—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

WHAT OTHER PAPERS SAY.

Toronto Star.

There is a movement afoot to increase President Roosevelt's salary to \$75,000, and the congressmen's salaries in proportion. In the United States they have to do these things to keep John D. Rockefeller from getting it all.

Toronto Star.

In 1870 it was Louis Napoleon who was "itching" to fight with Germany. In 1906, it is William II. who is itching to fight with France. If history repeats itself, whose capital is likely to be besieged?

Exchange.

A Sarulia man has just got five years for lighting a fire, whereas many meek married men light fires regularly every morning, and don't get so much as a thank you for it.

Toronto News.

Manitoba is likely to take over all the telephones and run them under government ownership. Wonder if Premier Roblin will allow the grits to talk through them?

What is the object of Mr. Crawford's bill in the legislature? To prevent the attendance of scholars from outside the municipality at a high school at less than the actual cost of the service? This is surely a matter for grave consideration.

The Weekly Sun, which speaks in behalf of the rural legislators, warns the local government not to change the country councils' act. The question was not up in the last election, but it will be up in the next election if Mr. Whitney desires it.

TONS OF GOLD TREASURE.

Vast Store of Wealth Empty from New World Into Old.

It has never been told how vast was the treasure that was emptied from the new world into the old in the glorious days of the Spanish dominion. We can only judge of how great it was by collateral evidence. The booties of Cortes and Pizarro are famous in annals of new world history. In them we have read how the soldiers of the former carried away only a small part of the treasures looted at Mexico, yet were so loaded down with stolen gold that when they fell from the causeway into the lake in the memorable retreat from Mexico they sank and drowned as weighted with plummets of lead; also we read how Pizarro exacted as a tribute for the liberation of the Inca Atahualpa gold that filled to the depth of several feet a room seventeen feet wide by twenty-two feet long and that was valued at 1,300,000 pesos d'or, the equivalent of nearly \$15,500 of our money.

When Drake sailed the south sea in the Golden Hind upon his piratical voyage of circumnavigation in the years 1577-79 and when he captured the Nuestra Senora della Concepcion—surnamed the Cacafue or Spitfire—of Cape San Francisco, it took three days to transfer the treasure from the captured ship to his own. In that single haul there was realized a "purchase," as it was called, of over twenty-six tons of silver, besides eighty pounds of virgin gold, thirteen chests of pieces of eight containing over \$1,000,000 in money and an enormous amount of jewels and plate.

Upon the evidence of John Drake we find that when the Golden Hind laid

THIS PRETTY CANADIENNE

Saved From Terrible Kidney Disease By "Fruit-a-tives."

"I have much pleasure in reporting to you the great benefit I have received from taking 'Fruit-a-tives'—and I feel that I cannot say too much in favor of a medicine which has done me so much good. I was a martyr to that distressing complaint, chronic constipation accompanied with severe headaches, backache, sick stomach and all the symptoms of dyspepsia. I had also a dreadful complexion, sallow in the extreme and black under the eyes. I had every symptom of kidney irritation and I had been told by physicians that my kidneys were affected. I consulted a number of physicians and took various remedies but received very little benefit. Last May I was advised to try 'Fruit-a-tives' and when I began to take them I had little faith of getting anything to give me permanent relief, but after I had taken half a box of 'Fruit-a-tives' I began to feel better and before I had finished one box the constipation was relieved, the headaches left me, the pain in my back was better and I could sleep as soundly as when I was child. Also, my complexion began to clear up again, all the sallowness disappeared and the black circles under my eyes went away. The pain in the back gradually left me and all signs of kidney disease disappeared by the first of August after I had taken three boxes. Since then I have continued to improve and now I have none of my old symptoms and my appetite is good, digestion splendid and my complexion as clear as when I was a young girl. Also the constipation from which I had suffered so long has been entirely cured and it is not necessary for me to take the 'Fruit-a-tives' now as I am quite well in every way. I took no medicine but 'Fruit-a-tives' but I followed faithfully the directions as to diet etc., given in the pamphlet which accompanies each box of 'Fruit-a-tives.'"

(Sgd.) FLORANCE JAMISON.

Every part of the body is constantly decaying and being renewed. The dead cells, or tissue waste, should be removed by the skin, kidneys and bowels. When these organs do not act regularly, this poisonous matter stays in the system—is taken up by the blood—carried to heart, liver, stomach, brain and nerves all over the body—and poisons everything it touches.

"Fruit-a-tives" keep each organ clean and healthy. "Fruit-a-tives" act on the skin, stimulating the millions of minute glands and opening the pores so the waste can escape. They act on the liver sending more bile into the bowels and making the bowels move regularly and naturally every day. They act on the kidneys, strengthening and invigorating these organs and curing all kidney disorders.

At all druggists or sent postpaid on receipt of price—

In the Lead.

Albert College Belleville,
ONT.

Business School founded 1877. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters.
\$27.00 pays board, room and tuition electric

requires that each factory receiving instruction pay \$15.00 for the season. This amount represents about half the actual cost to the Department.

The Instructors in addition to giving instruction to the makers will devote some attention to giving advice to farmers as to the method of cooling and taking care of their milk. Each instructor will be supplied with leaflets giving the most approved method of caring for milk and will have pleasure in leaving one with each producer as visited, and a few extra copies will be supplied to each maker.

Those desiring instruction will please make application to G. G. Pablow Chief Instructor for Eastern Ontario, Kingston, at an early date in order that the work for the season may be well planned.

It is particularly desired that new factories or factories which are operating under a new name inform the Department of Agriculture, Toronto, of the name of the factory, together with lists of officers.

Enclosed you will find a copy of a letter addressed to Proprietors and Secretaries of factories, and we would be pleased to have your paper draw the attention of your readers to the work

tons of silver, besides eighty pounds of virgin gold, thirteen chests of pieces of eight containing over \$1,000,000 in money and an enormous amount of jewels and plate.

Upon the evidence of John Drake we read that when the Golden Hind laid her course for England, by way of the Cape of Good Hope, she was so heavily "ballasted" with pure silver that she "rode exceeding deep in the water."

THE MOONSTROKE.

A Sailor's Experience After a Night Nap on Deck in the Tropics.

"People laugh at moonstrokes," said a sailor. "They call them shellbacks' superstition. I once had a moonstroke, though, and I tell you it was no laughing matter.

"In a full moon one night in the tropics I fell asleep on deck. The moon shone directly on me. I lay in a white pool of moonlight. So three hours went by.

"Then, when they woke me, I felt like a man in a dream. My mouth hung open, as it does when I sleep, and I couldn't close it, and my head lay over on the side, and I couldn't straighten it up.

"Nor could I understand what people said to me, nor could I obey orders. Voices I'd hear far away, but they seemed meaningless, unpleasant. I was very drowsy. All I wanted was sleep.

"They worked on me for two days, rubbing me down with cold water and dosing me with castor oil, before they brought me round. And always after that I have been careful never to sleep where the moon's rays could get at me. My moonstroke happened eight years ago, but still at every full moon I am stupid and drowsy, my head droops a little to one side, and my mouth tends to hang open.

"There's many a sailor has been moonstruck, but this accident never befalls landmen. Landmen, you see, never sleep out of doors."

The Ducking Stool in England.

The latest recorded use of the ducking stool in England (the designations cucking and ducking were, of course, synonymous in the days of Queen Elizabeth) was in 1809. It was at Leominster, when a woman named Jenny Pipes, alias Jane Corran, was paraded through the town on the ducking stool and ducked in the water near Kenwater bridge by order of the magistrates. In 1817 another woman, called Sarah Leake, was wheeled round the place in the same chair, but not ducked, as, fortunately for her, the water was too low. The instrument of punishment in question has not been used since then.—London Notes and Queries.

India Rubber Tree Fruit.

The fruit of the India rubber tree is somewhat similar to that of the Ricinus communis, the castor oil plant, though somewhat larger. The seeds have a not disagreeable taste and yield a purplish oil. It is a fairly good substitute for linseed oil, though it dries less rapidly. Mixed with copal blue and turpentine, it makes a good varnish. The oil may be also used in the manufacture of soaps and lithographic inks. The seeds are somewhat like tiny chestnuts, although darker in color. The Indian girls are fond of wearing bracelets and necklets made of them.

Loafers as Trouble Makers.

Did you ever consider how much trouble and turmoil in the world is stirred up by loafers? Do it and you will be surprised. Investigate carefully, and you will find that nine of the

started by loafers who had no business of their own to attend to and so got busy with other people's affairs.

In the Lead.

Hostess (introducing first violin to sporting and nonmusical guest)—This is Professor Jingelheim, who leads the quartet, you know. Sporting Guest (thinking to be highly complimentary)—Leads—oh—ah—by several lengths, eh—and the rest nowhere! What?—Punch.

Nothing is impossible to industry.—Perlander of Corinth.

Lessons For Schoolboys.

There is no question that our forefathers supposed that benefit might be derived from causing schoolboys to be spectators of the hangings of criminals. Sir Walter Scott has borne testimony to this custom being not unknown in Scotland. In "The Heart of Midlothian" Mr. Saddletree is represented as saying:

I promised to ask a half play day to the schule so that the bairns might gang and see the hanging, which canna but have a pleasing effect on their young minds, seeing there is no knowing what they may come to themselves.—Chapter 20.

Sir Walter would not, we may assume, have written the above had he not known that such things had actually taken place.—London Notes and Queries.

The Sea Otter.

The sea otter is nearly twice the size of the common river otter, and the fur, without finishing or preparation of any kind, is more beautiful as it is stripped from the animal than the richest seal-skin, which has to be scraped, plucked of the long upper hairs and then dyed before it could be recognized as the beautiful object which the finished fur undoubtedly is. In the sea otter's fur the soft undercoat, the true fur, is as thick as that of the seal and nearly twice as long, while the long outer hairs are as soft as a sable's tail and often a pale gray, which gives to the whole coat an appearance as of dark fur slightly frosted over.

Bird Confidence.

Mr. Bell's aviary presented a pretty evidence of mutual confidence among birds. A pair of Java sparrows lived in a compartment with a "bleeding heart" pigeon. The latter fell in love with them and at night always cuddled a sparrow under each wing. When seen by the light of a lantern the pigeon seemed to be cuddling two babies, one under each wing, from which the cheerful countenances of the little sparrows looked with blinking eyes.—London Spectator.

His Definition.

A teacher in a certain school asked for the definition of a furrier. A hand was raised. "Well, John, you tell us what a furrier is." "A man who deals in furs," correctly replied the pupil. Then, turning to another scholar, the teacher asked for the definition of a currier. "A man who deals in cures," was the unexpected reply of the eager boy.

All In the Bill.

"I'm afraid," said the junior member of the law firm, "that we are causing our client unnecessary trouble."

"Oh, that's all right," rejoined the senior member. "We'll charge him for it."

Good Old Remedy.

"How did you cure your boy of swearing?"

"By the laying on of hands, principally."

ONT. 55

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters.

\$27.00 pays board, room and tuition electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, was also an expert penman, and a specialist in shorthand in connection with attendance. The teachers in the literary department also acted in the work. The high character of the College is a guarantee of thoroughness. New Commercial Hall one of the finest in Ontario. Catalogue with specimen of penmanship FREE.

Heart and Lungs.

The action of the heart, lungs and digestive system is involuntary, for the reason that it is indispensable to life and must be carried on under all circumstances. If a man had to think of his heart or had to remember that he

"A Great Tonic"

"PSYCHINE" is a wonderful tonic. It contains medicinal elements not found in any of the patent medicines. "PSYCHINE" is a regular practicing physician's formula. A tonic for weak people, for men of business worries, for the tired mother, the pale, languid girl. Young girls just budding into womanhood; elderly people who feel that weakness due to old age find it a remedy they cannot do without. It restores vitality, creates rich, new blood, removes all impurities, strengthens the nerves. If you need a trial ask druggist for "PSYCHINE."

GREATEST OF ALL TONICS

PSYCHINE (PRONOUNCED SI-KEEN)

DR. F. A. SLOOUM, Limited 179 King St. W. Toronto, Canada

Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

SCOTT'S EMULSION

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

A BALL OF FIRE.

Franks of a Thunderbolt in a House in Paris.

Camille Flammarion in his book "Thunder and Lightning" describes some of the phenomena of electrical storms. Of the actions of a ball of fire in Paris he says: "It was in the Rue St. Jacques, near the Val de Grace. The fire ball burst into the room from the chimney, knocking over the paper guard in front of the fireplace. In appearance it suggested a young cat gathered up in a ball, as it were, and moving along without using its paws. It approached the tailor's legs as if to play with them. The tailor moved them away to avoid the contact, of which he naturally was in terror.

"After some seconds the globe of fire rose vertically to the height of the man's face as he sat, and he to save himself leaned quickly back and fell over. The fire ball continued to rise and made its way toward a hole which had been made at the top of the chimney for the insertion of a stovepipe in the winter, but which, as the tailor put it afterward, 'the fire ball couldn't see,' because it was closed up with paper.

"The ball stripped off the paper neatly, entered the chimney quite quietly and, having risen to the summit, produced a tremendous explosion, which sent the chimney pot flying and scattered it in bits all over the neighboring courtyard and surrounding roofs."

LIFE'S LITTLE THINGS.

They Go a Very Long Way Toward Making the World Happy.

A wild bird's song is a little thing—lost in the depths of a frowning sky.

And yet as it falls on a listening ear and leaves its message of melody earth's green seems brighter and life is sweeter all through an autumn day.

The coo of a babe is a little thing—meaningless sound from a vacant mind.

But 'tis the only sound that all nations heed—the one clear language that all races know.

A mother's love is a little thing—too soon, alas, forgot!

But it typifies to blind humankind the love and trust and hope divine that bear with patience calm and sweet the willful wrongs in these lives of ours.

A passing smile is a little thing—lost in a world of toil and care.

And yet the soul with gloom oppressed and the life grown wearied with burdens hard will happier be in the afterglow of a smile that is warmly kind.

A kindly word is a little thing—a breath that goes and a sound that dies.

But the heart that gives and the heart that hears may know that it sings and sings and sings till at last it blends with the wild bird's song and the coo of babes in what men call the celestial choir.

THE STOMACH.

How It Is Affected by the Use of Mixed Fatty Foods.

The stomach never has the least power of digesting true fat. This is disposed of in the intestines. When eaten in the ordinary forms, as fat meat, butter, etc., the fat separates out in the stomach and does not in the least interfere with the work of the gastric juice on the other food, but when a nonfatty food has been intimately mixed with grease the latter prevents the gastric juice getting at the food it could digest. Fish fried in oil or butter is by no means the most marked example, as the fat does not penetrate very deeply. Potatoes mashed with butter are rather worse, and mixed vegetables fried with butter are bad

If You Suffer

From Germ Troubles, Please Learn What Ligozone Can Do

Thousands who were sick—like you, perhaps—are well to-day because of Ligozone. Many had doctored long. Many were discouraged because other treatments had failed. But they were treating germ diseases with remedies which do not kill germs.

We offered to buy them a bottle of Ligozone—just as we offer you. They did with it what other remedies failed to accomplish. And those countless cured ones—scattered everywhere—are now telling others what Ligozone has done.

Kills Disease Germs.

Contact with Ligozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Ligozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poisons when taken internally. That is why medicine has been so helpless in a germ disease. Ligozone is exhilarating, vitalizing, purifying; yet no disease germs can exist in it.

The virtues of Ligozone are derived solely from gases. They are generated from the best producers of oxygen, sulphur dioxide and other germicidal gases. The process of making requires large apparatus, and from 8 to 14 days' time. The object is to so fix the gases, and to combine them, as to carry into the system a powerful tonic-germicide.

We purchased the American rights to Ligozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. To-day there are countless cured ones, scattered everywhere, to tell what Ligozone has done.

But so many others need it that this offer is published still. In the last few years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Ligozone can do.

Where It Applies.

These are the diseases in which Ligozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma	Gout
Abcess—Anemia	Gonorrhea—Gleet
Bronchitis	Hay Fever—Influenza
Blood Poison	Leucorrhea
Bowel Troubles	Malaria—Neuralgia
Coughs—Colds	Piles—Quinsy
Consumption	Rheumatism
Contagious Diseases	Scrofula—Syphilis
Cancer—Catarrh	Skin Diseases

NOBODY NEED HAVE INFLAMMATORY RHEUMATISM

THAT'S FACT THAT MEDICAL SCIENCE CAN PROVE TO YOU EVERY DAY IN THE YEAR—CARELESSNESS COURTS IT—PRECAUTION PREVENTS—IT'S NOT A CONTAGION THAT STEALS IN UNAWARES

South American Rheumatic Cure

is the fortress behind which you may be perfectly secure; and why take chances if, through exposure to heat and wet, you feel those unwelcome chills, then the fever, then the sweating, then the pains in the joints. Do not put off securing the greatest of rheumatic and neuralgia cures. Experience shows that the duration of inflammatory rheumatism, under ordinary treatment, will cover a period of six to eight weeks; and what a wracking it gives to the sufferer, and it seems almost incredible that the great South American Rheumatic Cure has, in thousands of instances, controlled and conquered most stubborn and next to baffling cases in from one to three days.

Lumbago is one of rheumatism's full brothers. It comes and prostrate at times with the suddenness of a thunderclap, and yet, as in the most acute inflammatory cases, the great South American Rheumatic Cure comes as a ministering angel, holds out its healing hand, and bids the bent and bedridden take on the suppleness of youth. Lots of testimony for the asking.

Healthy kidneys are kept so by South American Kidney Cure and unhealthy kidneys are cured by the same great remedy.

Gray's Syrup
of
Red Spruce Gum
For Coughs and Colds.

example, as the fat does not penetrate very deeply. Potatoes mashed with butter are rather worse, and minced vegetables fried with butter are bad offenders. The reason advanced explains why pork is difficult of digestion. The muscular fibers are mixed up with fat cells, and by the liberation of the oil in each tiny cell the eaten pork is made into an oily paste. A very strong stomach will do the work required, but it is not a fair task to impose frequently, and a weak stomach will refuse to do anything beyond reminding its owner by a few stabs that it will not stand such treatment.

GIANTS OF THE PAST

PREVIOUS AGES SUPPLY US WITH ENORMOUS FOSSIL BONES.

Lizards Three Times the Size of the Largest Elephant and a Turtle Whose Shell Looked Like a Hat. The Remarkable Plated Lizard.

The belief in a race of giants was once almost universal. Even today large skeletons when found are sometimes reported as being those of giant human beings. This was especially true of the period about the tenth and eleventh centuries, and in the latter a most amazing discovery was reported, which threw the scientific world of the time into great excitement. It was said that the body of Pallas, the son of Evander, had been discovered beneath the tomb of the Emperor Henry III. The bones were enormous and proved to have belonged to a huge fossil elephant. As late as the fifteenth century a war of words was waged over a find of large bones, one party claiming that they belonged to the giant Teutobochus. In 1857 a giant was discovered in Switzerland. The council of Lucerne requested a learned scientific man, Professor Felix Plater of Basel, to report upon it, and he not only announced the bones as part of a human giant, but made a complete restoration, showing the man twenty feet high, which the proud city adopted as an ancestor in the arms of the commonwealth. Unfortunately for the theory and much to the discomfiture of the people who had raised to a high pinnacle this mighty ancestor, it was found to be the remains of an elephant.

Nearly all the mastodon finds were attributed to giants, but there is no evidence that a human giant ever existed over eight feet in height, and it is extremely doubtful if this height was ever attained.

Giants other than human are very common in all branches of the animal kingdom—giants in every sense when compared to their pygmy representatives of today. Some years ago some laborers in the Senalik hills of India were engaged upon a government work when they came upon the remains of a turtle that proved beyond question that these animals had their giants in the days of old. The shell which the men exposed might have been used as a shelter for several men, and at first, before its bony nature was observed, it was thought by the natives to be a hut of some kind. Fortunately the bones were uninjured, and they were taken out and removed to the British museum, where a complete restoration of the animal may be seen. The length of the turtle was ten feet, its horizontal circumference twenty-five feet and its girth fifteen feet, but it was estimated by scientists that this was not an adult and that when fully grown this huge creature would display a dome-like back eight or nine feet high, giving a total length of twenty feet.

which, with its enormous spines, must have been a terrible weapon.

A giant from America had a skull that measured eight feet in length. Almost over the eyes were two large horns, a third placed over the nose. The great length of the skull was given by a huge crest that was protected by a ridge of long plates. The mouth of the triceratops was protected by a horny beak. In life it must have presented a formidable appearance, with a body clumsy and low like that of a hippopotamus, a long tail like an alligator's, its head calling to mind the rhinoceros. This monster was twenty-five feet in length and must have been one of the strangest animals of its time.—London Spectator.

Barely Missed.

"I came near getting that appointment I was after."

"How near?"

"I got a disappointment."—Exchange.

FOUND THE KEYNOTE.

The Story of an Angry Fiddler and a Dancing Bridge.

The old Sixth street bridge was a suspension bridge, and in connection therewith a story used to be told. Everybody knows that soldiers in crossing a suspension bridge must break step and bands are not allowed to play marches because of the cumulative force of the vibrations, which are apt to either destroy the bridge completely or crystallize the iron cables. Now, sound is vibration, and this explanation, not very scientifically put here, is the basis of the story, remembering that every object is supposed to have a keynote, which when struck on a musical instrument evokes responsive vibrations in the said object.

The story goes that many years ago an old man carrying a fiddle in a case once started across the bridge without paying toll. He was called back by the tollkeeper, protested his inability to pay, but was not allowed to cross. Threatening vengeance, the old fiddler seated himself on the wharf under the Allegheny end of the bridge and began to scrape away on his fiddle for hours, apparently trying all sorts of notes, half notes and combinations of notes and chords. Suddenly he seemed to find what he sought for, for his face lighted up, and he began to scrape steadily on a certain chord. A moan went through the bridge. Faster played the old man, and the wire cables fairly sang in response to the wild notes of the fiddle. Furiously the old fiddle scraped away, and the cables began to vibrate, slowly at first, the vibrations growing stronger and stronger as the keynote sounded on the violin. The bridge began to tremble, then to sway.

By this time the tollkeepers saw something was up, for the pedestrians on the bridge began to run, drivers whipped up their horses and men and women with blanched faces declined to set foot on either end of the structure. A messenger (there were no telephones then) was dispatched for the superintendent, and he came running. The old fiddler was pointed out, and a constable was ordered to arrest him; but, there being no suspicious person law then in existence, the officer shook his head. The bridge was cutting up all sorts of capers, swaying back and forth like a swing, until at last the superintendent in desperation ran to the fiddler and promised never to demand toll from him. An agreement was entered into, the fiddler pledging to keep secret to his dying day the keynote, so that no revengeful musician ever again could place the structure in jeopardy without studying out the keynote himself.

For Coughs and Colds.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

FROST STEEL GATES

The strong features of Frost's gates are combined in the Gates. A special feature is the frame of continuous steel tubing. This is vastly stronger than a frame with elbow corners and malleable castings. The heavy wire filling insures against sagging.

The public is warned against buying gates that infringe against Frost Fence Co.'s patent, as purchasers as well as users are laying themselves liable. For sale by

S. BOND & CO.'S GENERAL STORE, ODESSA.

FRIDAY BARGAIN DAYS CLOSED but we are giving Special Bargains on all dry goods for one week

Commencing March 12th.

We are also selling Groceries, Boots and Shoes and all other goods at a very low Price.

Highest Price paid for all Farm Produce.

S. BOND & CO., ODESSA.

Calcium was first made in minute quantities by Humphry Davy. In the new process chloride of calcium is placed in a receptacle and fused by electrolysis. An iron cathode forms a basis upon which the molten calcium deposits itself, and the once rare metal builds itself up into an irregular rod resembling a cabbage stalk. When the stalk has grown to the right length it is chipped off and dipped in paraffin wax to preserve it from the action of the air.

Three Strange and Remarkable Men.
As Dumas, the grandfather, prided himself more upon his wonderful strength and skill in athletics than his generalship, as Dumas the second prided himself more upon his knowledge of cookery than the authorship of "The Three Musketeers," so Dumas the third prided himself more upon his knowledge of art than upon the writing of "La Dame aux Camellias." They were three strange and remarkable men.

At Their Own Expense.
"Do you joke writers ever make jokes at your own expense?"
"For the first few years all our jokes are made that way. After that, if we're lucky, we get paid for 'em."

The Bargain.
"You ought to take this horse," said the dealer. "He is a bargain."
"Well, then, I don't want him," said the customer. "I want something to drive, and I never could drive a bargain."

The most manifest sign of wisdom is a continual cheerfulness.—Montaigne.

"BEST LAID PLANS"

By CHESTER FARRINGTON

Copyright, 1905, by P. C. Eastment

As the carriage drew up to the curb before the station the young man whispered a few hurried words to the young woman beside him. She turned to him quickly, admiration stamped on every line of her pretty face, while one little gloved hand stole up to pull his ear caressingly.

"Splendid, oh, splendid!" she cried. "You're a genius, Tom, dear, a real genius." Then she added, with an odd little seriousness that set him chuckling. "I know I shall like you."

The young man produced a cardcase and from it pulled a Pullman ticket, which he passed to the young woman.

"I'm afraid you'll have to take one of the suit cases, dearie," he said. "Sorry, but, you see, if I come lugging them both in it will give it all away. I fancy this will be the best way out of it. If we go in together we might just as well be labeled."

The driver of the carriage descended from the box and pulled open the door.

IF YOU'LL SCUSE ME, SUH, I'LL DES SWEEP UP DAT RICE ON DE FLO'.

The man stepped out first, then assisted the young woman to alight. He handed her a suit case and a small, carefully rolled umbrella.

"Track 4, dearie," he said, giving her hand a surreptitious squeeze. He turned to the driver. "You may drive me to the other entrance," he said quietly.

The driver stood quite still, staring at the young man.

"The other entrance, I said," the latter reminded him sharply.

"Sure, sir! All right, sir!" the driver chuckled, while a broad grin wreathed his face. The young man re-entered the carriage, the driver banged the door and mounted the box, and the equipage rattled over the pavements to the other entrance of the station.

Arrived there, the young man paid

the fares, gathered up the remaining suit case and a bag of golf sticks and walked leisurely across the platform to track 4. He passed over his luggage to the porter of the Pullman Avon and followed that worthy functionary down the aisle to his seat. Scarcely had the porter put down his traps when the young man turned about and discovered the young woman in the seat directly behind him. It was the same young woman of the carriage.

"Why, by Jove, Eleanor," he cried. "this is luck! I've been anticipating the usual dreary ride up to the camps, and here I run across you in possession of the very next seat to mine!"

"Cousin Tom, how very nice to meet you here!" she exclaimed, with a pleasure equaling his own.

They very solemnly shook hands. The other passengers of the car looked on, mildly interested.

"Going far?" he asked as he swung his chair about and settled himself comfortably.

"I'm bound to Ballard Junction," she said, flushing slightly.

"Good!" said he. "That's three hours away. We'll have a chance to get acquainted once more. Let's see—how long is it since I last saw you? Five years, isn't it?"

"Seven," she corrected. "Lord, how time flies!" said he. "Come to think of it, it is seven years. It was at the mountains, wasn't it?"

She nodded. "I confess I'd scarcely have recognized you."

"You haven't changed a bit," he declared. "I'd have known you had we met at the ends of the earth."

The passengers in the neighboring seats listened to the chatter with tolerant smiles. All the world loves a romance, even a consensually romance, and there was that in the young man's eyes which said very plainly this meeting was a consummation devoutly to be wished. The young woman, too, had a way of looking admiringly at her broad shouldered companion, and when their eyes met hers fell and her cheeks grew rather more rosy. They were two of those persons whom outsiders are prone to declare were made for each other.

Somewhere in the station a gong clanged. The train drew out of the gloom of the station into the brilliance of the early fall afternoon. The rumble of the train made it possible for the young people to speak in undertones to each other's ears alone when they chose to do so.

"Bully for you!" said the man softly. "You did it beautifully."

"I flatter myself we fooled them for once," she laughed.

Then they raised their voices and ran on about a string of cousins and aunts. They exchanged reminiscences; they talked over very thoroughly those seven (imaginary) years since they had last met. Every now and then the young man would mutter softly, "Nobody wise to it yet." And the young woman would chuckle, "Indeed not!"

The city was far behind them and they were rolling smoothly across green meadow lands when the young man noticed that the occupants of the seats directly opposite, a middle aged couple, were looking intently in his direction and smiling covertly. He tried to appear unperturbed, but somehow he felt decidedly ill at ease. The young woman's eyes followed his across the aisle, and she, too, was aware of something amiss, for her face reddened and she leaned forward nervously.

"What is it?" she asked breathlessly.

"Nothing, I imagine," said he—"our guilty consciences, perhaps," he hazarded.

She laughed a trifle artificially. "Suppose they should?"—she began.

Eminent Doctors Praise its Ingredients.

We refer to that boon to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fyfe one of the Editorial Staff of THE ECLECTIC MEDICAL REVIEW says of Unicorn root (*Helonias dioica*) which is one of the chief ingredients of the "Favorite Prescription":

"A remedy which invariably acts as a uterine invigorator . . . makes for normal activity of the entire reproductive system." He continues "In Helonias we have a medication which more fully answers the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent." Dr. Fyfe further says: "The following are among the leading indications for Helonias (Unicorn root). Pain or aching in the back, with leucorrhoea; atonic (weak) conditions of the reproductive organs of women, mental depression and irritability, associated with chronic diseases of the reproductive organs of women, constant sensation of heat in the region of the kidneys; menorrhagia (flooding) due to a weakened condition of the reproductive system; amenorrhoea (suppressed or absent monthly periods), arising from or accompanying an abnormal condition of the digestive organs and anemic (thin blood) habit; dragging sensations in the extreme lower part of the abdomen."

If more or less of the above symptoms are present, no invalid woman can do better than take Dr. Pierce's Favorite Prescription, one of the leading ingredients of which is Unicorn root, or Helonias, and the medical properties of which it most faithfully represents.

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says: "It is an important remedy in disorders of the womb. In all catarrhal conditions . . . and general enfeeblement, it is useful."

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root:

"In relation to its general effects on the system, there is no medicine in use about which there is such general unanimity of opinion. It is universally regarded as the tonic useful in all debilitated states."

Prof. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal:

"Valuable in uterine hemorrhage, menorrhagia (flooding) and congestive dysmenorrhoea (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

THE ESKIMO SMOKER.

He Dearly Loves Tobacco and Not a Mite of It Is Wasted.

"No man is fonder of tobacco than an Eskimo," said an arctic traveler. "The Eskimo depends for his tobacco solely on the white man. For a pound of it he would sell his oldest son."

"It is odd to see an Eskimo smoke. He chops his tobacco fine and mixes it with chopped willow twigs so as to make it go further. Then he cleans out with a picker of bone the small stone bowl of his pipe, and then he plucks a lock of hair from his deerskin suit and rams it down in the bottom of the pipe bowl so as to prevent any of the finely chopped tobacco from escaping into the stem."

"Finally he lights the pipe and smokes it in a swift series of long, strong puffs so that there may be no waste. Each puff is inhaled deep down into the lungs, and the first puff's smoke is still streaming from the nostrils long after another puff has been started. There must be, you see, no waste. There must be none of that vain combustion of tobacco without benefit to the smoker which goes on continually among us."

"Often the most experienced Eskimo will smoke so hard and fast that tears will stream from his eyes, he will cough violently, and sometimes vertigo and nausea will seize him."

WHO S!

Vapo-Cresolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

When this is a long established and standard remedy for the diseases indicated. It cures because the air rendered antiseptic is carried over the diseased surfaces of the trachea and tubes with every breath, giving prompt and constant treatment. Those of a consumptive tendency, or who suffer from chronic bronchitis, find frequent relief from coughs or inflamed conditions of the throat.

Vapo-Cresolene is sold by druggists or sent prepaid on receipt of price. Vapo-Cresolene is made of purest Cresolene and Eucalypti, and is a valuable remedy for Croup, Whooping Cough, Bronchitis, Asthma, Grip, Diphtheria, etc.

EAGLE HILL PUBLIC SCHOOL

Report for February.

Names in order of merit.

IV Reader, Class I—Pearl Ready, Katie Marquardt.

III Reader—Class 2—Arthur Ready, Norris Ready, Stanley Fox, Felix Lindsay, Leslie Fox. Class III—Hazel Irvine.

II Reader—Class IV—Henry Armstrong.

II Reader, Class V—Jimmy Marquardt, Puri Villneff, Gordon Pettefer. Class VI—Lorne Ready, Dolphs Villneff, Andrew Armstrong, Russell Pettefer, Frieda Mieske, Ula Lindsay.

I Reader, Pt. II, Class VII—Charlotte Armstrong.

I Reader Pt. I, Class VIII—Andrew Ready, Oris Villneff, Everett Villneff.

On Roll—22, average attendance—11.

FRANCE: STEWART,
Teacher.

Nickle plated tea and coffee pots, trays
do. at MADOLE & WILSON.

GRETNA.

E. and A. Alkenbrack are busy hauling timber for their new barn which they are going to build in the spring.

Miss Annie Field who has been quite ill, is improving under the care of Dr. Stratton.

J. N. Hough, who has been ill with the la grippe, is better.

Several of the young men are talking of going West in the spring.

J. Mellow lost a colt last week from pink eye.

Mr. and Mrs. W. Joyce returned home Saturday after a few days visit with relatives at Sunbury.

Clarence Wager has returned home to Deloraine, Manitoba, after visiting relatives here.

W. J. Mellow has returned home after two weeks visit with his son, at Enterprise.

J. Kellar is visiting his daughter, Mrs. H. Goodman, Tyendinaga.

A few from here attended the sale at H. Sils, Hay Bay, on Wednesday.

Mr. and Mrs. C. Mellow and Miss Olo VanAlstine visited, at T. Field's Wednesday evening.

Fred Mellow is ill with tonsillitis.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

DENBIGH.

Mr. Adam Gregg and Miss Maggie J. Stuffles, both of Matawathobar, were quietly married at the home of the bride's parents, Mr. and Mrs. D. Stuffles, on the 13th. ult. Rev. G. Dauchisel officiated.

Mr. and Mrs. A. John, mourn the loss of their eldest son Edward, who died at their residence on the 18th. ult., at the age of a little over twenty-two years. Deceased was a most exemplary young man, of rather quiet and retired disposition, liked and respected by all who knew him. He was last season employed on the C. A. Railway, at Depot Harbor, and in November last contracted a severe attack of Typhoid fever. He was taken to the

CAUGHT BY THE GRIP-- RELEASED BY PE-RU-NA.

"The World
of Medicine
Recognizes Grip
as Epidemic
Catarrh."
Medical Talk.

A Southern Judge Cured.

Judge Horatio J. Goss, Hartwell, Ga., writes:

"Some five or six years ago I had a very severe spell of grip which left me with systemic catarrh.

"A friend advised me to try your Peruna, which I did, and was immediately benefited and cured. The third bottle completed the cure."—H. J. Goss.

Cured in a Few Weeks.

Miss Jean Cowgill, Griswold Opera House, Troy, N. Y., is the leading lady with the Aubrey Stock Co. She writes the following:

"During the past winter of 1901, I suffered for several weeks from a severe attack of grip, which left a serious catarrhal condition of the throat and head.

"Some one suggested Peruna. As a last resort, after wasting much time and money on physicians, I tried the remedy faithfully, and in a few weeks was as well as ever."—Jean Cowgill.

Grip Resulted in Catarrh.

Miss Alice Bielke, Treasurer Young Women's Society of the Lutheran Church, Menasha, Wis., writes:

"I gratefully acknowledge the good that Peruna did me after I had been sick with la grippe which left me in a very weak and emaciated condition, with catarrhal trouble of the head and ears.

"My mother suggested that I take it to build up my strength and rid myself of the troublesome catarrh, and it acted with wonderful speed.

"I was able to resume my work inside of two months and I am in splendid health now."—Alice Bielke.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind. Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit. Peruna does not produce temporary results.—It cures.

The Word "Nugget."

"Nugget" was formerly used to signify a bit or lump of anything, as a "nugget of tobacco." Nowadays, however, it is used principally of gold as it comes from the mine. This use is Australian. Governor Sir William Denison of Australia wrote in 1852, "In many instances the gold is brought to market in lumps or nuggets, as they are called." In Queensland there is a peculiar use of the word unknown in the rest of Australia. There, when a man appropriates unbranded calves, he is said to be "nuggeting."

LaGrippe Is Epidemic Catarrh.

It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to la grippe. None are exempt—all are liable.

Grip is well named. The original French term, la grippe, has been shortened by the busy American to read 'grip.'

Without intending to do so, a new word has been coined that exactly describes the case. As if some hideous giant with awful grip had clutched us in its fatal clasp.

Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

Have you the grip? Or, rather, has the grip got you? If so, read the following letters.

These testimonials speak for themselves as to the efficacy of Peruna in cases of la grippe or its after-effects:

Saved by Pe-ru-na.

Hon. James R. Gull is one of the oldest and most esteemed men of Omaha, Neb. He has done much to make it what it is, serving on public boards a number of times. He endorses Peruna in the following words:

"I am 68 years old, am hale and hearty and Peruna has helped me attain it. Two years ago I had la grippe—my life was despaired of. Peruna saved me."—J. R. Gull.

A Relative of Abraham Lincoln.

Mr. Silas S. Lincoln, who resides at 913 I street, N. W., Washington, D. C., has the honor of being third cousin to Abraham Lincoln. He writes:

"I had la grippe five times before using your medicine. Four years ago I began the use of Peruna, since which time I have not been troubled with that disease.

"I can now do as much work at my desk as I ever could in my life. I have gained more than ten pounds in weight."—S. S. Lincoln.

Pe-ru-na Not Only Cured La Grippe but Benefited the Whole System.

Miss Alice M. Dressler, 1313 N. Bryant Ave., Minneapolis, Minn., writes:

"Last spring I suffered from la grippe and was partially cured, but the bad after-effects remained through the summer and somehow I did not get strong as I was before.

"One of my college friends who was visiting me asked me try Peruna and I did so and found it all and more than I had expected.

"It not only cured me of the catarrh but restored me to perfect health, and built up the entire system."—Alice M. Dressler.

Address Dr. S. B. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Husband—Anything you want in town today, my dear? Shall I order some more of that self rising flour? Wife—We have plenty left, but I wish you would stop at a registry office and order me a self rising servant girl.

Preparing the Soil.

"I notice the young Widow Prettyman doesn't have her widow's weeds so much in evidence now."

"No; she's clearing those weeds away. I believe she sees signs of a second crop of orange blossoms."

HE WAS

HE WAS OF LYDIA E. PINKHAM

with the Vegetable Compound
with the "Panic of '73" Caused
Public Sale in Drug Stores.

their mother, combined forces to restore the family fortune. They argued that the medicine which was so good for their woman friends and neighbors was equally good for the women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until to-day Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself.

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice—and there were thousands—received careful study and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

To her hands naturally fell the direction of the work when its originator passed away. For nearly twenty-five years she has continued it, and nothing in the work shows when the first Lydia E. Pinkham dropped her pen, and the present Mrs. Pinkham, now the mother of a large family, took it up. With woman assistants, some as capable as herself, the present Mrs. Pinkham continues this great work, and probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound: made from simple roots and herbs; the one great medicine for women's ailments, and the fitting monument to the noble woman whose name it bears.

once secured, and an experienced graduated nurse engaged to wait on him all efforts to prolong his life were in vain. His sister Ida, of Napanee and brother Alfred, of Depot Harbor, had been notified of his relapse. The former arrived a couple of days before he end came but the latter did not reach home until the evening before the funeral, which took place on the 21st, at the Lutheran Church and Cemetery. The funeral cortege was one of the largest known in this vicinity.

Mrs. B. Liedtke, is the guest of her parents, Mr. and Mrs. J. Rahm, for a couple of weeks.

Considerable stir was caused here, by the pursuit of a horse-thief during the last few days. On Saturday evening last a couple of constables arrived here from Cloyne and inquired for a man, who had stolen a horse, harness, and covered buggy, near Tweed, and had been traced this way. A party answering the description had passed through the village a few hours earlier and had been spoken to by several persons, who had noticed that the horse, apparently a young animal, was tired and must have been driven a long distance without being fed or rested. After passing the village he applied at the first farm house for a night's lodging, but was refused, and told that he should have stayed at the village, where there are two good hotels. He then drove to another farmer's who kept him as it had got dark in the meantime. In the morning, he offered a watch chain, to his host for his night's lodging and seemed to be very grateful when the latter would not accept anything for it.

In the mean time his pursuers, who had been somewhat delayed making inquiries and procuring a fresh team, passed the by road, their quarry had taken in the night and continued on the Renfrew road, which was also taken in the morning by the suspected party, who however must have found out that he was being pursued, for he only followed the road a few miles and then drove off in the bush, where he tied the horse to a tree and hid himself but was accidentally discovered. While word was being sent to the village, he managed to escape with his valise and fur coat, no trace has since been got of him. The horse and rig were taken care of by a farmer near by, and have since been taken away by their lawful owner. It has since been ascertained that the fellow with another chum was through here about five years ago peddling watches, chains, cheap jewelry, and other notions, and that they then were suspected of having taken things which did not belong to them. It is to be hoped that he will be caught this time and get what he deserves.

P. Stein is on a business trip to Napanee, and Tamworth, and has been visiting friends near Roblin, and Forest Mills.

Animals That Are Always Enemies.

Many animals are born with an inherent antipathy for other animals. The excessive fear shown by young rabbits which for the first time smell a ferret and of young turkeys which bear the shrill cry of a hawk they have never heard or seen before, are proved examples of the strength of these instinctive antipathies. But the case of the weasel and rat is, perhaps, more to be noticed because of the greater equality of the antagonists. The feud is so bitter that a meeting between them almost certainly means death to one or both. Friendships are not uncommon between the cat and dog and have been known between a dog and wolf, but the mutual attitude of the weasel and rat is invariably war—war that is waged to the death.

market in rumps of nuggets, "they are called." In Queensland there is a peculiar use of the word unknown in the rest of Australia. There, when a man appropriates unbranded calves, he is said to be "nuggeting."

He Understood.

Paul Louis Courier, when bitterly assailed by a French professor, quietly remarked: "I fancy he must be vexed. He calls me Jacobin, rebel, plagiarist, thief, poisoner, forger, leper, madman, impostor, calumniator, libeler, a horrible, filthy, grimaicing raskpiker. I gather what he wants to say. He means that he and I are not of the same opinion, and this is his only way of putting it."

That's Why.

"You say you conceal nothing from your wife?"
"Absolutely nothing."
"And why do you not?"
"It is evident that you do not know my wife."

Nothing can bring you peace but yourself; nothing can bring you peace but the triumph of principles.—Emerson.

How Red Rose Tea is Grown

TEA is a native plant of Northern India. Transplanted to Ceylon it lost much of its strength and richness, but gained in fragrance and delicacy. That is why Ceylon tea is not a strong tea. That is why I Blend Indian and Ceylon teas together—that is how the strength and richness, fragrance and delicacy of Red Rose Tea are secured—that is why Red Rose Tea has that "rich fruity flavor."

Red Rose Tea

is good Tea

PADEREWSKI AS HOST.

Opens His House to Receive Refugees from Poland.

No less than ten thousand Russians of all ages and all ranks have taken refuge in Switzerland during the past year. In almost all instances the wealthier classes are willing and glad to help their companions in adversity. The home of Paderewski, the famous pianist, at Norges is continually crowded with Polish refugees. They are welcome to stay as long as they need to, all the spare rooms being given up for their comfort and convenience. As soon as the Polish refugees who are being entertained by the Paderewskis are enabled to go to other countries or other parts of the country and look after themselves the home of the pianist at Norges is given over to new refugees.

WORRIED MOTHERS.

Much of the worry which every mother of young children undergoes, would be spared if the mother kept Baby's Own Tablets on hand and gave an occasional dose when the child was fretful, cross or feverish. Nearly all the ailments of childhood can be traced to the stomach, bowels or teething. For these troubles no medicine can equal Baby's Own Tablets, and the mother has the guarantee of a government analyst that this medicine is absolutely safe. Mrs. Kenneth McInnis, Lakeland, Ont., says:—"Baby's Own Tablets are a perfect medicine in every way. There will be no sickly children in the homes where they are used." Sold by all medicine dealers or by mail at 25 cents a box by writing The Dr. Williams Medicine Co., Brockville, Ont.

"You here, James?" exclaimed the slum-worker, visiting the jail. "Yes'm," replied the new prisoner, who was in for burglary. "Well, well, I certainly am surprised." "So was I, ma'am, or I wouldn't be here."

How to Cleanse the System.—Purlee's Vegetable Pills are the result of scientific study of the effects of extracts of certain roots and herbs upon the digestive organs. Their use has demonstrated in many instances that they regulate the action of the liver and the kidneys, purify the blood, and carry off all morbid accumulations from the system. They are easy to take and their action is mild and beneficial.

He—"Your new hat is charming, but I fancy it doesn't go well with that dress." She (enchanted)—"Oh, you dear old hubby, so you really mean to buy me a dress as well?"

Are You Haunted Day and Night?—Mind and body racked and tortured by evil forebodings, gloomy and dull, robbed of that "Divine restorer," sleep, appetite gone, nerves shattered, generally debilitated? This is none too dark a picture for great South American Nerveine to obliterate and set up in its stead the glowing tints of the sun of perfect health.—108.

"How are you coming on with your new system of weather prediction?" "Well," answered the prophet, cheerily, "I can always get the kind of weather

PASSING OF THE SWEEPER.

Picturesque Character on English Streets Is Being Crowded Out.

Little by little the old-time landmarks and customs of London appear to be passing away. Probably nothing was better known or more appreciated by the children a half or even a quarter of a century ago than the picturesque characters of the crossing sweepers. Today the crossing sweeper is passing—in fact, he may be said almost to have passed already. It has been suggested that the doing away with the "sweeps" must have been ordered, but in view of the number of unemployed, and the fact that John Burns of the Local Government Board and the authorities are disposed to deal gently with the unemployed, this is denied. However, the elimination of the "sweeps" within the next few years is regarded as a certainty, owing to the adoption of modern machinery in the sprinkling and sweeping of the pavements.

But even this apparently does not explain the lack of interest taken by the public in the "sweeps" themselves. The crossing sweepers say that where they once used to earn a fair amount of money they now receive little or nothing for their labors—in fact that they could make more money by actively begging. They cannot explain the change in public sentiment unless it is because the people are being educated up to the point of believing that the streets ought to be properly swept for them by the parish.

BARMAIDS TO GO.

Lancet Urges That They Should Be Abolished.

The London Lancet, the leading medical journal of the country, has pleased the Church and temperance advocates by coming out with a leader strongly condemning the vocation of barmaid. Says the Lancet:

"The vocation of barmaid is attended by perils from which young women should as far as possible be sheltered. Learning to bar has no tendency to render a woman a better wife or mother; it affords her no security of employment after reaching the age of thirty; renders her unacceptable to employers of almost every other kind; it often permanently injures her health; and it exposes her to exceptional risks. If that be the case is it consistent with a due regard to the national welfare to allow the daughters of the Empire to be offered up as sacrifices to the Moloch of the drink traffic, or, as too often happens, to be employed as decoys for the purpose of adding to the intemperance by which the country is at once weakened and disgraced.

SUFFERING WOMEN.

Find Health and Strength in the Use of Dr. Williams' Pink Pills.

Every growing girl and every woman nearing middle life suffers from ailments peculiar to her sex. At these times the health and happiness of every girl and woman depend upon the richness and regularity of her blood. Look

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXXV.

"Unless you inherited any money from your father or mother, I take it that you are utterly without means," he went on, regarding her with a half smile. "All the wealth which the Earl of Arrowdale had intended for you will go to the next-of-kin, the present earl. Not a single penny can you claim!"

Norah looked at him, but without speaking. What he said might be true or false; she did not very much care at the moment.

He seemed disappointed at the little effect the announcement of her poverty had made upon her.

"I'm afraid you don't realize," he resumed, "or perhaps," and as he spoke, he drew a little nearer to her, "the thought that is running through my mind is present in yours. Norah"—his voice dropped and he glanced toward the door—"why should this—injustice be? All the world knows that the earl, when he said 'my daughter,' meant yourself, and only you, and I, and the man Furlong, whom I can keep as quiet as he has hitherto been, are aware of the true story of your birth."

In his eagerness he did not notice the flash that came into Norah's lovely eyes, or that her hand clinched spasmodically. "Why should we not let the matter stand as it is? Who will be harmed? Not the present earl. If all be true that is said of him, he doesn't deserve more than he has got, and, in all conscience, he has got enough. If you are not the earl's daughter, you were regarded by him as such. He did mean you to have the money, and why should you not have it? Norah, it all rests with you and me, with you in reality, for I will abide by your decision. Place your hand 'n mine"—with a great effort Norah suppressed the shudder that ran through her, and kept her eyes fixed on the ground—"place your hand in mine, say 'Guildford, let bygones be bygones, I will be your wife, and the secret is locked within my lips until death! Why, see, if you become my wife, dearest, I shall have very little inducement to reveal the truth! Norah, think, for God's sake, of all this means to you. I will not speak of myself. You know I love you; you know that if—I have seemed hard sometimes, it is because I loved you so dearly that I was prepared to go through anything to win you. Forget the past—forget everything, and—say that you will be my wife. See how helpless and alone you are." He shot a glance at her. "You need a strong arm to lean upon, a clear brain to rely on in this—this crisis! Lean on me, rely on me! You shall be my wife and still Lady Norah, daughter of an earl, and heiress to his wealth!"

Norah's heart beat fiercely with the longing, the almost irrepressible longing, to look him in the face and cry "Scoundrel"—anything to express her indignation and loathing. But she did repress the desire, wonderful to say. At that moment she felt the truth of some of his words. She was alone and helpless; she must not even indulge in the craving of her soul to denounce him. Here was a cunning scoundrel, whom it was imperatively necessary that she should fight with something of his own weapons.

She looked down in silence, and, taking her silence for consent, he uttered a low cry, and caught her hand. It was cold as ice, but his was hot as fire. "Norah!" he burst out, any yet in a guarded voice, as if the walls might have ears. "Norah! You will do this—ah!" His success seemed to overwhelm him.

and not an impostor! Then she sat down, and wrote a few lines:

"I cannot see you to-night. Will you please come tomorrow?"

"Norah," and addressed them to Guildford Berton. Then, when her simple preparations were complete she rang the bell for Harman, but only opened the door sufficiently wide to allow of her passing out the note.

"Give this to Mr. Berton, please, Harman," she said, keeping her voice as steady as she could; "and do not let me be disturbed. I have a bad headache, and will ring when I want you."

It cost her a great deal to go without a word of farewell to the woman who had been so devoted to her; but she dared not risk it. She knew that Harman would see in a moment that something was wrong, and Norah felt that she could not stand a single question from her.

Half an hour afterward, with a veil drawn across her face, she left the house and struck into a bypath in the park.

She stopped and looked round once, only once, and a faint sigh trembled on her lips. She had grown fond of the grandly beautiful place; the memory of the man whom she had loved as a father, especially through his illness, brought the tears to her eyes. It was hard to think that she had no further connection with all that she had considered part and parcel of herself, that for the future she was just Norah Woodfern, a waif and stray on the great, bitter world, and the reader will not think less of her, or set her regret down as one wholly mercenary.

As she turned, she picked a brown leaf—as dead as her past—and pushed it gently inside the bosom of her dress; then went on her way.

She had formed the vaguest of vague plans only. First came the idea of going straight to Mr. Petherick, and telling him all that she had learned from Guildford Berton. After that—well, all was dark and unfathomable.

Perhaps the old lawyer, who had always been kind to her, and especially kind and gentle of late, would show her some way of gaining a living. She thought of Lady Ferndale, as she had thought of her many times since the revelation, but she shrank from going to her. It was scarcely pride so much as innate delicacy. Besides, what had she. Norah Woodfern, to do now with earls and countesses. She must put all her past life away from her completely. No, she would not go to Lady Ferndale, much as she loved her, and knew she was loved by her.

When she reached the high road she looked round rather fearfully, though she felt that there was no cause for fear. If Guildford Berton had chanced to come upon her, she decided that she would not be daunted. If necessary, she would call for help to the first passerby, and would proclaim the truth to the whole village.

But Guildford Berton was pacing up and down his room, wrapped in an ecstatic sense of triumph and self-satisfaction at that moment, and she saw no one but a few children on her way through the village.

She found that she had to wait nearly an hour for a train, and the station master, touching his hat respectfully, suggested that she should go inside the booking office and sit by the fire.

"It's not so draughtily as the waiting-room, my lady," he said. And the "my lady" brought the color to Norah's face as she thanked him.

found herself watching the passersby.
Suddenly she saw a face at the win-

health.—108.

"How are you coming on with your new system of weather prediction?" "Well," answered the prophet, cheerily, "I can always get the kind of weather all right, but I haven't quite succeeded in hitting the dates exactly."

It Keeps the Muscles Pliant.—Men given to muscular sports and exercises and those who suffer muscular pains from bicycle riding will find Dr. Thomas' Electric Oil something worth trying. As a lubricant it will keep the muscles pliant and free from pains which often follow constant use of them, without softening them or impairing their strength. For bruises, sprains and contusions it is without a peer.

Margie—"I wonder if Mr. Smartly meant to give me a left-handed compliment?" Rita—"Why?" Margie—"He said these artificial flowers I am wearing just match my hair."

Nature Revolts Against High Living and it has set its seal to it by adding to man's ailments the scourge of diabetes. Eminent medical men until recently proclaimed it a "no cure" disease, but South American Kidney Cure has knocked down their pet fallacy and has proved itself master of kidney disease in all its forms. Relief in 6 hours.—110.

THINKING AND VOTING.

"Have you ever made any effort to bring your colleagues to your way of thinking?" "No," answered Senator Sorghum, "I don't care anything about their way of thinking. What I want is to bring them to my way of voting."

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise, giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This highly instructive book was written by W. H. Veno, a gentleman who has made a study of these diseases. The article is by a graduate of the University of Wurtzburg. Send postal to-day and you will receive the book free by return.—Address, The Veno Drug Co., 24 King St. West, Toronto.

Mrs. Housekeeper—"Bridget, I wish you'd try to do something about the house without being told. You never do anything unless I tell you. You couldn't possibly do worse." Bridget—"Oh! I dunno, ma'am; I might refuse to do what you tell me."

Physical Pain and mental anguish afflict the victims of skin diseases. Get rid of both by rubbing Wewer's Cerate on the heated, itching, disfigured face. The relief given is among the wonders of medicine.

Some people are so proud of their family skeleton that they refuse to keep it concealed in the closet.

Customer—"Look here, this bicycle I bought only three weeks ago has all gone to pieces." Dealer—"Yes, sir. You remember I warranted it to go fast."

"I pity the man who can't learn anything from his own mistakes. Now, that's one thing I can do," said Bragg. "Ah! You're always learning something then, aren't you?" replied Knox.

Every growing girl and every woman nearing middle life suffers from ailments peculiar to her sex. At these times the health and happiness of every girl and woman depend upon the richness and regularity of her blood. Look at the young girl whose blood is weak and watery. Her face is pale, her lips and gums bloodless. Her head aches and her back aches. She has no energy, no life, a poor appetite and no desire for exercise. She complains that even to walk upstairs leaves her breathless. And the woman in middle life—she is nervous, irritable and depressed—liable to sudden attacks of pain and distress that only a woman knows of. She turns from food; horrible dizziness, hot and cold flushes, make her life miserable. But Dr. Williams' Pink Pills banish all this misery, because they fill the veins with rich, strong, healthy blood which gives tone and strength to every delicate organ. The case of Mrs. Geo. Danby, of Tilbury, Ont., is one of the many that proves that no medicine can compare with Dr. Williams' Pink Pills in curing the ills of womanhood. Mrs. Danby says: "I think Dr. Williams' Pink Pills are a blessing to suffering women. For a long time I was a great sufferer from the ailments that affect so many of my sex. I was extremely nervous at all times, suffered a great deal with headaches and indigestion. In fact, I was in a thoroughly miserable condition when I began the use of Dr. Williams' Pink Pills, but after taking them a short time I began to improve, and, through their further use, I am now feeling like a new woman. I am sure if all sick women would take Dr. Williams' Pink Pills they would be convinced of the great good they can do."

Dr. Williams' Pink Pills can make every ailing girl and suffering woman in the land strong and healthy if they are given a fair trial. But great care must be taken to see that you get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers everywhere or sent by mail at 50c. a box, or six boxes for \$2.50, by writing The Dr. Williams' Medicine Co., Brockville, Ont.

STILL ENJOYS HIS "VITTLES."

The Oldest British Subject and His Habits.

"Grandfather" McNally, King Edward's oldest subject, who lives at the Home for the Aged, London, England, maintained by the Little Sisters of the Poor, has entered his 110th year.

For fourteen years the Sisters, whose only funds are the alms they beg from door to door, have cared for the old man. It is twenty-eight years since he returned from the United States, and while he was there he buried his wife, whom he married in Ireland when she was a girl and he was a lad of eighteen.

"It is thirty years since she died, and she was eighty then."

"Yes, I have lived a very long while," he said to a visitor. "It is because I have always led a steady life. I was never the worse for drink in my life. I never ate too much. I never believed in ruining my stomach with two much drink or food. Aye, I am happy. I sleep well and enjoy my 'vittles.'"

JUST THE REVERSE.

A kind-hearted and witty clergyman, entering the house of one of his elders one morning, found the good old man unmercifully whipping one of his sons, a lad of about fourteen years old, and he at once began to intercede for the boy.

The deacon defended him by saying that "the youth must be early trained in the way it should go. It is best to make an impression when the wax is soft."

"Yes," said the pastor, "but that does not hold here, for the whacks were not soft."

The deacon let the boy go.

Because a girl refuses a young man you needn't suppose it is a sign she isn't going to marry him.

low cry, and caught her hand. It was cold as ice, but his was hot as fire.

"Norah!" he burst out, any yet in a guarded voice, as if the walls might have ears. "Norah! You will do this—ah!" His success seemed to overwhelm him, and he gazed at her with distraught eyes.

Norah drew her hand away. "I—I must have time," she murmured, huskily.

"You shall!" he responded, eagerly. "You shall have all just as you please! Ah, Norah, why have you withstood me so long? Did you think that I did not love you. That I should not make you happy? Happy!" He laughed. "There shall be no happier woman in all the world! You shall see! You shall see!"

He went to take her hand again, but she drew back with downcast eyes, and shook her head.

"I—I am tired," she said, "I think I will go now. To-morrow—"

"Ah, I cannot wait so long without seeing you!" he broke in, in a low voice that thrilled with passion. "I will come again this evening. You will see me, dearest, if only for a moment. My—my happiness has come to me so suddenly that I can scarcely believe, realize it. I must see you again to-day. Give me the papers—" He held out his hand.

Norah extended them to him, then drew them back gently.

"No, let me look at them," she said, firmly.

"Very well; but take care of them, dearest. Do not leave them where anyone can see them—"

"Or steal them as the—the portrait was stolen," she could not help saying.

He laughed easily, then suddenly his face paled. Her words had recalled Becca South. But only for a moment.

"Ah, don't be hard upon me," he said. "All is fair in love and war. I would have gone through fire and water to win you, just as now I would go through fire and water to keep you. Must you go? Well, then—this evening. Remember, dearest, your fate lies in your own hands. As my wife, you will be Lady Norah, the heiress—"

"Yes, I will remember," she said, very quietly, and, without raising her eyes, she passed by him and left the room.

She went straight upstairs, and, locking herself in the room, dropped into a chair, and, holding the certificates tightly in her hand, tried to think.

To attempt to describe the varied emotions which thronged and eddied through her brain would be impossible. It would be false to human nature to say that she was not disappointed and shocked by the revelation. Only an idiot of the most hopeless sort would bear without a pang of regret that he was a nobody, instead of the somebody he had considered himself. She looked round the room and through the window, and tried to realize that she was—simply Norah Woodfern, Catherine Hayes' daughter, not the earl of Arrowdale's; and that the vast wealth which she had thought hers had departed from her and left her penniless.

And as she realized it, a strange thought flashed through her mind. Was it possible that Cyril's pride had been the cause of their parting? Had he been too proud to marry the daughter of a peer? A smile, a sad smile, crossed her pale face. If it had only come earlier, this story of her birth, this loss of rank and wealth! She could have gone to him then, and said: "I am poor and untitled; but I am still yours, if you care to take me."

But this was too late now. He was Becca South's husband, and lost to her forever.

The tears welled into her eyes, but she swept them away. There was no time for weeping if she meant to escape the scoundrel who thought that he held her in his power.

She got up and quickly changed her dress for a plain travelling one, and put a few things into a small bag. Then she paused, as the question of money arose. She had plenty in the little ornamental cashbox in which she kept it, but she took only the sum which had been left when the earl died from her last quarter's allowance; and even that, she resolved, she would take only as a loan; for it had not been given her under the impression that she was his daughter,

suggested that she should go inside the booking office and sit by the fire.

"It's not so draughtily as the waiting-room, my lady," he said. And the "my lady" brought the color to Norah's face as she thanked him.

"May I ask if you have heard anything about Becca South, my lady?" he said, as he brought a rug for her feet.

Norah looked up with a start. "No-o," she said.

"Ah," he remarked, with a smile. "No news is good news, my lady. I dare say the girl is happy enough up in London there. Santleigh was too quiet for a lively one like her. But, still, it was very ungrateful of her not to write after all your ladyship's kindness to her."

Norah murmured an inaudible response, and, to her relief, he went about his business and left her alone.

The train came up, and the station master put her into a carriage and got her a footwarmer. She had deemed it best to take a first-class ticket to avoid attracting the attention and remark which would have been caused by her asking for a third, and she drew back behind the curtains and out of sight until the train had started.

As the cab stopped she saw, to her dismay, that the office was closed.

She had not taken the important question of time into her consideration, and she sat and looked at the drawn blinds and closed door in a sort of stupor.

But as she sat asking herself what she should do next, the door opened, and a clerk came out.

He was an old man who had once or twice been down to the Court on business connected with the estate; and he came forward hat in hand, and with surprise stamped on his wrinkled face, as Norah called to him.

"Mr. Petherick, my lady!" he said. "He is not in London!"

Norah's heart sank like lead.

"Not in London!" she repeated, and her voice trembled.

"No, my lady. He's gone to the Continent. I think that he has got some kind of a clue to the viscount's—I mean Lord Arrowdale's—whereabouts, and he has gone to try and follow it up. I'm very sorry," he added, as he saw the dismay and disappointment in the lovely face. "Is there anything I can do, my lady?"

Norah shook her head. What could he do? What could she do?

"I don't even know Mr. Petherick's address," he said, after a pause, "or I'd telegraph to him, if it's important business."

"It is, it is," said Norah.

"If there is anything I can do—"

But Norah shook her head as she tried to thank him.

"I—I must go to an hotel," she said, faintly. "Can you tell me—"

"Your ladyship's house in Park lane," ventured the old man, rather surprised.

Norah's face crimsoned, and then went pale. She was no longer "your ladyship," and she had no house in Park Lane or elsewhere.

"I—I should prefer an hotel," she faltered.

"Yes, my lady, and a quiet one. There is one near here—it's not very fashionable, but it is quieter and more suited for a lady alone. But perhaps your ladyship is meeting some one?"

"No," said poor Norah, "I am quite alone."

"Then Godfrey's might suit, my lady; it is in Winchester street. I'll tell the cabman, and I'll do myself the honor of calling to-morrow, in case I should be of any service. I may hear from Mr. Petherick to-night. Indeed," he added, as he saw the perplexity did not disappear from her face, "if your ladyship will not think me presuming, I will accompany you."

Norah accepted the offer gratefully, and he rode with her to the quiet street, and did not leave her until he had procured the best room and impressed upon the landlady the importance of her guest. Then, with reiterated offers of his services, he went and Norah was left alone. They got her some tea, and she went and sat beside the window, and looked out with eyes that saw nothing. She was too tired to even think, and in a half-conscious, mechanical way, she found herself watching the passersby.

Suddenly she saw a face at the win-

dow of the house opposite that seemed to her vaguely familiar, and in a moment or two the recollection flashed upon her—the face was that of John Wesley, the famous poet, the gentleman she had met at Lady Derrington's, Cyril's friend Jack.

A thrill ran through her, and she put her hands to her eyes, for the sight of him brought back with painful suddenness the remembrance of Cyril himself. It was some moments before she could look again, and when she did, she found that Jack had thrown up the window and was leaning out, a look of expectancy on his handsome spirituelle face. As she looked, she heard the sound of wheels, and holding the curtain, she bent forward. A cab stopped at the door just beneath the open window, and someone got out.

"Hello!" She heard Jack's deep, musical voice. "Hello, old man; hurry up!" A strange curiosity, something more and deeper than idle interest, caused her heart to beat with eagerness, and it was with scarcely a shock of surprise she heard Cyril's voice—Cyril's—call back.

"Hello, Jack! All right. How are you?" She rose—she scarcely knew what she was doing—breathing fast and painfully, and watching intently. Was he alone, or—or—but yes, of course, there would be another with him—his wife, Becca!

But the cab stood between her and the door, and she could see neither Cyril nor any one else, and a moment or two later the cab drove away, the door shut, but directly afterward she saw the figure of Cyril enter the room, and heard the voices of the two men as they clasped hands.

Faint and overwhelmed she sank trembling into the chair, and hid her face in her hands.

Meanwhile, Jack and Cyril were exchanging greetings, and the former was looking at the latter earnestly.

"You don't look quite the thing yet, lad," he said. "The picture finished?"

Cyril shook his head.

"No," he replied, with a laugh that had very little merriment in it, "and not likely to be; it is I who am 'finished.' All the pluck seems to have gone out of me. But why did you send for me, old man?" he broke off.

"I've news for you," Cyril started.

"About—about her!"

"Well, indirectly, Cyril. It is grave news. Your uncle, the Earl of Arrowdale, is dead."

Cyril started and looked down.

"I'm—I'm sorry!" he said. "Dead! And he looked well and strong enough there in Santeigh Woods to last for years. Dead! Heigho!"

"The earl is dead; long live the earl," said Jack, significantly.

Cyril bit his lip and sighed.

"What is to be done?" he said. "I'd rather let the whole thing slide."

"That's nonsense, my dear boy," said Jack, quietly. "You are the new earl, and must take up your coronet and mantle."

"And Norah?" said Cyril, hesitating as he always did when he spoke her name. Jack nodded.

"The earl has left her every penny, every stick he was able to leave," he replied. "She will be an immensely rich woman, and the new earl will be none of the richest."

"Thank Heaven!" said Cyril. "I—I'm glad he has left me nothing but what he was compelled, Jack. May she be happy! Ah, how happy this would have made me if—if—she and I—!" He turned away and tried to whistle. "You haven't heard anything of—of her?" he asked.

Jack paused a moment.

"Well," he said, reluctantly, "I may as well tell you. There was always a rumor that she meant marrying that Mr. Guildford Berton, but since the earl's death the rumor has grown very distinct and positive."

Cyril sighed.

"God send her happiness!" he said, beneath his breath. "But—but I think she is worthy a better man."

"Cyril Burne, to-wit."

"Yes," said Cyril, with manly modesty.

"Yes, Jack, I'd back myself to make her happier than that fellow could do. Somehow, I don't believe in him; I don't like him."

"One seldom does like one's rival."

HAS BEEN ALL RIGHT EVER SINCE

T. H. BELYEA, P. M., PROVES THAT
DODD'S KIDNEY PILLS CURE

Some Years Since He Used Them Now
and He Has Had Good Health Ever
Since — Story of Well-Known New
Brunswick Man.

Lower Windsor, Carleton Co., N. B., Feb 26—(Special).—"Yes, I have good health ever since I used Dodd's Kidney Pills." The speaker was Mr. T. H. Belyea, postmaster here, and one of the most highly respected men in this part of the country. Asked to give his experience with the great Canadian Kidney Remedy Mr. Belyea continued:

"I had been troubled with my kidneys for a number of years. I tried several kinds of plasters and other kinds of medicines, but did not seem to get any lasting benefit. Hearing Dodd's Kidney Pills so highly recommended I decided to try them and they made a complete cure of me. That is two years ago now and as I said before I have had good health ever since I used Dodd's Kidney Pills."

Dodd's Kidney Pills cure once and for all. There is no stage or form of Kidney Disease that they do not cure completely and permanently.

Cyril, brokenly, "but it's hers! No! Jack, look, there is Norah! Where? Why, there at the window opposite!" and he dragged Jack cautiously behind the curtain. "Don't let her see you, man! Great Heaven and earth what is she doing there! Norah at Godfrey's Hotel!"

"You must be the victim of hallucination," began Jack; then he exclaimed: "By George, you're right; it is she!"

Cyril, pale and breathless, stared at him, and then eagerly returned to the window opposite.

"Jack, look; she's—she's in trouble!" he said, hoarsely. "See! She doesn't think anyone can see her—and she's crying. Great Heaven, what does it mean?"

"Can't say," said Jack. "I should go and ask her if I were you."

"By Heaven, I will!" exclaimed Cyril, swinging round upon him. "Yes, I will! No matter what has passed, no matter if she sends me away; she's in trouble, and I've—I've got to go to her. Where's my hat?" and in a state of excitement he caught it up and ran down the stairs as if Godfrey's Hotel were on fire, and he was off to rescue Norah.

Jack Wesley stood looking after him, then dropped into a chair, and groping for his pipe, lit it and fell to smoking, waiting patiently, philosopher as he was, for the issue of events.

Cyril went across the road and encountered the hall porter.

"I wish to see Lady Norah Arrowdale, please," he said.

There was something so masterful in the voice, so commanding in the stalwart, soldierly figure, that the porter, who was not used to this kind of swell, and who was rather thrown off his balance by having a titled lady in the house, at once began walking upstairs, and Cyril followed.

The man opened the door of the sitting-room, and Norah dropped her hands suddenly, but turned her face away to hide the tears and tear traces, so that Cyril had time to nearly reach her side before he spoke her name.

"Norah!"

She started, and turned to him with something in her face, in her lovely eyes, that made his heart leap. It said—ah! quite plainly—too distinctly to admit of his mistaking—"I love you!"

"Norah!" he breathed, and he held out his arms with an inarticulate cry.

She echoed it, rose and leaned toward him; then, as if suddenly smitten by a deadly dart, she checked herself, and drawing herself to her full height, said in a voice that thrilled with sorrow, reproach and indignation:

Brown Brothers Company.

"Cyril Burne, to-wit."

"Yes," said Cyril, with manly modesty. "Yes, Jack, I'd back myself to make her happier than that fellow could do. Somehow, I don't believe in him; I don't like him."

"One seldom does like one's rival," said Jack, cynically. "But the best thing you can do is to forget her. Meanwhile, you had better present yourself before the family lawyer, Mr. Petherick—they have been advertising for you, my local George, if I hadn't come home and seen the papers, they might have gone on hunting and advertising till all was blue. I suppose you never looked at the English papers over there?"

"No," said Cyril, moodily; "I'd something else to think of."

Jack Wesley laid a hand on the broad shoulder.

"Look here, Cyril," he said, "face the music, man! You have got to play your part in the world's drama, and a pretty large part it is. No more artistic vagabondage, no more fretting after what is lost. Forget her, lad—forget."

Cyril touched his hand gratefully.

"You're all right, Jack," he said. "You mean well, but as to forgetting her!" He laughed. "I tell you I see her all day long—By God!" He broke off with sudden vehemence, "I see her now!" and suddenly, white and startled, he stared through the window across the street.

"What on earth's the matter?" demanded Jack. "Is it a ghost, or have you taken to drinking?"

"It's—it's a ghost, perhaps," said

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

"Noran! he breathed, and he held out his arms with an inarticulate cry. She echoed it, rose and leaned toward him; then, as if suddenly smitten by a deadly dart, she checked herself, and drawing herself to her full height, said in a voice that thrilled with sorrow, reproach and indignation: "Where is your wife?" (To be continued).

IN AFRICAN FOREST.

Denseness of Vegetation Makes It Dark at Noonday.

An explorer describes a Central Africa forest:—"Ten miles west of the lake begins the only piece of real virgin forest met with. It is throughout a dense virgin forest, and almost impenetrable. It consists of very large trees of many varieties. The upper parts are festooned with a light greyish-green moss, hanging in long streamers, and giving to the forest a very fantastic appearance. When these long streamers are agitated by a storm they make the whole forest, seen from one of the hills near, look like a rough sea. Again, when the sun is vertical the whole forest appears dark, but when the sun is low the general effect on the sunny side is curiously light. "All the trees are bound together with innumerable lianas and creeping plants. Between the stems is a dense tangled mass of lesser vegetation. The forest stands to a great extent in the water and mud of the swamp. A singular feature of it is the abruptness with which it begins and ceases on the plain. The grassy swamp or open country reaches to the mighty wall of trees, which continue in the same density from one side to the other. There is no smaller wood or scrub outside, forming a transition from the open plain to the forest. "Inside, the silence and gloom are accentuated by the apparent absence of animal or bird life. There are some herds of buffaloes that make it a headquarters, elephants visit it occasionally, monkeys and parrots are sometimes seen, and a harnessed antelope now and then appears at the edge; but the general impression is one of lifelessness."

FOOD AND STUDY.

A College Man's Experience.

"All through my high school course and first year in college," writes an ambitious young man, "I struggled with my studies on a diet of greasy, pasty foods, being especially fond of cakes and fried things. My system got into a state of general disorder and it was difficult for me to apply myself to school work with any degree of satisfaction. I tried different medicines and food preparations but did not seem able to correct the difficulty. "Then my attention was called to Grape-Nuts food and I sampled it. I had to do something, so I just buckled down to a rigid observance of the directions on the package, and in less than no time began to feel better. In a few weeks my strength was restored, my weight had increased, I had a clearer head and felt better in every particular. My work was simply sport to what it was formerly. "My sister's health was badly run down and she had become so nervous that she could not attend to her music. She went on Grape-Nuts and had the same remarkable experience that I had. Then my brother, Frank, who is in the postoffice department at Washington city and had been trying to do brain work on greasy foods, cakes and all that, joined the Grape-Nuts army. I showed him what it was and could do and from a broken-down condition he has developed into a hearty and efficient man. "Besides these I could give account of numbers of my fellow-students who have made visible improvement mentally and physically by the use of this food." Name given by Postum Co., Battle Creek, Mich. There's a reason. Read the little book, "The Road to Wellville," in pkgs.

THIEVES CHASED IN MOTOR CAR.

Goods to the Amount of \$100,000 Were Stolen by Daring Robbers.

The Paris police have succeeded in arresting a gang of 35 thieves, whose exploits were of a most audacious character. They were captured by an ex-member of the Paris police, a man named Arnaud. One of the methods adopted by the thieves was to steal goods by means of an imitation railway goods van. The van, in charge of two or three of the men, would call at large warehouses from which goods were likely to be sent by rail. They collected the parcels, entered them up in a dummy receipt book, and drove off. In this way over \$100,000 worth of goods have been stolen since the beginning of the year. The headquarters of the gang was on a piece of waste land at Levallois, a suburb of Paris, where they carried on a business as owners of a motor garage. The leaders were in the habit of using a motor car to drive to and from their headquarters. Several times the police watched their car, but were never able to trace it to Levallois. They, therefore, determined to chase the thieves in a motor car, and on Monday two detective inspectors hired a car and began following the thieves from place to place. At last, seeing that they were followed, the thieves put on full speed and succeeded in outdistancing their pursuers. On Thursday the police determined to be equal with them, and, securing a couple of racing machines, gave chase. The police, however, were stopped for driving at a speed of twenty-five miles an hour, and it was only when the second car came up with a police magistrate inside that they were allowed to proceed. Eventually the whole gang of 35 thieves were captured, and it was found that at the garage they had a complete workshop fitted up for the alteration of stolen motor cars and bicycles. "It was a case of love at first sight, was it not?" "Yes—at his first sight of her bank account."

STILL HOPE.

"I am afraid it is all over between Jeanette and Jack."

"Why, dear?"

"She has returned his photograph."

"You don't mean it?"

"Also his letters."

"Gracious!"

"And his ring."

"My! My! But there is still hope. He gave her a kiss as they parted on the old lawn."

"And what did she do?"

"She—she returned that, too."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"So he no longer calls his pretty little home 'The Nutshell'? Why did he change it?" "He got tired of having passing humorists ring his bell to ask if the kernel was in."

Ill fitting boots and shoes cause corns. Holloway's Corn Cure is the article to use. Get a bottle at once and cure your corns.

Boarders are apt to have liver complaint when it is served to them seven times a week.

Will it stay where you put it? Oh, yes. "The D & L" Mental Healer will, and it will quickly cure rheumatic pain, lumbago, sciatica, face ache, neuralgia, etc.

Wedderly—"To-day is the tenth anniversary of my marriage." Singleton—"Well, what do you expect?" Wedderly—"Which do I expect?" Singleton—"Yes; congratulations or sympathy?"

Many patent medicines have come and gone, but Bickel's Anti-Consumptive Syrup continues to occupy a foremost place among remedies for coughs and colds, and as a preventive of decay of the lungs. It is a standard medicine that widens its sphere of usefulness year by year. If you are in need of something to rid yourself of a cough or cold, you cannot do better than try Bickel's Syrup.

The bell-ringer to the city of Cork once made the following curious announcement:—"O yist! O yist! Lost, somewhere between twelve o'clock and McKinney's, shure in Market Street, a large brass key. I'll not be afther telling ye what it is but it's the key of the bank, shure."

Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell

SHILOH

This remedy should be in every household.

REGISTERED NO. 9-06

THOUSANDS DIE IN CYCLONE

Loss of Life Estimated as High as Ten Thousand.

A despatch from Papeete, Tahiti, via San Francisco, Cal., says: The most destructive cyclone ever experienced in the Society and Tuamotu Islands occurred on Feb. 7th and 8th. The damage in Tahiti is estimated at \$1,000,000, and presumably a similar amount of property was destroyed on the Tuamotu Islands. The City of Papeete was inundated and about 75 buildings destroyed, including the American Consulate and the French Government building. The shipping in the harbor of Papeete escaped injury, owing to the direction of the wind, but fears are entertained for vessels which were cruising near the Tuamotu Islands.

TERRIFIC VELOCITY.

The cyclone reached the velocity of 120 miles an hour. It struck the islands about midnight on Feb. 7th, and continued until about 4 o'clock the next afternoon. The Island of Anoa, Tuamotu group, is believed to have been the centre of the storm.

At Papeete, about 7 p.m. on Feb. 7th, the sea began to break heavily over the reef, and washed over the quay. There was no perceptible wind. Toward 10 o'clock persons dwelling on the water front abandoned their homes. The merchants and clerks went to the stores and warehouses only to discover that it was impossible to save goods on the lower floors. An hour later high seas broke over the entire city, completely demolishing the Government slip and buildings, besides causing great damage to the coal sheds.

The Village of Taronia, near the arsenal, was completely swept away. The mission buildings and homes of native converts of the reorganized Latter Day Saints' mission have disappeared.

A settlement nearby, composed of dwellings of several hundred Cook Islanders, British subjects, was completely destroyed. Farther east on the beach road all the houses were swept away for about half a mile.

SOME CLOSE SHAVES.

At Tanna the family of one Herman Menell had a narrow escape. Their home was torn down by the waves, and the family fled to a native house. Frequently during the flight the water was up to their necks, and time and again they were compelled to cling to trees to save themselves.

Mrs. Gooding, an aged American, was caught in the debris of a wrecked house

at Papeete, and narrowly escaped being swept out to sea.

At 8 a.m. the American Consulate collapsed. In the absence of the American Consul, his mother, Mrs. Doty, supervised the removal of the archives, aided by several missionaries. Mrs. Doty's life was in jeopardy several times. The records were temporarily stored in the Latter Day Saints' Mission house. Mrs. Doty's family also accepted their hospitality.

The substitute guardian at the quarantine station at Monautia Island, Papeete harbor, was waving a lantern for many hours during the night, as he and his wife clung to the tops of coconut trees in the midst of waves that dashed 30 feet high over the island. On shore, M. Andre, the chief pilot, called out to Commander Hurbin, of the gunboat Zelee, to let him have a boat and crew to rescue women at the quarantine station. Commander Hurbin promised to let M. Andre have a boat without a crew. Pilot Andre requested four prisoners at the local jail, and with them proceeded to the Zelee. As Commander Hurbin did not wish to risk the lives of his crew, even to send a boat ashore, the four native prisoners who were splendid swimmers, went to the rescue.

MANY MAY DIE.

M. Marcadi, a French resident, put to sea in a cutter, and after three days reached Tahiti, reporting that the Government buildings, Roman Catholic church and all the dwellings had been swept away. He feared that many would succumb to hunger, thirst and exposure.

There is much distress among the homeless people. The local Government opened the military barracks as a temporary refuge, and provided food when needed, but the funds at the treasury are exhausted.

The Islands of Moorea, Huahoni, Reitia, and Tohaua, of the Society group, have sustained \$100,000 damage.

The steamer Mariposa waited beyond her sailing time with the request of Gov. Julien, who hoped that the French gunboat Zelee would return from her relief trip to Tuamotu Islands. The vessel had not been sighted when the Mariposa departed.

Local newspapers state that 10,000 persons perished during the storm on Tahiti, and that several of the adjacent islands have disappeared. The damage is placed at \$5,000,000.

LEADING MARKETS

BREADSTUFFS.

Toronto, March 6.—Wheat—Ontario—No. 2 white 78c, red 77½c mixed 77c, spring and goose 74c, at outside points. Wheat—Manitoba—½c easier. No. 1 hard 87c, No. 1 Northern 84½c, No. 2 northern 82c, No. 3 northern 81c, at lake ports; all-rail quotations, at North Bay, are 3½c more than these prices. Flour—Ontario—For export, \$3.10, buyers' bags, at outside points, for 90 per cent. patents; high patents, at \$3.65, 90 per cent. patents, are quoted at \$3.65, \$3.30 to \$3.40 for 1st patents, \$4 for 2nd patents and \$3.90 for bakers'. Millfeed—Ontario bran firm, \$16.50 to \$17, in bags, outside; shorts, \$16.50 to \$17.50; Manitoba bran, \$19, shorts \$20 at Toronto and equal points. Oats—¾c easier, 34½c for No. 2 white and 33½c for No. 2 mixed, at outside points. Barley—Firm, 48½c to 49c for No. 2, 46c to 46½c for No. 3 extra and 44c for No. 3, outside points.

NEW YORK WHEAT MARKET.

New York, March 6.—Spot easy; No. 2 red, 86½c elevator; No. 2 red, 89c f.o.b. affloat; No. 1 northern Duluth, 91c f.o.b. affloat.

CATTLE MARKET.

Toronto, Mar. 6.—The market to-day, notwithstanding a heavy rain, held steady. The export cattle went well at from \$1.90 to \$5.10. Good short-keep feeders were in good demand and firm at \$4.25 to \$4.50. Butchers.—The market was steady for the general run of butchers' cattle and perhaps a little firmer for the choicest picked. There was a little falling off in quality of the market as a whole, with too many rough, unfinished butcher cattle offering. Choice, well-finished butcher heifers were scarce and high. A pair of extra choice heifers, weighing 2,070 lbs. the pair, sold for \$4.70. Good ordinary heifers and steers sold at \$3.90 to \$4.10. Heavy Feeders—Good—heavy feeders are firm at \$3.85 to \$4. Stockers—Good stockers are wanted.

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

FINANCES OF ONTARIO.

The public accounts for the Province of Ontario were presented in the Legislature, and a balance of \$620,159.68 's shown in income over expenditure. The latter was \$5,398,016.74, and the revenue, \$6,016,176.42. The expenditure in 1904 was \$5,267,789.52.

The receipts include the Dominion Government subsidy of \$1,339,287.88. The largest item of direct Provincial revenue comes from the Crown Lands Department, which aggregates about \$2,300,000. Succession duties brought \$684,178.36; supplementary revenues, \$445,688.33; the Provincial Secretary's Department contributed \$131,059.21; the Education Department, \$74,753; law stamps, \$93,516.70; Algoma taxes, \$44,163.46; fisheries, \$47,755.03; agriculture, \$83,162.51; licenses, \$377,610.88. Casual revenue amounted to \$139,390.90; the lunatic asylums paid \$148,121.09 into the Treasury.

WHERE IT GOES TO.

There is an increase in nearly every branch of expenditure. Salaries and office expenses amounted to \$344,006.29, against \$374,975.69 in 1904. Legislation cost \$211,107.09; compared with \$200,011.14 last year. The education item, \$1,131,799.17, shows an increase over last year's disbursement, \$927,306.79; miscellaneous expenses have mounted from \$151,030.12, to \$238,699.47.

There has been a saving in the public institution maintenance department, the expenses being \$907,307.19, against \$950,434.04 for 1904. Public buildings only took \$234,977.40, against \$425,833.04 in the previous year; public works, \$69,853.29, against \$102,282.34.

The debts due to the Dominion, with the exception of the disputed Indian claim, are \$1,737,190.72; Temiskaming and Northern Ontario Railway, \$7,376,168.27; railway and annuity certificate, \$2,386,991.54, and \$1,655,549.69 respectively; common school fund, \$6,038.73. Indirect liabilities, total \$2,600,000, including the Government loan and the Niagara Falls park.

Trust funds are held by the Dominion to the value of \$3,379,407.36. Cash and debenture assets amount to \$3,626,927.07, which include \$368,937.69, current account of bank balances and special deposits bearing interest.

HOUSES OF REFUGE.

It is said that the bill respecting county houses of refuge, introduced in the Legislature by Mr. Eilber, the member for South Huron, has the approval of and will be supported by the Government. In effect the bill proposes that where inmates of such institutions are known to be possessed of means they shall be compelled to contribute something for their own support. For instance, among the 96 inmates of Huron county's House of Refuge at Clinton it has been found that there are several with paid-up insurance policies, a few who own some stocks, and one man who is the owner of a house and lot. Some of the inmates who have small means are incapable of looking after themselves, either from the infirmities of old age or mental incapacity. Mr. Eilber's bill proposes that in such cases where proper evidence is produced before the County Judge he should have authority to direct appropriations from the properties of the inmates to help pay the cost of their maintenance, and thus relieve the burdens on the counties. The measure also provides for the inspection of houses of refuge by the official of the Government. There is no such inspection at the present time. It is thought this could be carried out by officials of the prisons and asylums department during their visit to other institutions in the various counties.

WOODSTOCK ASYLUM OPENING.

Hon. Mr. Hanna informed Mr. Munro (North Oxford) that the Asylum for Epileptics at Woodstock would be opened as soon as the legislation necessary for

The reform was the result of the existence of a great deal of dissatisfaction regarding the present system and of advantage having been taken of it, to the loss of the province.

TEMISKAMING RAILWAY.

The annual report of the Temiskaming and Northern Ontario Railway Commission was laid on the table.

At the end of the year the Boston Creek trestle was being erected at the forty-first mile of the second division, which extends beyond New Liskeard. Track-laying will proceed rapidly northward, and should reach Black River, 75 miles beyond New Liskeard, by June 1st. From that point to the end of the present contract the grading should be completed in time to allow the laying of track to the junction of the Black and Abitibi Rivers by next fall. Preparation is being made to establish a train service over the first thirty miles of this second division. The telegraph line is erected, and two stations partially constructed.

The cost of the road and equipment to Dec. 31, 1905, was \$7,475,473, less \$38,870 proceeds from the sale of wood, car rental and interest on deposits, leaving \$7,436,603 as the net cost. The liabilities are: Loan from province, \$5,840,004; advances from province, \$1,636,164; unclaimed wages, \$273.

The revenue for the year was \$253,720, made up as follows: Passenger earnings, \$108,681; mails and express, \$7,804; freight earnings, \$121,530; telegraph earnings, \$4,697; miscellaneous, \$11,006. The operating expenses were \$139,772, consisting of: Maintenance of way and structures, \$25,072; maintenance of equipment, \$12,533; conducting transportation, \$88,823; general expenses \$13,823. The net earnings were, therefore, \$113,948, the percentage of operating expenses to gross earnings being 55 per cent.

The mileage of passenger trains for the year was 45,538 miles, that of freight trains 21,080 miles, and that of mixed trains 52,197 miles, a total of 118,815 miles. The total number of passengers carried was 86,648, the average distance travelled by each being 55 miles, and the average amount received from each being \$1.25.

There were 99,122 tons of freight carried, the average haul being 48 miles. Of lumber and square timber there was carried 27,822 tons, this being the largest item in the freight traffic.

TO ABOLISH TREATING.

Mr. McNaught, the new member for North Toronto, has already distinguished himself by giving notice of a bill to prohibit the custom of treating. Mr. McNaught said that he was not familiar with the terms of the bill, which was on the lines of a suggestion debated recently before the Yacht Club. Many influential men are behind it, and he had consented to introduce it merely as an educational measure. It might appear to be in advance of the age, but Mr. McNaught believed it was a good thing to get people to think about it. The more discussion and ventilation it received the better. The only way, he thought, to make people temperate was to educate them, as they could not be forced. The bill was being revised by another member of the House, and Mr. McNaught preferred to wait until it was brought in before saying anything more about it.

TO PREVENT FOREST FIRES.

Hon. Mr. Cochrane introduced a bill to amend the Act to preserve forests from destruction by fire, and it was read a first time. It provides that during the construction of any railway passing through any of the public forests, whether under timber license or not, the Minister of Lands, Forests and Mines may appoint as many fire rangers as he may see fit, whose duty it shall be to enforce the provisions and requirements of the Act along and adjacent to the line of construction of such railway, and the expenses connected with such fire ranging shall be a debt due to the Crown from the railway concerned, payable upon demand of the Minister, and may be recovered at the suit of the Crown in any court of competent jurisdiction.

KING EDWARD OFF FOR HOLIDAY.

also considering emigration to Canada as a solution of the problem. They have decided not to assist any married man to go unless he takes his wife and family.

MAY PAY MEMBERS.
British Premier Points Out That the Colonies Pay Them.

A London despatch says: In answering a question in the House on Wednesday the Premier said the Government was considering the question of payment of members, and pointed out what was the existing practice in the colonies. Canada, he said, for a session of more than 30 days, paid \$2,500, and for 30 days or less \$20 for each day's attendance. Australia paid £400 a year, New Zealand £500, Tasmania £100, West Australia £300, South Australia £200, Queensland £300, New South Wales £300, Victoria £300. Care of Good Hope members resident within fifteen miles from the House a guinea for each day's attendance and for more than fifteen miles a guinea remuneration and allowance for personal expenses for every day's absence from home on Parliamentary duties. In Newfoundland payments were voted annually. Under the Public Service Act of 1905 provision was made for \$8,300 for salaries for 36 members.

CHINA TO PUNISH ASSASSINS.
Will Make Reparation for Murder of Missionaries.

A Pekin despatch says: The Government has instructed the Governor of Nanchang, Province of Kiangsi, where on February 25 six French Jesuit missionaries and four British subjects were killed, to punish severely all participants in the massacre, and declares its willingness to make any reasonable reparation demanded. Many foreigners at Pekin know the Governor of Nanchang and consider him to be efficient and friendly. They believe his version of the troubles and credit his statement that he was unable to prevent the disturbance. American, British, and German gunboats are proceeding to the nearest possible point to Nanchang.

LARGEST ON RECORD.
February Customs Returns at Montreal Show Great Increase.

A despatch from Montreal says: Customs collections on imports at this port of Montreal during the month of February amounted to \$1,015,811, being the largest amount on record for the second month of the calendar year, and an increase of \$136,640 over the same month last year. It is estimated that at the rate at which Customs collections have been increasing in this port the close of the fiscal year, June 30, will show a total for the year of \$13,500,000.

ITY GUARANTEED
Been Ordered and
porated

ler of appointed and elected members taken from the clergy, nobility, zemstvos and Academy of Science, universities, trade and industry.
WILL BE TWO HOUSES.
There will be two Houses, both of whom will have power to initiate legislation which does not effect the fundamental laws of the empire, the question of succession, etc. The annual sessions will be convoked and closed by Imperial ukase. Both the Council of the Empire and the National Assembly will enjoy the right to interpellate Ministers for alleged unlawful acts. The sessions will be public.

salaries: The President, \$75,000; Vice-President, \$15,000; Speaker of the House of Representatives, \$12,000; members of the Cabinet, \$15,000; Senators and representatives, \$7,500.

THE PICK OF EMIGRANTS

General Booth Says No Wastrels are Being Sent to Canada.

A London despatch says: Gen. Booth on Thursday addressed 1,400 emigrants at Euston station prior to their enrouting for Liverpool. Gen. Booth said: "We are sending the finest blood of the country to Canada, and I hope Canada in some tangible form will show appreciation." There were no wastrels being sent, he continued, and if Canada cried out that she did not want these emigrants, there were other colonies to send them to.

CZAR'S CLEMENCY.
Will Pardon Leader of Mutiny Sentenced to be Hanged.

An Odessa despatch says: The military authorities here have received a despatch from St. Petersburg, saying that the Czar will pardon Schmidt, the leader of the mutiny at Sebastopol, who was condemned to be hanged. It is believed that he will be confined in a fortress for life.

WATER FAMINE IN WINNIPEG.
Caused by Attempt to Fill Six-Million Gallon Reservoir.

A despatch from Winnipeg says: There is a great shortage of water in the city. It was stated on Sunday at the City Hall that the shortage had come as a result of attempting to fill the new six-million-gallon reservoir in order to have a supply on hand in case of emergency. There is now five feet of water in the reservoir. If the Legislature passes the city's application for power to appoint a water commission, consisting of aldermen and private citizens, it is probable that the commission will be appointed at an early date to make all enquiries and obtain all facts relative to a permanent visible supply of water for Winnipeg.

WOMAN'S BONES FOUND.
In a Baggage Room at the C. P. R. Depot, Montreal.

A despatch from Montreal says: A box containing the bones of a woman was discovered on Sunday night at the C.P.R. baggage department, but there is no explanation of whom it belongs to. Some days ago a young man brought the box to the department, stating that it contained books, and that he would return and have it forwarded. No further attention was paid to the matter until Sunday night, when, as the box was giving forth an unsavory odor, it was opened, and found to contain human bones. The authorities are investigating.

PANIC IN KISHINEFF.
Another Rising Against the Jews Said to be Imminent.

A despatch from St. Petersburg says: There is a panic in Kishineff, as another rising against the Jews is imminent. The Jews are threatened that if they participate in the election of representatives to the National Assembly they will be massacred.

PHONES FOR THE G. T. R.
Report That the Railway Will Establish a Complete System.

A Toronto despatch says: There is renewed talk of the Grand Trunk Railway installing a system of telephones over the entire system, to bring the officers in almost immediate touch with the heads at Montreal. It is thought time would be saved as well as the expenses cut down.

excepting Canada.
Marion Satter, once a popular singer, appeared in a London police court, on Saturday, charged with stealing a pair of boots.

The Financial Secretary of the Navy, commenting on the estimates, deplored the increased expenditure, and suggested a League of Peace.

The bill for the removal of the embargo on Canadian cattle will have the support of Scotch members in the British House of Commons. Opposition in the House of Lords is expected.

UNITED STATES.

A convention of the United Mine Workers of America has been called by President Mitchell for March 15th at Indianapolis.

Seven cases of trichinosis, including five deaths, have occurred at Collins, Ga. The malady is caused by eating diseased pork.

The rush from south of the line into Western Canada opened in earnest on Tuesday, when thirty cars of settlers' effects from Iowa passed through here.

The Wheeler elevator at Buffalo, N.Y., was destroyed by fire on Friday. Loss \$150,000. For a time the shipping in the harbor was in great danger.

Joseph Boyd narrowly escaped death from a bullet fired at the train that he was in, while passing Gifford, Pa. The bullet inflicted a nasty scalp wound. The train was stopped and the crew hunted for the man, but without success.

The largest freight car in the world is being constructed in the shops of the Chicago, Milwaukee and St. Paul Railway at Milwaukee. The largest freight cars at present are of 100,000 pounds capacity, and are looked upon as monsters. The new car will have a capacity of 200,000 pounds.

GENERAL.

King Edward is being received in Paris with great enthusiasm.

An immense outflow of gold from Russia will further embarrass the financial condition of that country.

The deadlock at the Algeiras Conference is the cause of grave concern.

The Czar is believed to be using every influence with the German Emperor to settle the Moroccan dispute amicably. Russia's financial welfare depends upon it.

TAKE OVER DOCKYARD.

Federal Government Accepts Offer to Transfer Halifax Property.

An Ottawa despatch says: The Government has received a despatch from the Imperial Government offering to transfer the dockyard and Admiralty property at Halifax to the Dominion, on condition that \$10,000 will be paid annually for five years, this sum being part of an obligation assumed by the Imperial authorities some years ago. The offer will be accepted and an officer sent to Halifax to take over the property.

ENGLISH RECTOR SUSPENDED.

Rev. R. C. Fillingham's Apology to His Lordship Doesn't Save Him.

A despatch from London says: The Rev. R. C. Fillingham, rector of Hexton, who was condemned recently by an ecclesiastical court to lose his living unless he apologized to his bishop for going through the ceremony of ordination with a Nonconformist, wrote to the bishop regretting that he unwittingly committed the illegal act, but has been suspended from his clerical functions for two years.

GLASS PRICES SMASHED.

Flint Workers of United States and Canada Agree.

A Steubenville, Ohio, despatch says: Flint glass workers of the United States and Canada on Wednesday agreed to accept a sliding scale, which means a reduction of 20 to 30 per cent. in lamp chimneys, reflectors and globes the country over. This will, it is said, enable the independent manufacturers to fight the so-called trust. The agreement means that the threatened strike of flint glass workers will be averted.

about 7 1/2 inch. In this operation the hole is cleared of all foul matter and discolored wood, which causes the syrup that is made at this time to be dark colored and to taste strong. This reaming of the hole is an important operation, for it enables the sugar maker to make a much larger production of the better grades.

Use a spout that is made in such a way as to fit in either of the holes and strong enough to hold the bucket when full of sap. The gathering should commence about as soon as the sap begins to run, and be boiled as soon as gathered. The sap should be strained into the storage tank, as well as when gathered. The storage tank should be placed outside the boiling place and on the north side and be protected from the weather.

The evaporator should be one that admits boiling and has the greatest heating surface. The bucket covers keep out much dirt as well as rain water. The syrup should be strained from the evaporator through a conical strainer, made from the heaviest and most closely woven all-wool flannel; this is much better than felt. The syrup should not be forced through the strainer; when one becomes clogged, take another and let the first drain out and then wash thoroughly before using again. If the syrup is boiled to 10 1/2 pounds or more per gallon, most, if not all, of the malate of lime will be removed.

My best market for the maple sweets is in my own section, although I send them to many other states. I put my syrup in one-gallon cans and grade it and put a sample in small bottle with each grade. Then when a customer comes I can show him what is in each lot. My best syrup is made into small cakes, put into one-half pound boxes with my address on the top of each box and these sell for a fancy price.

The darker grades I make into sugar and put into small pails and these sell for a good price. Much of my success in selling my syrup and sugar is, I think, due to the confidence my customers have that they are getting a pure article. And I earnestly advise the sugar maker not to adulterate this most delicious product of the maple. Give good weight and a pure article and you will make more money, besides having the satisfaction of knowing that you are doing right.

TO MAKE FIELD GUNS.

Big English Company May Establish Branch in Canada.

A despatch from Ottawa says: There is a prospect of a big English company, the Coventry Ordnance Company, establishing a branch in this country. Negotiations are at present in progress with the Department of Militia. The company is willing to erect a large factory in Canada if the Government will guarantee them any orders they may be placing for field guns or field gun ammunition. It is quite recognized that the requirements of the Dominion in this respect would not be likely to keep a large plant in constant use, but if one is erected it will no doubt be employed also for the manufacture of machinery of various kinds.

OLD AGE PENSIONS.

Recommendation of the Australian Pension Commission.

A despatch from London says: The Australian Pension Commission, of which the Postmaster-General is Chairman, recommends that the Commonwealth grant pensions of ten shillings weekly to all persons of sixty-five years who have lived twenty-five years continuously in the country, or at sixty years in special cases. The pensioners may possess means up to £26 a year. An estimate of the cost is one and one half millions sterling annually. The next Parliament will likely legislate on these lines.

HAD NO INSURANCE.

Loss of Intercolonial at Moncton Was Not Covered.

An Ottawa despatch says: There was no insurance on the Intercolonial Railway buildings burned at Moncton. The loss was nearly a million dollars.

CYCLONE SWEEPS CITY.

Principal Business Street of Meridian City Wiped Out.

A despatch from Mobile, Alabama, says: A message received from Meridian, Miss., states that a cyclone from the south-west struck the place on Friday evening at 6.30 o'clock, doing thousands of dollars' worth of damage to the business district. Front Street, the principal street in the city, was swept by the cyclone. The building in that section of the city left standing is the Armour Packing Company's building. Part of the roof and the rear end of that has been swept away.

Thousands of people are on the streets, which are in total darkness, the lighting system having been put out of business at the same time. Several large fires broke out among the ruins of the wholesale district, and are raging fiercely, despite the terrific downpour of rain at this hour.

A number of bodies are known to be in the ruins, and the rescuers are working with candle light trying to reach them. One report places the number at about 150.

The Western Union telegraph office reports they lost 15 miles of wire this side of Meridian, Miss., which means that all trains will be subjected to indefinite delay.

Three entire squares were leveled to the ground in the business district, together with the North-Eastern freight depot. Thousands of dollars' worth of freight were ruined by the water, and another large amount by fire. The Grand Avenue Hotel, one block from the business district, was badly damaged. Several fine residences in the east end were blown down, and a number were more or less damaged. A large number of negroes are reported to have been killed in one of the buildings blown down.

The Union Depot is one of the buildings blown away. The telegraph wires are still down between Meridian, Mobile and other points.

WATER AT LAKE PORTS.

Comprehensive Scheme to be Presented to Parliament.

A despatch from Ottawa says: The Minister of Public Works will present to Parliament next session a comprehensive scheme of improvement on the Upper Lakes, the execution of which will mean a great deal for the Canadian shipping interests of those waters and for the railways operating to the Georgian Bay ports. The object is to provide 20 feet of water at Port Arthur and Fort William on Lake Superior, at Depot Harbor and Midland, the Grand Trunk terminals, and at Victoria Harbor, the new Canadian Pacific Railway terminal on Georgian Bay.

The large expenditure that this work involves will be spread over six years. It will be left for the railways to build their own docks and terminal facilities. All the Government is undertaking is to provide them with 20 feet depth of water.

NOT EQUAL TO FARM WORK.

Many of Unemployed Emigrants are Weakened by Lack of Food.

A despatch from London says: Something of the distress of the unemployed was revealed by a medical examination of those desiring to leave Leith for Canada. Thirty-one adults and six children who passed a rigid inspection were found to be suffering in some cases from lack of food. It is thought half the 400 unemployed are physically unfit for the arduous life in the Canadian West, and plans are being discussed with a view to training them on farms at home before a large emigration is attempted.

The Dundee Distress Committee is also considering emigration to Canada as a solution of the problem. They have decided not to assist any married man to go unless he takes his wife and family.

MAY PAY MEMBERS.

DEATH BY SPIDER'S BITE

Child is Stung on the Ankle and Suffers Terrible Agony.

A San Bernardino, California, despatch says: The bite of a black spider brought agonizing death to Edmund Secombe, the 11-year-old son of Mr. and Mrs. F. W. Secombe, prominent residents of the city. The child, while playing in the hay-mow, was bitten on the ankle. The injury was not thought serious. Home remedies were applied, but these failed to bring relief, and when convulsions and unconsciousness came doctors were hurriedly summoned. They announced at once that the poison had progressed too far to hope for successful treatment, but every means was employed to relieve the suffering of the child, who raved wildly. The leg which had been bitten had swelled twice its normal size when death came. Chloroform had to be liberally administered during the period of the child's intense suffering.

FISHERMEN IN DANGER.

Eight Hundred Afloat on Ice Field in the Baltic.

A Helsingfors, Finland, despatch says: It is feared that eight hundred fishermen, with their families, who are afloat on the ice in the Gulf of Finland, will perish. A fortnight ago about a thousand persons, who had their horses with them, were fishing off the east land, when the ice parted and was driven by a storm into the Baltic Sea. Later the ice split and the wind changed to the east, and on Saturday a block on which there were two hundred persons came ashore at Frederickskham. The fate of the others is unknown.

SUICIDE AT WINNIPEG

J. D. Maudsley, of Liverpool, Shoots Himself.

A Winnipeg despatch says: J. D. Maudsley of Sefton Park, Liverpool, England, committed suicide on Friday afternoon at the Leland Hotel. The act of self-destruction occurred in the lavatory of the hotel shortly after 2 o'clock, when Maudsley placed a revolver to his head and fired the fatal shot, the bullet inflicting a wound that caused death almost instantly. The dead man was a stranger to all connected with the hotel. An envelope was found on his person addressed to Ed. Smith, 624 Yonge street, Toronto. Deceased was a remittance man, and had just recovered from a protracted drunk.

READY TO INVADE FRANCE

The German Army Could Soon Cross The Border.

A Paris despatch says: The Journal on Friday published the result of an investigation made by its correspondents along the German frontiers. The paper says the Germans do not desire war, but the German army is ready and its superior mobilization plans permit a rapid invasion of French territory. The Journal counsels the abandonment of French reliance on fortifications and the adoption of the German plan of a rapid invasion of the enemy's territory.

SALARIES AT WASHINGTON

A Bill for Readjustment, Giving President \$75,000 a Year.

A Washington despatch says: Senator Gallinger has introduced a bill to readjust the salaries of the general officers of the Government, to take effect March 4, 1909. The bill proposes the following salaries: The President, \$75,000; Vice-President, \$15,000; Speaker of the House of Representatives, \$12,000; members of the Cabinet, \$15,000; Senators and representatives, \$7,500.

The British naval estimates include amounts from all the leading colonies excepting Canada.

Marion Salter, once a popular singer, appeared in a London police court, on Saturday, charged with stealing a pair of boots.

The Financial Secretary of the Navy, commenting on the estimates, deplored the increased expenditure, and suggested

ON THE FARM.

DO WINTER EGGS PAY?

Eggs freshly laid are high in winter. It quite often happens that the cost of making them is still higher when the time consumed in attending to the many wants of the hens is added to the cost of a liberal supply of egg producing feeds, there must be a generous supply of eggs to make ends meet. And every one knows biddy's exasperating indifference to any kind of good treatment when she wants to take a time off. This is very apt to be in winter, writes Mr. Grant Davis.

To get eggs abundantly in winter requires more than feed and care. The hens must be so managed that their laying habits may be somewhat diverted from the normal egg producing season, spring and summer. Force them to do their best during the summer months and it will be uphill business to get them to lay when it is cold. Recently, I saw the advice given that if to get winter eggs begin to feed in summer in order to get the hens in trim. The trouble is they will get in trim and get out again by the time cold weather begins. This plan of feeding for eggs in the fall is a good one and one I have followed for some years, but I invariably find, that while the hens lay very profitably until cold weather sets in they will lay little in winter until towards spring and I do not coax them to, knowing that it would result in failure. They must have their seasons of rest. A hen fed continuously for eggs will get off her feed and out of condition and will not lay as much as less feeding and more rational management. Give them a rest and a change of diet in the hottest summer weather and they will give a good account of themselves during the fall months. To work for winter eggs with this flock of hens will give a negative result no matter how careful a feeder may have them in charge.

As a general rule, we should look to the early pullets for our successful winter layers. Pullets hatched in April and kept growing will be at maturity before cold weather sets in and given reasonable care and feeding will begin to lay. They will not lay every day, it is true, but, with a comfortable house and an abundance of feed to keep up heat and make egg material at the same time, they will continue to lay all winter. Late pullets which do not mature until along in winter are not apt to begin the egg business until the approach of spring. To try to make hens lay which are too young or are "laid out" is only to invite failure and possible injury to the flock especially if stimulating feeds and condiments are used. To get the pullets started laying in the fall, they must be kept in the best of health, be lively and thrifty. From this kind of stock winter eggs can be produced with profit, and he who is in the egg business neglects one of his best opportunities if he does not raise a lot of early pullets for the following winter's layers.

MAPLE SUGAR MAKING.

As the maple sugar season approaches my advice to the sugar maker is, to be prepared to catch the first run of sap. Have everything clean; the storage tank and gathering tub should be made or lined with tin; the spouts, buckets, pails and evaporator should be of tin also. It is much easier to keep them clean than when made from anything else. Tap with 3/4-inch bit about 1 1/2 inches deep in the most thrifty side of the tree. My choice would be on the south or west side of the tree, says Mr. L. G. Osgood. In about two weeks after tapping use a reamer that will enlarge the bore to about 1/2 inch. In this operation the hole is cleared of all foul matter and discolored wood, which causes the syrup that is made at this time to be dark colored and to taste strong. This reaming of the hole is an important operation, for it enables the sugar maker to make a much larger proportion of the better grades. The amount that is made in such a

to \$17.50; Manitoba bran, 19s. shorts, 2s. 20. at Toronto and equal points.
Oats— $\frac{1}{2}$ ¢ easier, 34 $\frac{1}{2}$ ¢ for No. 2 white and 33 $\frac{1}{2}$ ¢ for No. 2 mixed, at outside points.
Barley — Firmer, 48 $\frac{1}{2}$ ¢ to 49¢ for No. 2, 46¢ to 46 $\frac{1}{2}$ ¢ for No. 3 extra and 44¢ for No. 3, outside points.
Peas—77¢ to 77 $\frac{1}{2}$ ¢ outside.
Rye — 60¢ to 70¢, outside.
Corn — Canadian — 41¢ to 42¢, Cham- ham freights; American easier, No. 3 yellow 48¢, mixed 47 $\frac{1}{2}$ ¢, at Toronto.
Buckwheat — 49¢ to 49 $\frac{1}{2}$ ¢, outside.

COUNTRY PRODUCE.

Butter — The demand for creamery continues heavy in the absence of choice dairy, and prices are firmer.
Creamery — 25¢ to 26¢ do solids, 23¢ to 24¢ Dairy B. rolls, good to choice 18¢ to 18 $\frac{1}{2}$ ¢ do large rolls, 17¢ to 18¢ do medium, 16¢ to 17¢ Cheese — 13 $\frac{1}{2}$ ¢ for large and 13¢ to 14¢ for twins.

Baled Straw — Unchanged at 85.50 to 86¢ per ton for car lots on track here.

MONTREAL MARKETS.

Montreal, March 6.—There was some inquiry for Manitoba wheat by cable to-day, but bids were out of line and business was very quiet.
Oats—No. 2, 30 $\frac{1}{2}$ ¢ to 40¢; No. 3, 38 $\frac{1}{2}$ ¢ to 39¢; No. 4, 37¢ to 38¢.
Barley — Manitoba No. 3, 39¢ to 39 $\frac{1}{2}$ ¢; No. 4, 48¢ to 48 $\frac{1}{2}$ ¢; Ontario, 46¢ to 46 $\frac{1}{2}$ ¢, 72¢ per cent. points.
Corn — American mixed, 52 $\frac{1}{2}$ ¢; No. 3 yellow, 53¢ ex track.
Flour—Manitoba spring wheat patents, \$4.50 to \$4.60; strong bakers', \$4 to \$4.10, winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do, in bags, \$1.85 to \$1.95; extras, \$1.65 to \$1.75.
Milled — Manitoba bran in bags, 1.10; shorts, 82¢ per ton; Ontario bran in bulk, \$14.50 to \$15; shorts, 82¢; milled mouille, 82¢ to 82 $\frac{1}{2}$ ¢; straight grain mouille, 82¢ to 82 $\frac{1}{2}$ ¢ per ton.
Rolled Oats — Per bag, \$1.90 to \$1.95.
Cornmeal, \$1.30 to \$1.50 per bag.
Hay — No. 1, 88 to 88.50; No. 2, 87 to 87.50; clover, mixed, 86 to 86.50, and pure clover.
Cheese — No change in the local cheese situation. An improved tone continues, and a good inquiry was reported this morning. Asking prices unchanged at 13¢ to 13 $\frac{1}{2}$ ¢.
Butter — Continues steady with weak undertone. Demand is only fair. Prices steady at 23¢ for choice and 21¢ to 21 $\frac{1}{2}$ ¢ for undergrades.
Eggs — A slight improvement is reported in the local market, though there was no change in the price this morning. Receipts of new laid were rather limited. The demand was rather good for fresh at 16¢ to 18¢, full stock selling at 13¢ to 14¢ and limed at 11¢ to 12¢.
Provisions—Heavy Canadian short cut pork, 82 $\frac{1}{2}$ ¢; light short cut, 82¢; American short cut, 82¢; American cut clear fat back, 81¢ to 82¢; compound lard, 6 $\frac{1}{2}$ ¢ to 7 $\frac{1}{2}$ ¢; Canadian pure lard, 11 $\frac{1}{2}$ ¢ to 12¢; kettle rendered, 12 $\frac{1}{2}$ ¢ to 13¢; hams, 12¢ to 13 $\frac{1}{2}$ ¢, according to size; bacon, 14 $\frac{1}{2}$ ¢; fresh killed abattoir dressed hogs, 81¢ to 81.25; country dressed, 88.75 to 89.50; alive, 87.75 and 87.50, selecting and mixed lots.

BUFFALO MARKETS.

Buffalo, March 6. — Flour — Steady. Wheat — Spring easy; No. 1 Northern, 86 $\frac{1}{2}$ ¢ asked, carloads; Winter dull; No. 2 red, 75¢. Corn — Steady; No. 2 yellow, 46¢. No. 2 corn, 45 $\frac{1}{2}$ ¢. Oats — Firm; No. 2 white, 34 $\frac{1}{2}$ ¢; No. 2 mixed, 33 $\frac{1}{2}$ ¢. Barley — Opening shipment quoted 45¢ to 46¢. Rye—Dull; No. 1 offered 70¢.

butcher meatners were scarce and high. A pair of extra choice heifers, weighing 2,070 lbs. the pair, sold for \$4.70. Good ordinary heifers and steers sold at \$3.90 to \$4.10.
Heavy Feeders—Good heavy feeders are firm at \$3.85 to \$4.
Stockers—Good stockers are wanted.
Sheep and Lambs—Market slightly easier for grain-fed lambs.
Hogs—Market is steady at the rate of the latter part of last week. Quotations were unchanged to-day at \$6.60 to \$6.85.

BRITISH MANOEUVRES.

Greatest Navy Will Attempt to Force Gibraltar's Straits.

A London despatch says: The dominant note of the British naval manoeuvres which began recently in Lagos Bay is their secrecy, says The Express. No attaches or privileged strangers will be allowed on board, and even army officers are forbidden to be present. Distinguished general officers who had understood that they would be permitted to go with the fleet have been refused permission, and have been obliged to remain on shore. Several foreign gunnery officers were also desirous of attending in order to learn something of ship working, but they have been told that they cannot go. As every effort is being made to co-ordinate the working of the navy and army in war-time, the attitude of the Sea Lords in refusing to allow the attendance of army officers desiring instruction is not very well received in the sister service, and the matter has come under the notice of the king.
The fifty warships constituting the fleet have 730 primary guns, not one of which is less than six-inch calibre, and hundreds of smaller guns, bringing the total to nearly two thousand pieces of ordnance. King Carlos, on his yacht, will greet the squadrons as they sail in to Lagos Bay to concentrate, and the Thames-built Portuguese cruiser Vasco da Gama will welcome the arrival of the British ships in Portuguese waters. The fleet is to manoeuvre in protection of the trade routes and the shipping bound for home ports with food-stuffs. An attempt also will be made to force the passage of the Straits of Gibraltar. There will be a conference of Admirals, and the fleets will have strategical exercises. More than 40,000 seamen and marines will be engaged in the manoeuvres.

BAR LIQUOR FROM DRY COUNTIES.

New Brunswick Government Will Amend the Act.

A despatch from St. John, N.B., says: As a result of a demand by temperance bodies that wholesale dealers should not be allowed to send liquor by express into the counties where prohibition is in force, Premier Tweedie on Wednesday introduced important amendments to the Liquor License Act. This measure forbids any licensed wholesale dealer sending liquor to persons in Scott Act districts who they have reason to believe are engaged in the sale of liquor. It also makes it unlawful for express companies to carry liquor C.O.D. to Scott Act counties in this province. Heavy fines in both cases and loss of license in the first are the penalties.
In introducing the bill Premier Tweedie said the Government would do all possible to lessen the evil of intemperance, but could not at present see that a provincial prohibitory law would be likely to be enforced in cities and towns. Therefore he would not introduce such legislation.

KING NEVER WAS BETTER.

Rumors are Denounced as Malicious Inventions.

A Vienna despatch says: Dr. Ott, King Edward's Marienbad physician, has taken the occasion of his return from his visit to England to publicly deny the rumors of his Majesty's ill-health. These, Dr. Ott declares, are malicious inventions, possibly traceable to political motives. King Edward was never in better health than at present.

of the prisoners and asylums department during their visit to other institutions in the various counties.

WOODSTOCK ASYLUM OPENING.

Hon. Mr. Hanna informed Mr. Munro (North Oxford) that the Asylum for Epileptics at Woodstock would be opened as soon as the legislation necessary for the control of such asylums was passed at the present session. The ordinary asylum legislation was not sufficient for this case. The erection of the two additional cottages at the Asylum for Epileptics had not been commenced because the Government wished to decide what additional accommodation is necessary and how it is to be provided. Provision for the buildings will be included in this year's estimates.

PORT ARTHUR MINES ACTIVE.

Inspector E. J. Corkill, of the Bureau of Mines, has returned from a trip, during which he inspected mines west of Sudbury on the main line of the C.P.R. at the Antikokan iron mine on the Canadian Northern line, 135 miles west of Port Arthur, a large plant is being installed and preparations are being made to commence operations in two months. A spur line is being constructed from the main line to the mine.

An inspection was made of the famous Laurentian mine at Gold Rock on upper Lake Manitou. Rich finds have been made there recently. Some fine ore is in sight and a stamp mill is being erected. Three or four other mines which were closed down, are being worked again as the result of the new finds. The Sultana gold mine on the Lake of the Woods is being operated steadily.

NOTICES OF MOTION.

The following notices of motion were given:—

Mr. Eilber—To amend the Insurance Act.

Mr. Eilber—To amend the Municipal Act.

Mr. Cochran—To amend the Act to Preserve the Forests from Destruction by Fire.

Mr. Thompson (Simcoe)—To amend the Municipal Act.

Mr. Kidd—To amend the Municipal Act.

Mr. Tucker—To amend the Act to regulate the width between sleigh runners.

Mr. Lucas—To amend the Act respecting Conditional Sales.

Mr. Preston (Brant)—Enquiry—1. Have any representations been made to the Government of Ontario by the Dominion Government relative to possible injury to Niagara Falls through the development of electric energy at that point? 2. Has international action to guard against such injury been suggested by the Dominion authorities, and, if so, with what result? 3. Does this Government intend to take steps to preserve the Falls, and, if so, of what nature?

GRANT WAS CONFIRMED.

The confirmation of a grant made by the Ross Government to aid the construction of the branch of the Manitoulin and North Shore Railway Company between Sudbury and Little Current was asked by a deputation which sought an interview with Premier Whitney. The late Government granted 400 acres a mile to the company. The line will be 60 miles in length when completed. Of that 12 miles is already built and in operation.

PRINCE ARTHUR'S VISIT.

Col. Hanbury-Williams and Under-Secretary of State Pope made a social call on Premier Whitney and his colleagues at the Parliament Buildings on Thursday. They are in the city arranging for the visit of Prince Arthur of Connaught, from April 21 to 26. They also called on the Lieutenant-Governor. Premier Whitney said that the Government would wait until the Lieutenant-Governor's plans were made known before deciding what steps to take to entertain Prince Arthur.

TO STOP PERQUISITES.

An interesting announcement was made by Hon. W. J. Hanna regarding the question of perquisites for officials at public institutions. He told the House that he intended to do away with the system of perquisites for all but superintendents, and to extend the reform even to the superintendents, probably next year. In the place of the perquisites increased salaries would be given.

Crown on the railway concerned, payable upon demand of the Minister, and may be recovered at the suit of the Crown in any court of competent jurisdiction.

KING EDWARD OFF FOR HOLIDAY.

He Will Travel Incog. as the Duke of Lancaster.

A despatch from London says: The Duke of Lancaster, as King Edward will be known for two months, left on Friday night for a holiday in Paris and Biarritz, and a subsequent cruise in the Mediterranean. The King, who is attended only by Gen. Sir Stanley Clarke and Hon. Sidney Greville, spent the night on board the Royal yacht at Portsmouth, leaving early on Saturday morning for Cherbourg, and arrived in Paris on Saturday night. He will stay at the British Embassy until Tuesday, and during his visit to the French capital will see President Fallieres, whom he has not yet met.

From Paris the King goes to Biarritz, France, and will stay there until the end of March, afterward joining the Royal yacht Victoria and Albert in the Mediterranean, where, it is said, he will meet Emperor William. During his stay at Biarritz King Edward will see King Alfonso and discuss the details of the latter's marriage with the Princess Ena of Battenberg.

INDIAN SHOT DEAD.

Resident of a Reserve in Manitoba Killed by a Fellow Redman.

A despatch from Griswold, Man., says: Wambidiska, a highly-respected Indian of Oak River reserve, about four miles north of here, was on Wednesday morning shot and instantly killed by Wally Bear, an Indian from the Pipestone reserve. The trouble was over a horse deal. The murderer is still at large, but is being pursued by constables.

A Brandon despatch says: Woolly Bear, the Indian murderer who attempted suicide after perpetrating his desperate crime, is now in the hospital here, and will probably recover. The bullet went clear through his body. He claims that prior to shooting Wambidiska they had fought with knives, and several gashes on his body would appear to confirm his story.

RUSH OF BLUE JACKETS.

British Admiralty Test of Speedy Transportation.

A despatch from London says: Two hundred sailors leave per steamship Lake Manitoba on March 13 for Vancouver as an experiment by the Admiralty to find out how speedy in case of necessity troops can be transported to the far west.

RUSSIAN LIBERTY

A Manifesto Has E Incorporated

A despatch from St. Petersburg says: As the result of a series of special councils held at the Tsarskoe-Selo and composed of forty high dignitaries, Ministers and members of the Council of the Empire, under the Presidency of the Emperor, the main guarantees of liberty have been granted, and a manifesto has been ordered to be coded and incorporated in the fundamental laws of the empire. The main points are as follows: No law will hereafter be effective without the approval of the National Assembly and Council of the Empire. The latter body will consist of an equal number

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand. **FEED GRINDING** a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

Wall Paper.

We have our stock all in now, and can say, we have never had so large, so varied, so artistic, so good a stock of Wall Paper, as we have thisspring.

We have New papers from 5c. to 75c. per roll.

Don't be led to believe ANYONE can compete with us.

We have the stock on hand.

COMING

Daniel W. Brown, the director of
the American Jubilee Singers, who are
to appear here shortly, was a member
of the original Fisk Jubilee Singers,
who, it will be remembered, gave such
great delight by the excellence of their
singing and the popular character of
their programmes. It is claimed the
American Jubilee Singers give equal
pleasure. They are composed of ten
in number, including two sopranos,
two tenors, two basses, one alto, a con-
tralto, a reader, a pianist, and an
organist. Their appearance here on
Wednesday, March 21st, at Brisco
Opera House will be welcomed with a
great deal of interest.

Paints and oils white lead, gasoline,
coal oil liquid veneer, removes all stains
make furniture new.
BOYLE & SON.

Mr. J. S. Hulett has issued a writ
against The Mercant Bank for \$50,
000.00 damages in connection with
Neilson-Robinson note endorsed by Mr.
Hulett.

M—N—R—
George Woodman, one of Wolfe Is-
land's respected and well-to-do farm-
ers died at his home last week after a
year's illness from heart trouble at the
age of 78 years. The funeral took place
on Saturday morning and was largely
attended by a very large number of
friends and relations.

A—T—
It is now definitely announced that
there will be no protest against the
election of Mr. E. J. B. Pense, who
was elected over Mr. Donald McIntyre
last January by a majority of 36. The
latter gentleman says that he could
have presented quite a number of
cases, but he has now no desire to en-
ter any petition against the repre-
sentative in the Ontario Legislature.
Probably it is just as well.

M—H—
At the Court house on Monday, Geo.
La Fontesse, appeared before His
Honor Judge Madden charged with
having with having on February 22nd,
at the village of Odessa injured F. G.
Hagerman by furious driving. After
hearing the evidence His Honor found
the prisoner not guilty. H. M.
Deroche, Esq. K. C. appeared for the
Crown. W. S. Herrington Esq. K. C.
for defendant.

WILTON
George Simmons lost a valuable
yearling heifer this week, blackleg
being the cause.
Mr. and Mrs. Thomas Mills have re-
turned from Campbellford, where they
were spending the winter with their
daughter, Mrs. Jordan.
Rev. Mr. McQuarrie, Pittsburgh,
preached in the Presbyterian church,
Sunday evening. He came in the in-
terest of the augmentation fund, and
found this part of the charge in
excellent condition.
Auston Simmons is also on the sick
list.
Wesley Parrott is quite recovered
from his recent illness.
Communion will be dispensed in the
Presbyterian church next Sunday even-
ing.
Rufus Owens is having a sale of his
farm stock and implements to-day
having rented his farm to John Carr

Sap buckets, sap pans, spoils, dairy
cans. We make the best in Canada.

CHANGES IN COMPANY.

The announcement is made that Mr.
C. M. Johnson, who at one time was
managing director of the Wells &
Richardson Co., Limited, 200 Mountain
Street, Montreal, Que., but who was
succeeded some time ago by Mr. Thos.
Brady, is not now connected with this
company in any way, and also Mr. A.
E. Richardson, who was a former
stockholder in the above-named com-
pany, and also in the Wells & Rich-
ardson Company, of Burlington, Vermont
is not now connected in any form or
capacity with either company, both
of the above gentlemen having disposed
of their holdings of stock. The Wells
& Richardson Co., Limited, of Montreal
are the sole proprietors, among other
articles, of the well-known Diamond
Dyes, Improved Butter Coloring, Lac-
ated Food, and Paine's Celery Com-
pound, and at present under the very
able management of Mr. Brady, are
doing the largest business in the history
of the Canadian Company,

Marks Bros. Coming.
The Marks Bros. Co., Joe and Alex
Marks, Proprietors, open a three night's
engagement at the Opera House,
Thursday, March 15th. The company
numbering sixteen people, is one of
exceptional merit, and offers a strong
list of plays. Miss Grace Marks the
charming little comedienne, will be
heard in the latest songs, and as a
features specialty, the management
presents E. R. Zaranos and sisters.
Hess in a superb exhibition of musket
juggling and club swinging together
with a musical program including solos
and duets on every kind of musical
instruments. The opening bill will be
"An Alabama Home." Prices 15, 25,
35 cents.

Miss Maud Bruton has rented the
store formerly occupied by Mrs. Mc-
Leod and will open a Millinery Store.
Clean your stoves inside and clean
out chimneys with soot destroyer at
BOYLE & SON.

town on Tuesday.

Miss Mantell has returned to town
to resume her position with The Rob-
inson Co.
Miss Mayme Foster, Syracuse, N.Y.,
spent last week the guest of Mrs. Mc-
Keown, East Street.

Misses Willoughby and Kake, are
the milliners with Mrs. Dooxsee.
Miss Nellie Casey has returned to
Troy, N. Y., after a three weeks' visit
with her mother, Mrs. T. Casey, Piety
Hill.

Mr. Alex. Rombough, of New York,
is visiting his father and brother, York
Road.

Mr. John Wilson spent a few days
in Toronto last week.

Mrs. R. Dinner has returned from a
visit with friends at Prescott.

Rev. Rural Dean Dibb, was in King-
ston on Thursday.

Rev. H. Gracey was unanimously
nominated as Moderator of the Gen-
eral Assembly by Kingston Presbytery.

Mr. R. H. J. Pasmore, son of Dr.
Pasmore, of Deseronto has taken over
the management of the J. P. Lawra-
son & Co. Drug Store, which will be
re-opened on Saturday March 10th.
Mr. Pasmore has had several years
experience as manager with Hawkins
Limited, of Hamilton, and the Lawra-
son Co. should be congratulated on
the services of so successful a chemist
as Mr. Pasmore has proved himself to
be.

STELLA.
The recent cold spell was welcomed
by all, as the ice had become rather
shaky. We have hopes that March
will give us a taste of winter yet.

Mr. and Mrs. Cecil Patterson, Buf-
falo, returned home last week accom-
panied by his mother, for an extended
visit.

W. Reid and family leave this week
for their new home in the west. We
wish them all prosperity, but regret
losing our life-long neighbors.

Mrs. W. Neilson, of Kingston, and
Mrs. James Saunders, of Buffalo, have
been visiting their mother, Mrs. James
Howard. Mrs. Saunders has purchased
the Howard farm.

P. C. Filson spent Sunday here, but
had to remain over night owing to the
state of the ice.

Russian Unthrift.
 A condition of general unthrift among
 the peasants is one of the most striking
 features of Russian country life. Every
 stranger passing the frontier be-
 tween that country and Germany is
 struck by the marked change in this
 respect which he encounters up to the
 very boundary line and which the geo-
 graphical position does not at all ac-
 count for. There is no gradual change
 in the appearance of the face of the
 country or the people from comparative
 prosperity to extreme poverty, but
 a sudden difference in the conditions
 marked by totally dissimilar methods
 of cultivation, dwellings and habits of
 thrift. Everything on the German side
 indicates careful cultivation and indus-
 try, while upon the Russian side the
 fields show bad tillage and neglect,
 squalid houses, infill and uncared
 for stock and tools and implements ly-
 ing in the fields exposed to the weath-
 er.—Herbert H. D. Peirce in Atlantic.

An Old English Custom.
 The nomination of sheriffs according
 to the present mode dates from 1461.
 The "shire reeve" was first appointed
 by Alfred the Great to assist the alder-
 men and the bishop in the discharge
 of their judicial functions in the coun-
 ties. In Edward III.'s reign it was en-
 acted that they should be "ordained on
 the morrow of All Souls by the chan-
 cellor, treasurer and chief baron of the
 exchequer." The only instance of a fe-
 male sheriff is that of Anne, countess
 of Pembroke, who on the death of her
 father, the Earl of Cumberland, with-
 out male heirs in 1613, succeeded to the
 office in Westmorland and attended the
 judges to Appleby.

Homely Voltaire.
 Voltaire was the ugliest man of his
 age. Emaciated to a skeleton, all the
 features of his countenance were exag-
 gerated. His nose and chin nearly met
 from the lack of teeth; his cheeks were
 sunken and wrinkled, his eyes set so
 far back in his head and so obscured
 by shaggy, overhanging brows as to be
 almost invisible. He usually wore a
 large wig, from the midst of which his
 attenuated features peeped out with
 comical effect. For years before he
 died his weight did not exceed ninety
 pounds.

Nothing More to Do.
 Hubby—I don't see why you shouldn't
 exert yourself to make me happy. Wifey
 —Why, of all things! You know you
 told me when I accepted you that I had
 made you the happiest man on earth.
 What is the use of my trying to im-
 prove on that?

Different.
 "She told me in confidence that the
 way he makes love is absurd."
 "Yes, but the way he makes money
 isn't."

Snowshoes For Marshes.
 The largest extent of marsh land in
 the world is to be found in the low-
 lands which form part of the steppe of
 Baraba, between the rivers Intish and
 Obi, in Asiatic Russia. The region is
 flat and covered with forests, salt lakes
 and quivering marshes, extending over
 an area which is not less than 100,000
 square miles. During the summer
 dense clouds of mosquitoes float over
 the treacherous ground. Immense areas
 of these dreaded swamps have never
 been visited by man. The marshes,
 treacherously concealed under a sway-
 ing layer of grassy vegetation, can only
 be crossed by means of a kind of snow-
 shoe in winter except at the peril of
 one's life.

The Drunkard's Cloak.
 In the time of the commonwealth in
 England the magistrates of Newcastle-
 upon-Tyne punished drunkards by
 making them carry a tub called the
 drunkard's cloak. This tub was worn
 bottom upward, there being a hole at
 the bottom for the head and two small-
 er holes in the sides for the hands to
 pass through, and thus ridiculously at-
 tired the delinquent was made to walk
 through the streets of the town for as
 long a time as the magistrates thought
 proper to order, according to the gross-
 ness of the offense.

Soft Soap.
 "Yes, dear," said the petted young
 wife, examining her birthday gift,
 "these diamond earrings are pretty,
 but the stones are awfully small."
 "Of course, my dear," replied the dip-
 lomatic husband, "but if they were
 any larger they'd be all out of propor-
 tion to the size of your ears."

Coughs, colds, hoarseness, and other throat
 ailments are quickly relieved by Cresolene
 tablets, ten cents per box. All druggists
Sugar Making Supplies.
 Boiling furnaces and pans, buckets,
 spoils etc.
MADOLE & WILSON,

PRIVATE BILL.
**HEATED DISCUSSION REGARDING
 NAPANEE BY-LAW.**
 Toronto News.
 "I'll sell my judgement against the
 protesting company for a postage
 stamp," declared Mr. W. S. Herrington
 counsel for Napanee, during the Private
 Bills Committee this morning.
 "It's the Gas Company fighting this
 bill in the guise of the hopelessly bank-
 rupt electric light company."
 The town sought to have validated a
 by-law carried by the ratepayers by a
 vote of 200 to 27, providing that the
 town operate its own plant, but insuffi-
 ciently advertised. On this technical
 objection the Electric Company, now
 enjoying the monopoly of service, had
 taken it into the courts, and Mr. Mid-
 dleton, on their behalf, opposed the bill
 before the committee. It was reported.

**Women Angrily Aroused
 ALL OVER THE
 DOMINION.**
 Information from various Provinces
 of Canada points to the fact that many
 women have been deceived and un-
 scrupulous manufacturers to imitate
 the popular DIAMOND DYES.
 Our Canadian women, thoroughly
 aroused, after loss of time, money and
 valuable materials through the use of
 muddy, blotchy and weak dyes
 have directly laid the blame for their
 losses on the retail merchants who sold
 them the deceptive dyes.
 This action of indignant women has
 caused many of our retail and whole-
 sale dealers to pack up and return to
 the manufacturers responsible, their
 worthless and dangerous dyes.
MORALE: When ladies decide to do
 home dyeing work, it pays to use the
 celebrated and popular DIAMOND
 DYES, which have been the home
 friends of the ladies for over 25 years.
 When buying, see that each package
 handed to you bears the words DIA-
 MOND PACKAGE DYES. Users of
 DIAMOND DYES soon become ex-
 perts in the fascinating work of home
 coloring, and find that a ten cent pack-
 age will renew the life of any faded
 and dingy suit, dress, skirt, blouse,
 jacket, cape or husband's or son's coat,
 vest or trousers. Allow no dealer to
 offer you the something he calls "JUST
 AS GOOD." No other dyes equal the
 DIAMOND DYES.
 Send your name and address to
 Wells & Richardson Co., Limited,
 Montreal, P.Q., and you will receive
 free of cost new Dye Book, Card of
 Dyed Cloth Samples and Booklet in
 verse, entitled "The Longjohn's Trip
 to the Klondike."

Golfers.

In shades of Navy, Cardinal, Black, White, and White and Cardinal.

Styles—Newfancy stitch with deepcollar, Norfolk and Sweater style, also Children's sweaters in Navy, White and Cardinal.

MARLBANK

Business is quiet in our village at present but spring bids fair to open soon when the old time bustle will begin again.

It has been difficult for the farmers to do their hauling this season as we see them each day hauling logs on their wagons which must be inconvenient.

Joe Dale has returned home after a trip to Michigan. His brother, who resided there accompanied him home for a visit.

Mrs. Brant, daughter of Mrs. Darlington suffering from a lingering illness is very low with no hopes for her recovery.

Mrs. Rikley, of Camden has purchased a house and lot from W. J. Wilson and has become a resident of Marlbank.

There was considerable excitement in our town last week over the attempt of Wesley Huff of Napanee, to dispose of a quantity of merchandise at reduced rates in Allen's Hall, for the benefit of the Marlbankers. Our wily merchants got their heads together (who knows but in a combine) and took proceedings against him which resulted in giving poor Wesley the hustle. The townspeople have become agitated over the event but by the merchants coming half way peace is again proclaimed on condition that the former still retain their option of purchasing at Eaton's.

Mr. Copp of Belleville College conducted the services here in the Methodist Church on Sunday evening.

International Stock Food, Heave Cure and other remedies. Three feeds one cent.

MADOLE & WILSON.

LAPUMS WEST.

Wm. Love had a sheep killed by dogs on Monday. This has become entirely too common here lately. People having dogs that they know to be dangerous would save paying damages by looking after them.

Mr. and Mrs. Cyrus Bush and Miss Lizzie Foster, of Camden East, were visiting at H. E. Bush's and Levi Brown's on Sunday.

Mrs. J. D. Huff returned from a two week's visit with relatives near Elginburgh.

Mr. L. Brown and Mrs. H. Bush were visiting in Napanee from Saturday to Monday.

Mr. and Mrs. A. R. Boulton, entertained the members of the choir and friends on Tuesday evening.

Jas. Huff has engaged John Brown, for the coming summer.

Allan Sagar is moving to his new home near Violet, this week. He has sold his two farms here, to Alna Emberey, and Jas Judge.

The Juvenile section of a Charivari party gave Mr. and Mrs. S. Bush, a call recently The Senior members next.

It was a great shock to the people here when the news spread that Wilmot Snider, Maple Avenue, was no more, that his spirit had taken its flight to the God that gave it. He was beloved by all that knew him, and many with sad hearts attended his funeral to day, which occurred at Wilton.

Col. Clyde, Odessa, was in our midst last week.

A few from here recently attended a large party at R. N. Lapum's, Wilton.

Visitors: Mr. and Mrs. James Dawson, Odessa, at Mrs. Clara Lapum's; Mr. and Mrs. G. C. Davy, Yarker, at B. Rose's; James Reid, Elginburgh, at Michael Love's.

That New Dye called "Dyola" is sold at WALLACE'S RED CROSS DRUG STORE 3 packages for 25 cents also Diamond Dyes, Turkish, Standard or Rex all same price.

ODESSA

Sincere sympathy is extended to Mr. and Mrs. Walter Snider, fifth concession, in the death of their only child, Wilton, a bright boy of ten.

Miss Georgie Graham, graduate of Kingston Business College left for Toronto last Friday where she has secured a good position.

Geo. Watts lost a valuable Jersey cow on Sunday morning.

Mrs. Hannah McKim, aged eighty-five years, died at the home of James Hogle on Monday. She leaves one son George Smythe, New York city. The funeral was held, to-day, at the house by Rural Dean Dibb, of Napanee, thence to Cataract cemetery, for burial.

"The Jolly Pathfinders," a concert company, gave entertainment on Monday and Tuesday nights. Percentage of proceeds was in aid of Odessa bank.

A number from here attended the tea-meeting at Fourth Concession church, on Friday evening last.

The Salvation Army held a banquet and jubilee on Thursday, May 8th. The Citizen's band assisted in the programme. It was a success in every way.

Mrs. (Dr.) McCullough, of Perth, is visiting at Byron Derbyshire's.

Mrs. Sherman Bond is visiting friends at Carthage, N.Y.

Division court was held here on Tuesday, Judgt Madden presiding.

The bar was represented by Messrs. Deroche, English and German, barrister, from Napanee; also by S. W. Clark, Odessa. There was a docket of seven cases, but only the following were disposed of: Rattle Creek, Ohio, Savings bank vs. R. B. Pennell; action to recover \$170.22 on note; judgement against Emery for full amount. Clark vs. Jackson, for \$13.50 on note; judgement for plaintiff for \$10 and costs. There was one judgement served in which his honor made an order for defendant to pay \$5 per month till debt and costs are paid.

Miss Florence Murphy, who has been very ill, is able to be out again.

New Century, Sunlight and Handy Washers, sold on approval.

MADOLE & WILSON.

A CARD OF THANKS.

From Mr. and Mrs. Holcomb and their Sister, Miss Mary M. Bowen.

We wish to return thanks through the columns of this paper, for the generous and kind way that our friends and neighbors of Mount Pleasant and its surroundings, expressed their kindness towards us by their kindness towards us by their presentation and able address given us on the evening of Thursday, February 27th, as a token of remembrance, before taking our departure to our new home in Cobourg, where we are about to soon enter.

We feel that our long stay of many years in your midst has not only been satisfactory, but a very pleasant time with you all. Time does not allow us to see you all personally, so kindly accept this as a farewell.

MODERN DISPENSING.

Modern up-to-date dispensing calls for a thorough knowledge of the drug trade, drugs of the best quality, and the proper facilities for insuring accurate and quick work. Our arrangements are perfect for dispensing work and our prices right in every case.

A POPULAR MEDICINE.

Paine's Celery Compound is giving marvellous results to sick people. The wonderful cures wrought have made Paine's Celery Compound justly popular. Thousands cured of rheumatism, neuralgia, blood troubles and nervous complaints, now sing the praises of the great medicine. We always have a full stock of the genuine "Paine's."

NEWS IN GENERAL.

Mr. John McFee's residence at Belleville was burned. Loss, \$10,000.

The Government have decided to revise the rules of the House of Commons by a committee.

The outlook for a peaceful settlement at the Algeiras Conference grows brighter each day.

Evidence showing how netting was depleting the fish in Georgian Bay was given before the Fish Commission.

Miss Jessie McEachern, teacher, of St. Catharines, disappeared while visiting Hamilton.

The C. P. R. has given another big order for new rolling stock in view of the outlook for heavy demands all over the system.

The presentation of the new license act to the Legislature has been postponed till next week.

F. J. Reilly is to be liberated at Belleville this week, after serving a year for his connection with the bogus ballot-box scheme.

Picton has decided to accept Mr. Carnegie's offer of \$10,000 for a library, and steps will at once be taken to secure a suitable site for the building.

Navigation was opened in Toronto by the arrival of the steamer Macassa, the earliest opening in the history of the port.

In a mine explosion at Lens, France, followed by fire and poisonous gases, eleven hundred miners lost their lives. It is one of the worst mine disasters in history.

The examination of Joseph Phillips of the York County Loan was adjourned till a higher court decides whether the Crown should not furnish fuller particulars of the charges against him.

Edwin St. George Banwell and his wife were committed for trial. The evidence showed that it was Mrs. Banwell who purchased the diamonds found on the prisoners.

Rumors of discontent and further insurrection are rife in Moscow. The Government will meet any disturbance with the utmost firmness.

Some mischievous persons have been damaging the street letter-boxes at Brantford. In one case matches were thrown into a box and letters were burned.

The address passed the House after a debate covering a wide range. The Saskatchewan and Alberta elections were touched on, and several members spoke in favor of reconsidering the indemnity questions.

Edwin St. George Banwell, the defaulting Crown Bank teller, and his wife, were committed for trial at Toronto Monday. The evidence shows that

OBITUARY.

E. B. HEMSTREET.

One of Nananee's well-known citizens passed away on Friday last, aged sixty-six years. Deceased had been a resident of Nananee for a long number of years. Some years ago he kept a grocery on John street, from which he retired on account of ill-health. He had been suffering from Bright's disease for a long time and during the past few months had been confined to his bed. The late Mr. Hemstreet served in the American army during the Civil War and was a pensioner of the U. S. Government. Deceased leaves a widow, one son and one daughter to mourn his loss. The funeral took place on Sunday afternoon, to the Western Methodist Church.

ADALINE L. FRALICK.

Relict of the late Chas. B. Perry passed away on Thursday morning aged 74 years and 8 months after an illness of but a few days, though she had been in failing health for some time.

Deceased had been a life long resident of Nananee, and an ardent worker in the Eastern Methodist Church of which she had been a member for a long number of years. The funeral will take place from the residence of Mrs. Rud Perry on Saturday afternoon at 3 o'clock, services at the house, thence to the Eastern Cemetery vault.

A. C. BOWEN.

The infirmities of old age prevailed against Alexander Cummings Bowen on Wednesday morning of last week, and the last but one of his family was laid to rest on Friday afternoon. Mr. Bowen was born on the farm now occupied by his nephew, W. J. Bowen, on the Nananee road just east of Deseronto. This farm had been secured by his father on a patent from the Crown in the early years of last century and here Alexander C. Bowen was born in November, 1818. He had seven brothers and three sisters, and of these but one survives, Miss Mary Bowen, who resides with relatives in Northumberland County.

JAMES RICHARDSON.

Kingston, Ont. March 14.—The death of George Richardson, head of the grain firm of James Richardson & Sons, occurred this morning in Bermuda. He had been in poor health for some time, suffering from heart affection. Soon after the first attack he went to Watkin's Glen, N. Y., and took treatment. He returned the middle of February and later took the Southern trip. He was about 52 years of age, and is survived by a widow, with him, and four children. He was very prominent in grain circles, the firm he represented being one of the

Contagion and Infection.

The terms contagion and infection are too often used promiscuously, though they are by no means synonymous. The dissemination of mycotic diseases takes place in different ways. There are those which cannot be communicated from person to person, but spread only by the microbic cause invading the individual. To this class belong malarial fevers produced by sporozoa. These are communicable from

IN THE HIGH COURT OF JUSTICE Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A.D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Nananee at his Chambers in the Court House, Nananee, on

FRIDAY THE 9TH DAY OF MARCH, A.D. 1906.

at 2 p.m., the following valuable farm lands, Parcel No. 1.—The Northwest 1/4 of Lot N 11 in the 5th Concession of the Township of Canden, in the County of Lennox and Addington, containing 20 acres more or less. Parcel No. 2.—The Northwest 1/4 of Lot N

to Monday." The evidence shows that it was Mrs. Banwell who purchased the diamonds found on the prisoners.

Warden W. J. Franklin of Frontenac summoned Robert Jamieson and Thomas Bonner before the Police Magistrate on Tuesday morning for alleged assault last Thursday night in the Windsor Hotel. The trouble arose as a result of the County Council deadlock. Another member of the Council is involved. The fight began in the down-town hotel, and was continued some hours later at an uptown hostelry.

A Public Benefit.

The pure food law requiring the ingredients of all food preparations to be stated on the container, will certainly be a public benefit. But we are ahead of the legislature in publishing the composition of our Chemically Pure Baking Powder, which is guaranteed to contain chemically pure Bicarbonate of Soda and Pure Cream of Tartar. It is not an acid mixture. Ask for free sample package. The Medical Hall.—Fred L. Hooper.

Kingston, March 13.—While reading the lesson at evensong in St. George's Cathedral shortly after 5 o'clock the Dean of Ontario, Rev. Buxton B. Smith, M. A., was seized with apoplexy. He was apparently well when he began to read, but his voice gradually became indistinct. Canon Starr, cathedral curate, seeing that the dean was unwell, arose from his desk and walked over to him, just in time to catch him as he tottered. Dr. Garrett, whose residence is opposite the cathedral, was summoned. The dean was removed to his home, where he lies in a critical condition.

Belleville, March 12.—Another attempt at wife murder occurred in this city on Saturday, but not until to-day did the news become public, when a warrant was issued, charging Alex. Patterson, a well-known, middle-aged and prosperous drayman, with attempting to kill and murder his wife. The latter is in a bad condition, and several bruises testify to her brutal treatment. Patterson it is alleged, choked his wife, threw her out of the doors, then dragged her back into the house by the hair of the head, telling her he would do the same as Klingbeil did by murdering his wife last Monday. The prisoner was arrested on his rig at noon to-day by Constable Hayes. He has a terrible temper, not long ago deliberately killing one of his horses in a fit of anger. He has been accused several times of wife-beating, and two years ago was bound over to keep the peace. He will be remanded until the outcome of his wife's injuries is known.

The story of "An Alabama Home," presented by Marks Bros. Co., at the Opera House, March 15th, is one that appeals to every heart. Rose McLaren the heroine, having been disowned by her father, because of her refusal to believe her lover guilty of her brother's murder, turns to her lover's accusers and in a superb display of womanly emotion, rates with bitter scorn, her brother's real murderer. The beautiful scene in the prison between the heroine and the condemned man in which two hearts are laid bare, is one to convert the most obstinate cynic.

As Good as Married.

First Sailor—No, Bill, yer don't really know what life is till yer get spliced. Second Sailor—W'y, shiver me timbers, messmate! I've never been married, true, but I've had yellor fever and cholera, I've been frostbit, drowned, burned alive, eat by a shark, blowed up at sea and operated on for cancer. Wot more does a reasonable chap want?—London Answers.

The Real Thing.

Express Clerk—Value of this package, please? Fair Damsel—\$25,000. Express Clerk—Huh? Fair Damsel—You heard what I said. Those are love letters from old Bagsocoyne, and I'm sending 'em to my lawyer.

firm he represented being one of the heaviest dealers in grain in Canada.

MYLES PARROTT.

After a long illness, Myles Parrott died early Wednesday morning, at the General Hospital, Kingston. Mr. Parrott has lived in Kingston about three years, on Queen street, going to Kingston from Violet, where he was a prosperous farmer. Deceased was aged sixty-eight years, a Methodist and a reformer in politics. One daughter survives, his wife having died last September. The funeral took place Thursday afternoon.

See Too Much.

Some people see too much, others cannot see enough; but we feel confident that if you test the ability of the expert optician in charge of the new optical department at Medical Hall, you will see perfectly. We guarantee satisfaction.—Fred L. Hooper.

Wonders of Baalbec.

Baalbec, or Baalbek, is the name given a ruined city lying in ancient Coele-Syria, forty-five miles northwest of Damascus. There is nothing particularly remarkable about a ruined city being found in the locality mentioned, but the size of the blocks of stone used by the ancient builders of this particular city is something that has puzzled the modern engineers since the day when Baalbec was first made the Mecca of the oriental traveler. There are immense stones on every side of the visitor to this ancient pile of ruins, but the three most remarkable blocks—said to be the largest ever used in the construction of a building—are in a wall back of the temple of Baal. These immense stones are respectively sixty-four, sixty-three and sixty-two feet in length and each is thirteen feet in thickness, but the most wonderful thing in connection with them is the fact that they are at a place in the wall twenty-five feet from the ground. How these immense blocks of granite were ever raised to such a height is a question that has never yet been answered.

25% We will start the ball rolling 25%

by giving twenty-five per cent off china and pinked tea sets, and we will expect to clear out the balance of 50 sets in the next three weeks

THE COXALL CO.

Wherever Tuck's Rheumatic Bone Oil has been introduced everybody is talking about its wonderful curative powers. Here is what one sufferer writes:—

A Letter Dear Sir—I want everyone of Thanks. To know, what Tuck's Bone Oil did for me. I suffered for a year and nine months from a sore leg and at times the pain was almost unbearable. If I moved about the house I was obliged to go with my knee on a chair. I was under the doctor's care for months and was six weeks in the—hospital from which my husband brought me home not much improved. A neighbor told me of Tuck's Bone Oil and advised me to try it. I did so and at once began to get relief. Four bottles cured me and I can now walk over town and back again at my ease. I think Tuck's Bone Oil is the best medicine ever made.

MRS. J. HOPKINS,
Smith's Falls.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c. a bottle or sent prepaid by The Tuck Bone Oil Co., Limited, Smith's Falls, Ontario.

long malarial fevers produced by spasmodia. There are, secondly, those which are not communicable from person to person, but through external carriers only, such as soil, water, food, air, clothing and utensils. To this class belong yellow fever and Asiatic cholera. They are infectious. There are, finally, those which may be transmitted directly from a person or indirectly through carriers. To this class belong scarlet fever, measles, diphtheria, variola, influenza, erysipelas and varicella, perhaps also whooping cough. They are contagious and infectious.

Courting Customs of Siam.

In Siam the lighting of a cigar indicates a betrothal. In that country a person wishing to become engaged to the girl of his choice offers her a flower or takes a light from a cigar or cigarette if she happens to have one in her mouth, and thereupon, provided there is no impediment, steps are at once taken to arrange for the payment of the dowry. The families of the bride and bridegroom have each to provide a considerable sum. In Calabria, as in many parts of India, a lighted taper or a lighted pipe betokens the acceptance of the suitor for the hand of a lady in marriage. In Siberia it is the custom that when a suitor has been accepted by a girl she presents him with a box of cigars and a pair of slippers as a sign that he is to be master in the house.

Japan's Pancake Women.

One of the familiar sights on the streets of a Japanese town is the pancake woman, who, with her little brazier of coals and her tiny frying pan, is usually found on a corner not far from a school. She has a bowl full of delicious batter, a ladle and a cake turner, and there is apt to be a hungry crowd around her little stand as soon as school is out, for not many of the children are able to resist the smell of the crisp pancakes, at least if they have any money. For a small coin worth only a fraction of one of our pennies a child may fry and turn his own cakes, and happy is the one who has a number of coins in his little kimono sleeve and can fry and eat to his heart's content.

Camden, in the County of Lennox and Addington, containing 10 acres more or less.

Parcel No. 2.—The Northwest 1/4 of Lot No. 11 in the 6th concession of the said Township of Camden, in the County of Lennox and Addington containing 10 acres more or less.

Parcel No. 1 contains about 35 or 40 acres of good arable land, the balance being timber land and swamp. It is fairly well fenced and well watered, and has erected upon it a frame barn and two sheds.

Parcel No. 2 is pasture land without any buildings and well fenced with a patent fence. The 2 parcels will be sold separate or en bloc at the option of the Master, and subject to an annuity of \$300 a year against the 2 parcels payable to Eleanor McKeown and subject also to a reserve bid fixed by the Master.

The purchaser shall pay down a deposit in the proportion of \$10 for every \$100 of the purchase money, and the balance in one month thereafter without interest.

In all other respects the terms and conditions of sale will be the standing conditions of sale of this Court.

For further particulars, apply at the law offices of Messrs. Herrington Warner & Grange and Morden & Hutcheon, Kingston, Ont.

Dated the 6th day of February, A.D. 1906.

(Sgd) J. S. S. LAZARUS, Master.

Herrington, Warner & Grange,
Plt's Solicitors.

WANTED, by Chicago wholesale house, special representative (man or woman) for each province in Canada. Salary \$200 and expenses paid weekly. Expense money advanced. Business successful; position permanent. No investment required. Previous experience not essential to engaging.

Address Manager, 132 Lake Street, Chicago, Ill., U.S.A.

TO LET

TWO VIEWS OF CURZON.

He Is An Unbroken Colt, Or a Genius, Take Your Choice.

Now that Lord Curzon is no longer Viceroy the Indian press is paying its respects and disrespects to him with great freedom.

An ex-president of the National Congress says that Lord Curzon departed the shores of India "unwept, unhonored and unsung." Those who did him reverence were his unqualified panegyrists, "the men who had blinded their eyes and stuffed their ears with cotton all the time that there was going on a most unequal and deplorable struggle between the people, the educated classes specially, on the one side, and the unbridled and irresponsible autocrat on the other."

He then proceeds to characterize the ex-Viceroy as one utterly without modesty and blowing his own trumpet. "He carried about him," says the writer, "throughout his viceregal career the impetuosity of the boy at Eton and all the insubriety and immaturity which accompany youth. The fact is, he was an unbroken colt. He conjured himself as an autocrat ruling a larger population than that of the Czar of All the Russias. He pictured himself as one who blended a Tiberius and Suliman the Magnificent into one."

On the other hand, an equally decided article in the Calcutta Review declares that "it would be hard to find another ruler who combines in himself all those qualities, mental and moral, which Lord Curzon brought to bear on the difficult task of governing a vast country like India, and that it is no disrespect to Lord Minto to say that he does not possess the genius with which his predecessor was gifted."

GROWING BOYS.

Need an Occasional Tonic to Maintain Strength and Keep the Skin Clear.

On every side one sees young men and growing boys with pale, pasty complexions, their faces covered with pimples and their gate shambling and listless. Such a condition is extremely dangerous—the blood is out of order—a complete breakdown may result. To put matters right; to give that spring to the step; that clearness to the skin and that glow of active health to the face, a tonic is needed—Dr. Williams' Pink Pills are needed. As proof of this, Mr. Charles Diefenthal, 12 St. Ursule street Quebec, says:—"Frequently my studies necessitated my remaining up until a late hour. The result was that in December, 1903, I seemed to collapse. I was completely run down and went under the care of a doctor, but instead of gaining strength, I seemed to grow weaker. I could not take solid food, did not sleep well, and weakening night sweats gave me further cause for alarm. Dr. Williams' Pink Pills were brought to my notice and I began their use. Almost from the outset they seemed to help me, but it was some weeks

BLOWN INTO SPACE.

German Climber and Guides Have Terrible Experience.

Dr. Geehrs, of Mulhouse, Germany, a well-known climber, has just had a terrible Alpine experience. Accompanied by the guides Bener and Max Augdenblatten, he left Zermatt in cold but beautiful weather to make the first ascent of the Stahhorn, a difficult peak 12,400 feet high in the Mischabel range. The party reached the summit in safety, and, after a short rest, commenced the descent. About a quarter of an hour from the top a terrific hurricane was encountered. The guides dug their pioletos into the ice and held on.

Dr. Geehrs was blown off the slope into space time after time, but was dragged back by the guides to firm ground in each case and only with the greatest efforts.

If the rope had broken the doctor would have been hurled 4,000 feet below on to the glacier, of which he caught several glimpses while helpless in the air.

After half an hour the hurricane abated somewhat, and the three climbers, crawling on their hands and knees, and moving only one at a time, reached a sheltered spot, where they rested, and later made their way down to Zermatt.

Everything they had with them (even their clothing) was frozen hard as wood. The terrible strain of clinging on to the exposed slope had kept their bodies warm and saved them from being frozen to death in the glacial hurricane. When they arrived at Zermatt they could hardly walk or speak.

POPULAR HEARSES.

Hearses as equipages are used in Minnesota not only to carry people to the church, but to take them home again. The chief at the Yellow Medicine Indian Reserve goes to church every Sunday, proud as a peacock, lying in a hearse, looking out and bowing to his friends. The chief bought the hearse at a great price from a livery-stable man, who was glad to get the aged white elephant off his hands.

ROSY-CHEEKED BABIES.

Nothing in the world is such a comfort and joy as a healthy, hearty, rosy-cheeked, happy baby. But the price of baby's health and happiness is constant vigilance on the mother's part. The little ills of babyhood come suddenly, and the wise mother will always be in a position to treat them at once. Inpromptly relieving and curing the ills of babyhood and childhood no other medicine can equal Baby's Own Tablets, and they are guaranteed absolutely free from opiates and harmful drugs. Mrs. Wm. Sinclair, Hebron, N. B., says:—"Baby's Own Tablets are the best medicine I know of for curing the ills of young children. I always keep the Tablets in the house, and do not know how I could get along without them." Sold by all medicine dealers or by mail at 25 cents a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON.

CHAPTER XXXVI.

"Where is your wife?"

Cyril's arms, which had been held out to take her to his heart, dropped to his side.

"Where—is—my—what?" he exclaimed, gazing in profound amazement at the lovely face, which, though flushed with indignation, still conveyed a hidden and suppressed tenderness.

"Your wife," Norah repeated, her lips quivering; "where is Becca? Oh, how can you—" she meant, "offer to take me in your arms," but said, instead, "how can you come to me?"

"Becca! Do you mean Becca South?" said Cyril, more and more amazed. "How on earth should I know? What have I to do with Becca South, or Becca any one else?"

Norah's breath came fast, and her eyes dilated.

"Oh, how can you answer me so?" she said, piteously. "I know everything! It is useless to try and deceive me. It is wicked—cruel and wicked. Why have you come here?" and the lovely eyes grew dangerously limpid.

Cyril put his hand to his head. No doubt at that moment he fancied he was dreaming, and that it was only a vision of Norah which stood before him, asking the most extraordinary of conundrums.

"Norah," he said, desperately, "Norah, I don't know what you mean. I'm in a whirl. What are you doing here? Why, I've not seen her since the night of that confounded ball at Ferndale—" He stopped suddenly, for Norah had swayed slightly, and with a low cry, sank into the chair.

He sprang to her, but she put her hand out to keep him off.

He called upon her name in a frenzy, and as her eyes closed, he looked around for the bell. Not seeing it, he did, perhaps, the wisest thing he could do—flung up the window and seizing a shell which "ornamented" the table, flung it at the window opposite.

Jack's head appeared promptly, with every expression of wrath upon his face.

"Come over at once!" shouted Cyril, and before Norah had succeeded in fighting off the fainting fit, Jack Wesley was in the room, looking amazedly from one to the other.

"Well," he said, "what has happened? Lady Norah, are you ill? Cyril, are you mad? What have you been saying to her?"

"It's what she has been saying to me!" retorted Cyril, half demented.

Jack Wesley pushed him aside, and brought a glass of water and gave it to her, and she opened her eyes and fixed them on him penitently, and then on Cyril, with an expression difficult to describe, but full of tenderness and hope, and a half-fearful joy.

"Are you better, Lady Norah?" said Jack. "Don't pay any attention to him, please. Keep away, Cyril. Now, tell me what is the matter."

Then Norah opened her lips and struggled for words.

"Ask him to tell me the—the truth," she said, brokenly. "I can bear anything but this uncertainty. Ask him to tell me if it is true that he is married to Becca South."

"There!" exclaimed Cyril; "that's what she asked me before you came in. Tell her, Jack—"

"Hold your tongue!" said Jack Wes-

people at the station tell you— Why, by George! they must have mistaken the emigrant girl whose ticket I took for Becca," and in rapid sentences he told her of the incident.

"Oh, that was so like you, dear!" she murmured. "But—but it was cruel that you should be punished; I mean I—"

"Say both."

"That both should be punished because you were kind to a poor, lonely girl." "Yes," he responded, with something of his own bright, light-hearted smile, "but it will be a lesson to me. I'll never help any woman under fifty again. But Norah, dearest, tell me—the letters—what became of them?"

Norah shook her head.

"I do not know; I cannot—" guess she was going to say, then stopped, as Guildford Berton crossed her mind.

"And—and what are you doing here? Are you alone?" asked Cyril, in the tone of one who has so many questions to ask that he doesn't know which to put first.

"Not alone, dearest? There is someone with you?" He touched her black dress. "I have heard of—of your loss, dear. If I had only been with you! I am so sorry, Norah. I only heard of it five—ten minutes ago, from Jack here—"

Norah's eyes grew moist again, but she swept the tears away.

"Yes, I—I am alone," she said, looking down, and with a sudden sort of embarrassment, and she gently began to draw her hands away from him, reluctantly, clingly.

"What is the matter?" he asked, quick to perceive that something was wrong.

"What is it, dearest?"

At this juncture Jacked looked round.

"I think I have intruded long enough," he said; "I'll take myself off. You can call if you want me. Don't break another window, Cyril."

Norah held out her hand to him.

"Will you not say that you forgive me, Mr. Wesley, for my rudeness to you that night?" she said, her big eyes turned on him so pleadingly that Jack's heart, which was of the very softest, melted in a moment.

"I'd forgive you more than that, Lady Norah," he said; "and I understand now that the sting was meant for our young friend here rather than for me; and he got it. If you had seen him when I told him— But there," he said, quickly, "all that is part of the past misunderstanding, Lady Norah."

Norah looked up at him gravely.

"You are as good as Cyril said," she murmured, softly. "But—but you must not call me Lady Norah."

Jack stared at her.

"I—I beg your ladyship's pardon; Lady Arrowdale, I suppose I ought to have said."

"No," said Norah, "I am not Lady Anything, I am simply Norah Woodfern."

It was a day of surprises, but this statement, delivered in her calm, sweet voice, startled the two men pretty considerably. Cyril got hold of her hands again, and looked up at her almost in a fright. Goddesses do not lose their senses, or else he might have thought—

Jack was the first to speak.

"What do you say, Lady Norah?" he said, gravely, for he saw that something was coming.

"It is true," she replied, looking from one to the other. "I am not Lady Norah, the daughter of the Earl of Arrowdale, but the daughter of the countess' companion, Catherine." Her lips trembled,

use. Almost from the outset they seemed to help me, but it was some weeks before there was a material change for the better. From that on, however, recovery was rapid, and in a couple of months I was as well as ever I had been and able to resume my studies."

Every dose of Dr. Williams' Pink Pills make new, rich, red blood; every drop of pure blood gives strength and vitality to the whole system, and this strength brings health. That is why Dr. Williams' Pink Pills cure such cases as anaemia, all stomach and kidney troubles, St. Vitus dance, heart palpitation, the afflictions known only to growing girls and women; and a host of other ailments from which both young and old suffer through bad blood. Sold by dealers in medicine or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

ANSWERING INQUIRIES.

"I understand," said a facetious man who intended to play a joke upon an editor, "that you answer all sorts of questions here?"

"We do," replied the editor, politely. "Well, what I want to know is, if a woman has a number six foot, what size glove should she wear?"

The editor turned to his book-shelves, glanced into an encyclopaedia, a French dictionary, and the "Book of the Dog," and then said:

"After turning up several authorities, sir, I find that a woman with a number six foot should wear the size of gloves that fits her!"

A Most Attractive and Patriotic Policy.

We published in another section of this paper the advertisement of the Union Trust Company. This Company has large holdings of land along the line of the Grand Trunk Pacific in our Northwest.

The Union Trust Company has secured for the management of its Lands Department the exceptionally able services of Mr. F. W. Hodson, formerly vice stock commissioner of Canada and organizer of farmers' institutes.

The Union Trust Company is to be congratulated on securing Mr. Hodson for this position, as his mere connection with their land business will undoubtedly secure the confidence of the entire farming community of the country.

The plans of the Union Trust Company for sale of lands, colonization, settlement, etc., are most unusually helpful especially to the settler with small capital. Their scheme is a general and far-reaching one and it will certainly pay anyone contemplating taking lands up in the Northwest to communicate with them.

When the young husband reached home he opened the parcel he was carrying and displayed a number of placards, some of which read, "For Show," and others, "For Use." "There!" he exclaimed, triumphantly. "I flatter myself that I have at last solved the problem." "Solved the problem?" his wife repeated; "what in the world do you intend to do with those cards?" "I am going to give them to you," he replied, "so that you can put them on the various sofa cushions about the house."

25 cents a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

Mr. Staylale—"Y-as, I hate those—ah—simple-minded country people that show everything they feel." Miss West-end—"It is a mere matter of training. One of the first things I was taught was the art of appearing interested when bored half to death."

Convinced by Printed Testimony of the hundreds of the cured, Mrs. Benz, of 418 E. 8th street, New York, who was for years a great sufferer from Catarrh, procured two bottles of Dr. Agnew's Catarrhal Powder and it effected an absolute cure in a very short while. One puff through the blower will clear the head and stop headache. 50 cents.—113

Cholly—"Bah, Jove, y' know, Miss Savvam said I looked like an extremely clev'n man." Dolly—"Did she say who the clever man was?"

It is only necessary to read the testimonials to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a complete extingisher.

Customer: "The soles of these boots you have made me are far too thick." Bootmaker (blandly): "Ah, ma'am, that's an objection that will soon wear away."

We must go from heated rooms to the cold outer air, and the change sets us coughing. Curing colds is not hard for Allen's Lung Balsam. A neglected cold is troublesome and dangerous.

He: "I'm in love with a charming girl, and I'd like to ask your advice." She: "Are you? I shall be glad to help you all I can." He: "Well, how would you advise me to propose to you?"

Bickle's Anti-Consumptive Syrup is an unparalleled remedy for colds, coughs, influenza and diseases of the throat and lungs. The fame of the medicine rests upon years of successful use in eradicating these affections, and in protecting mankind from the fatal ravages of consumption, and as a neglected cold leads to consumption, one cannot be too careful to fight it in its early stages. Bickle's Syrup is the weapon, use it.

Little Willie—"I say, pa, what is an empty title?" Pa—"An empty title, my son, is your mother's way of referring to me as the head of the house when there are visitors present."

Muscular Rheumatism, produced by exposure, if neglected, develops into the chronic form with almost incredible rapidity. South American Rheumatic Cure is a quick-acting, safe, simple and harmless cure, acts directly on the system, not a liniment to temporarily deaden pain. An internal treatment that will absolutely cure most acute forms in from one to three days.—114

"Well," said Snaggs, "I think many dogs have more sense than their masters." "Yes," chimed in Cruggs, "I have a dog like that myself." And yet he couldn't make out why they laughed.

Cheapest of All Medicines—Considering the curative qualities of Dr. Thomas' Electric Oil it is the cheapest medicine now offered to the public. The dose required in any ailment is small and a bottle contains many doses. If it were valued at the benefit it confers it could not be purchased for many times the price asked for it, but increased consumption has simplified and cheapened its manufacture.

PROGRESS OF CREMATION.

According to the British Medical Journal, the total number of cremations in Great Britain during the year 1905 was 600, as against 566 in 1904 and 475 in 1903. Whereas, however, in 1904 there were only nine crematories at work, in 1905 there were twelve. The cremations were distributed among these as follows: Golder's Green, Hampstead, 252; Woking 95; Manchester, 100; Liverpool, 35; Glasgow, 35; Hull (Municipal), 15; Darlington, 4; Leicester (Corporation), 16; Birmingham, 22; Leeds (Municipal), 16; Ilford (City of London), 9; Bradford (Corporation), 1. The total number of cremations carried out at Woking from the date of its opening twenty years ago, to the end of 1905, is 2,748; those performed at Golder's Green number 635.

what she asked me before you came in. Tell her, Jack—"

"Hold your tongue," said Jack Wesley, whose acute brain was beginning to get the drift of things. "Are you married to the young person mentioned?" "Am I? Oh, great goodness, I shall go mad," said Cyril. "Married to her? You know; she must know, that I am not; that I would not marry any one but—but one woman, if my life depended on it!"

If there had not been that awful tragedy behind it, the situation would have been almost farcical. But it was very serious to two of them, and Norah hid her face in her hands and began to cry. "Oh, what shall I do?" she moaned, but with a cadence of joy and thanks-giving. "Oh, how—how wicked I have been!"

This brought Cyril on his knees beside her instantly, and he dragged her hands tenderly from her face and looked up at her, all his soul in his eyes.

"Norah, my darling, my darling!" he murmured, and a long string of passionate endearments. "What does it all mean? Why have you treated me so—so cruelly? Why did you not answer my letters? Why did you tell Jack?"—Jack had discreetly gone to examine a picture on the wall, and kept his back turned upon the pair—"why did you tell Jack that you were no friend of mine, and—and let me believe that you wished to see no more of me? Oh, my darling, you have nearly broken my heart!"

"Mine is—quite broken," whimpered Norah, her hands grasping his arm with little spasmodic pressures. "Oh, Cyril, I thought, I believed, that you had deserted me; that you were married."

"Deserted you? Married?" he repeated. "But why—why—why?"

"Because you went away with her—with Becca," said Norah, in a low voice. "I went off with Becca—poor, little Becca South!" he echoed. "Great Heaven! what made you think so?"

"They told me so at the station," said Norah, faintly; "and—you were with her that night of the ball, and I saw you—ah, I saw you give her the ring—"

Cyril uttered a groan of desperation. "I know! Yes, I gave her the ring. I once gave a child a stick of taffee, and Becca was no more than a child, a—nothing to me. I gave her that ring because she had found it, and she was unhappy about that, among other things, and I thought it would console her—"

"And—and then you went away without a word—"

"Without a word? Why, Norah, I wrote to you; I sent you a letter by her; I couldn't help going. I wrote and explained it all. I begged and prayed you to send me a word—just one word. But you didn't. Nor did you when I wrote from Brittany, imploring you to tell me why you had cut me at the ball. Why didn't you write?"

"I never got the letters, either of them," said Norah, the tears running slowly down her face, "and I thought—oh, Cyril, how could I help it?—that—that you wished to break off, that you had thought better of it, and—"

He puts his arms round her and strained her to him, and cut short her broken attempts at explanation. "Thank God! Thank God!" he exclaimed. "And that is all! You are not angry with me for anything? You—you love me still, Norah?"

"I have always loved you!" she panted, under her breath.

Jack had transferred his attentions to another picture, and the lovers had forgotten him.

"And you did not know why I had gone to Brittany?"

"I didn't know you had gone there. I never received either letter," said Norah.

"Then—then where are they?" demanded Cyril, of no one in particular.

Norah shook her head. Possibly she did not care very much. She had got her lover again and all in a moment joy had come back to her heart with him. She held him with that clinging grasp which only a woman knows the secret of, as if she feared some one would come and take him from her again; and her lovely eyes, full of subtle worship and tenderness, looked into his eager ones. "Where are they? And why did the

but the daughter of the countess' companion, Catherine." Her lips trembled, and she lowered her eyes. "I'll—I'll try and tell you," she went on, bravely. "You—you must neither of you speak until I have finished, for my head," and she put her beautiful hand to her forehead, "is whirling."

Cyril holding her hand, and Jack leaning against the window with his arms folded, she told the story and produced the certificates.

Cyril could scarcely keep silent until she had concluded, then he broke out: "It is false, Norah! It is a pure invention concocted to suit some purpose of Guildford Berton's. He is a scoundrel."

"He is a scoundrel, without doubt," said the grave voice of Jack Wesley. "But I think his story is true."

"I don't believe—" broke in Cyril.

"In the first place," went on Jack, very quietly and gently, "he would not have dared to concoct it, much less to forge these copies. He is too clever for that! You see, a lawyer's clerk could satisfy himself as to their genuineness by just taking a journey to Plymouth and these other places, and examining the registers—"

"Which may have been tampered with," said Cyril.

Jack Wesley smiled.

"I am sorry to dispel a delusion which has been of vast service to novelists; you can't tamper with registers nowadays. They keep a correct copy at Somerset House."

All Run Down

THIS is a common expression we hear on every side. Unless there is some organic trouble, the condition can doubtless be remedied. Your doctor is the best adviser. Do not dose yourself with all kinds of advertised remedies—get his opinion. More than likely you need a concentrated fat food to enrich your blood and tone up the system.

Scott's Emulsion of Cod Liver Oil

is just such a food in its best form. It will build up the weakened and wasted body when all other foods fail to nourish. If you are run down or emaciated, give it a trial: it cannot hurt you. It is essentially the best possible nourishment for delicate children and pale, anaemic girls. We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

Cyril's face fell.

"No! The story is true, and as Lady—I mean Miss Woodfern says, she is no longer—"

"Which doesn't matter in the slightest!" exclaimed Cyril, his face flushing. "As it happens, I have a story to tell—"

He stopped suddenly to utter an exclamation of surprise and pain, for Jack had administered to him a decidedly sharp kick upon the ankle. "Eh? What?"

Then, catching the expression of warning in Jack's eyes, he colored still more furiously, and changed the direction of his words. "But I won't trouble you with that now, dearest. What if it is true, this—this revelation? It doesn't matter to you—nor me, Norah?"

"To me—no!" she smiled, through her tears.

"And as for men, I'm—yes, don't be angry, dearest—I am glad! Do you remember our talk in the woods? Do you remember my saying that I wished you weren't a peer's daughter—"

"I remember every word," she answered, shyly, her eyes dwelling upon him with as much of worship in them as a woman ever permits her eyes to reveal. "Well, then, I am happy now!" he said, brightly. "You see," and he laughed, "I'm so confoundedly proud—"

Jack Wesley, with his back turned to them, grinned.

"And I might now and then have thought that you had thrown yourself away, and that you regretted it, but now—"

"You can both revel in poverty together," remarked Jack, blandly.

"Ex-actly," retorted Cyril, but with rather a guilty air; "we can face the world hand in hand, and—"

"Be happy ever afterwards," said Jack. "Don't mind him, dearest," said Cyril. "It is only his way; you'll get used to it. And now for a bit of good news. We shan't be so very poor, after all. Thanks to Jack, here, who pretends to be a bear, but is really as soft—as soft—"

"As an imbecile," put in Jack, in a low voice.

"I've got enough work to last for—"

"Your life," growled Jack, knowing how very little more work would be done.

Cyril laughed.

"I can't get a word in," he said. "But no matter. And now, dearest—"

"And now what about Lady—I beg pardon—Miss Norah's dinner?" put in Jack. "Would it be very wicked if I suggest that the committee adjourn to Cyril's favorite restaurant?"

Cyril laughed.

"Jack is always thinking of his dinner," he said.

"Because he has nothing better to think of, and no one to think for him," said Jack, with a touch of gravity and—could it be?—envy.

Norah smiled at them both.

"I will do anything you wish," she said, so sweetly that Cyril had hard work to keep from kissing her straight before Jack.

When she left them to put on her outdoor things, Cyril exclaimed in a whisper:

"You stopped me in time, Jack! I was just going to tell her!"

"You were. And would have upset the whole bag of tricks just as they were arranging themselves nicely."

"But—but I shall have to tell her!" said Cyril, with a troubled frown.

Jack thrust his hands in his pockets, and screwed up his mouth.

"If you will take my advice, just for once, you will keep that bit of information until—well, until after you are married," he said. "Blurt out to her that you are the Earl of Arrowdale, and—well, you'll see what happens. Miss Norah's as sweet— Look here, lad; for some inscrutable reason Providence has seen fit to bestow upon you an angel in the guise of a woman—hold on a minute!—but angels have some pride, and if you tell her who and what you are, her pride may take alarm. Keep quiet for a little while longer, and thank heaven for its goodness to a young cub who doesn't

HE FEELS AS YOUNG AS EVER

MR. CHESTER LOOMIS TOLD DODD'S
KIDNEY PILLS.

And From a Used Man He Became as
Smart as a Boy.

Orland, Ont., March 5—(Special).—Mr. Chester Loomis, an old and respected farmer living in this section, is spreading broadcast the good news that Dodd's Kidney Pills are a sure cure for the Lame Back and Kidney Disease so common among old people. Mr. Loomis says:

"I am 76 years of age and smart and active as a boy, and I give Dodd's Kidney Pills all the credit for it."

"Before I started to use Dodd's Kidney Pills I was so used up I could hardly ride in a buggy, and I could not do any work of any kind. Everybody thought I would not live long. Dodd's Kidney Pills are a wonderful remedy."

The Kidneys of the young may be wrong, but the Kidneys of the old must be wrong. Dodd's Kidney Pills make all wrong Kidneys right. That is why they are the old folks' greatest friend.

WHY I DISLIKE UMBRELLAS.

A Retired Burglar Gives His Experience
When On a "Job."

"To this day," said the retired burglar, as he watched a woman close and place a dripping umbrella in a stand, "to this day I never see an umbrella without thinking of an experience I had with a lot of them once in the kitchen of a farmhouse."

"I had a complete view of the whole interior of the kitchen, as I walked past the house by day, and I had taken, as one might say, in a single glance, an instantaneous photograph. I knew there was no table standing in the middle of the room, as you are likely to find 'n some kitchens, and I knew the location of every chair, where the stove stood, and where the door was that opened into the other part of the house."

"But that night when I set out to walk simply across the middle of it, I came to grief."

"The back door I opened easy enough, and, in fact, it seemed as if everything was going to be easy, but at the second step forward to cross that kitchen I kicked against something that sprang back and jumped away from me, and scraped along the floor. So I started off in another direction, but the first step I took that way I brought up against another one of those things. It certainly did put my nerves on edge."

"But I started again, still making for that inner door, and going now very carefully, and bent forward, listening, as one is likely to do in the dark, and the first thing I knew I went up against another of those things. I was leaning forward, and over I went."

"But I had hung on to my lamp, and with its aid I found that the floor was covered with open umbrellas."

TOBACCO AS CURRENCY.

Its Use Among Natives of British New Guinea Demoralizing.

Capt. Barton, the Acting Administrator of British New Guinea, reporting to the Federal Government of Australia, tells of the deadly stagnation of trade. Thousands of young, able men in the coast villages, he says, do little else but eat and sleep.

"In my opinion, one of the greatest curses to the native is trade tobacco. He will go to work for a few weeks or months and earn a few pounds, then returns to his home and leads the life of a gentleman. He is able to purchase with the tobacco he buys the best of

compliment to my taste and judgment."
 "What did he do?" asked her friend.
 "He wanted me to marry him."

Finally Hubert was again arrested on Mme Williseck's complaint and sentenced to six months' imprisonment. He appealed, was allowed out on bail, went straight to Mme. Williseck's shop and committed murder. He has been arrested.

ISSUE NO. 10-06

HUNDREDS DIE IN MINE FIRE

Terrible Explosion in a Colliery Near Calais France, Entraps 1,200

Paris, March 10.—A mining catastrophe of incalculable horror and magnitude has stricken the great coal centre of northern France. An explosion of fire damp at 7 o'clock this morning carried death and destruction throughout the network of coal mines centred at Courrières, and fire followed the explosion, making rescues difficult and almost impossible. The intense excitement and confusion in the vicinity prevented early estimates of the exact loss of life, but a despatch received here at 4.35 p.m., gave 1,404 miners entombed, and probably lost. At 8.45 o'clock this evening a brief despatch from Lille announced the awful total of 1,193 dead.

All France has been profoundly shocked by the magnitude of the disaster, which is said to be the greatest in the history of continental mining.

IMPOSSIBLE TO RENDER AID.

Gas is pouring into pit No. 2, preventing an entrance, and it is impossible to succor the men imprisoned there. In pit No. 3 the cages will not work, having been damaged by the violence of the explosion. The rescue work, therefore, is proceeding mainly in pit No. 4.

The rescuers are made up of engineers and the personnel of the surrounding mining towns.

Ten miners from pit No. 11 were removed alive, but none of the 858 miners who entered pit No. 4 has yet been brought out. Of the 500 miners who descended there this morning, according to a despatch from Lens, 388 have been brought out, but the rescue of the others is impossible. In pit No. 3 only 13 men out of 443 have been rescued, and as the ladders are broken and the cages jammed the rescuers despair of helping the others. The Prefect of Pas de Calais, M. Arras, is directing the work of rescue at pit No. 11, near the scene of the main catastrophe. It is possible that the rescuers may be able to ap-

proach the lateral galleries, and fifty miners, headed by Engineer Bar, have been formed into a relief gang, and will make an attempt to reach them.

Foreman Lecomte came up from the mine this afternoon and reported a terrifying scene below.

FAMILIES CROWDED THE SHAFTS.

The families of the entombed miners crowded about the shaft seeking husbands or fathers and threatening in their efforts to obtain details to force back the gendarmes who kept them from the mouth of the pit. The populace of the district is appalled by the disaster, which affects every household. Those persons who were rescued were terribly burned. The latest estimates place those taken out at 591.

Throughout the afternoon the heroic efforts at rescue were continued, but nightfall brought the conviction that the entombed men had been suffocated, and the despatch from Lille at 8.45 p.m. announcing the number of dead at 1,193 appears to remove the last hope that others may be brought to the surface alive.

A TERRIBLE EXPLOSION.

The catastrophe took place shortly after 1.795 men had descended into the mine this morning. There was a deafening explosion, which was followed by the cages and mining apparatus being hurled from the mouth of the Courrières mine. Men and horse nearby outside the mine were either stunned or killed. The roof of the mine office was torn off. Immediately following the explosion flames burst from the mouth of the pit, driving back those without who sought to enter and dooming those within. The work of attempting to rescue the imprisoned miners was hastily begun by officials, engineers and miners from the surrounding mines, who formed parties and made heroic efforts to penetrate the smoke and foul gases and bring out the imprisoned.

DOMINION PARLIAMENT

GOVERNOR GENERAL'S SPEECH AT THE OPENING.

A despatch from Ottawa says: The Canadian Parliament opened here with all due ceremony on Thursday afternoon. There was a large attendance of members, and every available seat in the House was taken by the public. Society was very much in evidence.

TEXT OF THE ADDRESS.

The speech from the throne was as follows:

Honorable Gentlemen of the Senate and House of Commons:

In again summoning you to meet for the despatch of business I am glad to be able to congratulate you on the prosperity prevailing throughout the Dominion.

The loss which Queen Alexandra has sustained through the death of her father, the King of Denmark, has occasioned much sorrow throughout the land, and I am satisfied that the warm sympathy of the people of Canada will be readily extended to her Majesty.

INAUGURATING NEW PROVINCES.

It afforded me much pleasure as the chief representative of his Majesty to take part in the inauguration of the Provinces of Alberta and Saskatchewan as constituents of the Confederation. The universal rejoicing on the assumption of Provincial autonomy everywhere was gratifying to witness, and I venture to

document will be laid before you.

The legal experts appointed to revise, classify and consolidate the public general statutes passed since the revision in 1876 have completed their task, and it is expected that the volumes will be ready for distribution before July.

AMEND LORD'S DAY ACT.

A measure for the better observance of the Lord's Day will be submitted for your consideration.

You will be invited to consider among other subjects, bills to amend the Railway Act, the Fruit Marks Act, and Act respecting usury, and also the Dominion Elections Act.

Gentlemen of the House of Commons:

The accounts of the past year will be laid before you. The estimates for nine months, embracing a portion of the proposed fiscal year terminating on the thirty-first day of March, 1907, will be submitted for your approval at an early date.

WISDOM AND MODERATION.

Honorable Gentlemen of the Senate, Gentlemen of the House of Commons:

I invite your earnest attention to the several subjects I have mentioned and to the general business that will come before you, and I trust your deliberations will be guided by wisdom and moderation.

The House had only a short session on Friday, lasting for about 20 minutes. Hon. Mr. Sifton had the honor of opening the session in a business way by presenting a petition from some of his constituents. Sir Wilfrid Laurier then moved that the select committee for the appointing of standing committees be composed of the following: Sir Wil-

EXPERIMENTS WITH FARM CROPS.

Many New Varieties of Seeds Being Distributed Free of Charge.

The members of the Ontario Agricultural and Experimental Union are pleased to state that for 1906 they are prepared to distribute into every township of Ontario material for experiments with fodder crops, roots, grains, grasses, clovers, and fertilizers. Upwards of 1,600 varieties of farm crops have been tested in the Experimental Department of the Ontario Agricultural College, Guelph, for at least five years in succession. These consist of nearly all the Canadian sorts and several hundred new varieties, some of which have done exceedingly well in the carefully conducted experiments at the College and are now being distributed free of charge for co-operative experiments throughout Ontario. The following is the list of co-operative experiments in agriculture for 1906:

No.	Experiments.	Plots.
1—	Three varieties of Oats	3
2—(a)	Three varieties of Six-rowed Barley	3
(b)	Two varieties of Two-rowed Barley	2
3—	Two varieties of Hulless Barley ..	2
4—	Two varieties of Spring Wheat ..	2
5—	Two varieties of Buckwheat	2
6—	Two varieties of Field Peas	2
7—	Emmer and Spelt	2
8—	Two varieties of Soy, Soja, or Japanese Beans	2
9—	Three varieties of Husking Corn ..	3
10—	Three varieties of Mangolds	3
11—	Two varieties of Sugar Beets for feeding purposes	2
12—	Three varieties of Swedish Turnips	3
13—	Kohlrabi and two varieties of Fall Turnips	3
14—	Parsnips and two varieties of Carrots	3
15—	Three varieties of Fodder or Silage Corn	3
16—	Three varieties of Millet	3
17—	Three varieties of Sorghum	3
18—	Grass Peas and two varieties of Vetches	3
19—	Two varieties of Rape	2
20—	Three varieties of Clover	3
21—	Sainfoin, Lucerne, and Burnet ..	3
22—	Seven varieties of Grasses	7
23—	Three varieties of Field Beans ..	3
24—	Three varieties of Sweet Corn ..	3
25—	Fertilizers with Corn	6
26—	Fertilizers with Swedish Turnips ..	6
27—	Sowing Mangels on the level and in drills	2
28—	Two varieties of early, medium, or late Potatoes	2
29—	Three Grain Mixtures for grain production	3
30—	Three mixtures of Grasses and Clover for hay	3

The size of each plot in each of the first twenty-seven experiments and in Nos. 29 and 30 is to be two rods long by one rod wide; and in No. 28, one rod square.

Each person in Ontario who wishes to join in the work may choose any ONE of the experiments for 1906, and apply for the same. The material will be furnished in the order in which the applications are received until the supply is exhausted. It might be well for each applicant to make a second choice, for fear the first could not be granted. All material will be furnished entirely free of charge to each applicant, and the produce of the plots will, of course, become the property of the person who conducts the experiment.

J. BUCHANAN,

Director.
Ontario Agricultural College,
Guelph, March 5th, 1906.

FRENCH CABINET RESIGNED.

Was Defeated on the Question of Church Inventories.

A despatch from Paris says: Prime Minister Rouvier and the members of his Cabinet resigned on Wednesday, following a debate in the Chamber of Deputies on the Government's application of the law regarding the taking of

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

THE ESTIMATES.

Hon. Col. Matheson, the Provincial Treasurer, said that the estimates showed a large increase, but that the increase was in reality smaller than the figures would indicate. There were several heavy offsets that were concealed in the intricacies of bookkeeping, which would reduce the increase by \$200,000.

The total estimates are \$5,625,543. The expenditure last year was \$5,398,016. The estimated increase is \$229,526. To this must be added the very large increases the Government's new educational policy will entail. The educational estimate this year is the heaviest item. A total of \$1,233,416 is asked as against \$1,131,799 expended last year. For administration of justice \$519,000 is asked, an increase of \$18,000.

The Agricultural Department asks for \$446,000, a \$41,000 increase. The statement applies \$482,805 on capital account.

Colonization and mining roads will get \$212,410.

The increase in civil government expenses is \$57,602, which gives every man in the civic service at the buildings from \$50 to \$500.

Over \$101,000 is allowed for increases in the maintenance of public institutions.

Crown lands gets \$427,525, an increase of \$105,794.

Public works include \$48,600 for two cottages for forty patients each at Woodstock Asylum, and \$7,000 for an addition to the O. A. C. chemical laboratory.

Under miscellaneous items are included: \$7,500 for enforcing the Liquor License Act, \$6,000 for wolf bounty, \$8,000 for the Hydro-Electric Power Commission, \$5,000 for the University of Toronto Commission, and \$10,000 for gratuities.

Salaries and expenses of the Agricultural College are placed at \$97,883, as compared with \$89,373 in the estimates of 1905. There is \$11,000 increase in the estimates for dairy instructors. The Eastern Dairy School gets an increase of \$5,000.

For incidentals the sum of \$22,000 is allowed, as compared with \$16,000 last year.

NEW JAIL FOR COBOURG.

The private bills committee decided to report Mr. Preston's bill to authorize the United Counties of Northumberland and Durham to raise \$60,000 by the issue of debentures payable in 30 years, for the purpose of erecting a new and modern jail at Cobourg. Many condemnations of the old jail have been voiced by the inspectors of such institutions. Nevertheless it has been considered by the Counties' Council that the structure might be renovated in such a way as to fit it for use as a House of Refuge. Land has been purchased to carry out this project. The new jail will be adjacent to the court-house, from which the old lock-up was distant two miles.

TO INSPECT CHEESE FACTORIES.

The appointment of three inspectors to enforce the maintenance of sanitary conditions in the 1,200 odd cheese factories and creameries as well as the many farm dairies of the province was the request of a deputation which waited on Hon. Nelson Monteith, Minister of Agriculture, yesterday, on behalf of the Eastern and Western Dairymen's Associations. It was suggested that two inspectors should perform the duties in the east and the other in the western portion of the province. It is not expected that the new officials will be able to inspect all the places in which cheese and butter are manufactured, but it is felt that they would learn in what factories unsatisfactory conditions prevail, and visit them. "I for one member of the Cabinet will be pleased to do what I can to forward the idea," Hon. Mr. Monteith said.

...representative of his majesty to take part in the inauguration of the Provinces of Alberta and Saskatchewan as constituents of the Confederation. The universal rejoicing on the assumption of Provincial autonomy everywhere was gratifying to witness, and I venture to say that in no part of the world could a more contented population be found. The universal sentiment was one of abounding confidence in the future.

LARGEST TRADE ON RECORD.

The bountiful harvest with which we have been blessed in the past season, together with the continued development of our industries and transportation facilities, have so stimulated business in all parts of Canada, and have given such an impetus to our exports and imports, that the trade both with the United Kingdom and foreign countries for the current fiscal year, gives promise of being the largest on record.

The flow of immigrants seeking homes in the three prairie Provinces still continues, and from the present outlook the number will be in excess of any previous year, and it is satisfactory to note the increasing proportion from the British Isles.

A treaty on behalf of Canada has not been concluded between the United Kingdom and Japan, which it is confidently hoped will largely increase our trade with the people of that progressive empire. When the formal documents have been received they will be laid before you.

NEW FOREST RESERVES.

The rapid destruction of our forests now going on will, unless the operations of the lumbermen be prudently regulated in the future, and a system of reforestation adopted, result in grave consequences, affecting the uniform flow of our rivers and limiting our valuable water powers to a few months in the year. A bill will be submitted for your consideration empowering the Government to set apart forest reserves on lands under its control.

In accordance with the offer made by my Ministers to the Government of the United Kingdom, the Imperial Treasury has now been relieved from the cost of garrisoning Halifax, and arrangements are in progress for taking over the defence of Esquimaux, and hereafter detachments from the permanent force of Canada will have charge of both these important stations. You will be invited to consider the propriety of making such a change in the fiscal year as will bring it more into harmony with the active business season.

THE INSURANCE INQUIRY.

The result of the investigation into the administration of leading life insurance companies in the neighboring Republic as naturally created some uneasiness in the public mind as to the condition of Canadian companies. A commission has therefore been issued to inquire into and report on the management and financial standing not only in companies holding Canadian charters, but also of all companies doing business under license in Canada.

Satisfactory progress has been made in the exploration and surveys of the eastern division of the National Transcontinental Railway and it is expected the contracts for the construction of two important sections embracing together about 400 miles will shortly be executed.

INTERNATIONAL WATERWAYS.

The interim report of the Canadian section of the International Waterway Commission will be laid before you. The work of the joint Commission has been somewhat delayed owing to a doubt as to the jurisdiction of the American section. The great development of commerce on the waters dividing the two countries and the opportunities for the generating of electric power at many points necessarily evolve questions which can only be dealt with by international arrangement or treaty. At Niagara the Commission will have to consider how best to preserve the scenic effect of the Falls, while not unduly restricting the use of the flow of the Niagara River so valuable for the power purposes.

REPORT ON TRANSPORTATION.

A report has been received from the transportation Commission containing several important recommendations; the

Hon. Mr. Sifton had the honor of opening the session in a business way by presenting a petition from some of his constituents. Sir Wilfrid Laurier then moved that the select committee for the appointing of standing committees be composed of the following: Sir Wilfrid Laurier, Mr. R. L. Borden, Hon. Mr. Paterson, Hon. Mr. Hymans, Hon. Mr. Haggart, Hon. Mr. Calvert, and Mr. Taylor.

Mr. Foster enquired when they could expect a number of returns which had been moved for last session but not presented. One of these was from the Public Works Department, and there were two from the Department of the Interior, the first regarding timber licenses and the second regarding the scrip enquiry.

Mr. Hymans said that the return in regard to public works would be ready on Monday. Mr. Oliver said that the returns from the Department of the Interior would be ready on the same day. The evidence which had been taken in regard to the scrip had not yet been printed, but would be if the House desired it.

AUDITOR-GENERAL'S REPORT.

Hon. Mr. Foster enquired when they could expect the report of the Auditor-General. Sir Wilfrid said he had spoken to the Auditor-General in regard to the matter, and was in a position to say that the first part of the report would be laid on the table on Monday, and the balance a few days later.

BRITAIN OWNS FIFTH OF WORLD.

First Census of the Empire Shows 400,000,000 Population.

A despatch from London says: The result of the first organized census of the British Empire is issued in a blue book. It shows that the Empire consists of an approximate area of 11,908,378 square miles, or more than one-fifth of the entire land area of the world. The population is about 400,000,000, of whom 54,000,000 are whites. The population is roughly distributed as follows:—

In Asia	300,000,000
In Africa	43,000,000
In Europe	42,000,000
In America	7,500,000
In Australasia	5,000,000

The most populous city after London is Calcutta. The highest proportion of married persons is in India, Natal, Cyprus and Canada. The lowest is in the West Indies. Depression in the birth rate is general almost everywhere, but is most remarkable in Australasia. The proportion of insane persons in the colonies is much below that in the United Kingdom. Insanity is markedly decreasing in India, despite consanguineous marriages. Indeed, the theory that such marriages produce mental unsoundness is little supported by these statistics.

DARING FORGER ARRESTED.

He Passed \$18,000 Worth of Bogus Pay Checks.

A despatch from Chicago says: The principal in the \$18,000 forgery of Illinois Steel Company pay checks in South Chicago has been discovered. According to his own confession, Louis Longpre is the man. He was arrested on Tuesday in the office of the Western Bank Note Company, where he has been employed as an engraver. Longpre confessed that he made the plate from which the checks were printed and that he assisted in cashing them among the South Chicago merchants. Marie Longpre's wife, was arrested Monday and was identified by several merchants as having cashed some of the pay checks. There are several others under arrest, but the police refuse to tell their identity. Longpre in previous years has been arrested on suspicion of being concerned in other big forgeries.

Toronto's assessment this year is expected to be increased by \$10,000,000.

The Berlin Boerse reflects the unrest in German financial circles, caused by that country's attitude at the Algieras conference.

Church Inventories.

A despatch from Paris says: Prime Minister Rouvier and the members of his Cabinet resigned on Wednesday, following a debate in the Chamber of Deputies on the Government's application of the law regarding the taking of inventories of church property. M. Rouvier demanded a vote of confidence, which was defeated by 273 to 234.

The Cabinet crisis comes at a most dramatic moment, when the Franco-German contest has reached a decisive stage, and may exert an important adverse influence on the Algerias conference and European affairs.

The Government succeeded in holding only 234 votes, while the various elements in opposition, Clericals, Socialists, and Nationalists, united and polled 27 votes, thus placing the Ministry in a minority of 33.

Premier Rouvier, with all his colleagues, immediately proceeded to the Foreign Office, where a joint letter of resignation was prepared. Later M. Rouvier presented this letter to President Fallieres, who accepted the resignations. Having returned from presenting to President Fallieres the resignation of the Ministry, M. Rouvier was surrounded in the lobbies of the Chamber of Deputies by groups of members, who expressed their regret at his abandonment of office. M. Rouvier displayed not the slightest emotion.

DEATH OF HALIFAX PRELATE.

Archbishop O'Brien Expires After Few Hours' Illness.

A despatch from Halifax, N.S., says: Cornelius O'Brien, Roman Catholic Archbishop of Halifax, died suddenly at 11 o'clock on Friday night. For four or five years his Grace had been in somewhat poor health, suffering from an affection of the kidneys, but it was apoplexy that proved the immediate cause of death. Friday morning the Archbishop rose feeling about as usual, but in the afternoon he complained of indigestion, from an acute form of which he was a sufferer. He went to bed and sent for his physician, who came and prescribed. The doctor was called for again at 10 o'clock at night, but saw no reason for thinking it more than indigestion. At 11 o'clock his Grace asked his niece, who was in the room, to get him a glass of water. She went after it, and returning in a minute, found the prelate dead on his bed. He had expired in a moment, and without a pang.

CARNEGIE ON WEALTH.

Millionaires Who Laugh Are Rare, Says Carnegie.

A despatch from London says: Andrew Carnegie has written to a newspaper here declaring that the advantages of wealth are trifling. He says, "Beyond a competence for old age, which need not be great, and may be very small, wealth lessens rather than increases human happiness. Millionaires who laugh are rare."

SALARY FOR BRITISH MEMBERS.

Bill Carried to Pay Each of Them One Thousand Five Hundred Dollars.

A despatch from London says: The House of Commons, after a discussion occupying the whole of the Wednesday evening session, carried by a majority of 238 the motion introduced by the capitalist Liberal, Wm. Hesketh Lever, representing the Wirral division of Cheshire, in favor of payment to members of Parliament of \$1,500 yearly.

LIVERPOOL WITH CANADA.

Big British Port Will Petition to Remove Embargo.

A despatch from London says: Liverpool City Council will petition for the removal of the cattle embargo in the interests of the meat consumers and for the benefit of the trade of the port.

and butter are manufactured, but it is felt that they would learn in what factories unsatisfactory conditions prevail, and visit them. "I for one member of the Cabinet will be pleased to do what I can to forward the idea," Hon. Mr. Monteith said.

DAIRY HERD.

Mr. Sutherland asked a number of questions respecting the Ontario Agricultural College Farm, particularly with regard to the dairy herd kept there and the output of milk from it. He was supplied with the desired information by the Minister of Agriculture, who stated that from 1895 the average yearly production of milk from the herd had been 23,200 pounds.

JOINT STOCK COMPANIES.

M. Hoyle's bill providing that hereafter all promoters of joint stock companies selling shares in the Province of Ontario shall file with the Government their prospectuses and these prospectuses shall contain full and accurate particulars as to the allotment of capital stock, the character of the business to be conducted, etc., was warmly endorsed by both sides of the House. The bill is an important one, and its passage, which is now sure, will give a valuable safeguard to investors against the wiles of professional promoters who issue misleading and alluring prospectuses of enterprises in which the promoters themselves are to be the chief beneficiaries.

WOULD CHEAPEN LAWSUITS.

An enlargement of the jurisdiction of the Division Court is contemplated by the bill to amend the Division Courts Act, of which T. H. Lennox, M.P.P., for North York, has given notice. At present suit can be entered in those tribunals for damages from \$60 up to \$100 on open account, and up to \$200 where the amount is ascertained. Suit can be entered in the County Court for damages or on a running account up to \$200, and where the amount is known, up to \$600. Cases of either sort are tried by the same judges or by a jury. Expenses of action in the County Court are heavy as compared with those in the Division Court. M. Lennox would include within the jurisdiction of the latter tribunals actions up to \$100 in suits for damages, \$200 in open accounts, and \$600 where the amount is known. In the County Courts suits for \$400 for damages or on running accounts and \$500 where the amount is ascertained it would be permissible. He would also make it possible to serve any papers in the Division Court as in the High Court, instead of through bailiffs and officers.

RETURNS ASKED FOR.

Mr. McDougall (Ottawa), obtained an order of the House for return of copies of all documents showing amounts and prices of all commodities supplied either to Government or to Commissioners of the Temiskaming and Northern Ontario Railway by the license inspector at Mattawa. Also on order for a return, giving the names of all officials replaced by the Government in East and West Nipissing, with reasons for their dismissals.

THE LIST OF DISMISSALS.

The leader of the Opposition obtained an order of the House for a return giving a list of all persons in the service of the province on Feb. 7th, 1905, who have since retired from the service, distinguished as follows:—(a) Those who voluntarily retired. (b) Those whose resignations were called for. (c) Those who were dismissed. (d) Those in regard to whose conduct an investigation was held, showing where resignation was called for, or dismissal took place, the reasons or cause therefore in each individual case.

WEALTHY PAUPERS.

Mr. Eilber's bill to recover maintenance from inmates of houses of refuge possessing property, was given its second reading. In his own County of Huron he instanced four cases, where the persons living on the charity of the county had among them more than \$2,000. One correspondent mentioned an inmate of a house of refuge who had over \$1,000 in the bank and a house and lot valued at \$750. Another man had a paid-up life insurance policy. It pro-

posed also to have houses of refuge inspected by the Inspector of Jails and Prisons, who, he thought, had ample time on his hands for this duty.

A MONSTER ENGINE.

Will Haul C.P.R. Transcontinental Train in One Section.

A despatch from Montreal says: The C. P. R. is experimenting with what is said to be the largest locomotive ever built. This locomotive was designed by Mr. Vaughan, assistant to President Van Horne. It left the shops on Tuesday night under its own steam for the North Bay division, on which it will be tried out.

The C.P.R. is trying to get an engine that will take the Transcontinental all the way to Vancouver in one section. Hitherto when traffic has been at all heavy it has been found necessary to break the Transcontinental into two sections. This new engine, if it fulfills expectations, will take a train of twenty passenger cars across the continent.

Though the C.P.R. authorities admit that they have built the largest engine ever constructed in America, they will not give out any particulars as to its weight or manner of construction.

ENA IS NOW A CATHOLIC.

Impressive Ceremony at the Conversion of the Princess.

A despatch from San Sebastian, Spain, says: The impressive ceremony of the conversion of the Princess Ena of Battenberg to the Roman Catholic faith prior to her marrying King Alfonso occurred on Wednesday in the chapel of the Palace of Miramar. The members of the royal family were deeply moved, the Princess Beatrice, Princess Henry of Battenberg, mother of the Princess Ena, and Princess Ena were in tears. An artillery salute announced the termination of the ceremony, after which the royal party lunched together. The town enjoyed a holiday in honor of the event, processions headed by bands of music passing constantly through the streets.

MURDER AT WINNIPEG.

A Drunken Quarrel Followed by a Stabbing.

A despatch from Winnipeg says: A Galician named Thomas Korchzynski was murdered in a row in a tenement house in the foreign quarter on Saturday night. Another Galician named Fred Huyk has been arrested charged with the crime. About 25 foreigners in the house had been drinking and celebrating before the altercation, which terminated in a fight between Korchzynski and Huyk. They went outside to settle the difference and Huyk stabbed deceased four times, inflicting wounds which caused death shortly afterwards. The police have arrested all the parties implicated. Huyk has a bad record, having served eighteen years in prison in Austria for killing a police officer. He has a wife and family in his native country. His victim was a young man, 27 years of age.

CANCER CURES WITH RAYS.

Prof. Schiff Successfully Uses Rontgen and Radium.

A despatch from Berlin says: Prof. Edward Schiff, of Vienna, who was one of the first physicians to study the healing effect of the Rontgen rays, describes in a Munich medical journal three cases in which he has succeeded in healing cutaneous cancer with the aid of Rontgen or radium rays.

In opposition to the practice of other physicians, who assist the healing process with slight operation and the application of certain chemical materials, Prof. Schiff used only the rays. One case was that of a lady of 75 years of age, who had cancer in the right foot.

A British Royal Commission which investigated the legal status of trades unions holds that they should be declared legal institutions, and makes important recommendations.

UNITED STATES.

The A. O. U. W. Grand Lodge, of New York, decided on an advance in rates,

refused to vacate her building. She snapped the trigger and Moyaen fainted from fright. It was thought for a time he was dead.

GENERAL.

Revolutionists in San Domingo, while making a false surrender, started a fight, in which six were killed.

TIRED OF CULTURE.

Famous Surgeon to Study Civilization's Lowest Scale.

A Chicago despatch says: Dr. Nicholas Senn, one of the most famous surgeons in the United States, is tired of civilization, and is going back to the simple life in the wilderness of Africa.

"I want to get into the Zambesi district before it becomes too civilized," said the great surgeon. "The savages will give me a good vacation. The races of the region, together with the flora and fauna, are the things that interest me. It will be a somewhat dangerous trip, owing to the unhealthy climate, and it looks now as if I would have to take it alone."

With the possible exception of the Andaman Islanders and Bushmen, the equatorial peoples of Africa are said to represent the lowest scale of civilization in the world. It is these races Dr. Senn will study. Anthropologists consider observation of their habits and customs to be of the highest importance before civilization shall obscure or destroy them.

WOMEN FOUGHT DUEL.

Neither Suffered Injury, but Man Nearly is Killed.

A Middlesboro, Ky., despatch says: In a pistol duel on Tuesday between Mrs. Alice Moore and Mrs. Lucy Tucker, as the result of a long-time quarrel, Frank Maden was killed by a bullet from a revolver of Mrs. Tucker. The women met in front of a saloon and after exchanging a few words both drew weapons. Mrs. Tucker was the first to open fire. At the third shot Mrs. Moore turned and ran down the street unharméd, though her clothing was twice pierced. It was this last shot which struck Maden, who was near the saloon door engaged in a game of pool. The bullet hit him squarely in the forehead, causing instant death. The trouble between the two women is said to have grown out of a love affair.

A THOUSAND FOR ONTARIO.

Church Army Party Secured for the Province.

A Toronto despatch says: The Minister of Agriculture has received a cable from Mr. J. O'Byrne, colonization agent at Liverpool, stating that the whole party of 1,000 men arranged for by the Church Army had been secured for Ontario. A large number of the party will sail on April 19. The grants made by Canon Carlile's organization are in the shape of loans, and each emigrant signs a contract to repay the passage-money in six quarterly instalments. They are carefully selected and tested at the Church Army's farm colonies as far as possible. Each is recommended by responsible parties. A large number of the men, it is said, will be accompanied by their families. The sum of £10,000 has been raised by the Church Army for the purpose, and a further appeal for £100,000 to send out 10,000 men is being made. The men are expected to take up the free grants of 160 acres after a year or so of experience in the Province.

MILLIONS FOR DEFENCE.

New Government Adopts Estimates of Predecessors.

A London despatch says: A memorandum attached to the army estimates was issued on Tuesday night. It esti-

LEADING MARKETS

BREADSTUFFS.

Toronto, March 13. — Wheat — On (ario — No. 2 white, 78c asked f.o.b., 7 per cent. freight points; red, 78c bid, 77½c asked, mixed 77c asked.

Wheat — Manitoba — No. 2 North ern, 81c asked, f.o.b. lake ports 1c May.

Oats — No. 2 white, 34c bid, f.o.b. 7 per cent. freight points.

Barley — 58c asked for No. 2, outside 47c bid for No. 3 extra and 45c for No. 3.

Peas — No quotation.

Corn — No. 3 yellow, American, 47 bid, at Toronto.

Flour — Exporters are bidding 63.0 for Ontario 90 per cent. patents for export, in buyers' bags, at outside points Manitoba—first patents \$4.30 to \$4.50 \$4 for second patents.

COUNTRY PRODUCE.

Butter — Receipts are generally large; heavy, and the market has a firmer tone for all lines.

Creamery 25c to 26

do solids 23c to 24

Dairy lb. rolls, good to choice... 17c to 19

do large rolls 17c to 18

do medium 15c to 17

Cheese—13½c for large and 14c for twins.

Eggs — Deliveries are again heavy and the market is taking a downward turn, and quotations are lower, at 17 for new laid and 14c for storage.

Poultry — Fat chickens, 11c to 12c thin 7c to 8c; fat hens, 8c to 9c, thin 6c to 7c; ducks, 12c to 13c, thin 6c to 7c; geese, 10c to 11c; turkeys, 14c to 15c, to choice small lots.

Potatoes — Ontario, 45c to 75c per bag on track here, 75c to 85c out of store eastern, 70c to 80c on track, and 80c to 90c out of store.

Baled Hay—Quiet at \$8 per ton for No. 1 timothy and \$5.50 to \$6 for No. 2 in car lots on track here.

Baled Straw—Unchanged at \$6 per ton for car lots on track here.

MONTREAL MARKETS.

Montreal, March 13.—Grain — Bids were out of line in Manitoba wheat, and business was quiet. The oat market continues easy in tone; prices unchanged. Barley firm. No change in flour. Roller mills firm in tone, and millers have advanced prices to \$1.90 per bag in car lots, and \$2 to \$2.05 in jobbing way.

Oats — No. 3, 39c to 39½c; No. 3, 38c to 38½c; No. 4, 37c to 37½c.

Peas — 79c f.o.b. per bushel.

Barley — Manitoba, No. 3, 49c to 49½c; No. 4, 48c to 48½c; Ontario, 46c f.o.b. 78 per cent. points.

Corn — American mixed, 50½c; No. 1 yellow, 51½c ex-track.

Flour — Manitoba spring wheat patents, \$4.50 to \$1.60; strong bakers', \$4.50 to \$4.10; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do in bags, \$1.75 to \$1.85; extras, \$1.65 to \$1.75.

Millfeed — Manitoba bran in bags, \$10 shorts, \$20 per ton; Ontario bran in bulk \$14.50 to \$15; shorts, \$20; milled meal 21 to 24, straight grain mouille \$2 to \$2.7 per ton.

Rolled Oats — Per bag, \$1.90 to \$1.95 cornmeal, \$1.30 to \$1.40 per bag.

Hay—No. 1, \$8 to \$8.50; No. 2, \$7 to \$7.50; clover mixed, \$6 to \$6.50.

Cheese—No change; fair trade is passing in small lots, dealers quoting 13c to 13½c.

Butter — Steady, choice selling at 22c to 22½c, and 23c to 23½c in small lots. Second quality is unchanged at 21½c to 22c.

Eggs — Fresh selling at 19½c to 20c fall stock at 14c to 15c, and limed at 13c to 14c.

Provisions — Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clean fat back, \$19 to \$20; compound lard, 6½c to 7c; Canadian pure lard, 11½c to 12c kettle rendered, 12½c to 13c; hams, 12c to 13½c, according to size; bacon, 14½c

or radium rays. In opposition to the practice of other physicians, who assist the healing process with slight operation and the application of certain chemical materials, Prof. Schiff used only the rays. One case was that of a lady of 75 years of age, who had cancer in the right temple. The other two, who were also between 70 and 75 years of age, had cancer on the nose. From ten to fourteen sittings sufficed to heal the cancer, the radium and Röntgen rays being applied alternately for the space of one hour with the former and ten minutes with the latter treatment.

Prof. Schiff considers that he has proved that the statement that cancer on the skin can be removed only with the knife is erroneous.

DOUKHOBORS TAKE CONTRACT.

Will Help Build the National Transcontinental Railway.

A Winnipeg despatch says: Representatives of the Doukhobor community, Peter Verigin and two men with him, were very busily engaged during the last week purchasing supplies for railway work to be done by the Doukhobors during the season of 1906. Large quantities of ploughs, scrapers, carls, dump cars, etc., have been secured, in addition to much other material, and food and clothing supplies. The contract which the community have with the Grand Trunk Pacific involves the moving of about one million cubic yards of earth. A thousand Doukhobor workmen will be employed on the contract.

GERMAN SYSTEM ADOPTED

Russia Has Not Been Granted a Written Constitution.

STATUS OF PARLIAMENT.

A despatch from St. Petersburg says. Although Tuesday's manifesto and ukases referring to the National Assembly leave considerable vagueness regarding the exact status of the Parliament under the new political scheme of the Government, the vagueness, perhaps, being intentional and intended for future definition according to the development of events. It is made clear that Russia has not been granted a written constitution.

The Cabinet, as in the German system, remains quite independent of the majority in Parliament. The hope expressed after the manifesto of Oct. 30, that the Cabinet would be responsible to the National Assembly, after the British system, has not been realized.

Even interpellations of the Ministers are restricted to alleged violations of the law and the apparent causes of events.

WILL CONTROL PARLIAMENT.

The Government believes it will control the new Parliament and proposes to fight further concessions to the Radical parties. That it expects to succeed is evident by the fact that Premier Witte has definitely changed his plans and will not retire on the opening of the National Assembly. He had frequently declared that his task would be confined to guiding over the Government till the representatives of the people were convoked. But having accomplished this task, the revolutionary storm having somewhat abated and conditions being altered, he has decided to continue as the head of the Government. His decision is expected to aid in the negotiations of the new foreign loan, of which the treasury stands in urgent need.

Another subject removed from the consideration of Parliament, is the expropriation of private lands, the compensation for which is a question which

is cleared legal institutions, and makes important recommendations.

UNITED STATES.

The A. O. U. W. Grand Lodge, of New York, decided on an advance in rates, and anticipate a loss in membership as a result.

In boring a ten-inch hole to install plunger elevators in the Title Guarantee building at No. 176 Broadway, New York, workmen brought up gneiss bearing a proportion of gold.

Charles Green, on trial for murder at Trenton, in spite of the protests of his counsel, jumped up in court and said, "You see before you a fool." The court believed him, and he was released.

When James Burns told Recorder Lazarus, of New York, he was not lazy, but constitutionally tired, he was ordered to go home with his wife and scrub the floor or go to jail. He did the floor.

Alley Brillhart, of York, Pa., thought it must be a spook that turned on the electric lights in his barn every night, till he watched and saw his pet mare Phoebe turn the button with her nose.

After getting two whippings every month for ten years, Mrs. M. Turner, of Nashville, Ind., sued for a divorce and \$5,000 alimony. She declares that every two weeks her husband gave her a beating.

Miss Irene Wright, of Pittsburg, Pa., found a pocketbook on a counter in a department store containing \$4,000. Just then the owner rushed up, and after counting the money gave the finder a quarter as a reward.

Mrs. Kolitskey drew a revolver on Michael Moyer, of Hazelton, Pa., a saloonkeeper, on Thursday, when he

vitality affects the interests of the rich landed proprietors and the court, and which might even be interpreted to affect Crown lands which Parliament might desire to appropriate for the benefit of the people.

KILLING POLICE OFFICIALS.

A despatch from Lodz, Poland, says: The war against police officials here still continues. On Wednesday a captain and sergeant of police were killed. The assassins escaped. A band of toughs are attacking shops, flats and offices and extorting money at the point of the revolver.

RUSSIA WANTS MILLIONS.

A despatch from St. Petersburg says: The Russian bankers offer to float an interior loan of between \$25,000,000 to \$50,000,000 at 5 per cent., with the issue price at 93, if the Government will abandon its scheme for a new lottery. The latter the Government is willing to do, but objects to the price of the interior loan proposed by the bankers. M. Davidoff, chief of the Department of Credit Operations of the Ministry of Finance, said to-day: "The Government has made no secret of the necessity for raising an immense sum, but all the \$350,000,000 needed to liquidate the war and revolution expenses will not be required in 1906. With \$200,000,000 to \$250,000,000 in 1906, and \$150,000,000 in 1907, the balance could be cleared."

BUTCHERY OF THE JEWS.

A despatch from St. Petersburg says: The fears of a renewal of Jewish massacres at Easter, to which a deputation recently called Premier Witte's attention, appear upon investigation to have a real foundation. The "Black Hundred" organizations are conducting an agitation to slaughter the "enemies of Russia." Circulars have been prepared in St. Petersburg calling for the extermination of the Jews.

New Government Adopts Estimates of Predecessors.

A London despatch says: A memorandum attached to the army estimates was issued on Tuesday night. It estimates the expenditure for the current year on the army of \$148,630,000, which is a reduction of only \$85,000 on the previous year. As in the case of the navy, the new Government has simply adopted the estimates prepared by their predecessors. Thus, including \$180,000,000 for the navy, the nation's defence bill is nearly \$330,000,000, which destroys any possibility of a large budget surplus or a substantial reduction in taxation.

NEW FRENCH BATTLESHIPS

Six to be Built of 18,000 Tons Burden Each.

A Paris despatch says: In the Chamber of Deputies on Wednesday M. Thompson, Minister of Marine, announced that six new battleships would be built. Each will be of 18,000 tons burden and have a speed of 19 knots. They will carry four 12-inch and twelve 9.45-inch guns, which, he thought, would be equal to the armament of the Dreadnought, the latest British battleship. The latter's superior speed was due to the use of turbine engines, which France has tried and found too expensive.

FIRE ON SPANISH MOB.

Four Rioters Killed and Many Wounded by Gendarmes.

A Madrid despatch says: A mob of unemployed men attacked the municipal buildings in Fraga, Province of Aragon, on Wednesday. Gendarmes within the buildings fired upon them, and four of the assailants were killed and three wounded. One soldier was wounded.

BRITAIN DECAYS SLOWLY.

Her Exports and Imports Show a Large Increase.

A despatch from London says: The total British imports for February were £17,628,835, an increase of £4,693,698 over February, 1905. The exports were £28,781,123, an increase of £3,512,050 over February, 1905.

FELL ONE MILE TO EARTH

Military Balloon Containing Nine Soldiers Collapsed Near Rome.

A Rome despatch says: The envelope of a military balloon, which was making an ascent at Civita Lavagna, 18 miles south-east of this city on Thursday, burst at a height of over a mile, and a captain and eight soldiers, who were in the car, were dashed to the ground.

CONSUMPTION OF LUMBER.

Statistics for Manitoba and Saskatchewan—Quantity Imported.

A Winnipeg despatch says: The Crown timber office here has issued interesting statistics showing the amount of lumber consumed in Manitoba and Saskatchewan, based on reliable information, which assures that the figures are approximately correct. The total aggregates 379,901,189 feet, of which 37,015,821 feet were imported from the United States, 116,000,000 feet brought from British Columbia, and 82,000,000 feet from new Ontario. There was an increase of nearly 38,000,000 feet over the preceding year.

DISASTER IN AUSTRIAN MINE.

Forty Miners and Engineer Killed by Collapse of Staging.

A despatch from Vienna says: By the collapse of the gallery staging in Earl's Mine at Raibl, district of Tarvis, on Thursday, 40 miners and one engineer were killed.

Provisions.—Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut \$20; American cut clear fat back, \$19 to \$20; compound lard, 6½¢ to 7½¢; Canadian pure lard, 11½¢ to 12¢; kettle rendered, 12½¢ to 13¢; hams, 18¢ to 19¢, according to size; bacon, 14½¢; fresh killed abattoir dressed hogs, \$10 to \$10.25; country dressed, \$9.75 to \$9.50, alive, \$7.50 for selects.

BUFFALO MARKETS.

Buffalo, March 13. — Flour — Quiet and steady. Wheat — Spring unsettled. No. 1 Northern, 82½¢, carloads; Winter quiet; No. 2 red, 82½¢. Corn — Eastern No. 2 yellow, 46½¢; No. 2 corn, 46¢. Oats — Quiet, and only steady; No. 1 white, 34½¢. Barley — Only steady. Western, in store, offered at 46 to 52¢. Rye — Nominal.

LIVE STOCK MARKET.

Toronto, Mar. 12.—The run of cattle offering at the Western Market this morning was heavier than for some time, but the demand continues fairly active for all lines and prices were well maintained.

Export Cattle—Choice are quoted at \$4.16 to \$5.15, good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.50 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle—Picked lots, \$4.50 to \$4.75; good to choice, \$4.10 to \$4.40; fair to good, \$3.50 to \$4; common, \$2.50 to \$3; cows, \$3 to \$3.60; bulls, \$3 to \$4; canners, \$1.50 to \$2.

Stockers and Feeders — Short-keep feeders are quoted at \$4 to \$4.50; heavy feeders at \$3.85 to \$4.15, medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75, good stockers run at \$3 to \$3.65, light at \$2.75 to \$3; rough to common at \$2 to \$2.75 and bulls at \$1.75 to \$2.50.

Milk Cows—Trade is steady and the range of prices offering is unchanged at \$30 to \$60 each.

Calves—Prices were generally maintained and are quoted unchanged at 3½¢ to 6½¢ per lb.

Sheep and Lambs—They are quoted at \$4.75 to \$5 per cwt., and bucks at \$3.75 to \$4.50. Lambs are steady at \$6.75 to \$7.10 for grain-fed and \$5.50 to \$6.50 for mixed.

Hogs—Selects are quoted at \$6.85 per cwt. and lights and fats at \$6.60.

OLD WOMAN'S AWFUL FATE

Crouched Between Rails as Locomotive Approached.

A Binghamton, N.Y., despatch says: After getting out of the way of a swiftly moving Lackawanna train near Whitney Point, Mrs. Kate Bliss, aged 70 years, of that village, leaped back upon the tracks, and, crouching between the rails, allowed the locomotive to pass over her body, on Friday. When the "cow catcher" struck the aged woman she was precipitated to the right rail. Her head was completely severed, and after it rolled away from the rails the body was thrown to the opposite side of the track.

TO VISIT NEW YORK.

Governor-General to be Entertained at a Banquet by the Pilgrims.

A New York despatch says: Earl Grey Governor-General of Canada, has accepted the invitation of the Pilgrims to a dinner in his honor at the Waldorf Astoria, on March 31, and will come down from Ottawa for the occasion with several of his Cabinet Ministers. Secretary Root and other members of the Administration, as well as Sir Mortimer Durand, the British Ambassador, have also promised to attend, while the President may be present. The dinner will be eventful as the first occasion of a public entertainment of the Governor-General of the Dominion, either in New York or anywhere else in the United States. In the absence of Bishop Potter, Moris K. Jesup, one of the vice-presidents of the Pilgrims, will take the chair.

Toronto nurses have gone to Fort William to take charge of typhoid fever cases.

Ask Your Own Doctor

If he tells you to take Ayer's Cherry Pectoral for your severe cough or bronchial trouble, then take it. If he has anything better, then take that. We have great confidence in this medicine. So will you, when you once know it.

The Government has not been long in falling away from the lofty principles of Opposition, and the first struggle with difficult explanations has been in regard to the delicate matter of selling timber without auction or tender. A sale of timber by order in Council is a perfectly comfortable affair till it is found out, but then it becomes troublesome and necessitates a certain amount of Ministerial indignation. It makes it necessary for the Cabinet to repose upon official dignity, and to resent the criticism that popular discontent is ever ready to level against men in authority. A nice, quiet, comfortable

for Mr. Dunlop and Mr. McGarry of the South riding to help the Government explain it. They all did very well considering the material they had to work with and the lofty promises so fresh in their minds.

The plea that the sale was small and solitary brought another exposure by Mr. J. A. Auld, who cited another sale by order in Council. Five lots in an Algoma township, containing about a million and a quarter of pine, had been sold quietly by the same method. This was still more difficult to explain, and it brought forth a perfect torrent of Ministerial eloquence. It is usually the part of the Ministry to be quiet, reserved and indicative of suppressed force in addressing the House, but our new Government has got into the meshes of the unexplainable before its members have time to cultivate the Ministerial voice and noise. Alas for the pledges given and the good things hoped for! It will be fortunate if such transactions are always as carefully followed up and discussed.

Mr. Whitney made some long explanations of the general increase in salaries and effectually set at rest the rumor that he found it impossible to induce the officials to remain or to secure men to fill their places. The story that the general increases were intended to prevent the starving of the service by general resignations was emphatically disposed of. The Premier said the increases were entirely an act of executive clemency. He also said that a system had been adopted, although no trace of anything in the remotest degree resembling a system could be discovered by a perusal of the estimates. But salaries are the least censurable kind of extravagance, and the Provinces need not hope to indulge in a Conservative Government without paying the price—Globe.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.
We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WALDING, KINNAN & MARVIN,
Wholesale Druggists Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

WHAT OTHER PAPERS SAY.

Toronto Star.

Sir Wilfrid Laurier has been elected honorary president of the Canadian Forestry Association. This doubtless because he is such a good judge of Cabinet timber.

Toronto Star.

Premier Whitney declares he is too busy to accept an invitation to a conservative luncheon. The premier is not going to take any chances of having some disappointed office-seeker put arsenic in his soup if he can help it.

London Advertiser.

It begins to look as though the provincial government will not have enough normal schools to go round.

Kingston Whig.

It was somewhat embarrassing to the premier last week when a Kingston politician apologized for not having "delivered the goods."

Botebaygeon Independent.

Temperance sentiment can be developed only by education and example. The example must be set by those who drink, and if those of influence, if a few of sufficient force of character will

EXPERIMENTS WITH

FARM CROPS.

The members of the Ontario Agricultural and Experimental Union are pleased to state that for 1906 they are prepared to distribute into every Township of Ontario material for experiments with fodder crops, roots, grains, grasses, clovers, and fertilizers. Upwards of 1,600 varieties of farm crops have been tested in the Experimental Department of the Ontario Agricultural College, Guelph, for at least five years in succession. These consist of nearly all the Canadian sorts and several hundred new varieties, some of which have done exceedingly well in the carefully conducted experiments at the College and are now being distributed free of charge for co-operative experiments throughout Ontario. The following is the list of cooperative experiments in agriculture for 1906:

No.	Plots.	
1—Three varieties of Oats.....	3	
2—(a) Three varieties of six rowed Barley	3	
(b) Two varieties of two rowed Barley	2	
3—Two varieties of Hulless Barley....	2	
4—Two varieties of Spring Wheat.....	2	
5—Two varieties of Buckwheat.....	2	
6—Two varieties of Field Peas.....	2	
7—Emmer and Spelt.....	2	
8—Two varieties of Soy, Soja, or Japanese Beans.....	2	
9—Three varieties of Husking Corn....	2	
10—Three varieties of Mangolds.....	2	
11—Two varieties of Sugar Beets for feeding purposes.....	3	
12—Three varieties of Swedish Turnips	3	
13—Kohl Rabi, and two varieties of fall Turnips.....	3	
14—Parasnis and 2 varieties of Carrots.	3	
15—Three varieties of Fodder or Silage Corn.....	3	
16—Three varieties of Millet.....	3	
17—Three varieties of Sorghum.....	3	
18—Grass Peas and two varieties of Vetches.....	3	
19—Two varieties of Rape.....	2	
20—Three varieties of Clover.....	3	
21—Sainfoin, Lucerne, and Burnet.....	3	
22—Seven varieties of Grasses.....	7	
23—Three varieties of Field Beans.....	3	
24—Three varieties of Sweet Corn.....	3	
25—Fertilizers with Corn.....	6	
26—" with Swedish Turnips.....	6	
27—Sowing Mangels on the level and in drills.....	2	
28—Two varieties of early, medium or late Potatoes.....	2	
29—Three Grain Mixtures for grain production.....	3	
30—Three mixtures of Grasses and Clover for hay.....	3	

The size of each plot in each plot of the first twenty-seven experiments and in Nos. 29 and 30 is to be two rods long by one rod wide; and in No. 28, one rod square

Each person in Ontario who wishes to join in the work may choose any ONE of the experiments for 1906, and apply for the same. The material will be furnished in the order in which the applications are received until the supply is exhausted. It might be well for each applicant to make a second choice, for fear the first could not be granted. All material will be furnished entirely free of charge to each applicant, and the produce of the plots will, of course, become the property of the person who conducts the experiment.

PEPPYS AS A PLAYGOER.

The Time When Women First Appeared on the English Stage.

In the methods of producing plays Pepys' period of playgoing was coeval with many most important innovations which seriously affected the presentation of Shakespeare on the stage. The chief was the substitution of women for boys in female roles. During the first few months of Pepys' theatrical experience boys were still taking the women's parts. That the practice survived in the first days of Charles II.'s reign we know from the well worn anecdote that when the king sent behind the scenes to inquire why the play of "Hamlet," which he had come to see, was so late in commencing he was an-

Fruit-a-tives

DR. ALEXANDER FALKNER, Williamstown, Ont., a physician who has enjoyed a large practice for the past thirty years:—"I have much pleasure in certifying to the value of 'Fruit-a-tives' or 'Fruit Liver Tablets' as a medicine for chronic constipation and biliousness, dyspepsia, etc., etc. I have prescribed this medicine for the past six months and can strongly recommend 'Fruit-a-tives' in all cases of constipation, indigestion and flatulence, headaches due to weakened digestion, etc.

DR. A. FRANKFORD ROGERS, Ottawa, a physician who has enjoyed one of the largest practices in that city, states:—"I have no hesitation in recommending 'Fruit-a-tives' or 'Fruit Liver Tablets' as the fact of these tablets being made from a laxative material extracted from ripe fruit appeals, and has appealed to my judgement, and I have used these tablets extensively in my practice and always with most gratifying results. The proprietors of this medicine do not hesitate to furnish the formula of the tablets to physicians, and hence any physician can use these tablets and recommend them without loss of self respect. The formula of 'Fruit-a-tives' is certainly a magnificent one, and in my experience no medicine ever used by me has given such excellent results in constipation and stomach and liver trouble as 'Fruit-a-tives' has. That these tablets act beneficially on the kidneys and skin is beyond doubt and in many cases where the skin was sluggish and inactive and the complexion bad 'Fruit-a-tives' have given the most pleasing results."

DR. D. J. COSTELLO, member of the internal staff of the General Hospital, Ottawa, and who has extensive experience, states:—"I have used 'Fruit-a-tives' or 'Fruit Liver Tablets' with most beneficial results in obstinate constipation and biliousness, and found their action mild and non-irritating, and yet more curative than any medicine ever used previously. I strongly recommend 'Fruit-a-tives' to those suffering from these complaints."

At all druggists or sent postpaid on receipt of price, 60c. a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED, OTTAWA.

Albert College Belleville, ONT.

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters. \$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the College is a guarantee of thoroughness. New Commercial Mail one of the finest in Ontario. Catalogue with specimen of penmanship.

ever ready to level against men in authority. A nice, quiet, comfortable sale of timber, without noise or vulgar ostentation, is in accordance with Ministerial decorum, and the questions of the Opposition are naturally disquieting and even annoying.

The first sale that came to light was that of 250,000 feet in North Renfrew at \$3.25 per thousand. This was cited by Mr. McDougall of Ottawa, and the explanation ran to the effect that it was primarily a sale of land, the timber being incidental. Mr. C. N. Smith of Sault Ste. Marie explained the incidental timber as a familiar trick. The man who wants a timber area applies for the land in the guise of an intending settler, and thus gets it, timber and all at 50 cents an acre. This was tried with the North Renfrew timber, but the Minister did better than that by the Province. He did not throw in the timber, but sold it quietly without tender or other form of competition. The interesting point was that the successful applicant was one Finley Watts, a clerk in the employ of Mr. Dunlop, who redeemed the constituency for Mr. Whitney. This made it necessary

to find a sufficient force of character will but resolutely decline to accept or give the return treat, a decisive break will be made in a custom that is as senseless as it is pernicious.

Toronto Globe.

It is satisfactory to find that both parties at Ottawa are disposed to devise new measures for the repression of corrupt practices in elections. There is no need of adopting a despairing attitude towards the subject. The laws already on the statute book have had a beneficial effect. They only need strengthening to provide for unforeseen weakness.

Winnipeg Telegram:—There never was any wild and woolly west in Canada. The swearer, the swaggerer and the bad man never had a chance to live north of the forty-ninth parallel. As to this it may be said that in the streets of New York and Chicago the waylerner will hear more profanity and see more swagger and bumptiousness of all kinds in a week than in Winnipeg or any other western city in twice the time. He certainly will pass by more revolvers hidden away in the clothes of "yeegmen" and tailor-made toughs.

Advertising.

Until business is successful without a proper store, proper employees and the right amount of capital, it must be assumed that these three conditions are essential to the conduct of profitable trade, and it is as obvious that so long as advertising accompanies the business of profit advertising is necessary for the upbuilding of business. The mere appearance of advertising indicates that business is being done or will be done, and so long as everybody prefers to buy of men of success rather than of men of failure just so long will the man who advertises be likely to do the largest business.

The Moat.

Before the days of artillery the moat was an effective means of defense, particularly when filled with water. In very large forts or castles it sometimes assumed the dimensions of a lake, being often 100 yards wide and ten to twenty feet deep. The moat was crossed by a drawbridge, which could be raised at an instant's notice. When the moat was too wide to permit of this bridge covering the entire distance a slight wooden bridge was employed.

Its Curious Origin.

The word "cavesdropper" has a curious origin. In the early part of last century the penalty of listening to or overlooking secret assemblies, especially Masonic ones, was suspension under the eaves of a house on a rainy day till the water ran through the clothing and down to the shoes of the offender.—London Express.

Court Terms.

A court of law is a reminiscence of the time when justice sat in the open courtyard, and the "dock" is from a German word meaning a receptacle, while the "bar" is a Welsh word meaning a branch of a tree used to separate the lords of justice from their vassals.

His Revolution.

"Speaking of revolutions," began the loquacious man, "I was the central figure in one myself once."
"Somewhere in South America?"
"No; in Massachusetts. I got caught in the shafting of a woolen mill."

"Hamlet," which he had come to see, was so late in commencing he was answered that the queen was not yet shaved. But in the opening month of 1661, within five months of his first visit to a theater, the reign of the boys ended. On Jan. 3 of that year Pepys writes that he "first saw women come upon the stage." Next night he makes entry of a boy's performance of a woman's part, and that is the final record of boys masquerading as women in the English theater. I believe the practice now survives nowhere except in Japan. This mode of representation has always been a great puzzle to students of Elizabethan drama. It is difficult to imagine what boys in Shakespeare's day, if they were anything like boys of our own day, made of such parts as Lady Macbeth or Cleopatra. Before, however, Pepys saw Shakespeare's work on the stage the usurpation of the boys was over.

It was after the Restoration, too, that scenery, rich costume and scenic machinery became, to Pepys' delight, regular features of the theater. When the diarist saw "Hamlet" "done with scenes" for the first time he was most favorably impressed. Musical accompaniment was known to prerestoration days, but the orchestra was now for the first time placed on the floor of the house in front of the stage instead of in a side gallery. The musical accompaniment of plays developed very rapidly, and the methods of opera were applied to many of Shakespeare's pieces, notably to "The Tempest" and "Macbeth."—From "Pepys and Shakespeare," by Sidney Lee, in Fortnightly Review.

An Old News Rag.

A curious relic of the old days of the paper duties which so much hampered journalistic enterprise in the first half of the nineteenth century is the first number of Berthold's Political Handkerchief, being a news sheet printed on cotton fabric instead of paper. It is dated London, Saturday, Sept. 3, 1831; price, fourpence. And the letterpress, which is fairly legible, is as remarkable as the material on which it is printed. The tone of this news rag is intensely radical, but it reproduces the order of ceremonial to be observed at the coronation of King William IV, and Queen Adelaide on the following Thursday, and it is announced that a proclamation to the people of Europe will appear in our "next cotton." It is embellished with a medallion woodcut of Napoleon crossing the Alps, but the ink in this pictorial effort was too much for the cotton, and the Alps are in a fog and the emperor, on horseback, very indistinct.—London Mail.

CURED HIS WIFE of LA GRIPPE

Quebec Man tells how the Great Consumptive Preventative was
an all-round Benefit

"My wife took La Grippe when she was in Ottawa," says R. N. Dafoe of Northfield Farm, Que., in an interview. "She got a bottle of Psychine and after using it for a few days she was quite well. I took a cold and am using it and am getting all right. I think Psychine is one of the best tonics on the market to-day."

There you have the whole matter in a nutshell. La Grippe and colds are among the forerunners of consumption.

This man had one, his wife had the other. Psychine not only cured both but it built them up so that their bodies are strong enough to resist disease. All seeds of consumption are killed by

VARICOCELE
NERVOUS DEBILITY
CURED.

No Names Used Without Written Consent.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

We Treat and Cure Syphilis, Gleet, Varicocele, Emissions, Stricture, Unnatural Discharges, Seminal Weakness, Kidney and Bladder Diseases.

CANDLESS' CANDIDACY

By Henry Berlinghoff

Copyright, 1905, by P. C. Eastment

"Then you may get the senatorship?" asked Marion. Candleless gave a little laugh.

"It ought to be better than that," he declared. "This investigation will attract attention all over the country. It might even be good for the governorship."

"But you won't get the senatorship this election, will you?" persisted the girl. Candleless shook his head.

"We are only fairly getting under way," he explained patiently. "I suspect the committee will sit after Christmas."

"But I thought you were the whole investigation," she persisted. "What has the committee to do? Can't you hurry it up?"

"I am only one of a committee of five," he said. "I am doing most of the work, but these things cannot be hurried."

"You know now that they all stole," she persisted.

"But the facts must be legally set forth. We cannot rush it through."

"I wish you could," she whispered. "Then we could be married at once."

"I know it, dear," he answered tenderly. "I would give anything to hurry it up, but we must wait."

Harrington, strolling across the ballroom floor, heard and smiled as he asked Candleless for a ten minute chat. The younger man went off, proud to be seen in conference with the man who really ruled the destinies of his party.

Three months before Candleless would have shouted at the suggestion that he might be sent to the senate from his state. He was merely a young attorney whose cleverness had gained for him a place in the state legislature. Then had come the water front investigation. He had been placed on the committee because the leaders supposed him to be "safe." To the surprise of every one, he had developed an ingenuity at cross examination which had dragged out, bit by bit, the whole miserable story of the steal of the water front by the Cadiz and Southwest-ern.

It had been no part of the leaders' intentions that the story should come

It Is Wrong

To Suffer From a Germ Disease, When Liquozone is Free.

In the past few years, scores of diseases have been traced to germ attacks. They were thought to be due to other causes when old-time remedies were made. Can you not see why you don't get well, if you treat a germ disease with remedies that can't kill germs?

The remedy of to-day is Liquozone, and the first bottle is free. Its power is best told by a test. We ask you to try it, as millions have done, and learn what it means to you. Learn what this gas-made germicide can do.

What Liquozone Is.

The virtues of Liquozone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Liquozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Liquozone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Liquozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Liquozone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Liquozone can do.

Where It Applies.

These are the diseases in which Liquozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma	Gout
Abcess	Gonorrhea
Anemia	Gleet
Bronchitis	Hay Fever
Blood Poison	Influenza
Bowel Troubles	La Grippe
Coughs—Colds	Leucorrhea
Consumption	Malaria
Contagious Diseases	Neuralgia
Cancer—Catarrh	Piles—Quinsy
Dysentery—Diarrhea	Rheumatism
Dyspepsia—Dandruff	Scrofula—Syphilis
Eczema—Erysipelas	Skin Diseases
Fever—Gall Stones	Tuberculosis
	Tumors—Ulcers
	Throat Troubles

Also most forms of the following:
Kidney Troubles Liver Troubles
Stomach Troubles Women's Diseases
Fever, inflammation or catarrh—impure or poisoned blood—usually indicate a germ attack.
In nervous debility Liquozone acts as a vitalizer, accomplishing remarkable results.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you; to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Liquozone costs 50c. and \$1.

Heart, Throat, Liver and Skin

DR. AGNEW'S FOUR FAMOUS SPECIFICS CURE COMPLETELY THE WORST DISEASES OF THESE PARTS—DREADFUL HEART DISEASE RELIEVED IN THIRTY MINUTES.

Heart disease will affect people differently, but in all cases it must be viewed with great alarm. Dr. Agnew's Cure for the Heart is the one remedy that can be safely depended upon in times of trouble. It will give relief in thirty minutes.

Mr. Thomas Petry, of Aylmer, Que., was troubled with severe heart complaint for five years, the pain, at times, being so severe that he could not attend to business. Every other remedy failed until he tried Dr. Agnew's Cure for the Heart, which gave immediate relief, and his words are these: "I have now taken four bottles of the remedy and am entirely free from every symptom of heart disease."

A cold in the head need not be trifled with, for it is catarrh in an incipient condition, and catarrh is not to be trifled with. Dr. Agnew's Catarrhal Powder, as scores of clergymen, members of parliament, and prominent citizens in the Dominion have borne testimony, drives away a cold in the head like magic, and where this has assumed the shape of aggravated catarrh, producing deafness and throat trouble, it effects a permanent cure.

It is not always safe to take pills for liver trouble. They not unfrequently create other troubles that are serious. Dr. Agnew's Liver Pills, whilst thoroughly certain of removing all liver trouble, give no difficulty either at the time or afterwards. They are pleasant to take and cost only 10 cents.

The faculty that Dr. Agnew has displayed in getting at the seat of trouble is manifest in his Ointment, as in the other three remedies. This contains the elements that give speedy and permanent relief in all skin diseases and is peculiarly effective in curing piles. 35 cents.

Sold by F. L. Hooper.

Gray's Syrup of Red Spruce Gum

"HARRINGTON HAS FIXED ALL THAT," HE EXPLAINED.

out, but it was too late now to call off the investigation. The public had been aroused.

To Candless it had seemed as if he were very near his goal, for he was to make Marion his wife when he had made his way. Surely his future was assured. If only the investigation had ended in time to run for the senatorship!

He wondered as he followed Harrington into the conservatory whether it were too late. An hour later, with sparkling eyes, he emerged from the conference and sought the girl.

"Is it good news, Hugh?" she asked as he led her toward the library.

"It couldn't be better!" he cried exultingly. "I'll give you three guesses."

They were inside the library now, and the girl faced him. "Is it the senatorship?" she half-whispered.

Candless nodded as he seized her about the waist and waltzed her across the floor to the library sofa. He was like a boy in his exuberance.

"Tell me all about it," she demanded as she curled herself upon the sofa. "Was that what Mr. Harrington wanted of you?"

"Nothing less," exulted Candless. "It has been decided that I am the most available candidate. They will run me for the state senate, with the assurance that I shall be sent to Washington."

"You'll be awfully busy with the campaign and the investigation," she lamented. "I'm afraid I will not see anything of you at all."

"Harrington has fixed all that," he explained. "They realize that I cannot handle both, so Varrick will take over the investigation. I wanted to keep on, but Harrington pointed out that I could not do both and that this was too good a chance at the senate to be lost."

"And are you going to give up the investigation," she gasped—"give up all that has been gained?"

"Varrick can carry it on," he said impatiently. "We have to make some sacrifices."

"And you are going to give up the fight before you have fairly begun?" she repeated. "You are going to turn your back on the investigation and let that fall through that you may go to Washington?"

"I told you Varrick would take my place," he said irritably. Marion turned and faced him.

"Hugh," she said simply, "do you really think that Mr. Varrick will take your place?"

"Why not?" he asked. This was so different from what he had anticipated.

"I heard Mr. Colghoon talking to father last night," she explained. "He said that the investigation was a complete surprise to both parties, that they had supposed there would be the usual whitewashing and that you had made a real investigation."

"What of it?" demanded Candless.

"He said," went on Marion, "that he wondered how they would bribe you off; that he did not think money could do it. I was proud of you then, Hugh."

"Why not now?" he asked crossly. "Is it any disgrace to be elected to congress?"

"It is a disgrace when you turn your back on the people who look to you to right an evil—when you sell your honor for the nomination."

ting through the curtains, "I don't think you need to wait, my boy. You have your triumph in being willing to forego performance for your duty. That is a far greater triumph than the winning of the senatorship. You may have Marion whenever you want her."

Hugh turned to the girl. "I want her now," he said quietly, "for my strength lies in her."

How the Blood Moves in the Veins.

The principal cause of the movement of the blood in the veins is what the physiologists refer to as "the pressure from behind." By this is meant the capillary circulation, or a movement of the blood caused by the constant pumping action of the heart, which forces the current into and through the veins. To prevent the engorgement of the veins—that is, to prevent their becoming so filled with blood that their resistance would counterbalance the pressure from the arteries—each pulsation of the heart by emptying the right ventricle allows a part of the blood accumulated in the veins to be removed. In this way the backward resistance in the veins is kept inferior to the pressure of the arterial circulation. The venous circulation is also greatly aided by the action of the voluntary muscles. It is a well known fact that when a muscle contracts it thickens and becomes diminished in length. The effect of this lateral swelling is to compress the veins lying between the muscles, thus forcing the blood forward. Another peculiarity is the half moon shaped valves with which the veins are well provided. These "semilunar" valves open only toward the heart, making any backward movement of the blood into the venous system impossible.

The First Log Cabin in Kentucky.

Harrodsburg, the county seat of Mercer county, Ky., was the scene in the latter part of the eighteenth century of some very exciting episodes in the history of the early settlers in the young state. On June 16, 1774, Captain James Harrod of Virginia, who had brought a party of settlers to the new country, laid off a town site at Big Spring camp, where they had erected the first cabin ever built in Kentucky. They allotted to each man a half acre lot and a ten acre out lot. The town's first name was Harrodstown, but later this was changed to Harrodsburg. A clearing was made in the east end of the town boundary, and here it was that John Harman planted and raised the first corn that was known to have been grown in the state. Only a few weeks after this auspicious beginning of the town's promoters four of Harrod's men were ambushed by Indians. Jared Cowan was killed. The other men escaped, only one of them being injured.

POINTED PARAGRAPHS.

How soon we learn that the average man's bark is about all there is to him. When people say anything good about you, ever notice what a few are present?

We all of us claim to be natural, but we all of us know that the only time when we are not putting on is when we are asleep.

Somehow the hundred dollars some other man has always looks larger and as if it should go further than the hundred dollars you have.

There are not many sights more depressing than to meet a farmer's wagon on a country road going out from town with a coffin in it.

When a man says he got up nine times with the baby six nights in succession it means that one night he woke up and heard his wife get up.

For Coughs and Colds.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIR,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Cause of Headaches

You must look well after the condition of your liver and bowels. Unless there is daily action of the bowels, poisonous products are absorbed, causing headaches, biliousness, nausea, dyspepsia. Ayer's Pills are genuine liver pills. We have no secrets! We publish the formulas of all our medicines. J. C. Ayer Co., Lowell, Mass.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them." M. E. PARKS, Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely." MRS. GEO. A. SMITH, Hayworth, Quebec.

"After 14 years' experience in treating infantile ailments in our home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried." W. C. WEIR, Pastor Baptist Church, Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

DOUGLAS & CO., Napanee, Ont., Can., Wholesale Agents for Canada.

Time flies so fast as a man grows older that it seems to him he has his Sunday clothes on all the time.

People do things in broad daylight to make themselves ridiculous and then blame a paper for mentioning it.

You hear "He was one of the best men that ever lived" oftener than "He is one of the best men that ever lived."

Why is it that people who say disagreeable things to one's face are called honest and people who say pleasant things are called flatterers?

AN ORANGE GROVE.

Modern Methods in Cultivating the Gold of the Orchard.

You are certainly entitled to look through that wire fence and see all that constitutes an orange orchard. There are 200 round headed trees, about twelve feet in diameter. The fruit looks immensely as if it had been artificially put in place. Really there would pass for 200 Christmas trees. Does nature do this sort of work anywhere else? You forget the cherry trees in your northern orchard. You have become so familiar with the scarlet globules that hang all over those trees, with orioles and robins shouting approval, and tanager with indigo birds sitting in the apple tree overhead, that you cannot fully see and appreciate the charm. But you certainly have not forgotten the glory of a McIntosh red apple tree in October or indeed a whole orchard of ripe Northern Spies, Spitzenburgs and Kings. Yet the orange has a glory all its own. It is the gold of the orchard. You thought the trees grew in groves, "but here they are in long, regular rows." That was a word borrowed from the wild oranges that in Spanish days came up where they might and were seldom transplanted. They grew as those wild persimmons grow at the edge of the orchard or as pines and maples grow. But your modern orange trees are grown in long rows to be cultivated with plows and horses.

The real orange tree should stand about twenty-five or thirty feet high, with a trunk of five or six inches. Its foliage is dense and a rich green. It is a grand tree to sit beneath at midday and drink the juices of the fruit instead of water—it is distilled perfectly. But these trees are round and low headed, and one must stoop to get beneath them. They are made of the grafter shoots that came up around the old trees after the freeze. They are more convenient to spray, to protect from the blizzard, while the fruit is more easily gathered. You can walk all about that orchard and reach half the fruit without a ladder. It is a good illustration of how good sometimes comes out of evil.

"Different shapes!" To be sure. There are quite as many varieties of oranges in this orchard as there are of apples or plums in most of your northern orchards—fifteen or twenty, at least. The grower knows them all by name and can tell them all by the shape and the quality. He does not go at random and pick any fine big orange

times poured into the bath and the whole body laved in it, and sometimes the hands and face were sponged with it from a silver basin, the soft linen towel completing the process. The hair was delicately scented, and all kinds of washes and burnishers were applied to it. It took many slaves to bring the tresses into the classic bands or high pyramids which were the fashion at various times. Perfumes were not only applied to hair, hands, clothes and the person generally, but pervaded the rooms, which were hung with garlands and decorated with blooms of many kinds. The dresses of Roman matrons were made brilliant with various processes of pressing and smoothing, machines being employed for the purpose.

Though most refined in the duties of the toilet, the women of that day were barbaric in their cruelty. Woe be to the poor slave who failed to follow her mistress' command. She was whipped by the public flagellator if she did not fall a prey to the personal fury of her mistress, who would hurl at her victim the mirror or anything else at hand and would not disdain to pierce her tender flesh with the long, ever ready hairpin if nails, teeth and hands were not sufficient.

FIRE AND AIR.

The Ancients Recognized the Intimate Relations Between Them.

The intimate relation between fire and air was early recognized, seeing that experience soon taught that air was necessary for fire. The experiment of burning a candle in a closed vessel, now so familiar to every school-boy, is a very old one, and the influence of a blast of air on a furnace had been probably noticed from a very remote period. By some it was affirmed to be the food of fire, while by others the same belief was embodied in the phrase, "Air nourishes fire."

Again, it was long ago observed that niter, a substance well known to the chemical philosophers of the past, could produce intense ignition. It was hence inferred that, since niter possessed this property, it necessarily followed that the two substances resembled each other in composition. According to Robert Boyle, the air contained "volatile niter," while Lord Bacon held that air contained a "volatile, crude and windy spirit," and thunder and lightning were supposed to be due to the presence of minute particles of this niter diffused through air.

The important bearing of such observations is due to the fact that oxygen gas, which is one of the chief constituents of air and the one to which it owes its power of supporting combustion, also forms the largest elementary constituent of niter and is likewise the source of the power possessed by that body of supporting combustion.

The action of heat on metals in causing them to lose their metallic luster had also not escaped notice, and Cardan, a philosopher who lived during the sixteenth century, in noticing the increase in weight that lead undergoes when heated in air, attributed it to the gas in the air, which feeds flame and which rekindles a body presenting an ignited point.

A Cautious Scot.

A Scotsman went to an English race meeting and boldly staked a sovereign. Strangely enough, the horse he backed proved a winner, and he went to the "bookie" to claim his winnings. The sporting man begrudgingly handed him 5 sovereigns. He looked at each one very carefully before placing it in his pocketbook. "Well," said the "bookie," with a snarl, "are you afraid they're bad?"

"Oh, no," said the Scotsman, "but I was just lookin' to mak' sure the bad ain't gae among them!"

Bay of Quinte Railway and Navigation Company

PREVENTION OF SMUT AND APPLE SCAB.

(by Prof. W. Looshead.)

Spring is approaching and farmers will soon be planting the seed for the season's crop. With some crops clean seed means good crops, and dirty seed poor crops. It is important, therefore, to take a few simple precautions, especially when it is known that these precautions will save much money.

Now, smut is very prevalent in many oat and wheat fields, and the loss to the province by this disease alone amounts every year to two or three million dollars. Smutty oats and wheat are caused by planting seed oats and wheat that have smut spores attached to them. These spores are so small that it is impossible to see with the naked eye.

Perhaps the simplest and most effective method that has been devised for killing these attachid spores is to sprinkle the seed grain with a dilute solution of formalin, made by pouring half a pint of formalin into ten or twelve gallons of water. The formalin can be procured at any drug store for 25 cents. The seed grain should be spread out on a clean floor or wagon box, and the formalin solution sprinkled over it by means of a sprinkling can. The seed should be thoroughly shoveled over and mixed while it is being sprinkled so that every grain receives some of the solution. Ten gallons of solution will suffice for 20 or 25 bushels of grain.

When the grain is dry, it should be put into clean bags to prevent the entrance of fresh spores of smut, which are always floating in the air of barns.

If this method is carefully followed, no smut heads of grain will be found in the crop.

APPLE SCAB is one of the serious diseases of the apple. It can be prevented by spraying the trees with Bordeaux Mixture. Four applications should be given,—the first just as the leaves are unfolding, the second just before blossoming, the third after blossoming, and the fourth two or three weeks later. If the season is a wet one, it is advisable to give another application in July or August. The formula for Bordeaux Mixture is as follows:—

Copper sulphate (blue stone)... 4 pounds.
Fresh stone lime..... 4 "

Water..... 40 gals.
Make a stock solution of bluestone by dissolving 25 pounds in warm water in a barrel and add water to make up to 25 gallons. Every gallon of this solution in this barrel contains one pound of blue stone.

Into a second barrel put 25 pounds of fresh stone lime, and add with stirring small quantities of water to slake it. When fully slaked make up to 25 gallons by adding water. Every gallon of milk of lime in this second barrel contains one pound of lime.

To prepare the Bordeaux, empty four gallons of bluestone solution into the spray tank or barrel, which already should have 25 or 30 gallons of water in it; stir the milk of lime thoroughly and empty four gallons of it through the strainer into the spray barrel with constant stirring; then add water to make up to 40 gallons.

The Codling Worm may be controlled at the same time if 6 oz. of Paris Green are added to every barrel of the Bordeaux Mixture used in the application made after blossoming.

A curious detail of Napoleon Bonaparte's costume was the religious care with which he kept hung around his neck the little leather envelope, shaped like a heart, which contained poison that was to liberate him in case of irretrievable reverses of fortune. This poison was prepared after a recipe that Cabanis had given to Corvisart, and after the year 1808 the emperor never undertook a campaign without having his little packet of poison.

He Was Tender.

"Young Mr. Softy paralyzed Dr. Simon when he went to be vaccinated," observed Gaswell to Dukane.

"How was that?"

"He asked the doctor to put him under the influence of anaesthetics."

RICHMOND MINUTES.

The Council met at Selby. The members present were, Messrs Z. A. Grooms Reeve, and Councillors Fred Sexsmith, Chas. Anderson, Erastus B Sills and Alf. McCutcheon.

The Reeve presiding. The minutes of the last meeting were read and confirmed.

COMMUNICATIONS.

From Geo. F. Ruttan (r. Otter Creek Drain) was read and laid on the table for discussion.

The resignation of T. V. Anderson as road engineer was read and laid on the table.

Moved by E. R. Sills and seconded by Fred Sexsmith that T. V. Anderson's resignation as Road Engineer be accepted. Carried.

Moved by Alf. McCutcheon and seconded by E. R. Sills that John McFarlane be, and is, hereby appointed road engineer for the North division of Richmond for the year 1906 at \$1 50 per day without commission, according to By-law. Carried.

Moved by Chas. Anderson and seconded by E. R. Sills, that the system heretofore in force in the Township providing for the payment of commission to Road Engineers of five per cent on money expended by them be and is hereby abolished from this date and that a By-Law be passed in accordance with this resolution. Carried.

Moved by Chas. Anderson and seconded by Fred Sexsmith, that the road Engineer be instructed to repair the railing on the Forest Mill hill as soon as possible. Carried.

A petition presented by John McLaughlin, and others asking aid to repair the hill near his place in the 7th concession was laid on the table.

Moved by A. McCutcheon and seconded by E. R. Sills that on the petition presented by John McLaughlin and others that the Engineer be instructed to inspect and repair if necessary, the hill west of Forest Mills, known as Hannah's Hill. Carried.

Moved by Chas. Anderson, seconded by E. R. Sills, that Wm. Brandon and Manchester Thompson be detached from Road Section No. 13 and that the By-law may be amended accordingly. Carried.

Moved by Chas. Anderson, seconded by Fred Sexsmith that whereas the Council of the County of Lenox and Addington have passed a by-law adopting a system of County Roads and whereas clause No. 2 in the said By-law, discriminates against the Tp. of Richmond, whereas it appears that the Minister of Public Works desires to have fuller information in reference to the said clause. Be it therefore resolved that the Reeve be authorized to represent the Tp. of Richmond's interests together with a deputation of other representatives of this Township Councils of the County if found necessary to meet the Minister of Public Works at Toronto, and that a copy of this resolution certified by the Clerk be forwarded to our representative in the Local Legislature, T. G. Caswell, Esq. Carried.

Moved by Fred Sexsmith, seconded by Chas. Anderson that the following accounts be paid:

David Breeze for 33 loads of gravel for Road Section No. 63 by order of Pathmaster, \$1 65; J. C. Hudgins repairing culvert in Road section No. 21 \$1.00; Anson Rose, repairs on Bridge in Road Section No. 25, \$1.00; Thos. Connell tacking care of Martin Bumhour \$12.75.

Moved by Chas. Anderson seconded by Fred Sexsmith that John McFarlane be given the job of putting his engine on the crusher at \$5 50 per day as per

This Pretty Girl Saved From Catarrh of the Lungs By Pe-ru-na.

MISS FLORENCE KENAH.

Miss Florence E. Kenah, 434 Maria street, Ottawa, Ont., writes:

"A few months ago I caught a severe cold, which settled on my lungs and remained there so persistently that I became alarmed. I took medicine without benefit, until my digestive organs became upset, and my head and back began to ache severely and frequently.

"I was advised to try Peruna, and although I had little faith I felt so sick that I was ready to try anything. It brought me blessed relief at once, and I felt that I had the right medicine at last. Within three weeks I was completely restored and have enjoyed perfect health since.

"I now have the greatest faith in Peruna."

Florence E. Kenah.

WOMEN SHOULD BEWARE OF CONTRACTING CATARRH.

The cold wind and rain, slush and mud of winter are especially conducive to catarrhal derangements. Few women escape.

Upon the first symptoms of catching cold Peruna should be taken. It fortifies the system against colds and catarrh.

Pe-ru-na for Colds and Catarrh.

The following interesting letter gives one young woman's experience with Peruna:

Miss Rose Gerbing, a popular society woman of Crown Point, Ind., writes:

"Recently I took a long drive in the country, and being too thinly clad I caught a bad cold which settled on my lungs, and which I could not seem to shake off. I had heard a great deal of Peruna for colds and catarrh and I bought a bottle to try. I am pleased that I did, for it brought speedy relief. It only took about two bottles, and I consider this money well spent.

"You have a firm friend in me, and I not only advise its use to my friends,

but have purchased several bottles to give to those without the means to buy, and have noticed without exception that it has brought about a speedy cure wherever it has been used."—Rose Gerbing.

Pe-ru-na Contains no Narcotics.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind. Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit. Peruna does not produce temporary results. It is permanent in its effect.

It has no bad effect upon the system, and gradually eliminates catarrh by removing the cause of catarrh. There are a multitude of homes where Peruna has been used off and on for twenty years. Such a thing could not be possible if Peruna contained any drugs of a narcotic nature.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

All correspondence held strictly confidential.

Hawaiian Huckleberry.

On the island of Hawaii are great thickets of the ohelo, or Hawaiian huckleberry (*Vaccinium reticulatum*), which the natives consider sacred to Pele, the goddess who is supposed to preside over the famous crater of Kilauea, and which, together with white pigs and chickens, are thrown by them into the boiling red lake during an eruption to appease the wrath of the aggressive dame and thus cause the rivers of lava to cease flowing on their destructive course. These berries grow in clusters on low bushes right on the very brink of the brimstone beds and are so numerous that a bushel may be easily gathered in half an hour. In appearance they somewhat resemble a cranberry, and the flavor is pleasantly suggestive of grapes.

euphemism, just as they said "Vixit" (he has lived) instead of "he is dead." In all languages the reluctance frankly to say "dead" or "die" appears; hence such words and phrases as "pass away," "decease," "demise," "the departed," "defunct," "the late," "no more," "if anything should happen to me."

Perpetuating the Species.

There is a stringent law in Japan that when one camphor laurel is cut down another must be planted in its place. The tree is hardy and long lived, attaining to an enormous size. It is covered with a small leaf of a vivid green color. The seed, or berries, grow in clusters, resembling the black currant in size and appearance. And the wood is employed for every purpose, from cabinetmaking to shipbuilding.

"He asked the doctor to put him under the influence of anaesthetics."

THE COOKBOOK.

When soaking beans a tiny pinch of soda in the water will be an improvement.

It is better to steam green cabbage, cauliflower and the like. A sprinkling of salt should be applied to the vegetables before they are put into the steamer.

To keep soup let it remain covered with a coating of fat, as this excludes the air and helps to preserve the stock. If the soup has no fat use clarified dripping for this purpose.

Bread which has been cut in slices and then allowed to become stale may be freshened by folding the slices in a napkin, putting them in the napkin into a paper bag and placing the bag in a hot oven for a quarter of an hour.

If a cake falls in the center the opening of the oven door and the consequent rush of cold air may account for it, too much baking powder may have been used or the mixing may be at fault. Never slam or bang the oven door when a cake is inside.

ALL SICK WOMEN

SHOULD READ MISS SCHWALM'S LETTER

In All Parts of Canada Lydia E. Pinkham's Vegetable Compound Has Effected Similar Cures.

Many wonderful cures of female ills are continually coming to light which have been brought about by Lydia E. Pinkham's Vegetable Compound, and

through the advice of Mrs. Pinkham, of Lynn, Mass., which is given to sick women absolutely free of charge.

The present Mrs. Pinkham has for twenty-five years made a study of the ills of her sex; she has consulted with and advised thousands of suffering women, who to-day owe not only their health but even life to her helpful advice.

Miss Annie E. Schwalm, of 326 Spadina Ave., Toronto, Ont., writes:

"I have found Lydia E. Pinkham's Vegetable Compound a specific for female weakness with which I have been troubled for years. I also had irregular and painful periods which affected my general health until last spring. I was only a wreck of my former self. In my affliction I was advised to use your Compound, and am so glad that I did so. I found that in a few short months there was no trace of female weakness, my strength gradually returned, and in a very short time I considered myself a perfectly well woman. I appreciate my good health, and beg to assure you that I am most grateful to you for discovering such a wonderful remedy for suffering woman."

The testimonials which we are constantly publishing from grateful women establish beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. She asks nothing in return for her advice. It is absolutely free, and to thousands of women has proved to be more precious than gold.

Moved by Chas. Anderson seconded by Fred Sexsmith that John McFarlane be given the job of putting his engine on the crusher at \$5.50 per day as per tender, for that part of the Township north of the Salmon river and the Napanee and Sheffield road south to Grievie's Corner; and that Geo. Bush be given the job for that part of the Township south of Salmon River and the Napanee and Sheffield Road south of Grievie's Corner, at the same price per day, according to tender. Carried.

Moved and seconded that the following officers be appointed for the current year, that is to say,—

PATHMASTERS.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

gathered in half an hour. In appearance they somewhat resemble a cranberry, and the flavor is pleasantly suggestive of grapes.

The Word "Expire."

"Expire" in its literal sense is breathing out. Inspiration and expiration together constitute respiration. Izaak Walton observed that "if the inspiring or expiring organ of any animal be stopt it suddenly dies." The Romans spoke of "breathing out" the breath of life instead of "dying," by way of

green color. The seed, or berries, grow in clusters, resembling the black currant in size and appearance. And the wood is employed for every purpose, from cabinetmaking to shipbuilding.

He Guessed Right.

"Ah, me," exclaimed Mrs. Nagget, "my shopping was most unsatisfactory today!"

"Huh," grunted Nagget; "trying to get something for nothing, I suppose!"

"Yes, dear. I was after a birthday gift for you."

The Red Rose Flavor and Strength

NO Ceylon tea nor Indian tea alone can have the "rich fruity flavor" of Red Rose Tea. Neither variety in itself possesses all the qualities of strength, richness, delicacy, or fragrance. Each has its own peculiar qualities, but each has its weaknesses.

By combining the two in the Red Rose proportions, I produce a tea with the "rich fruity flavor" and strength of Red Rose Tea, a flavor and strength found in no brand of Ceylon alone.

Red Rose Tea is good Tea

T. H. Estabrooke
St. John, N.B., Toronto, Winnipeg

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST | Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleansing bath room, pipes, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft

WICKED USE OF SATIRE

Virtue and Worth Are Maimed By Cowardly Ridicule.

Whosoever shall say to his brother "Raca" shall be in danger of the council; and whosoever shall say "Thou fool" shall be in danger of hell fire.—Matt. V. 22.

Ridicule is an edged tool, satire a deadly weapon, and scorn may become an accursed instrument.

These powers of speech may be used rightly to correct, heal and to save, but never to hurt, poison or destroy. The vast press, the multiplied facilities of speech, and the ever-increasing forms and methods of art for the conveyance and display of ideas, together with the thousands of educational institutions and the wide ramifications of our magical modern delivery and transportation systems, have all joined to increase enormously the power of satire to help or to harm. Therefore it should be used conscientiously, discreetly and mercifully. Otherwise, it is a cowardly, pernicious and fatal weapon.

Virtue and worth may be maimed or slain as easily as vice and meanness and misfortune. Adversity and misery are all too often the pitiable victims of the unspeakably cruel attacks of the satirist and the scorner.

What worse calamity could be brought upon sensitive women or high-spirited men than to make them feel that they are

ed. But examples like these are without number, familiar to us all.

Society, trade and politics turn out victims of this order continually, and their misfortunes proclaim again that that "man's inhumanity to man makes countless thousands mourn." Even one such victim should sufficiently admonish us against this to prevalent vice—the wicked use of satire. We should avoid it because it is cowardly and cruel and because it is so dangerous—so very dangerous. It is so often aimed at the helpless and unfortunate, whose condition or peculiarities they cannot help, and which should make them rather objects of compassion.

These are creatures for whom Christ died, and whose presence in the world entitles them to place, consideration, fellowship and the helpful word and hand. Let us follow the maxim,

"LIVE AND LET LIVE."

Let us learn to "enjoy the imperfect in a life that can never be perfect," and more earnestly to pursue the "golden rule" and strive after the grace to love our neighbor as ourself. To think to put ourselves in his place will serve to guide us in the way of kindness toward our fellow being in all situations.

Behold, I show you a terrible picture: Jesus mocked as a crazy king by brutal Roman soldiers; a filthy cast-off robe is put on Him, to cover the bloody stripes on His scourged back; a crown of thorns is set on His head, a weed is gathered from the yard and placed in His hand and then with guffaws and insults these ruffians bow at His feet in mock obeisances and hail Him in derisive terms as king. Last they smite and cuff the blessed sufferer and command Him to prophesy—to name the offender. Not one brave voice raised in protest, nor one hand raised to defend Him who was the most peerless man of his day, the most superb hero they had ever seen, and who was soon to defend them and all the race with His life.

Let that sickening scene of cruel mocking stand before the shamed eyes of all men as God's rebuke to human ridicule.

C. Q. WRIGHT.

THE S. S. LESSON

INTERNATIONAL LESSON,

MARCH 18.

Lesson XI. First Quarterly Review. Golden Text, Matt. 4. 23.

QUESTIONS FOR SENIOR SCHOLARS.

Lessons I, II, and III deal with the infancy and boyhood of Jesus. What two groups of men found the infant Christ-child? How was each group directed to the place where he might be found? How did these two groups of persons differ in their respective stations in life? What lesson is there for us in the fact that men of station and rank so widely separated rejoiced at the birth of a Savior? What single incident from the early boyhood of Jesus is recorded in the gospel? What light does this throw upon the intellectual life of the boy Jesus? Upon his relation to his guardian parents? In what respect is the boy Jesus an example for boys (and girls) to-day?

Lessons IV, V, and VI deal with the events connected with the beginning of the public ministry of Jesus. In what way was Jesus specially prepared for

the tempter came to him? Who was the tempter? Did he appear in frightful and fiery appearance, do you suppose? What were the three temptations?

Lesson VI.—Jesus Calling Fishermen.—From what part of the land did Jesus get his disciples? From what class of people did he recruit them? Why did he not get hold of the wealthy, the educated, and the titled, and put some of them into his list? Would these fishermen ever have been heard of but for Jesus? What parallels can you run between fishing and winning men.

Lesson VII.—A Day of Miracles in Capernaum.—Did Jesus heal on the Sabbath day? Can you recall any other instance? Was he a churchgoing man? Did he need the services of the synagogue? What phases of Jesus's power were shown on that Sabbath day in Capernaum, and in the evening? Why were demons not allowed to testify that Jesus was the Christ?

Lesson VIII.—Jesus's Power to Forgive.—What is the forgiveness of sins? Who has the right to forgive an offense against the State of Ohio? Against the national government? Against the government of God? If Jesus has the right to pardon, what must he be? In what respects are the four men in the story patterns for us to imitate?

Lesson IX.—Jesus Tells Who Are Blessed.—How many beatitudes are

RANCHING IN THE WEST

FRANK CARPENTER TAKES A LOOK AROUND THE RANGES.

The Great Country Where Beef and Pork are Rised and Fine Horses are Bred.

Calgary is the capital of the cowboy country of the wild Canadian West, writes Frank G. Carpenter to the Chicago Record-Herald from Calgary, Alberta. What was once known as the great American Desert extends from Montana north into Canada. It comprises a region more than twice as large as Ohio, running from the Rocky Mountains eastward, devoted to grazing. The land though semi-arid, is covered with the richest of grasses and it is now supporting hundreds of thousands of cattle, horses, sheep and hogs. According to the last census there were a million cattle in Manitoba and the Northwest, a little more than a third that many horses, and about 400,000 hogs and sheep. Large herds are now brought from Texas here to be fed and more than 40,000 head were shipped on the hoof last year from Calgary to England. Just north of this is a dairy country where they are establishing creameries with government assistance, and where they expect to raise butter and cheese for British Columbia and the Orient.

The most of this country is now let out on government leases. The annual rent is four cents an acre, but the grass is so thin that it takes twenty acres to feed one head, and the government will not permit more than that average number to be grazed on any of the ranches. Here, in Canada, everything is under rigid government supervision.

THE MOUNTED POLICE

patrol the ranches. They enforce the protection of the cattle against diseases and having dipping stations where all the stock that comes into the country is examined and treated to prevent the introduction of Texas fever and other plagues. The police have veterinary surgeons with them and they watch carefully all cattle from the United States.

Most of the stock raised here is well bred. One thousand dollars is by no means a high price for a bull, and there are cattle sales at Calgary every year which compare favorably with any in the United States. The favorable animal is the Shorthorn, but there are many Polled Angus and Galloways. The best breeding comes from England, and there are some ranchmen who make a specialty of raising choice beef for the English market. The Canada Cattle Company, which has 40,000 head on its different ranches, ships its stock on the hoof to England. The animals are all grass fed, and the sanitary regulations are such that they must be killed within eight days after landing in Great Britain.

One of the best known ranching men of the West is Patrick C. Burns of Calgary. He is the Armour of this part of the world, and is sometimes called the cattle king of the British Northwest. He shipped 3,500 carloads of beefs last year, and he has now about 20,000 head in his yards. He has a big trade with Manitoba, British Columbia and Alaska. At the beginning of the Klondike gold discovery he got \$1,000 apiece at Dawson for steers, and as much as a dollar a pound for beef on the hoof.

Pat Burns came to Calgary about 25 years ago, and began life by plowing on the prairie at so much per acre. He turned his savings into cattle, and let them graze on government lands. As he made more money he bought more cattle, and, to make a long story short,

HE IS NOW A MILLIONAIRE.

and is growing richer and richer. It was in his office in Calgary that I chatted with this man on cattle raising. Said he:

"There has never been such a country

the first prize at the New York horse show, was reared just outside of Calgary, and nearby there is a stockman who has 1,200 Percheron mares. There are stallion shows here every year, and they compare with the cattle shows in quality.

I drove over the prairie to the ROBINSON HORSE RANCH.

This is devoted to rearing Clydesdales and Shires for the markets of British Columbia and Eastern Canada. These horses are in great demand in the mining regions, some of them going as far north as Alaska. Leaving Calgary, we drove for several hours over a rolling prairie covered with thick grass, now cured into hay. It is brown on top, but green near the roots. The horses feed on such grass all the year round. They are pastured in the midst of the winter, even when the ground is covered with snow. They paw the snow away with their feet, and, as the cowboys tell me, come out hog fat in the spring.

The ranch buildings here consist of a dwelling worth perhaps about \$2,000, a barn the size of a country livery stable and a number of corrals. The horses live on the prairies, and the buildings are comparatively cheap. The owner of this ranch, although he is worth \$500,000, lives as simply as the ordinary store clerk of one of our cities. His house here is comfortable, but not pretentious, and during our call his wife apologized for her appearance, saying that she had just come from superintending the dressing of some hogs which had been killed that morning. She chatted freely about her ranch life, saying that she preferred it greatly to that of San Francisco, where her girlhood was spent.

In a chat with Mr. Robinson about horse rearing, he said:

"Our horses take care of themselves. We graze them for part of the year on the prairies here near the Elbow river, and later on drive them to the foothills of the Rockies, where we have another large grazing territory. We find it best to let the horses hustle for themselves. They come out stronger and are worth more than grain fed stock.

"We formerly paid considerable attention to breeding, keeping the stock up for that purpose. Of late years we have turned the stallions out with the horses and let all hustle for themselves. We divide the horses up into droves of about 50 each, and give every drove a stallion, keeping the droves separated for two or three weeks to allow them to become acquainted with each other. The animals are then driven together into one herd and they

PASTURE IN COMMON.

Every stallion, however, will take care of his own mares. He will not allow any of the others of his sex to come near them and will fight for them on the slightest provocation."

"What breeds of horses are the most profitable?"

"We can make more money from draft horses than from any others. I have about 300 four-year-old animals which will weigh about 1,500 pounds apiece. Those horses will bring \$400 a pair, and they are far easier to raise than the thoroughbreds and require less trouble to train them for the market."

"What breeds are your draft animals?"

"They are chiefly Clydesdales. I like them better than the Percherons. Their limbs are cleaner and they are better for general purpose horses."

"How are they broken?"

"We have a little trouble as to that," replied the horse rancher. "I have one boy who has broken more than 1,000 horses. We first get them used to the halter. This is a matter of a couple of hours. After that we hitch up each animal with a quiet old stager and drive the team about for a day or so. Later still we harness the horse up with another horse of the same age which we are training. We put on the brakes and let the colts go as fast as they please, holding tight to the reins. The pulling of the wagon soon tires them out, and in short time they are ready for general use."

I would say that the Canada cow-

(and girls) today?

Lessons IV, V, and VI deal with the events connected with the beginning of the public ministry of Jesus. In what way was Jesus specially prepared for that ministry just preceding its beginning? What had been his previous preparation for his life's work? How was he tested after having been prepared and equipped for the work? Does God ever permit men to be tested before he has given them an opportunity to equip themselves for such a testing? From what callings in life were some of the disciples of our Lord chosen? Were any of them wealthy? (Comp. Lesson VIII.) Concerning how many and which of the disciples of Jesus have we learned in the lessons of this quarter? Give the Golden Text of each of these lessons.

Lessons VII and VIII deal with several miracles wrought by our Lord. What miracles? In what respect was the day described in Lesson VII a typical day of our Lord's life? What was the twofold purpose of Jesus in working miracles? How does Lesson VIII show us the relative value placed by Jesus on the salvation of a man's soul and his physical well being? How may physical suffering sometimes bear spiritual results? What should be the Christian's attitude toward human suffering about him? Repeat from memory the Golden Text of each of these lessons.

Lessons IX and X are taken from our Lord's Sermon on the Mount. Near what city was that sermon preached? Whom does our Lord call "blessed"? What principle or rule should govern our conversation? With what double parable does Jesus conclude his sermon? What is the main thought of this parable? Give the Golden Text of each of these lessons. Repeat the Golden Text for to-day.

QUESTIONS FOR INTERMEDIATE SCHOLARS.

Some General Questions.—What differences do you find between the four gospels? Which is the shortest, the longest, the deepest, the most systematic, the most philosophical, the sweetest? Which pays most attention to the discourses of Jesus? Which tells particularly of Christ's interviews with individuals? Which was written primarily to show that in Christ the Messianic prophecies were fulfilled? Which are the Synoptic Gospels? Why are they thus called? How many years of Christ's life are included in the lessons thus far studied?

Lesson I.—The Shepherd's Find Jesus.—Do you know the names of any of these shepherds? Who, a thousand years before this lesson's date, was a shepherd in the same region? What region was it? Where did the shepherds find Jesus? What sign was given to them? Of what was this a sign? What did they do when they had found the Saviour?

Lesson II.—The Wise Men Find Jesus.—By what other name are the wise men known? Whence did they come? What led them to Bethlehem? What did they bring to the Babe? What may we bring to Christ?

Lesson III.—The Boy Jesus.—To what trade was this Boy brought up? What kind of surroundings had he? In what village did he live all his life until his ministry opened? Had he any advantages such as come to people nowadays from travel and wide observation? In what capacity did he appear at Jerusalem at the age of twelve? When he sat among the doctors, what was he engaged in? When did he begin his work as a teacher? Who taught him his letters? How did he come to know the Word of God so well?

Lesson IV.—The Baptism of Jesus.—Who baptized our Lord? What sort of a man was this great preacher in the Jordan valley? What method of modern consecration to the ministerial office may be said to resemble the baptism of our Lord? In what respect was this incident a turning point in the life of the faster? Why did he need to be baptized?

Lesson V.—The Temptation of Jesus.—Who led Jesus from the Jordan? Whither was he led? How many days did he fast? Have there been any fasts of that length in our time? What do you prove? Is there anything significant in the fact that our Lord was weak, hungry, and exhausted, physically, when

respect to the four men in the story patterns for us to imitate?

Lesson IX.—Jesus Tells Who Are Blessed.—How many beatitudes are there? What does the term mean? Can you give any examples of men or women, in the Bible, who seem to you fair specimens of humility, penitence, meekness, spiritual hunger, mercifulness, purity of heart, peacemakers?

Lesson X.—The Tongue and the Temper.—What are some of the objections to the use of frivolous or profane oaths? Is swearing a gentlemanly habit? What effect has profane language upon the heart and inner life of the man who uses it? Did you ever hear anyone make the threat, "I will pay you back for that"? Is it right to cherish a spirit of vengeance?

A PERFECT HAND.

How Its Appearance Became Familiar to the Public.

The story of how probably the most perfect feminine hand in America became known to the people is rather interesting.

As the story goes, the possessor of the hand was with some friends in a photographer's one day and while talking, held out a piece of candy. The pose of the hand with its perfect contour and faultless shape attracted the attention of the artist who proposed to photograph it. The result was a beautiful picture kept in the family until one day, after reading a letter from someone inquiring as to who wrote the Postum and Grape-Nuts advertisements, Mr. Post said to his wife, "We receive so many inquiries of this kind, that it is evident some people are curious to know, suppose we let the advertising department have that picture of your hand to print and name it 'A Helping Hand.'" (Mrs. Post has assisted him in preparation of some of the most famous advertisements).

There was a natural shrinking from the publicity, but with an agreement that no name would accompany the picture its use was granted.

The case was presented in the light of extending a welcoming hand to the friends of Postum and Grape-Nuts, so the picture appeared on the back covers of many of the January and February magazines and became known to millions of people.

Many artists have commented upon it as probably the most perfect hand in the world.

The advertising dept. of the Postum Co. did not seem able to resist the temptation to enlist the curiosity of the public, by refraining from giving the name of the owner when the picture appeared but stated that the name would be given later in one of the newspaper announcements, thus seeking to induce the readers to look for and read the forthcoming advertisements to learn the name of the owner.

This combination of art and commerce and the multitude of inquiries furnishes an excellent illustration of the interest the public takes in the personal and family life of large manufacturers whose names become household words through extensive and continuous announcements in newspapers and periodicals.

THEY NEVER FELL TREES.

Most of the Spaniards dislike to fell trees or cut live timber of any sort, and this fact perhaps accounts for the giant trees of California. The Spaniards, two centuries ago, pushed their way through Mexico to California, and, save the clearing of paths through the dense forests, not a twig did their axes chop down. Nor do the Spaniards transplanted to the New World ever destroy timber. They continue to build their houses of stone and mortar, at great expense of money and physical exertion, when timber in abundance surrounds them, out of which they could construct log houses, as did other pioneers, at a minimum of cost and labor. The Spaniard does not even fell trees for firewood, but picks up dead limbs as they fall to the ground, or pulls them from the trees with his lariat.

and is growing richer and richer. It was in his office in Calgary that I chatted with this man on cattle raising. Said he:

"There has never been such a country for money making as this. All we have had to do has been to turn the cattle out on the prairie and let them grow into gold. The climate is such that they can feed out of doors all the year round and the grass fattens them almost as well as grain. I am now shipping stock to Liverpool, which have never tasted corn. They are grass fed, and their flesh is hard enough to stand the voyage."

"Not as well as grain-fed stock?" asked I.

"Perhaps not," was the reply. "But they cost less to raise and they are worth more money to us."

"What can you get for a good steer, Mr. Burns?"

"A four-year-old, fit for the market, will bring \$40 here," was the reply.

"What will it sell for in Liverpool?"

"Seventy-five or eighty." It costs just about \$30 to get it there, for we must send it 2,000 miles by rail and then across the Atlantic Ocean. The people who handle such cattle expect to make \$7 or \$8 a head."

"How much do such animals weigh?"

"I have shipped many which have averaged one ton each, and we sell hundreds which weigh 1,600 pounds. Such beasts are entirely grass fed."

"But will not the stock business now fall off? I understand that the ranches are being cut up into farms."

"Yes, that will be the case with ranching pure and simple, although stock raising will increase. It now takes ten acres of wild grass to support one steer; on the farms the same land will support ten. We have now about 150,000 cattle in this vicinity. We shall eventually have 1,500,000."

"But what kind of feed can you raise for fattening stock? You are too far north for corn?"

"We don't expect to raise corn. We have wheat, oats and barley. Much of the best meat is now made of wheat. The screenings and rough wheat are saved for feed and the cattle

GRAZE ON THE STUBBLE.

When wheat is low it is more profitable to feed it than sell it. I know a man who recently tried the experiment of fattening hogs with wheat. He had sixteen and he fed them on wheat that cost 70 cents a bushel. The hogs fattened so easily that his wheat, turned into pork, netted him \$1.25 a bushel. Wheat at 50 cents a bushel will bring far more in pork or beef than at the elevator.

"Barley is another feed that makes good pork," continued Mr. Burns. "It grows well in Canada, and it will, to a large extent take the place that corn does in the United States. Our barley fed hogs will bring several cents more per pound than your corn fed hogs. I expect to see a barley pork packing centre grow up here."

"Does Canada buy much of your meat?"

"Yes, we get most of our pork from Chicago, and we are also buying veal to fill out our shipments to England. All your meat that comes here pays a tariff of two cents a pound, but even at that your packing arrangements are on such a vast scale that you have so far been able to undersell us. We are also importing poultry into Eastern Canada from the United States. I brought in 25 carloads of turkeys last Christmas. Eventually, we will raise these things ourselves, and we will be shipping fowls direct to England."

One of the large stock businesses here is horse raising. I saw thousands of horses feeding on the prairies between here and Medicine Hat, and passed large herds on my way north to Edmonton. The horses are fine looking. The day of the broncho and the broncho buster have passed, and the animals now breeding are handled by the stockmen, so that they are comparatively tame when ready to break. Nearly all the best-known horses are represented. There are Clydes from Scotland, thoroughbred Shires from England and Percherons from France. Some of the ranchers are raising trotting stock, and others park saddlers for our city markets. Robin Adair, which recently took

of the wagon soon tires them out, and in short time they are ready for general use."

I would say that the Canada cowboy is a far more orderly creature than his American brother. He lacks the picturesque quality of our frontiersman and he never dashes into the settlements to shoot up the towns. The system of mounted police which prevails throughout Western Canada results in good order being everywhere kept. The farmers are regularly visited and cattle thieves are vigorously punished. Indeed, the general order in both town and country is superior to that of the western parts of the United States.

WHY HAIR BECOMES GRAY.

The color of the hair depends on little granules, which can be seen if the hair be examined under a powerful microscope. Sometimes the hair may become white in a night. Brown-Sequard tells us that when he was 45 years old his beard turned white in two days. This took place when he was perfectly well, and without any special cause. Sometimes, however, sorrow or illness produces the change earlier in life than it would usually take place. As to the cause, some have said that the hair becomes filled with small air particles which make it look gray; others have said that the outer part of the hair becomes altered, so that it is like ground glass and you cannot see the color. But a man by the name of Metchnikoff tells us that the real reason is because small movable bodies in the hair devour the grains of coloring matter and move them to the root of the hair. Sometimes poisons in disease or some results of sorrow bring about an effect upon these small migrating bodies (cells), causing them to become active in the above fashion. That is said to be the reason why the hair grows gray.

Carrye—Jimmy, I'm sure Cholly loves n Her Brother—Why? Carrye—He asked me last night how mu

THE STORY OF NICKEL

DEVELOPMENTS OF A GREAT CANADIAN INDUSTRY.

How in a Comparatively Few Years Canada Became the World's Greatest Nickel Producer.

The value of metals refined from Sudbury last year was over \$12,000,000. The production of gold in the Yukon at the same time was only about \$5,000,000. Ontario produces from one-half to three-fifths of the world's supply of nickel. It will soon be the world's great producer of cobalt. The largest deposits in the whole world, so far as known, are to be found in the vicinity of Sudbury. Probably five thousand people, directly and indirectly, draw their living from these ores. It is only twenty years since the ores were first discovered there. The story of Canadian nickel since then is one of the most interesting romances associated with the history of any industry. The earlier chapters tell of many heart-testing difficulties. Here and there through the Sudbury district are melancholy monuments of human failure, of ambitions checked, of well-intended efforts that have gone wrong. There are also the monuments of success, and the inscriptions on these, for those who take the trouble to read them, tell a remarkable story of patience, of endurance, of indefatigable energy, of limitless faith and of final triumph. The story of nickel is worth telling as a story, apart from the importance to which the nickel industry has attained in these later days.

THE WORD NICKEL.

And, at first, a few words with reference to nickel itself. The derivation of the word brings us back to the old days when the devil played a much more prominent part in the earthly affairs of mankind than he is credited with to-day. About 1500 years ago, in one of the copper mines in Germany, an ore was discovered that had all the appearance of copper ore; but, do what they would with it, the smelters of those days could get no copper out of it. The German miners 1500 years ago were superstitious—miners are still said to be superstitious. They imagined they could hear the kobolds, the pixies and the gnomes at work in the mines; and when the smelters reported that this particular copper ore refused to yield any copper, it was an easy and natural conclusion that the copper had been bewitched. The miners, therefore, called it the "kupfer-nickel" or Old Nick's copper. There are more derivations, but they are not nearly so interesting, and perhaps no more reliable. Cobalt, a word which has become so familiar of late, is said to be only another form of the word kobold a German gnome or evil spirit.

The spirit of science was at work even a century ago, and so while the Old Nick explanation might satisfy the credulous miners, it was not sufficient for those who were accustomed to look for some natural cause behind even the most mysterious phenomenon. Cronstedt, the German chemist, began a series of experiments with Old Nick's copper, and finally succeeded in isolating a metal which was quite different from anything that had been seen before. It was not copper; it looked more like silver; but it was not silver either. It was no longer necessary to believe that it was Old Nick's peculiar property; but the name stuck to it and it is still known as nickel.

A few years afterwards another chemist discovered another metal which had not been isolated before, and because of its hidden qualities it was called kobold for the reason already explained.

KOBOLD BECAME COBALT,

the name by which the mineral is now known to the world. That an Ontario mining town should owe its name to a German demon may appear a little

woods. He was found about four miles away, seated on a little knoll, and apparently very much engrossed in the examination of an out-cropping of yellow mineral, that looked like copper ore. This, so far as veracious history can say was the first discovery of nickel in Canada. The outcrop was developed into what is now known as the Murray mine. The people were more interested in copper than they were in nickel in those days, however, and so Copper Cliff,

NOT NICKEL CLIFF,

is the name by which the station on the through branch of the C. P. R. and the mining town adjacent have come to be known.

The news of the discovery spread abroad, and soon large numbers of prospectors were pushing their way through what was then an impenetrable wilderness. Many important croppings were discovered, among the earliest known being the one which subsequently bore the name of the Lady Macdonald mine.

The story of the development of the nickel wealth of Sudbury district is even more interesting than the story of its discovery. In 1886 Sir William Van Horne, Sir George Stephens, Sir Charles Tupper, Sir John A. Macdonald, and others whose names were known widely either in politics or finance, visited the place. Here was an opportunity for Canadian capital and Canadian enterprise. Unfortunately, the members of the distinguished group were not specially gifted with foresight. They were interested in what they saw and heard, but of the meaning of it they apparently had very little idea. They came, they saw—and they went home again; and the only evidence of their trip that still remains is the name "Lady Macdonald," by which one of the little lakes in the neighborhood is still known. It would be folly to blame them for their inability to see into the future. At that time but little was known of nickel, and scarcely anything of its possibilities. It is curious to note, however, that the Americans from Ohio, who visited Sudbury district about the same time, appeared to have been more favorably impressed by what they saw than the Canadians were. Perhaps they had some vision of the future; perhaps they were willing to take a chance. Whatever the explanation may be, the fact is that a group of Ohio men—Judge Stevenson, Burk, Senator H. B. Payne, Mr. H. P. McIntosh, Mr. Thomas Cornell and others—after a thorough exploration of the country decided that there was something there worth while. They purchased a block of land in the vicinity of Sudbury, and organized the Canadian Copper Co., with a capital of \$2,500,000. Thus it was that the greatest deposit of nickel in the world fell into the hands of American capitalists. This is only

A PART OF THE STORY;

but it is well to keep this much clearly in mind. Some people talk as if the said American capitalists came over like thieves in the night and gobbled up the whole of Canada's great nickel supply while the Canadians slept. The Canadians may have been sleeping, but that surely was no fault of the men from Ohio. The real fact appears to be that while chance has favored the Americans in a remarkable way, they showed an appreciation of the situation, a faith in the future, and a degree of courage in risking their money in what was then a very questionable venture, requisites that the Canadians appeared to lack. For it must be remembered that when the Canadian Copper Company was formed in 1886, nickel was not what it is to-day. The discoveries which gave nickel its importance had not yet been made. As a matter of fact, the Canadian Copper Company, as the name indicates was formed to mine copper, not nickel. The story of how the "slag" of the copper ore, which at first was cast aside as worthless, became the product of most value, and how from this small beginning a great Canadian industry grew up, will be told later in this series.

ANSWERED HIMSELF.

SUBMARINE NEARLY GONE.

Crew of the A9 Had a Narrow Escape From Death.

Submarine A9 had a narrow escape from disaster off Plymouth during an inspection recently. The submarine was struck on the starboard side, while submerged, by the Coath, a cargo steamer outward-bound.

The crew of the submarine were considerably startled, and several were thrown to the deck. The water-tight door of the conning tower was, of course closed, and the collision was not of sufficient force to fracture the plates, although several were dented. The diving rudders were immediately put up, and the submarine rose to the surface and proceeded to her moorings in the harbor under her own motive power. The Coath afterwards left for Torquay and London.

When the collision occurred submarine A9 was ten feet beneath the surface of the water. The steamer, after striking her, passed right over the vessel, without, however, touching her deck. Inside the submarine there was naturally much alarm, as a severe shock was felt. This was the first intimation of the grave danger in which the submarine was placed. The crew remained perfectly cool, and the submarine was brought to the surface as quickly as possible. Beyond the dent in the conning tower, the submarine was undamaged, and no water entered.

YOUNG FOLKS

CHATS WITH THE CHILDREN.

"Auntie, will you please tell us a story; we have not heard a story for a long time."

"Then I suppose I must," said auntie. "As you have been very good this afternoon I will tell you the story of the boy and the jackdaws."

"Is it a true story, auntie, or a made-up."

"A true story, laddie, and I will tell it as it was told me, many years ago."

"In one of the Midland Counties of England is a pretty village where your grandfather's family lived, died and were buried, for over two hundred years. In the centre of the village stands the dear old church where they worshipped; some of them are buried beneath the path that leads to the rectory. The stones are laid flat on the ground, and you read the names as you walk along."

"I should like to go there and see it, auntie."

"Perhaps you will some day, dear. I hope so. The boy the story is about lived in a long low-built house called the Manor House in those days, and only a little way down the hill, on the other side the street. He was a lively little chap of seven, very fond of hunting birds' nests, and climbing trees. One day he discovered that a pair of jackdaws were building in the belfry and a jackdaw's nest is a treasure to an English boy, for they are most amusing birds. They can be taught to say many words, quite plainly, but are very mischievous. They will carry off and hide anything they fancy; bright things, such as spoons or jewellery, must not be left about if you have a jackdaw."

"I just wish I had one, Auntie."

"I don't think mother would care to have it," said Auntie. "She has enough little mischiefs to watch already. Well, our boy watched the belfry closely every day. He knew how long it would be before the little birds were fit to take from the nest. And when the time came he told his secret to a playmate, who promised to help him get them down, for a share in the young birds. The boy's coaxing the key from the sexton's wife, and they began their climb. I wish, dear, I could tell you just how many steps there are. I have counted and climbed

HEALTH

DISORDERS OF SPRING.

Much sickness comes with the breaking up of winter, when the frost comes out of the ground; but physicians no longer look for it in the melting of ice, the swelling of streams or the movements of the atmosphere. March winds are no more injurious than those of any other month. They disseminate the dust, and with it the germs of disease, just as all winds do. The source of danger lies in the susceptibility to infection that a person is apt to acquire at this season.

Persons in full vigor have little to fear, so long as they obey the rules of personal hygiene; but those whose vitality has been lowered by disease are more vulnerable. To them it is a time of danger in nearly all seasons of the earth, for convalescence may be checked or an intercurrent disease may be induced from which recovery is uncertain.

The body is especially liable to become overheated at this time of year, because it has accustomed itself to the production of more heat than is longer required, and because the clothing is generally too warm. The winter diet also favors an increased production of heat. Then, too, there are many temptations to commit sanitary sins. The air is warm, the clothing is oppressive, the breeze is refreshing, and the outer garments are thrown open while the body is overheated. Thus, at least, catching cold is generally explained.

But it is not always the sudden change of temperature by a draft that strikes the surface which accounts for the infection. The draft acts, if at all, flexibly by inducing localized congestion, usually affecting one of the mucous membranes. The congested area becomes a possible point of entrance to bacteria.

On the other hand, there is good evidence that the disease is contracted in many cases during the time that the body is overheated, and not as a result of the more noticeable exposure to a draft. In most cases, too, the development of an apparently acute cold is but the aggravation of a latent catarrh. A person who is subject to colds is generally in need of the services of a specialist.

Cool bathing and the proper changing of apparel to meet the exigencies of the weather are the best safeguards. The transition from one season to another is gradual, and the modification of the clothing should be correspondingly graded.

THE BLESSINGS OF COLD.

In the Medical Era, Dr. Robert Peter maintains that cold is a blessing when you learn to endure it. He points out that its endurance can be acquired gradually if begun early in the season. He does not believe in coddling the body with woollens. "Better keep the blood in circulation by outdoor exercise," says he, "so that if heavier clothing should really be needed the body will not require its encumbrance too much."

Graduated baths, with friction, he tells us, will harden the body very much, especially when followed by vigorous exercises in graded temperatures. "I know a man," says he, "who is always astir, and who wears not even a shirt, but only blue jeans and blouse, all the year round. He has his windows open all the year round, day and night. No fire, and thoroughly enjoys it. While this is an extreme case, it shows how one can inure himself to cold."

Dr. Peter expresses the conviction that the subjects of ventilation and heating, which are important factors in the winter months, are not so well understood as they might be, and he attributes much of the illness during the inclement part of the year to the foul air and fuel

KOBOLD BECAME COBALT,

the name by which the mineral is now known to the world. That an Ontario mining town should owe its name to a German demon may appear a little strange, but such seems to be the fact.

Among the earliest names associated with the production of nickel is that of Sir Henry Hussey Vivian, of Swansea, Wales. He succeeded in producing nickel from Norwegian ores, but only in small quantities. All that was generally known about his process was that a lot of "salynixon" was used in it, whatever "salynixon" might be. Joseph Wharton started a factory at Camden, N. J., to work up the nickel ore discovered at Lancaster Gap, Pa. Wharton knew nothing of what Vivian was doing but worked on a process of his own. He produced a few tons a month of a very poor product, which was held at a fancy price, and could not be used on that account. The first of this metal seen on this continent was at the Centennial in 1876, when articles made from nickel were exhibited as curiosities. Wharton produced the only nickel made on this side of the Atlantic for about thirty years, or until the discovery of nickel ore at Sudbury.

The story of the discovery and the development of the nickel deposits in the Sudbury districts has many of the necessary elements of romance. The ore was first discovered in a cutting on the main line of the C. P. R. about four miles northwest of Sudbury, where the Murray mine now stands. The story of the discovery, as it is still told by the people of Sudbury and Copper Cliff is as follows: Judge McNaughton, as he was called, was a stipendiary magistrate for the Sudbury district. He was fond of rambling in the woods, and one night, having failed to return to his home, the report was circulated that he was lost. A searching party was formed at Sudbury, then a hamlet in the

valley, and how from this small beginning a great Canadian industry grew up, will be told later in this series.

ANSWERED HIMSELF.

How a Young Man Enlivened a Social Gathering.

There was a social gathering at the residence of Mr. Wigglesworth one evening last week, and among those who were present was a young man with a forehead of marvellously developed bumps, a delicate tenor voice, and a brilliant necktie. As the gathering was purely of a social character, the company sat about the room on chairs, stared vacantly at the pictures, and thought things about each other's clothes. Finally, during a continued lull in the conversation, the young man cleared his throat, pulled his cuffs down, and said, for general edification:—

"Why does a dog always sneeze three times? It was an heroic act, and the young man actually turned pale as he realized his temerity, but the company eagerly grasped the rope thus thrown to their assistance.

"What kind of a dog?" inquired a pretty girl in blue silk.

"Oh, any kind," explained the young man.

"Is it because he can't help it?" observed a smart young clerk, with a tall collar and a weak smile, who was a little jealous of the sudden notoriety of the young man.

But the owner of the conundrum frowned severely. Then a fat woman, with grey hair and a jet-black chignon, remarked:—

"My husband had a dog once. He used to wear a nightcap—that is, my husband did—and one night when he was laid up with a sore paw—that is, the dog—he forgot to put it on—my husband forgot to put his nightcap on—and he chewed it all up—the dog did—and my husband jumped out of bed and found it so twisted around his feet—found the nightcap twisted—that I had to hold his hind legs while he cut it off with his knife."

"Hold whose hind legs—the dog's?" anxiously inquired a clerical looking man near the fire.

"Of course, sir," frigidly replied the fat woman.

"But what has that to do with the question?" mildly inquired a meek little woman in corkscrew curls.

"Nothing," responded the fat woman; "only he was such a funny little brute—the dog, I mean."

Just at this moment a young man by the door, who had been thinking so hard that he had started a seam on the back of his coat, burst out with:—

"Because it is the sneeziest thing to do!"

At this atrocious act the fat woman almost fainted; and the frowns of the whole company so abashed the unfortunate young man that he shrank out of sight behind the door.

"And why," finally said Mr. Wigglesworth, as the silence became painful, "why does a dog always sneeze three times?"

The company held their breath for the answer.

"He doesn't," replied the young man, very softly.

"Why?" exclaimed Mr. Wigglesworth, in condensed amazement, while the company resolved itself into an allegory of petrified astonishment.

"He doesn't," repeated the young man, in the same soft voice. And then it seemed as if a sort of gloom settled down over the company; and after the refreshments had been served the young man of the conundrum, noticing that the weather had suddenly grown very cool, went home. And of all that throng there was not one who bade him good night.

HAD TO DO IT.

Mary—"Oh, you dirty boy! Look at this coffee all over your new suit. What will your mamma say?"

Tommy (nonchalantly)—"I don't know; but she won't let me have any fun in these clothes until I get 'em spoilt."

Happiness has been described in so many different ways that a number of people have doubts as to its existence.

with his secret to a playmate, who promised to help him get them down, for a share in the young birds. The boy's coaxed the key from the sexton's wife, and they began their climb. I wish, dear, I could tell you just how many steps there are. I have counted and climbed them, but I have forgotten the exact number, so you must be content to know the tower is a high one, and the belfry, with its barred window half way up. So they climbed the winding stone steps to the belfry. 'I'll get the birds,' said the boy to his companion, who was older, 'and you help me down.' So up he went to the nest over the window, and holding on by one hand he managed to get the young birds into his frock. Little boys in those days wore stout frocks of jean, with trousers underneath. 'Now, help me down,' said he, and between them he got safely to the belfry floor with the birds cuddled up in his frock. 'How many?' said the big boy. 'Five, Will, two for you and three for me.' 'I'll have three, I will, or I'll not let you go down. I'll keep you up here till dark, so you may as well give them to me at once,' and Will planted himself fairly in the narrow staircase that led below. 'I found out the nest and watched it, Will; I got them down, and I'll have three if I stay here till dark.' 'You'll stay, then,' said Will, 'unless you give me three.' The little boy had taken the birds by the legs, three in one hand, two in the other. A thought struck him, and up the lower steps he went as fast as he could, still holding the birds. Of course the other boy followed, thinking he would be quite the master when he had the lad alone up there, but the little boy thought the sexton's wife would perhaps be watching for them to bring back the key. 'Now,' said the big boy, on reaching the top, 'you give me three or I'll push you down.' 'Push away, then; I won't give you three; they are mine.' And over he went from the top of that high tower, a fall that must have killed any man.

"Was he killed, Aunt?"

"No, dear; strange to say, he was not even hurt. A strong breeze was blowing and the wind got underneath the frock he wore, which may have helped him a little, but it was the birds that saved his life. You see they were lit to fly, and when they felt they were falling, all those five pairs of wings fluttered out with all their might, and so he landed on the turf below breathless but unhurt. The now frightened boy at the top saw him lie a moment in his breath came, then jump up, and calling out, 'Now, you'll have none,' run home as fast as he could. At the church gate his mother and the sexton's wife, who saw the fall, and ran for the mother, met him, and the frightened women could scarcely believe their eyes, but there he was, angry and red, but still holding his precious birds in his hands. And that is how your great-great-grandfather fell from the church tower."

BATTLE IN A BALL-ROOM.

An Incident of the Carnival in Austrian Poland.

A serious fight with swords occurred during a ball at Lemberg on Thursday night, when many students were wounded.

The carnival was being celebrated in Austrian Poland under difficulties, owing to the Polish patriotic societies having passed resolutions against the holding of the usual balls, as a sign of mourning for the massacres in Warsaw and elsewhere. Several dances which have been held in Lemberg in spite of this have been forcibly broken up by students.

Thursday night, while a ball of the state servants was being given, a large number of students forced their way into the hall and summoned the dancers to disperse. Unfortunately, among the latter were many prison warders and other officials who wear swords with their uniforms. These drew their weapons and furiously attacked the intruders, who fought with sticks and chairs.

Finally the intruders were driven off the premises. The girls bound up the wounded with their handkerchiefs until the ambulance and the police arrived. A large number of arrests were made, and, of course, there was no more dancing.

Dr. Frier expresses the conviction that the subjects of ventilation and heating, which are important factors in the winter months, are not so well understood as they might be, and he attributes much of the illness during the inclement part of the year to the foul air and fuel gases, to which the baneful effects of indoor life are mainly due. According to him, conditions should be reversed, and it would be wiser to camp out and bask in the winter sun and to stay home in the summer shade.

"As to ventilation," he says, "it can never be overcome, and especially is this true at night. Our bedrooms should be well ventilated. One-third of our lives are spent in them. A bedroom with southern exposure is probably best in winter, and it is a cheer and godsend. It is death to germ life. It will cut short a cold or catarrh, and the white plague cannot lurk there. As we need the shade in summer, we need the sun in winter."

After a consideration of the diet, which should be more stimulating at this season of the year, the author emphasizes the fact that the respiratory organs mostly stand the brunt of the winter diseases. The doctor believes that we must look to the circulation to help us out in our prophylaxis. "After a cold is once contracted, however," he says, "open the flood gates of elimination and equalize the circulation. A good physic or a Turkish bath may restore conditions."

HEALTH HINTLETS.

A bad cold may be averted by a warm bath and a rub down with eau de cologne after it. Whiskey may be used if the other spirit isn't obtainable. When chilled have something warm to slip on outside the usual night dress.

Pains in the head brought on by nervous attacks will often yield to binding the brow tight with a silk handkerchief.

Massaging the face is a help to nerves as well as a preventive of wrinkles, and should be done with an emollient cream after washing it with lukewarm water. Start from the chin with an upward and outward motion. The palms of the hands are best for the cheeks, always moving them in an outward direction. Beneath the eyes also move the finger ball in an outward direction, but do it lightly or bagginess at the corners of the eyes will result. Cologne dropped on a handkerchief and held under the eyes will remove the dark lines that come from fatigue.

SIMPLE REMEDY.

Horse-radish has some medicinal qualities. A good salve is made from its leaves by druggists. Anyone having a headache will find relief by grating a small piece of horse-radish, adding a little vinegar and placing it on the forehead. It will but a few seconds till it can scarcely be borne, but apply it till it gets nearly unbearable. Renew or retain it as long as possible.

BULL HELD UP A STREET.

An Irate Irish Bovine Stopped Belfast Car Service.

An Irish bull—not an eccentricity of speech, but a real live bull of considerable physical dimensions and undoubted violence—"held up" one of the main streets of Belfast for half an hour recently. Getting beyond control, it entered a protest against the electric tram service. One motorman scoffed at the idea. Fancy an electric tram-car being dismayed at a mere animal like this.

Forward the man drove his car. The enraged animal looked surprised, snorted, lowered his head, and crashed into the vehicle. Applying the brake, the driver skipped swiftly upstairs to the roof. After that, for some time, the electric tram-car system was "resting." Pedestrians carefully kept out of the beast's sight.

Meanwhile all the china dealers—with a cautious regard to the old proverb—and many other tradesmen closed their shops.

Matters became so critical at last that a policeman brought a gun and shot the inflated animal, the bullet passing through the bull's skull, cutting off a button from a bystander's coat, and smashing a plate glass window.

CAPE HORN TO CAPE TOWN FOUR DAYS ON A RAFT FROM BONNIE SCOTLAND

ALL RAIL ROUTE FROM NEW YORK TO PARIS.

This Is a Possibility in Five Years' Time—Cost of Constructing the Lines.

The Czar has issued an Imperial ukase approving the all-rail route to America. The ukase contains his sanction of the Russian commission, already named, to make the final survey of the route to Behring Sea.

Thus what a few years ago would have been a dream challenging the imagination of a Jules Verne, approaches an accomplished fact.

The railroad from Paris to New York will be built. And this is by no means all. Within a few years, in all human probability, a continuous railway will extend from Cape Horn, at the tip of South America, to the Cape of Good Hope, at the southern point of Africa.

This railroad across five continents will pass from the Western Hemisphere to the Eastern Hemisphere through a tunnel under Behring Strait in the Arctic Ocean.

The men, the plans and the money to complete this great world railway are ready to begin the work.

NUMBER OF MILES.

The line will be 25,000 miles long. Over 15,000 miles of this distance trains are running to-day. All the remaining portion—10,000 miles—has been surveyed, and great capitalists stand ready to rush the work.

Andrew Carnegie, who is one of these capitalists, predicts that the various railways that, connected, will form this complete world system through five continents, will all be completed within ten years. A French capitalist, who has been even more active in the great undertaking than Mr. Carnegie, declares that the ride by rail from Paris to New York will be made within five years.

The cost of completing this round-the-world trunk line is estimated at \$500,000,000, an amount but little exceeding that involved to-day in projecting engineering schemes in and around New York city—in subways, bridges, tunnels, suburban railroads, railway terminals, etc.

Already the railway south from New York has reached Central America, and is hastening its progress toward the Panama Canal zone. There two lines of rails are in process of extension across Equador. From Buenos Ayres northward to join these links the work has progressed across Bolivia and a large part of Peru.

IN SOUTH AMERICA.

Southward from Peru the survey follows the lofty crest of the Andes to the very tip of South America. Taking the direct through trip from Cape Horn, at the southern end of this hemisphere to Cape Town, in South Africa, the traveler will pass in quite a straight northern line through Western South America and Central Mexico, and along the Pacific slope of the United States and Canada into Alaska. Then through the thirty-six mile tunnel under Behring Strait and its two dozen islands, that will afford ventilating openings to the tunnel, and working points through shafts in building it. Then south-easterly the line will pass through 3,600 miles of Arctic Siberia. To Paris it will go by way of Moscow, and from there through Spain and by way of tunnel at Gibraltar, to Africa. A route also is projected that will pass from the Siberian line through torrid Central Asia to the Holy Land and Egypt. There, as by the first route, it will continue over the rails of Cecil Rhodes' Cape to Cairo Railroad, in course of construction.

PARIS TO NEW YORK.

THRILLING STORY OF THE SEA — BOY'S TERRIBLE ORDEAL.

Castaway Stood on a Frail Raft for Four Days and Nights.

The White Star liner Majestic, which arrived at Queenstown recently, from New York, brought particulars of the foundering of the Albula, and the rescue, by the British steamer Largo Bay, of one of her crew, after suffering terrible privations and after being on a raft without food for ninety-six hours.

On Dec. 15 last the Largo Bay was going on her voyage from the Mediterranean ports toward Brooklyn, United States, when the second officer, Tom Davidson, from the bridge saw a speck flashing in the sunlight three or four miles to the northward. Through the glass it looked like a bit of wreckage, with a big crawfish moving upon it. The Largo Bay bore down upon the object. Captain David McGregor turned his binoculars in the direction, and saw a boy holding, as high as he could, a pair of oilskin breeches upon a stick. "It was the most pitiable sight I ever beheld," said Captain McGregor. "When the boy saw we were going to stand by to save him, he fell down upon his knees in the water over the raft, clasped his hands, bowed his head, and prayed. A boat was manned and the boy taken off the raft, which was only eight square feet in area, and upon which he was under water for some inches. The castaway had stood upon his frail craft, without sleep, fresh water, or food, for four days and nights. In half an hour from the time we had sighted him he was saved. He was so exhausted that he could barely whisper that his name was Carl Bakstrom, from near Bergen, Norway, and

HIS AGE EIGHTEEN YEARS.

The boy's hands were swollen to several times their natural size, and bleached. He wore two full suits of clothing, a suit of oilskins, and a pair of sea boots, but had no cap. He could not speak a word of English.

"When we got him aboard," said Mr. Kennedy, the chief officer, who had taken the boat to the raft, "we put him in a bunk forward, where several of his countrymen could address him in his own tongue. He kept calling for water, but the captain would not allow him to have it. The first thing I gave him was a bit of fried sole, which had been procured fresh the day before. Then I gave him a cup of fresh tea, and I bathed him in hot water. His feet began to swell. He was delicious. I took him in hand when he had fish enough. At 11 o'clock he suffered a chill, and doubled up with cramps; then I gave him a spoonful of brandy. The first thing that Captain McGregor, through the interpreter, asked him, as soon as he could talk, was whether there were any more survivors of the wreck from which he had escaped. He shook his head and repeated that he was the only survivor of the Norwegian steamer Albula, of Bergen, which had sailed from Trapani, Sicily, on Dec. 11 for Kopervik, Norway."

Bakstrom told the following story of his escape:

"On the night of the day that the Albula left Trapani, a northeasterly gale broke out. The cargo of salt shifted, and the vessel took a bad list to port, and would not right herself. The crew numbered only nineteen, being short of the full complement, while the Albula was some

THIRTY-EIGHT YEARS OLD.

The position began to look serious. The sea boomed clean over the steamer, sweeping everything by the board. Captain Peter Flamer said that all must take the boats for the Albula would never

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

The Parks Committee of Glasgow Corporation recommend that two bowling greens be laid out on Glasgow Green on the east side of the King's Drive.

Provost Alexander, of Arbroath, has intimated his intention of presenting a portrait of the Right Hon. John Morley, M. P., to the Arbroath Public Library.

Mr. John Raphael, of the Coffee House Hotel, Dumfries, died in Dumfries Infirmary from injuries he received at the end of last week by falling down a stair.

Sir James Percy Miller, Bart., of Manderston, Duns, Berwickshire, has died after a short illness. Sir James, while hunting, caught a chill, which developed into pneumonia.

A painter named Michael Carrol, 35, residing at Potterrow, Edinburgh, was killed by falling from a window on the top flat of 35 Drumsheugh Gardens, a house of four stories.

The Earl of Rosebery has, per Mrs. Anderson, Plymouth, contributed £50 to the funds of the new municipal buildings at Stornoway, which were opened by his lordship in September last.

A parcel of whalebone weighing three-quarters of a ton comprising the catch of the ketch Snowdrop, has been sold in Dundee by private treaty at a rate, it is understood, of £2,500 per ton.

At Kirkwall, Alex. Mackie, aged 60, cattle dealer, Aberdeen, for stealing a grey ewe from the farm of Upper House, Hunsrath, Harry, was sentenced to twelve months' imprisonment with hard labor.

The statue of Alexander and Bucephalus, in Edinburgh, at present situated in St. Andrew Square, opposite the Melville Monument is to be shifted to Nelson Square, to make room for the Gladstone statue.

The death has occurred at Harwick of George Cruickshank, retired missionary. He was a native of Aberdeenshire and studied for the ministry in Glasgow University. Mr. Cruickshank went to Harwick 32 years ago.

The Glasgow Parks Committee decided to recommend the purchase of Yorkhill Mansion House and estate which includes the 1st Lanark Volunteer drill ground, and extends to 31 acres, as a public park. The price to be paid is £60,000.

Incendiarism continues to be the cause of serious damages at Greenock. The fire-raising epidemic had previously been confined to manufactories, but attention has been turned to stackyards situated on farms within the burgh boundary.

In a private pond at Balmossie the body of a woman was found floating on the surface, and information was immediately conveyed to the police, who found the remains to be those of a girl, Bella Cumming, missing since December 15th.

The town council of Dumfries attended at the Burns' Mausoleum, and placed a wreath on the poet's grave on the occasion of the anniversary, and in the evening Sheriff Fleming, K. C., presided at the annual dinner of the Dumfries Burns' Club and proposed the principal toast.

The remains of the late Sergeant Donald MacKechnie, a veteran of the Crimean war and Indian Mutiny, who died at the advanced age of 78 years, were interred with military honors in the new cemetery at Tobermory. A native of Mull, MacKechnie in 1845 joined the Royal Marines, in which branch he served ten years, going the Crimean war.

H.M.S. "DREADNOUGHT" THE

UPRISING IN CHINA NEAR.

Viceroy Are Powerless to Calm Public Indignation.

Wm. Hancock, for the past 31 years a resident of China, and a commissioner of Customs there, arriving in San Francisco recently on the liner Hong Kong on his way to England. Speaking of the situation in China he said:

"The principal causes of the present unsettled condition are the dissatisfaction in Southern China over the indemnity to be paid to foreign countries resulting from the Boxer outrages, which occurred in Northern China, and the outrageous treatment accorded to the wealthy King family of China by a Customs officer in Boston when he and his family were en route from England to China by way of this country. King and his family were treated as ordinary coolies, and the head of the family was furious over the matter. I think he was the real instigator of the boycott."

"Yuan Shi Kai, Viceroy of Chili Provinces, has done all he could to stamp out the boycott, but no one can do much when once public indignation is aroused in that country. Things are very apt to become serious before peace again reigns. In various provinces the Chinese are on the eve of a serious uprising, and it is hard to tell to what length they will go."

W. S. Allen, Canton agent for a flour company, who arrived from the Orient on the same steamer, said the situation in China was very serious. "The principal element in the agitation over there is the newspaper agitation," he said. "The Chinese newspapers have progressed wonderfully. They are at last alive to the general situation of affairs throughout the world, and they are becoming a powerful weapon. It has been charged that they are being controlled by the Japanese, but I have no evidence of it. The whole movement seems to me a Chinese upheaval, national in scope. It is foolish to say the boycott or the reform movement in general is weakening. It would be more correct to say it is just beginning. I think the whole trouble could be compromised by allowing the coolies access to the Philippines and Hawaii."

Mr. Allen was recalled from China on account of the paralysis of the firm's Chinese business since the boycott.

HUMAN BATTERY.

Man Who Can Bear a Current of Two Million Volts.

A young electrical engineer, who

travellers Cape to Cairo Railroad, in course of construction.

PARIS TO NEW YORK.

The trip from New York to Paris by rail through the Behring Strait tunnel, on an express train running forty miles an hour, will occupy a little more than two weeks. The traveller who fears sea-sickness and particularly enjoys life on a railroad train may prefer this journey to that on the fast ocean liner, which makes the trip to Paris an expenditure of but six days of time.

This also will allure the traveller; the overland route will be a great spectacular life experience. He will have laid before his eyes a variety of scenes, in the temperate, torrid and frigid zones, that has never been combined in any other railway journey on this earth.

COST AND TIME.

On a train of cars, with an average speed of twenty-five miles an hour, forty-one days would be occupied continuously in this 25,000 mile journey, through South America, North America, Asia, Europe and Africa.

The cost of this trip will be about \$650 for railroad fare, with \$50 added for sleeping cars. Stop-over privileges will be in demand.

The three great railway lines that are to complete the gaps in the system of around-the-world travel, and which are now to be built, are these three:

The Pan-American.
The Trans-Siberian and Alaska.
The Cape to Cairo.

On the first and the last of these three work is well advanced.

PARSON STARTS A SALOON.

A Clergyman in Britain Takes New Way to "Save" Church.

Rev. S. W. Thackeray, M.A., and LL.D., a clergyman of the Church of England, has started, under his own personal management, a saloon where all the usual intoxicating liquors are sold. The house is a quiet, old-fashioned inn called the Fish and Eels, at Hoddesdon, in Essex. It stands on the banks of the River Lea, and is much frequented by fishermen.

The Rev. Mr. Thackeray acts as his own bartender when not engaged in his ecclesiastical duties, and is the first clergyman in England who has ever served out "goes" of gin and whiskey and half-pints of ale in a saloon.

"In these days the Church is dying of respectability, and I am going to try to save it across the bar of this public-house," is Dr. Thackeray's explanation.

Dr. Thackeray's enterprise has not passed unopposed. He has been asked by the Camberwell Board of Guardians to resign the chaplaincy of the workhouse, on the ground that "the occupation of a publican is incompatible with the proper performance of his duties in ministering to the spiritual requirements of the inmates."

Dr. Thackeray, in his reply, says: "I have only to say that I decline to resign my office of chaplain," and there the matter rests, officially, at present.

ANCIENT GOLD MINES.

There are records which show that as early as 3800 B. C. the Chaldeans were in possession of both Sinai and the gold-producing Land of Melukkah, or Midian, where recent expeditions have discovered extremely ancient mineral workings containing mining tools, dating back some 7,000 years. These mines, which yielded copper as well as gold, appear to have fallen into the hands of the first Pharaohs, for the very earliest Egyptian records yet discovered tell of the expulsion of foreign miners from the Sinaitic Peninsula.

GOVERNMENT TOBACCO.

Tobacco is a Government monopoly in Italy, France, Austria and Japan. In the latter country the rules regarding its sale and manufacture are particularly stringent. All the tobacco leaf grown in the country has to be delivered to the Government at a fixed rate, and is then re-sold to the manufacturers at another rate, and, of course, an enhanced one, which is also fixed by Government.

sweeping everything by the board. Captain Peter Flamer said that all must take the boats for the Albulu would never right herself. An attempt was made to launch a boat, but it was smashed against the ship's side. Under the weight of the last sea the vessel suddenly began to turn turtle. 'May God have mercy. Every man for himself,' shouted Captain Flamer.

"I found myself going down, down, choking with sea water, and I thought that I was never coming up. As soon as I did so I could see nothing but bits of wreckage rising and falling on the swelling waves. I espied a raft not far away, swam for it, and pulled myself upon it. The carpenter, on the captain's orders, had built a rude wheelhouse on the bridge to shelter the quartermaster from the tropical sun. It was only a rough affair, made of inch-and-a-quarter boards and scantlings. If it had been a permanent part of the steamer it would not have detached itself when the ship went down. I saw the second mate near me, and I succeeded in hauling him from the sea upon the raft, which turned out to be the top of the wheelhouse. The raft would not well hold both of us. The water washed over it, and neither of us could sit down.

"The second officer had been hit by the ship as she sank. He was already nearly overcome with exhaustion. He could neither sit nor stand. I had to support him standing or lash him with his oilskins in a sitting position in the water.

HE LASTED NO TIME.

On that night he died, and I pushed his body off the raft, which made the platform more buoyant, but still the boards were awash, and I had to stand day after day and night after night in the water, with nothing to drink, with nothing to eat, and with no sleep.

"On the day before you came by an Italian steamer passed close. I waved my oilskin and tried to shout, but I could not do so. My throat and mouth were parched and swollen. Another steamer passed too far away to see me. When I saw you I determined to try once more to be saved, and if I failed this time to fall off the raft and be through with it. I prayed and when I saw you turn out of your course I thought I should go mad with joy. The wind had been off shore, the raft had drifted about twenty miles to the southward of the place where the Albulu went down, and she had sunk before we had gone sixty miles from Trapani."

The position of the rescue was some forty-eight miles west of the little island of Maritimo, off the coast of Sicily. The Largo Bay touched at Gibraltar long enough to land the grateful Norwegian boy, who would be sent to his home near Bergen by the Norwegian consul.—London Standard.

CAVALRY MARCHING.

A French detachment of twenty men of the 4th Dragoons, commanded by the colonel, who was assisted by a captain and three lieutenants, has just accomplished a fine piece of military riding. Leaving Chambrey at 6.30 a.m., the party reached Vizelle at 2.30 p.m., having covered forty-eight miles with one stop. At 4 p.m. the march back to Chambrey was begun, the route being by Grenoble and Les Echelles. Various manoeuvres and reconnaissances were carried out on the road, and after all stops and the night's rest the detachment marched into Chambrey at noon next day, having covered 121 miles in twenty-eight hours. Both men and horses were in perfect condition.

SAFE CELLULOID.

Celluloid, hitherto barred from many uses because of its explosive qualities, has been made incombustible through the invention of a French chemist. An ether-alcohol solution of celluloid is made, to which is added an ether-alcohol solution of perchloride of iron. The two are mixed, and upon the evaporation of the solvents a compound having every property of celluloid, and which is not only non-inflammable but non-combustible, is obtained.

Royal Marines, in which branch he served ten years, going the Crimean war.

REVIVE OLD-TIME TILTING.

Tournament Will Present Spectacle From the Days of Chivalry.

One of the most picturesque spectacles ever witnessed in London, is to be provided at the forthcoming Royal Navy and Military tournament.

It is nothing less than a revival of the military sport of the Middle Ages, in which armor-clad knights on horseback, equipped with long lances, engage in fierce tilting combats. They will be picked riders and swordsmen from crack cavalry regiments.

"Tilting in Tudor Times," is the title chosen for the display, and Col. Ricardo, who has charge of all the military arrangements in connection with the tournament, informed a press representative recently that it was intended to produce as exact an imitation as possible of the ancient tilting tournament as it existed in the days of Henry VIII.

In the preparation of the tilting contests, Colonel Ricardo is to have the assistance of Viscount Dillon, curator of the Tower Armouries. He is the greatest living authority on ancient armor and costume, so that the display is likely to be historically accurate in every particular.

There is to be no Queen of Beauty. "We have discovered," said Colonel Ricardo yesterday, "after careful historical research, that no Queen of Beauty was ever present at the tilting contests in the olden days. There will be no ladies at all in the display. The number of men who will take part in the tilting will be between three and four hundred, including knights, squires and men-at-arms."

Another striking feature of the tournament will be a series of great military tattoos. Among the troops which will take part in this will be the brigade of Guards, the Household Cavalry, both of these with massed bands, two regiments of cavalry of the line, and such famous volunteer corps as the London Scottish, the Queen's Westminster and the London Rifle Brigade.

Flaming torches will be a feature of the tattoo, while some wonderful lighting effects are to be produced by the Electrical Engineers Volunteer Corps.

LONDON'S MIGHTY TRAFFIC.

Government Report Throws Light on Daily Rush.

Wonders of London traffic are narrated and illustrated in two blue books of singular interest—namely, Vols. V. and VI. of the report of the Royal Commission on London traffic, just published. They contain a remarkable series of plates and maps, about one hundred in number. They are costly in workmanship and unique as a collection never before realized of all the features of the daily rush of London life.

Among the curious facts obtainable from these maps and diagrams are the following:

One-fourth of the population of England and Wales living within a twenty mile radius of Charing Cross.

Omni-buses in London carry in one year the whole population of the United Kingdom seven times over their routes. Mileage of railways within the area now constituting the administrative County of London was only 29% in 1845. In 1860 it was 69%. In 1880 it had increased to 215%, and in 1900 to 248%.

At the busy time of the day 642 omni-buses pass by the Bank of England in an hour, making the procession two and a half miles long, and four hundred pass through Oxford Street and Piccadilly, a procession one mile and three-quarters long.

Automobile omni-buses hold 34 persons, as against the horse omni-bus load of 26, so that if the horse omni-buses of London were replaced by automobile omni-buses the streets would be relieved of one-fourth of their existing omni-bus traffic.

Perhaps truth is stranger than fiction because we don't get so well acquainted with it.

Man Who Can Bear a Current of Two Million Volts.

A young electrical engineer, who claims that he can pass through his body an electric current of sufficient voltage to work all the machinery, lighting plant and tramways of London, is appearing at a music hall. All sorts of electrical apparatus are used, and the whole stage scintillates with blue flames.

Volta lies down on a live electric couch through which more than 2,000,000 volts are driven. An assistant passes handkerchiefs over his head, arms and loots, and wherever the linen touches him it bursts into flame. Then Volta causes glass tubes in his mouth to be illuminated, and lights a cigarette in his mouth by merely touching it with his hand.

He lights ordinary gas jets by placing a finger on them or by putting near them a metal spoon which he holds in his mouth. The strange part of many of the feats is that Volta is not in connection with the battery he wires. When the full strength of the battery is on he stands several feet away, and attracts the current to him by a metal band on the wrist.

Volta declares that he has studied electricity carefully, and by constant practice can withstand a shock which would be sufficient to kill hundreds of persons. He claims to be able to attract and contain electricity in exactly the same way as accumulators.

HOW HE ROBBED A BANK.

Remarkable Career of One of the Smartest English Cracksmen.

"One of the smartest cracksmen in England," was the description given by Mr. Justice Grantham at the Liverpool Assizes of Arthur Norton, in sentencing him to ten years' penal servitude for burglary.

Norton, with another man named Preston, who received a sentence of five years' penal servitude, was caught going through the jewellery case of a commercial traveller at the Union Hotel, Liverpool. Both made a desperate attempt to escape, but they were overpowered and arrested.

"I remember sentencing Norton to ten years' penal servitude at the Durham Assizes for stealing cash and notes to the value of £3,354," continued the judge. "After plotting days, weeks, months and years, he succeeded in robbing a Sunderland bank by taking a wax impression of the bank safe keys, which he abstracted from the pockets of a bank clerk while the latter was in a Turkish bath."

"On another occasion I remember he was arrested in Soho, London, and as the detectives got into a cab by one door Norton's accomplice slipped through the other and escaped."

"He is, indeed, a man of marvellous ability, worthy of a better life and a better vocation."

Both Norton and Preston were described by the police as being connected with a gang of thieves in London with whom it was very difficult to deal.

A MOURNERS' AGENCY.

"It pays to be a mourner in St. Petersburg, and there are agencies which employ great numbers of vagrants and tramps for the purpose," says a writer. "These agencies supply suitable clothing and pocket-handkerchiefs—everything, in fact, except boots, which the tramp must show on his feet, or he will not be hired. When there is a more or less important funeral the tramps gather at the Nikolski Market, and are selected by an employer of the agency. The wage for the occasion, with tips, generally equals about 3s."

HINDU WOMEN.

The Hindu holy books forbid a woman to see dancing, hear music, wear jewels, blacken her eyebrows, eat dainty food, sit at a window, or view herself in a mirror, during the absence of her husband; and allows him to divorce her if she has no sons, injures his property, scolds him, quarrels with another woman, or presumes to eat before he has finished his meal.

THE MOST POWERFUL BATTLESHIP IN THE WORLD.

EXTRAORDINARY CASE.

Woman About to be Wedded Abducted From Church.

An extraordinary scene occurred yesterday at St. Mary's Church, North Melbourne, Sydney, in connection with the wedding for which all arrangements had been made.

The bride was a young woman of 22 and the bridegroom a State school teacher. Strong objections to the marriage were made by the relatives of the bride, but eventually it was decided that the wedding should take place between 6 and 7 o'clock in the morning. The bridegroom, anticipating trouble, arranged for the attendance of a policeman. When the wedding party arrived they found to their dismay that the clergyman was engaged in earnest conversation with a sister of the bride.

She met the bride at the church door, and, clinging to her, besought her to reconsider the step that she contemplated. "For heaven's sake, stop!" she cried. The rector called upon the constable to restore order, but matters were made worse by the bridegroom trying to drag his intended wife from the grasp of her sister.

He was successful, and at length the sister, catching the others unawares, pushed the bride out of the door and hustled her into a waiting cab, which immediately drove away.

The bridegroom was dumfounded. Raising his hands in an attitude of despair, he cried, "I am ruined!" and fell unconscious on the church steps.

GREAT STADIUM AT ATHENS.

Will Seat Eighty-five Thousand Spectators.

The great stadium at Athens, now in process of building on the site of the ancient structure, is nearly finished, and it will be ready for the Olympic games, which will be held during the last week in April.

It is constructed entirely of dazzling white marble, is amphitheatrical in shape, and will have a seating capacity of 85,000. The structure has cost upwards of \$800,000 to date, and when it is complete it will rank next to the Acropolis among the "sights" of the city.

Some of the most ancient as well as nearly all the modern athletic sports will figure in the programme of games, and there is no doubt that contestants from all over the civilized world will be present.

OF SOLDIER AND SAILOR

THE BRITISH SERVICE ON LAND AND WATER.

Henry Eighth Was Founder of the Navy — How Uniforms Have Originated.

The credit of really organizing the British navy belongs to Henry VIII., as he created the Admiralty and Trinity House, and was the first of our sovereigns to establish Government dockyards at Deptford, Woolwich and Portsmouth, says London Tit-Bits.

Bluejackets march quite as regularly as soldiers, but no one who has seen them marching together can have failed to notice how very much easier the gait of the sailor is. Further, it is well known that the work sailors have to do almost invariably produces a better development of wrist, arm, shoulders and neck than the work of a soldier.

UNIFORMS OF THE SERVICE.

There was no regulation attire for the navy until the middle of the eighteenth century. Riding one day in the park in 1874, George II. met the beautiful Duchess of Bedford attired in a riding habit of blue, faced with white. His Majesty found the effect so charming that he at once commanded that these colors should be adopted in the navy.

The adoption of scarlet for the army uniform is not of very ancient date. Henry VIII.'s bodyguard were attired in cloth of gold and silver, changed later on to red and yellow damask. The Life Guards and Horse Guards, formed from troops who had fought in the Civil wars, were the first to be clad in red. They had scarlet coats, jack-boots, and feathered hats.

WHEN RED CAME IN.

Early in the eighteenth century the Guards wore scarlet faced with blue, and line regiments were supposed to wear red, when they could get it from their colonels. Among the earliest official orders for red is one of 1791, which says that all recruits are to be supplied with a scarlet jacket, and it was not until then that red became the color typical of our soldiers.

The great distinction between the training of a soldier and sailor is that the one is much more formal and mechanical than the other. Of course, the sailor's training is more practical, but the soldier's drill is

MICROBE LADEN 'PHONES

THE OLD STYLE RECEIVER MAY BE ABOLISHED.

A New Swedish Instrument Puts the Receiver Over Speaker's Head.

Two important telephonic developments have been invented in Sweden and officially adopted by the Swedish Government, which should bring within early range the universal abolition of the microbe-laden mouthpiece of the present-day telephone. The new mechanism is ingenious and cheap; one being available for commercial and private use, and the other for military field operations and railway work.

NEW STYLE RECEIVER.

The invention known as the monophone, which is for commercial use, has a receiver of a new type and of exceptional carrying power. It is about eight inches long, with a plain handle, funnel shaped at one end. This funnel, whether held above or below or at the back of the head, or pointed upwards or downwards, collects the speaker's voice and transmits his words. As the user must not apply the funnel close to his mouth the hygienic advantages are obvious.

And as the direct current of air does not come into contact with the membrane of the funnel, all disturbing vibrations are avoided and perfect articulation is secured.

It is the invention of Mr. Holmstrom, the chief engineer of the Swedish Telegraphic Office, and is much cheaper than similar instruments in use in this country.

The other invention is a field telephone and sound telegraph for military purposes, designed by Lieutenant Ljungman, of the Swedish Royal Engineers. By its aid a body of troops, horse or foot, can keep in constant touch with the general officer at the base of operations without delaying the march.

OUTFIT FOR SOLDIERS.

The apparatus is simple to a degree. It consists of a small brass cylinder, about nine inches long by three in diameter, containing a dry battery and a speaking receiver, which is strapped to the chest of the soldier. Fixed to his back are small drums which, although light, can hold 300 miles of wire, the base end being, of course, attached to a receiver. Strapped to the ear of the cavalryman is another receiver, which is also connected with the cylinder.

As the trooper gallops along, the wire unrolls from the drum, and it may either be allowed to lie on the ground or be picked up by a soldier following, who places it on the branches of trees. The cylinder receiver is so sensitive that although it is placed some 12 inches below the mouth of the trooper he need not bend his head to speak into it; or, if more convenient, the instrument can be used as a field sound-telegraph by employing the Morse system.

For the foot soldier a lighter instrument is provided. The British Government have experimented with this instrument at Aldershot, and are negotiating for a supply for the use of the army.

An adaptation of this telephone has been made for use by railway gangers to enable them to notify the nearest station of any accident or defect on the line.

OFF THE HOOK.

The British Post-office authorities are conducting a series of experiments to overcome the inconvenience caused by careless subscribers who, after using the telephone, leave the receiver off the rest.

When some few years ago, instruments of a cruder type were used, they had a "howler" device which continued to make a noise that reminded others

SUNLIGHT SOAP

is better than other Soaps but is best when used in the Sunlight way. Follow directions.

SUNLIGHT WAY OF WASHING

FIRST.—Dip the article to be washed in a tub of lukewarm water, draw it out on a washboard and rub the soap lightly over it. Be particular not to miss soaping all over. **THEN** roll it in a tight roll, lay in the tub under the water, and go on the same way until all the pieces have the soap rubbed on, and are rolled up.

Then go away for thirty minutes to one hour and let the "Sunlight" Soap do its work.

NEXT.—After soaking the full time rub the clothes lightly out on a washboard, and the dirt will drop out; turn the garment inside out to get at the seams, but don't use any more soap; don't scald or boil a single piece, and don't wash through two sudas. If the water gets too dirty, pour a little out and add fresh. If a streak is hard to wash, rub some more soap on it, and throw the piece back into the sudas for a few minutes.

LASTLY COMES THE RINSING, which is to be done in lukewarm water, taking special care to get all the dirty suds away, then wring out and hang up to dry.

For Woolens and Flannels proceed as follows:—

Shake the articles free from dust. Cut a tubful of

SUNLIGHT SOAP into

shavings, pour into a gallon

of boiling water and whisk

into a lather. When just

lukewarm, work articles in

the lather without rub-

bing. Squeeze out dirty

water without twisting

and rinse thoroughly in two

relays of lukewarm water.

Squeeze out water without

twisting and hang in the

open air.

The most delicate

colors may be safely

washed in the "Sun-

light" way.

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Your Money Refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

ARMORED MOTORS.

France Experiments With a Death-dealing Chariot.

Successful experiments have been made in the streets of Paris with one of the seven new bullet-proof and shell-proof motor cars which are being built for the Prussian Government. M. Etienne, the War Minister, rode in the car, which attained a speed of twenty-eight miles an hour on level ground, and ascended gradients as steep as one in four.

There are no doubt that contestants from all over the civilized world will be present.
Interest in the gathering is not confined to athletics. A great number of distinguished visitors will attend, chief among whom, it is hoped, will be King Edward, who some time ago conditionally promised to open the meeting. This will naturally result in a series of brilliant receptions, garden parties and other social functions.
The Greek post-office will issue a special set of fourteen stamps commemorative of the occasion.

IN A GLASS HOSPITAL.

New Scheme for Securing Complete Isolation.

A recent innovation at the isolation hospital at Chingford, England, should be watched with great interest by public health authorities. In the group of buildings which constitute the isolation hospital for the Urban District of Walthamstow is a twelve-bed pavilion, which is an entire departure in construction from all previous isolation buildings.

The block contains twelve beds, six on either side of a central nurses' duty room. Each half of the building is divided by plate glass partitions, into six separate self-contained cubicles, with 2,000 cubic feet of air space each. Each cubicle is entered by its own separate door from the outer air.

From the nurses' room the twelve patients can be seen at any time through the observation windows.

Dr. Clarke, says the Municipal Journal, sums up the advantages of the glass cubicle as follows—

1. Isolation as complete as in a four-bed pavilion and avoidance of mixed infection.
2. The avoidance of possible infection from tuberculosis, which children may develop in an active form after severe acute illness.
3. Patients absolutely separated, and at the same time under observation.

MOVING WELSH MOUNTAIN.

Threatens to Destroy Village in the Valley.

The moving Welsh mountain is advancing slowly but surely on the villages of Troedryhiwfwch and Sebastopol, in the Rhymney Valley.

The garden of the village inn at Troedryhiwfwch has been swept away, but curiously enough, the inn, which lies between the garden and the mountain, is intact. The reason for this is that it was practically rebuilt some time ago on a solid foundation of rock.

Close to the inn is a belt of woodland in which all the trees are drooping.

Every house in Sebastopol bears traces of damage. Most of the doors have been wrenched out of shape, and the keystones over them and the windows have been forced out of position.

Many theories are put forward to account for the slide. The two most popular are mining operations and quicksand. Prof. Galloway, the mining expert, favors the former theory.

The inspector of mines said at a recent inquest at Tredegar that falls caused more deaths in the pits of that neighborhood than in any other part of the country, and that the number had increased alarmingly during the last two years.

The railway officials are watching carefully for developments which may affect the line in the valley. One of them said recently—"This has been going on for forty years, and may continue for another forty."

LAND OF LUXURY.

Spaniards spend \$31,000,000 a year on wines, \$25,000,000 on cigars and cigarettes, \$20,000,000 on lotteries, \$13,500,000 on bull-fights, and \$12,500,000 on holidays.

If a man is prosperous he has no use for his friends; if he isn't they have no use for him.

It is the fellow who can't sing who generally has things offered to him for a song.

training of a soldier and sailor is that the one is much more formal and mechanical than the other. Of course, both are drilled, but the soldier's drill is far more precise, and all his exercises and training tend to make him more of a machine than the sailor. His work, too, is not so varied, and, under present conditions, does not afford the same scope for initiative.

OLD AND THE NEW.

Ship for ship, the cost of the modern battleship and cruiser is far greater than it was in Nelson's time for battleship and frigate. The best example that we have of the old line of battleship is the Victory. She cost about £68,000 to build, and her armament would bring the cost to about £100,000. A modern battleship of the first-class costs about £1,250,000, fully armed. The frigates of Nelson's time averaged from £13,000 to £22,000 each. Our ordinary cruiser costs about £600,000.

It is an apparently well-founded superstition in the navy that vessels named after reptiles or stinging insects are very unlucky. There have been two British gunboats named Wasp; the first was wrecked with a loss of fifty-two lives; the second disappeared in a typhoon off the coast of China. The Serpent, the second unlucky ship of her name, was lost off Spain with 173 lives. The Viper, another vessel of the same class, broke her back in the North Sea, and a similar vessel, named the Cobra, also came to grief.

REMARKABLE FEAT.

Recently an Indian fakir appeared at a circus in Berlin, where he astonished the audience by lifting a boy with his eyelids. The boy made himself as small as possible, and was put into a net to which was secured a string that was provided on each end with a little cup just large enough to fit over the eye. The fakir pressed these little cups over his eyes, where they held fast, then threw his head back and slowly straightened his body, thus lifting his burden, which he then carried about—his arms being outstretched all the time—and finally lowered it slowly to the ground again. How is it possible for any man to do this? The only explanation is that the cups were fitted into the eye-sockets so that they held on the edges of the sockets, but it is not likely that the trick will be imitated by even those prestigitars who consider themselves very expert.

WHAT SPANISH TITLES COST.

Spain has 600,000 titled persons; that is to say, about one in every thirty-eight inhabitants. But such titles are held as less than nothing by the original peerage of the country. These are known as the Grandees, and form an aristocracy entirely of birth, some of them—like our old landed gentry—having no handles at all to their names, and yet entirely refusing to mix with even dukes of new creation. To become a Spanish baron \$2,000 is sufficient. A viscount costs double that amount, while to be made a count a payment of \$6,000 is necessary.

CHARITY BENEFITS BY BETS.

The sum of \$480,000 which represents a 1 per cent. tax on betting transactions under the French law, between January 16th and December 1st of the present year, is available for the relief of the poor in that country.

NEW YORK'S PET AMBITION.

New York hopes to be the greatest city in the world about the year 1902. A commissioner, with a taste for calculations, estimates that in 1920, if the rate observed in the census periods of recent years be followed, New York will have 9,848,000 inhabitants, and London only 8,940,000.

SERVICE IN THE DARK.

A series of "social Sunday night services for working people" is announced in a Norwich, England, parish. The whole service will be conducted in the dark, "so that the poorest and shabbiest may not feel out of it because of their clothes."

When some few years ago, instruments of a cruder type were used, they had a "howler" device which continued to make a noise that compelled attention. The present experiments are with the object of discovering whether a similar alarm can be employed with the more delicate instruments now in use. It is not suggested that any "howler" will be devised to express the indignation of a subscriber who finds himself erroneously and frequently rung up in the search for a different subscriber.

AN EXTRAORDINARY PRIZE COMPETITION.

In the usual run of prize competitions only two or three lucky persons get anything for their efforts. The best feature about the prize competition which the Maclean Publishing Company have inaugurated in connection with THE BUSY MAN'S MAGAZINE, is that everybody gets a reward for his or her work. To him or her will be offered one of three unique prizes,—a four years' course at any Canadian university or educational institution with all expenses paid, a free trip around the world, or one thousand dollars in gold. In addition, there will be a great many more prizes, which can easily be won by any competitor. These are over and above a reward, in the shape of money payment, to everybody who enters the competition. The Maclean Publishing Company, through whose enterprise THE BUSY MAN'S MAGAZINE is being pushed rapidly to the front among present-day periodicals, are perhaps better known to the public as the publishers of Canadian trade newspapers. All interested in this competition should write for particulars to the nearest office of the Maclean Publishing Co., Limited.

Grand Prize Competition

A FOUR-YEAR UNIVERSITY COURSE,
A TRIP AROUND THE WORLD,
OR \$1,000 IN GOLD.

In addition to these prizes there are many others. Every competitor can win one for his or her work.

THE BUSY MAN'S MAGAZINE is unlike any other, its contents are a careful selection from the best that appears in the leading publications of the world. It is published by the proprietors of The Canadian Grocer, Hardware and metal, Canadian Machinery, The Dry Goods Review and other successful papers—and who are Canada's leading publishers. Subscriptions are not hard to secure—a bank clerk in Ontario took 25 in one week by writing to his friends.

"THE BUSY MAN'S MAGAZINE is the best I have ever had the pleasure of reading." S. W. WYNN, Editor Yorkton Enterprise.

Send postal for particulars of competition to our nearest office. DO IT NOW. It may be a glorious chance in your career.

THE MACLEAN PUBLISHING CO., Limited, Montreal, Toronto, Winnipeg, or London, Eng.

car, which attained a speed of twenty-eight miles an hour on level ground, and ascended gradients as steep as one in four.

The car weighs three tons, and is of 30 horse-power. It is provided with a small quick-firing swivel gun, which can fire 600 shots a minute in any direction.

France also is providing herself with a complete corps of these armored motor cars. The car carries a folding steel bridge, which can be quickly placed across ditches. With the help of this the car showed that it could go across country.

WESTERN ASSURANCE REPORT.

Annual Statement Shows Company to be Enjoying Prosperity.

The annual statement of the Western Assurance Company will be found in another part of to-day's issue, and will be seen to be one that does much credit to this progressive company. The year's transactions resulted in \$86,340.12 being devoted to dividends, and \$133,251.69 added to the reserve fund, which now amounts to \$1,742,020.42. The liability for unearned premiums on unexpired risks is estimated at \$1,322,183.46. By deducting this sum from the reserve it is seen that there is a surplus over capital and all liabilities amounting to \$419,836.96. The fire premium during the year amounted to \$2,888,590.34, and the marine premiums to \$705,764. The fire losses were \$1,547,006.80, and the marine losses \$665,157.57. The excellent list of assets which is published in the annual statement shows that almost one-third of them consist of municipal bonds and debentures.

A choice of which we offer to the individual securing the largest number of subscriptions during 1902 to

We have some splendid lines to show you.

Men's Crome Kip Lace Boots with heavy soles sewed and nailed. One of our best values \$2.50.

Men's Heavy Cowhide Blucher Cut Boots with extra heavy soles. Pegged, nailed and riveted, Price \$2.00.

Men's Heavy Cowhide Lace or Blucher Style. Boots with strong, solid soles at \$1.25 and \$1.50. Other styles at 90c, \$1.00 and \$1.10.

THE J. J. HAINES SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCKWHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade. A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

Wall Paper.

We have our stock all in now, and can say, we have never had so large, so varied, so artistic, so good a stock of Wall Paper, as we have this spring.

We have New papers from 5c. to 75c. per roll.

Don't be led to believe ANYONE can compete with us.

We have the stock on hand. We take back any unused paper.

Spring Hats.

The New Hats are all here both English and American. Christie is the leading English Manufacturer and the "Knickerbocker" is New York's swell make.

We are Sole Agents for both Hats.

Soft Hats, 50c to \$3.00.

Derbys, \$1.50 to \$3.00.

Here are the blocks of the leading Makers to choose; your fancy as well as your head can be quickly fitted.

Our guarantee goes with every hat we sell.

J. L. BOYES,
The Reliable Clothier.

Hogs Wanted.

I will ship on Wednesday next, 12th inst. and pay the highest Market price for good select hogs.

J. W. HALL.

The Salvation Army Emigration.

Blank application forms for farmers who wish to apply to The Salvation Army for farm help may be had at this office.

Fire.

On Wednesday evening fire was discovered in the frame woodworking shop in connection with Mr. Ezra Pringle's blacksmith shop. An alarm soon brought the firemen on the scene and through their efforts the fire was confined to the building in which it originated. The building was badly gutted and the tools and material in the shop destroyed.

The Fourth Contest.

The fourth elocutionary contest was held in the Town Hall last Tuesday evening and was well attended. There were six contestants and as amateurs their selections were exceedingly well rendered. The judges, Mrs. John Gibson Mrs. A. W. Grange, and Mrs. S. L. Daly, announced Contestant No. 5, Miss G. Abell as the winner of the contest. The medal was presented by Rev. G. S. White who congratulated Miss Abell on her success. A good musical programme was provided. Mr. C. D. Black proved an excellent chairman.

Visitors in Washington nearly always call upon the congressman from their district, and the latter, if of hospitable turn, frequently invites them to luncheon in the congress restaurant, a privilege highly prized by the average visitor. Once a number of women called upon a wealthy congressman and were duly invited to have luncheon with him, which they promptly and gladly accepted, and when seated proceeded to order a luncheon substantial enough for day laborers. When the check for the luncheon was handed to the congressman and he handed a bill for the amount to the waiter, one of the women remarked that she thought congressmen did not have to pay for their meals there or she would not have offered so much. The congressman, says the narrator, explained that paying for luncheons was one of the pleasant priv-

Don't Dye the Old Way.

The same package of **DY-O-LA** can be used for silk, wool, cotton, mixed materials, etc.

It's a new and better dye. Absolutely fast colours—rich and beautiful.

"DY-O-LA dyes more and better than any other dye I have ever used," writes Mrs. J. Webb, Mill River, P.E.I.

No poisons or acids in DY-O-LA. Use with common salt—and common sense.

Easy as washing. Same directions apply to every colour. (Be careful about discharging the old colour.)

At the druggist's insist on getting **DY-O-LA**.

One package instead of three. Price, 10c.

PERSONALS

Miss Emberley, Yarker, is the guest of Miss Gladys Knapp, Sydenham.

Master Harry Boyle is the guest of Mr. and Mrs. John Jenkins, Princess Street, Kingston.

Mr. J. D. Redmond, Holleford, was a caller at our office on Saturday.

Mr. Chas. B. Windover, Petrolia and Mr. Clarence Hicks, Peterborough are guests of Mr. and Mrs. Jas. Windover, Forest Mills.

Mr. Jack Hayes, Marlbank, was a caller at our office on Saturday.

Mrs. John Lowry entertained a number of friends on Wednesday evening.

Mrs. H. Cline, and daughter Elsie, Mount Pleasant, are guests of her father, Councillor Ming, Bridge street.

Mr. F. W. Vandusen, was in Peterborough this week attending the Annual meeting of the Canadian order of Home Circles.

Mr. F. S. Lapum expects to leave Napanee about the first of April for Mexico city where he has secured a situation with the United States Banking Co. of which Mr. Geo. I. Ham is president.

Mr. Donald Gerow, is taking a course in the Kingston Dairy school.

Mrs. John McKim left on Monday to spend the summer with her son, W. J. McKim, at Prosser, Washington Territory.

Mr. W. A. Glass, Fort McLeod, Alberta, who spent the winter with relatives in this vicinity left Tuesday for his home.

Mr. Chas. Cleall of the Merchant's Bank Staff has been transferred to Athens, Ont. Branch.

Mrs. Richard Bennett, Toronto, was in town this week attending the funeral of her father, the late Benjamin Treadway.

Mrs. T. E. Anderson was in Kingston on Wednesday.

Mr. J. L. Boyes spent a few days this week in Toronto.

Mrs. John Coates is visiting friends in Enterprise.

Miss Edith Hawley returned on Wednesday from Cobourg.

Mrs. J. S. Ham is visiting friends in Hamilton.

Mr. Walter Fralick returned on Wednesday, to Cheboygan, Mich.

Mr. and Mrs. T. D. Pruyen returned to Napanee on Wednesday.

Mrs. Geo. Saunders, Deseronto, was the guest of Mrs. S. R. Wales on Wednesday.

Mr. and Mrs. F. P. Douglas are spending the week in Toronto.

Mrs. J. W. Fuller, Tamworth, is spending the week in town.

Miss Mary Lee, Colebrook spent Thursday in town.

Mr. and Mrs. J. A. Gordanier are spending a month with friends in

ANYONE can compete with us.

We have the stock on hand.
We take back any unused paper
We trim the edges if you want it done.
We will sell borders and walls at same price.
We guarantee satisfaction.
We will take Eggs in exchange.

All we ask is a comparison of goods and prices.

Don't fail to call on us.

Re Old Boys' Association.

There will be a meeting held in the Council chamber, at the Town Hall, at Napanee, on Tuesday, March 20th, 1906, at the hour of 2 p. m., to consider the formation of a Lennox and Addington Old Boys Association and the holding of a Reunion this year. Some of the organizations that have been communicated with have not named a committee, and if the committee has been named the fact has not been communicated to the convener, and such organizations and committees are requested to take notice of this meeting. It is hoped that there will be a large attendance and that in the meantime consideration will be given to the best means of forming a strong association and that special thought will be directed to the question of finances, programme, formation of Lennox and Addington Old Boys Associations in other centres, &c.

U. M. WILSON, Convener.

M—H—

Sap buckets, sap pans, spoils, dairy cans. We make the best in Canada.
BOYLE & SON.

Properly Boiled Meat.

To boil meat so as to retain the juices and soluble salts and yet cook it sufficiently it should be plunged into boiling water and boiled rapidly for about ten minutes. After this fast cooking the kettle must be pushed over to the back of the fire, where its contents will simmer gently. This tends to coagulate the outer rind of the meat so that the juices cannot escape. If meat is treated in this manner the inside will be found juicy and tender, but if the meat is allowed to boil it will be found hard and chippy, the goodness having all boiled out of it.

Britain's Oldest Office.

The oldest office under the crown is that of lord high steward, which was in existence before the time of Edward the Confessor—indeed, some authorities say that it was instituted by Offa in 757. For a long period this official was second only to the king, and the office was for some time hereditary in certain noble families.

His Expectation.

"I suppose," said his friend, "that when the investigation takes place you will be represented by counsel."

"Yes," said the statesman, "and I suppose I'll be misrepresented by the opposing counsel."

The Nightshade.

The deadly nightshade in Italy and Spain is the emblem of falsehood. It is probable that the poisonous character of the plant had something to do with the symbolism.

gressmen did not have to pay for their meals there or she would not have ordered so much. The congressman, says the narrator, explained that paying for luncheons was one of the pleasant privileges which were still permitted to the congressmen by an indulgent government and that it was one which they especially enjoyed. "And visitors help us enjoy it, too," he added.

doesn't live in Billville—sent the following to headquarters in Washington:

"This will make three times that I've told you I'm laid up with a bad leg, havin' shot myself in the left leg—the one that was wounded in the war—while I wuz tryin' to kill a squirrel for my breakfast, and I will not be besides, I don't git much holiday now!"

Scotland Yard.

Scotland Yard, widely known as the headquarters of the London police, is a historical place, said to have been the site of a palace where kings of Scotland were received when they came to London. It is near the banqueting hall, Whitehall. The Scotch kings retained possession of it from 959 till the rebellion of William of Scotland. Milton, Sir Christopher Wren and other notables lived in Scotland Yard.

Why?

The following advertisement appeared in a prominent London newspaper:

Wanted.—Experienced business woman as manageress, floorwalker, supervisor, not necessarily experienced in hairdressing, but must be tactful, reliable and born about Sept. 22.

Two Kinds of People.

There are two great promoters of social happiness—cheerful people and people who have some reticence. The latter are more secure benefits to society than the former. They are the non-conductors of all the heats and animosities around them.

A Mean Insultation.

Miss Ingenue—Aren't you nearly ready to go to the ball? Miss Passany—Haven't made up my mind to go yet. Miss Ingenue—Oh, do you have to make that up too?

In proportion to population, mate drinking is more common in those parts of South America where the plant grows than tea drinking in the tea districts of China.

Man is the only animal which is always accompanied by disease except those creatures that are his companions and share his patronage. There is reason to believe that the denizens of the forests, the veld, the rivers and the ocean, so far as they escape man's influence, live, with hardly an exception, healthy lives. Chronic ailments begin with man's protection in the dairy, stable and kennel. Man has created artificial conditions with which the "thousand ills that flesh is heir to" are associated. It is now his supreme task to bring these conditions into harmony with the laws of his being. Sickness and debility are not to be regarded as natural and inevitable parts of our heritage, but as the fruits of rebellion against nature's laws, and therefore to be got rid of. If the human family dwelt in ventilated houses, breathed pure air, lived temperately, with little or no alcohol, and took daily exercise in the open, it would perhaps know little more of gout, rheumatism, cancer, fever, lumbago, dyspepsia, asthma and the host of infectious troubles than do the lower animals.—London Telegraph.

Miss Gertie Beattie is the guest of Miss Maggie Yorke.

Miss Bridget Tallon is seriously ill. The long bridge is again in a dangerous condition.

The funeral obsequies of the late Andrew Moir took place here on the 12th inst. The deceased was a native of this place, but left here about seven years ago. He had resided near Eugene City, Oregon, for five years, at which place he died of typhoid on the 27th.

His brother, John Moir, Duluth, Minn., accompanied the remains on the long and sad journey. The deceased was highly respected here, and the news of his death cast a gloom over the whole community. A widowed mother, four brothers and four sisters are left to mourn the loss of one they loved.

Information from various Provinces of Canada points to the fact that many women have been deceived and unscrupulous manufacturers to imitate the popular DIAMOND DYES.

Women Angrily Aroused ALL OVER THE DOMINION.

Our Canadian women, thoroughly aroused, after loss of time, money and valuable materials through the use of muddy, blotchy and weak dyes have directly laid the blame for their losses on the retail merchants who sold them the deceptive dyes.

This action of indignant women has caused many of our retail and wholesale dealers to pack up and return to the manufacturers responsible, their worthless and dangerous dyes.

MORAL:—When ladies decide to do home dyeing work, it pays to use the celebrated and popular DIAMOND DYES, which have been the home friends of the ladies for over 25 years.

When buying, see that each package handed to you bears the words DIAMOND PACKAGE DYES. Users of DIAMOND DYES soon become experts in the fascinating work of home coloring, and find that a ten cent package will renew the life of any faded and dingy suit, dress, skirt, blouse, jacket, cape or husband's or son's coat, vest or trousers. Allow no dealer to offer you the something he calls "JUST AS GOOD." No other dyes equal the DIAMOND DYES.

Send your name and address to Wells & Richardson Co., Limited, Montreal, P.Q., and you will receive free of cost new Dye Book, Card of Dyed Cloth Samples and Booklet in verse, entitled "The Longjohn's Trip to the Klondike."

TOWN COUNCIL.
Council Chamber,
Napanee, March, 19th, 1906
Council met in regular session Mayor Lowry presiding.
Present, Councillors Simpson, Williams, Graham, Kimmerly, Meng.
Minutes of previous meeting were read and adopted.
On motion Mr. Gibbard was heard in reference to a House of Industry, commending the action of the Council already taken and suggesting further action by the churches and others to bring pressure to bear on the authorities to have a House of Industry erected. Mr. Gibbard suggested the appointment of a committee of the Council to meet a committee of the churches and citizens to obtain statistics and information to lay before the Government.
Mr. Kenney was heard in reference to taxes on land sold by him to Mr. McCallum, on which both parties were assessed.
On motion Mr. Jas. Roblin was heard in reference to an order for rubber boots placed with Wilson Bros. at \$4 per pair, though the J. J. Haines store offered the rubber boots of same quality at \$3.75, though under a different name.
Mr. Kimmerly explained that in the judgement of the committee the boots purchased were slightly heavier than the (boots offered by the J. J. Haines Store).
Councillor Meng informed the Council that the new rubber coats purchased for the firemen were unsatisfactory.
COMMUNICATIONS.
From Underwriters' Association referring to report of Underwriters in reference to fire fighting appliances of the town recommending additional hydrants, hose, &c. Laid on the table.
From Alexander Bruce in reference to debentures, confirming form of debenture already submitted and that the debentures will be purchased as soon as the private bill has been signed.
From J. S. Fullerton, Toronto. Referred to Clerk to get further information.
From Canadian Rubber Co. re purchase of Fire Hose. Fyled.
REPORTS OF COMMITTEES.
The Finance Committee reported the Auditor's Report correct. On motion the report was adopted.
The Finance Committee reported in reference to account of Mr. W. F. Hall, 84 cts. On motion the report was adopted.
The Chairman of the Fire Water and Light Committee reported that the gong had been placed in the Fire chief's residence, also that the town's private bill has had its second reading in the house.
The chairman of the Poor and Sanitary Committee reported that he had a largely signed petition in favour of the House of Industry.
The Printing and by-laws committee reported in reference to a complaint of a butcher that grocery stores were selling fresh meat. The chairman reported that he could not find any fresh meat sold in any grocery store in town. On motion the report was adopted and the treasurer instructed to collect all butcher's Licenses.
All the members of the council ex-

OBITUARY.

EMMA JANE LEGETT.

Beloved wife of Reuben Herrington passed away on Thursday, March 15th aged fifty-two years and seven days. Deceased had been ill for a couple of years, suffering from cancer. Last fall she went to Toronto where an operation was performed which afforded but temporary relief and after months of extreme suffering she passed to the Great Beyond. Deceased will be much missed by her host of friends, to whom she was endeared by many acts of kindness. The funeral took place from her late residence, Richmond, the large number of friends present amply testifying to the esteem in which she was held. Besides her husband one son, Mr. Thos. Herrington is left to mourn her loss.

MARTHA JANE WAY.

Relict of the late Edward Edwards passed away on Wednesday evening, Mar. 21st, aged 62 years. Deceased was in good health on Monday, but on Tuesday night was taken suddenly ill. She managed to alarm her daughter, Miss Libbie Edwards, who at once procured assistance and attendance, but despite every attention she died on Wednesday. The funeral will take place from her late residence, South Napanee, on Saturday at 2.30 p.m. Services will be held at the house, thence to the Western Cemetery vault. One son, Mr. Gilbert Edwards, and two daughters, Mrs. Wallbridge, Watertown; and Miss Libbie Edwards are left to mourn her loss.

Pocket Electric Flash Lights will sell at \$1.00 each.

BOYLE & SON.

YARKER.

We have sleighing again and many are availing themselves of the chance for another sleigh ride.

R. Garrison is shipping hogs from here again.

The Ladies' Aid will give a tea in the Methodist church here at Easter.

Burglars at Newburgh; where next. All hands get out your shooting irons.

Mrs. E. Vanluven is improving the front of her residence here.

J. Watt will build an addition to his hotel. The kitchen and dining-room will be enlarged. It is intended to erect a new building here for bank purposes.

We notice Norwood and Peterboro are intending to enforce the law, as regards the sale to minors of cigarettes. It seems that parties in this section are breaking the law or are ignorant of it, for young men under eighteen are often seen using these cigarettes.

Services are being held in the English church here during the present week.

Jas. Warner has purchased a lot from P. Vanluven, and will build a butcher stall there.

H. Barclay, Mrs. L. Carl, Mrs. M. Warner, are on the sick list.

urglars entered the general store of J. Mills in Shannonville. They broke open the till, securing \$5 in small change besides taking several pairs of oots. They left no clew.

It is not unusual for a snow storm of the extent of that of Monday night to business here at this late date in March, though once in a while a good snow fall has been witnessed on the 31st of March. However, it is one year since a winter, which would have it done its duty two months ago got busy at the springtime. Snow began to fall lightly Monday afternoon and continued pretty well through the night. In the morning, the depth was eight inches, in the level, the largest fall of the winter, which has seen so little snow. At this late date the snow was not required. It will leave the hitherto dry streets in a pretty mess as soon as the thaw begins.

Builders Hardware, Paints, Oil, Glass, Varnishes for Boats, floor finishes at BOYLE & SON.

Bellevue, March 19.—Alex Patterson, a trial in the County Court before Judge Deroche this afternoon, on the charge of assault with bodily harm to his wife, was found guilty, the Judge saying there was no doubt in his mind that all Mrs. Patterson told of the assault was true. He deferred sentence until Saturday, on request of the prisoner's counsel, who said a momentary agreement might be reached between the prisoner and his wife, which might mitigate the Judge's view.

Ag Carpets and Dyeing.

Colors are everything in a rag or wool carpet. Dyes that are true to color, will not fade nor crock are the only satisfactory dyes to use. We are agents for the new dyes Dy-o-la and Rexall which dye either wool or cotton, also Diamond and Turkish Dyes. 3 packages for 25 cents. Try our cheap dye for Black, brown, and yellow. The Medical Hall.—RED L. HOOPER.

A Pity Indeed.

Snipkins (just returned from Italy)—and so, you see, I did not "see Naples and die." Miss Awfully Bored (absently)—What a pity.

Until comparatively recent times the only narrow was a large pile of brush or tree branches, dragged across the field by a team of oxen.

The Brute!

"This hat of mine," stormed the wife, "has been out of date for ten solid years."

"I should certainly have thought," responded her shameless husband, "that the styles would have swung back to it at least once in that length of time."

A Saving System.

"I saved a big pile of money today," said Mr. Hardhead.

"That is lovely! How?" said his wife.

"Instead of going to law with a man for what he owed me I let him have it."—London Tit-Bits.

His Specialty.

Mrs. Knicker—Is your husband an after dinner speaker. Mrs. Bocker—No, but he does a powerful lot of grumbling during it.

There are ways of showing satisfaction without a superabundance of words.

DEAN SMITH'S DEATH.

Kingston, March 20.—Rev. Buxton Birbeck Smith, Dean of Ontario Diocese, died at 8.30 o'clock.

While giving a brief address at evening, in St. George's Cathedral, on Tuesday, the 13th, he was stricken with apoplexy. His condition improved for several days, but on Sunday night a change for the worse came.

The deceased was the son of the late Rev. J. Smith, Rural Dean of Bromo, Que. He was born at Chambly, Que., in 1846, graduated at Bishop's College Lennoxville, as B.A., in 1866 and M.A. in 1873. He was ordained deacon in 1869 and priest in 1871. He was engaged as missionary for eight years on the Ottawa, 1871 to 1880 at Marysburg, 1880 to 1881 at Shannonville 1881 to 1883 curate of Christ Church (Ottawa) 1883 to 1885 rector at Sherbrooke, Que. In 1885 he was appointed rector of St. George's Cathedral, Kingston, in succession to Dean Lister, but retained the title of Dean until his death. In 1892 he was appointed a canon in St. George's and in April, 1893, became Dean of Ontario. In 1895 he received the degree of D. D. from his alma mater. He married in 1879 Louisa, third daughter of the late Walton Smith, Inspector of Prisons at Quebec. His wife and one daughter, Miss Jessie, survive. The late Dean Smith was greatly beloved by all classes and creeds in Kingston, because of his broad-mindedness and charitableness.

THE COXALL CO.

25% 25%

The great curative powers of this remarkable remedy is attracting much attention and everywhere it has been introduced it is winning Tuck's Bone Oil its way among the people. It is a powerful, penetrating oil which we believe has a larger percentage of cures of rheumatism to its credit than any other remedy ever offered for this dread disease. It acts directly on the bone—the lodging place of rheumatism—dispels the poisonous acid from the joints to be carried out of the system in the natural way, and by its splendid work has proved that the surest and quickest method of getting relief from the torturing pains of rheumatism, as well as the common sense way, is by a direct attack on the affected part. For the small ills of life it is invaluable.

Mrs. W. H. Thomas of Lombardy writes as follows:—I was subject to stiff neck. Suffered for years and have been as long as two weeks at a time able to turn my head without turning my whole body. I doctored and got relief only to have the trouble return again. In August last I had a severe attack and I tried Tuck's Rheumatic Bone Oil, having been reading in the papers about how good it was for rheumatism &c. Three applications completely cured me and I have had no return of the trouble since I recommend Tuck's Bone Oil to everyone.

Mrs. W. A. Thomas, Lombardy, Ont.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis in short for any and all kinds of inflammation there is nothing to equal Tuck's Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c a bottle or sent prepaid by The Tuck Bone Oil Co. limited, Smith's Falls, Ontario.

NOTICE OF MEETING.

The County Council

of Lennox and Addington will meet at the Council Chambers, in the Court House, Napanee, on

Tuesday, 3rd April, 1906, at 2 o'clock p.m.

All accounts must be in the hands of the undersigned, not later than Tuesday, 3rd April 1906, in order that they may be considered.

W. G. WILSON,
County Clerk.

Dated March 21st, 1906.

Sympathy.

It will afford sweeter happiness in the hour of death to have wiped one tear from the cheek of sorrow than to have ruled an empire, to have conquered millions or to have enslaved the world.

The Social Maze.

He—Don't you find this going out so much rather fatiguing? She—Yes, and so confusing. By the way, is the Plunketts' dance tomorrow night or is this it that we're at now?—Woma n's Home Companion.

Universal Habit.

Lives there a man who has not said, "Tomorrow I'll get out of bed at 6 o'clock and get things done before the setting of the sun?"

Lives there a man who has not said at 6 a.m., "How good this bed does feel!" and snored till after 8, then wondered how he slept so late?

SELECTED WHEAT LANDS IN WESTERN Canada near transcontinental railroad. Exceptional investments, absolutely safe and profitable. Full particulars on application. Denny & Pringle, Melita, Man., or Kenosha, Wis.

AGENTS WANTED. Why not have the best looking sample case, best goods and the best terms? ALFRED TYLER, Teas, London, Ontario. Apply Box E Express Office, Napanee.

Easily Explained.

"Oh, yes, his wife believes all he tells her."
"Isn't that remarkable?"
"Not at all. He never tells her anything."

A Fellow Feeling.

"I am hurt more than you," said the father.
"When I punish you, son," and thereat the boy raised his head as he sobbingly said,
"Well, there's some consolation in that."

No Mystery.

Mistress (severely)—How did this fire happen to go out?
New Girl (innocently)—I guess you forgot to tell me to put coal on.

Sweet Sympathy.

Towhee—Look at that poor blind beggar playing the accordion.
Browne—Yes; I've been listening to him. Pity he isn't deaf too.

No Deception.

Man calls his wife his "better half,"
But that's a sort of bluff.
He can't deceive himself, for she's
The whole thing, sure enough.

PROPERTY JUMPERS' TRICKS.

Burglar Who Gets into Houses Hid in Furniture.

Of all the criminals who make a living by preying on their fellow-creatures, the "property-jumper" is the most successful and the most scientific. He is not the common or garden thief, but a smartly-dressed individual, with plenty of money in his pockets and an excellent supply of that admirable quality known as "pluck."

A "property-jumper," it should be explained, is a man or woman who boldly takes possession of flats and houses, furnished and unfurnished, the owners of which have gone away and left the premises under the charge of a caretaker.

One of the smartest pieces of work that a "property-jumper" has done for some time was at a large flat in Paris. Some weeks ago the owner, a well-known lady music hall artiste, went away to Spain to take up an engagement there. The porter of the building in which the flat was situated was told by the lady to admit no one to her rooms under any circumstances during her absence. About a week after she had gone the porter received a letter, purporting to come from the tenant, and informing him that she was forwarding a large antique cabinet and would be glad if he would see it safely lodged in her flat. A few days later the cabinet arrived and was placed in the rooms. When the lady returned home she found to her dismay that the better part of her portable property, including jewellery to the value of \$2,500 had vanished. The thief had got into the flat in the old cabinet, which he himself had sent, and about which the tenant knew nothing whatever.

BABY'S SMILE.

Baby's Own Tablets has a smile in every dose for the tender babe and the growing child. These Tablets cure indigestion, wind colic, constipation, diarrhoea, and feverishness, break up colds and bring natural, healthy sleep. And the mother has the guarantee of a government analyst that this medicine contains no opiate, narcotic or poisonous "soothing" stuff—it always does good and cannot do harm. Mrs. Joseph Ross, Hawthorne, Ont., says:—"I have used Baby's Own Tablets and find them just the thing to keep children well." You can get the Tablets from any medicine dealer or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Contralto—"Only think of it! I was encored three times in my last song." Soprano (spitefully):—"Yes; the audience recognized that you needed practice."

Itching, Burning Skin Diseases relieved in a day. Eczema, Salt Rheum, Barber's Itch, and all eruption of the skin quickly relieved and speedily cured by Dr. Agnew's Ointment. It will give instant comfort in cases of Itching, Bleeding or Blind Piles, and will cure in from three to six nights. 35 cents.—119

Mr. Country Life (reading):—"If you

Fashion Notes.

FASHIONS FOR LITTLE FOLKS.

Before the first signs of coming spring, says a writer in the Delineator, mothers are busy planning the wardrobe of the young. This is far simpler than it once was, as the fashions for girls are adapted from those of the grown folks, and never were more attractive and becoming than they are at the present time. Ribbons enter largely into the decoration of juvenile dress, adding much to the pretty effect. For young girls under twelve, the one-piece plaited frock or blouse suit is always a sensible choice for light woollens or silks, and white with gilt buttons is effective, and has many admirers. Guimpe frocks are indispensable for girls, as variety and freshness are thereby obtained. For little girls and boys the Russian modes in different forms prevail, and are adaptable to simple, as well as more dressy wear.

The sailor is worn as much as ever, with decorations of braid and embroidered emblems, which can be bought ready to put on.

Cashmere, with bands of contrasting color, is used in a pretty costume, the trimming outlining the centre panel of the skirt, and edging the bretelles.

A seven-gored skirt for a young girl has box pleats at each seam. Five fine small box pleats front and back on the blouse. The same pleats extend the entire length of the sleeve which ends at the elbow in an inverted flare cuff.

PRETTY BUREAU SCARFS.

The prettiest of bureau scarfs, which carries out not only the color scheme of a room, but the very flower designs which may make up a part of the wall covering, can be made in an evening, at very little cost.

Dimities and lawns, with crossbars and plaids of white, have flowers of delicate colors scattered all over the barred background. Violet, blue, rose, green, yellow—every color and a number of shades are represented, and almost the whole floral calendar.

For a rose room, nothing makes a much daintier cover than one of those rose-strewn dimities, made with a deep hem, or with a four-inch ruffle, laid under a narrow hem.

In either case, the hem is briar-stitched, either with some one of the beautiful rose colors or with green, which for that matter, is just a little prettier. Use embroidery silk—the kind that will do up—for the briar-stitching, doing the double briar-stitching if you prefer the finer silk threads, or single with the heavier.

White ones, made the same way and laid either over a color or white, are more satisfactory for constant wear. They may be made of plaid muslins, or of the pretty plaid handkerchief linens which have just come out.

WHITE FOR SUMMER WEAR.

Excepting lingerie hats, we are told that the white hat is again taboo. It is so by fits and starts. Sometimes the white hat is the only smart thing one can wear; at all other times it is a thing of

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXXVI.—(Continued).

"What do you think has become of her, Jack?"

Jack Wesley shook his head.

"I think—" he began, then he stopped and took up the paper again. "But it's not of much consequence what I think. If any one knows where she is, depend upon it that person is Guildford Berton."

They were all very silent, thinking this over, but presently Jack broke in upon their reverie.

"Any way, it's no use making yourselves unhappy over the question to-night. I really think you deserve a little felicity. So, young people, let us have another small bottle of Pommery and—be merry."

Cyril and Norah were only too ready to dismiss all unpleasant subjects from their minds; they felt that they had been living under clouds so long that they were entitled, as Jack said, to a little sunshine.

After dinner they went out for a walk, and, leaning on her lover's arm, Norah saw for the first time something of the humors of that lively thoroughfare, the Strand.

It was nearly midnight when the two young men escorted her to the hotel, and Jack considerably crossed the road and left them to bid each other good-night unobserved.

"I'm the happiest man in this great city!" exclaimed Cyril, when he and Jack were alone in Jack's chambers. "The very happiest! Jack, did you ever know anything so extraordinary as this meeting and—and—reconciliation? There's only one thing I want to complete my satisfaction, and that is to meet Mr. Guildford Berton and give him a piece of my mind—"

"Meanwhile," said Jack, thoughtfully, "is Miss Norah to go on living by herself in an hotel off the Strand, eh?"

Cyril pondered this question.

"No harm can come to her—"

"No one will run away with her, certainly," said Jack, "but it's scarcely within the strict lines of propriety. She must have some friend upon whom she could rely—I mean some lady friend—"

"Of course!" said Cyril, promptly. "Lady Ferndale!"

"Exactly," said Jack, who had been thinking of her all the evening. "I will tell you what will happen: Lady Ferndale will be one of the first to hear of Miss Norah's flight, and you may depend upon it that the first thing she will do will be to come posthaste to London, thinking that Miss Norah may chance to go to the Ferndale's town house. Now, my lad, here is the plan of campaign. To-morrow we will go to the old lawyer's, Mr. Petherick's, and if he should have returned, you can tell him Miss Norah's story, and she can formally give up all claim to the old earl's money. That will leave her free, and absolutely her own mistress, to do as she likes, and if I were in your place, I should take care that she liked to marry me in—well, as soon as you can get the license. Of course, you'll have to take Lady Ferndale into your confidence, and perhaps the old lawyer, too; but I'd keep the lawyer in the dark if I could. He'll be sure to put some spoke in your wheel; lawyers love delay as mice love cheese, and if he hears that you are the Earl of Arrowdale, he'll stand out for all sorts of legal forms and ceremonies."

The two men sat far into the morning talking and planning, and after break-

you mean to say that you are going to resign half a million of money without a fight for it? You'll forgive me, sir; but I think if you were, say, twenty years older, you'd adopt a different course."

"No, I shouldn't," said Cyril, with some difficulty suppressing a smile. "I am quite willing that the earl should have this money. We shall get on very well. I—I don't know whether you can tell me how soon I can get a special license."

They talked for some little time longer, and Mr. Petherick's last words, as they rose to go on to Lady Ferndale's, were:

"I think you are two very foolish—and happy—young persons, and I'm going to do the best I can for you, in spite of yourselves. The least the earl can do, if we relinquish all this money without a fight, is to hand back a portion of it; he can very well spare it, confound him! What do you think, Mr. Burne?"

"I don't know, sir," said Cyril, shaking his head, gravely. "From my short experience, I'm inclined to think that men are not so ready to hand back any coin; but we'll hope for the best. You will let us know, Mr. Petherick, directly the earl turns up?"

"Yes, I will," said the old gentleman, with a kind of grunt; he was getting rather tired of the hunt for the young peer, and rather inclined to consider that a man who kept out of reach of an earldom did not deserve to be sought for. But all the same, he meant finding him, and one of the first pieces of business he transacted with the young earl, he resolved, should be to gain the best terms he could for the beautiful girl who was no longer an earl's daughter and the mistress of half a million.

CHAPTER XXXVII.

There was another delicious drive to Lady Ferndale's house, during which the two "foolish—but happy—young persons" discussed the situation in all its bearings.

If anything could have increased Norah's love for Cyril, his indifference to the loss of her fortune, and his cheerful assent to the surrender of it without a struggle, would have done so. To her he seemed the very type of all that was noble in man, and Cyril felt extremely uncomfortable as she nestled against him and whispered her praises in his ears.

"What on earth will she say when she learns the truth?" he thought.

They reached the Ferndale's house and were shown into the drawing-room, and in a minute or two Norah was in her friend's arms.

"My dear Norah! Why, what has brought you up to London so unexpectedly? And Mr. Burne, too!"

Then she smiled and held out her hand to Cyril.

"I suppose I've got to congratulate you, Mr. Burne?"

"Yes, Lady Ferndale, Norah has consented to make me the happiest of men."

"And you've come to tell me," she said. "Now, that is what I call really good and kind. Come and sit down—what is the matter?" she broke off, for Norah clung to her and began to cry quietly.

"You tell her," she said to Cyril.

It was comparatively easy to tell Mr. Petherick, but Lady Ferndale was quite another person.

"Or rather there was," said Norah. "It has all gone now."

Cyril unfolded the strange story, and

Mr. Country Life (reading)—"If you desire a safe horse always pick a grey or white one, as that color is sure indication of gentleness and tractability. Now, I wonder if that's true?" Mrs. C. L.—"Perfectly absurd, William! Why you're quite grey yourself."

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise, giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This highly instructive book was written by W. H. Veno, a gentleman who has made a study of these diseases. The preface is by a graduate of the University of Wurtzburg. Send postal to-day and you will receive the book free by return.—Address, The Veno Drug Co., 24 King St., West, Toronto

"I am afraid you are one of those people who look down on toil." "Not at all," answered the luxurious youth. "My great-great-grandfather worked hard and invested his money, and we are quite pleased with him for doing so."

Fertify Yourself against pulmonary troubles, including consumption, with Allen's Lung Balsam. It will loosen the cough and phlegm. Cure soon follows.

"I know, old chappie," said Dobbie, "she has her faults, and a temper, and all that; but I love her and can't live without her." "Just so," calmly replied his friend; "but the question isn't that. Can you live with her?"

The Demon of All Disease.—Kidney diseases are rightly so-called—they're in-explainable, unaccountable and insidious. It is the function of the kidneys to filter out all impurities. If they're clogged South American Kidney Cure will put them to rights and rid the ravages of so grim a visitant as diabetes or other kidney complications. It relieves in six hours.—HIS

Girls now-a-days are not so particular as they used to be about trifles. The other day a newly-made friend said to an awfully fetching girl: "What lovely teeth you have, dear!" "Yes," replied the other, without turning a hair: "they were a birthday present."

Itchy tubercles on the skin of scrofulous people produce the hideous disease called lupus. Weaver's Ointment, used in time, will save the skin from destruction. Apply to all affected parts. Cleanse the blood with Weaver's Syrup

Magistrate—"You say you didn't steal the watch. Then, where did you get it?" Prisoner—"Bought it, your worship." Magistrate—"Where?" Prisoner—"In King Street." Magistrate—"What did it cost?" Prisoner—"Really, your worship I quite forgot to ask."

After Wasting Fevers hasten recovery to health by the use of "Feringh's," it is the best tonic. It builds, strengthens and gives new vitality. Try it; it will make you feel strong.

Daughter—"Don't invite our country cousin to see us again." Mother—"Did he make any bad blunders before the company, dear?" Daughter—"I should say so. When I showed him a Louis XIV. chair, he asked if Louis was a good chairmaker!"

Stomach "Scowls."—Ever notice the seams and frowns that steal into the face of the sufferer from indigestion, dyspepsia and chronic stomach ailments. Watch the sunshine break in and the lines vanish when Dr. Von Stan's Pingapple Tablets are given a chance to show their power. One lady, in writing of their efficacy in her case, calls them "A heaven-born healer." 55 cents.—120

"Now, my dear sir," said Dr. Fox, "I can't cure you unless you promise to do everything I tell you." "All right," said Skinner. "I promise." "Good! Now, first of all, pay me my last year's bill."

white suit is the only smart thing one can wear; at all other times it is a thing of abhorrence. Just now it is considered provincial and out of all taste.

On the other hand, the all-white gown is to be very much the thing. Never have so many lovely white muslin and linen gowns been shown as at the present. Sheer, plain white, without dots or figures, is the preferred material, and handkerchief linen is the favorite above all others.

Ingenuity has been exhausted it would seem, in the decoration of these simply built, but highly ornamental gowns. The princess gown filled in at the waist line with lace insertions is redeemed from monotony by the variety of designs it has been possible to develop.

PURE RED BLOOD.

Is Necessary to Health, Strength and Happiness.

Pure, rich, red blood is what is needed by every woman, young or old. Thin, weak, watery blood is the cause of all the headaches, and backaches, and side-aches—all the weakness and weariness, all the nervousness and fainting spells that afflict girls and women. The only thing that can help you is Dr. Williams' Pink Pills. These pills make new, rich, red blood, that gives new life and strength to every organ of the body. In this way they make pale, feeble girls develop into healthy, happy women, and for the same reason bring ease and comfort, and regularity to women at all ages of life. Miss J. Dietrich, St. Clements, Que., is one of the many thousands made well and happy through the use of Dr. Williams' Pink Pills. She says: "I tried several medicines but got nothing to help me until I took Dr. Williams' Pink Pills. I was subject to palpitation of the heart, a throbbing in the head, and dizziness and fainting spells. I had no appetite, and was weak, pale and discouraged when I began the use of Dr. Williams' Pink Pills. Six boxes of these have made me feel like an altogether different person, and have given me new health and strength."

Rich, red blood is the true secret of health and strength, and it is simply because Dr. Williams' Pink Pills make new, pure blood, that they cure such troubles as anaemia, loss of appetite, indigestion, neuralgia, rheumatism, St. Vitus dance, partial paralysis, kidney troubles, and the special ailments that only women-folks know. But you must get the genuine with the full name, "Dr. Williams' Pink Pills for Pale People," in the wrapper around each box. If in doubt, send to The Dr. Williams' Medicine Co., and the pills will be mailed at 50 cents a box, or six boxes for \$2.50.

Most men who are willing to do good are not in a position to make good.

A woman writes a letter because she has something to say or nothing else to do.

Mrs. Brown: "I have such a lovely present for my husband!" Mrs. Smith: "What is it?" Mrs. Brown: "A pair of slippers. Won't he be pleased?" Mrs. Smith: "Yes. What do you expect to get from him?" Mrs. Brown: "Oh, nothing much—a diamond ring, I suppose, or a sealskin jacket."

For Years Canadians have been using "The D. & L' Menthol Plasters and the sale for them is greater than all other plasters combined; a specific for backache, headache, sciatic pains.

She—"Tis ever woman's lot to suffer in silence." He—"Yes; and if they'd only let us suffer in the same way how happy we'd be."

Catarrhal Headaches.—That dull, wretched pain in the head just over the eyes is one of the surest signs that the seeds of catarrh have been sown, and it's your warning to administer the quickest and surest treatment to prevent the seating of this dreaded malady. Dr. Agnew's Catarrhal Powder will stop all pain in ten minutes, and cure, 50 cents.

The two men sat far into the morning talking and planning, and after breakfast, Cyril was over at the hotel conferring with Norah. She agreed, at once, to the whole plan of campaign as elaborated by Jack, whom she regarded as a perfect Solomon of wisdom, excepting the item of the speedy marriage. Covered with blushes, she assured Cyril that it was impossible.

"Why, dear," she murmured, hiding her face upon his broad chest, "no one would be, no one ever has been, married so—so suddenly!"

"Oh, haven't they?" said Cyril. "Well, we'll inaugurate a new departure. Look here, dearest, I really think we'd better follow Jack's advice. I've always found myself in trouble when I've disregarded it, and I've always come out all right when I've taken it. And, to tell you the truth, Jack is apt to cut up rough, when you ask him for his advice and don't take it."

"It seems to me," said Norah, almost inaudibly, and smiling, "that Jack—I mean Mr. Wesley—treats us like a couple of children."

"So you are," said that gentleman, entering at that moment. "I've engaged a perambulator—I mean, hansom—by the hour, and I think the sooner you see Mr. Petherick and Lady Ferndale, the better. I'll offer to accompany you," he added, with a faint smile, "but the cab only holds two, and it is a case where decidedly two are company and three none."

It was the first time Norah had ridden in a hansom, and the journey to Mr. Petherick's office seemed all too short. As for Cyril, he made a mental vow that he would spend part of their honeymoon riding beside his wife, and holding her hand under the splash board.

The old clerk announced that Mr. Petherick had not returned, and they were about to leave the office, when that gentleman entered.

He was considerably startled at sight of Norah, and more than startled when he heard all that she had to tell.

"Bless my soul!" he exclaimed, staring from Norah to Cyril, in a kind of amazement. "Catherine Hayes married, and you—you her daughter! Let me see those papers! I don't believe a word of it! Strange! I've always had my doubts about Mr. Berton—always. And yet he was invariably kind and businesslike. Let me see! Mind, before I look at 'em, I express my opinion that they are bogus!"

But his face lengthened as he examined the certificates and compared the dates with the notes he had taken during Norah's recital.

"I—I'm afraid," he said, reluctantly, "I'm afraid—Why, confound it, every penny will go to the present earl!" and he looked from one to the other. But Norah did not appear at all heartbroken by the loss of her wealth, and even Mr. Cyril Burne showed very few signs of grief and regret.

"I suppose you have found the young earl, sir?" said Cyril, demurely.

Mr. Petherick shook his head with a frown of annoyance.

"No, I have not. I thought I had got a clew to him, and followed it up as far as Paris, but it turned out to be another man altogether. I—I can't understand why he keeps in hiding unless he is dead."

"Even his death would not restore this money to Miss Norah," said Cyril.

"Oh, as to restore," said the lawyer, pugnaciously, "she hasn't lost it yet. We shall make a fight of it, of course, and we are just as likely to win as lose."

"But—but I don't want to fight," said Norah, in a low voice. "I wish to give up all claim to it."

Mr. Petherick shook his head.

"That's all very well, my dear young lady," he said, severely, "but perhaps this gentleman," and he looked at Cyril, "may have something to say to that; and—ahem!—you should study the wishes of your—er—future husband; eh, Mr. Burne?"

"Her wishes are mine," said Cyril, quietly. "If Miss Norah is bent on resigning all claim to this money, I am more than willing to let it go without a struggle."

The old lawyer stared at them gravely. "Dear, dear!" he said. "Tut, tut! Do

"It has all gone now."

Cyril unfolded the strange story, and Lady Ferndale listened with scarcely an interruption; then she drew Norah's head down to her own bosom and stroked the soft, bronze hair.

"If I were to say that I'm not surprised, Mr. Burne, would you believe me?" she said at last. "But it is true. I can say I actually suspected that Norah was not the daughter of the earl and countess, but I can say that I am not astonished. From the first moment I saw her, her likeness to the earl and the Arrowdale family struck me, and I remarked upon it to him. Will it be very wicked to say that I am—am rather glad? Oh, wait, though, there is all that money."

Lady Ferndale looked rather grave. "I can't say that I am pleased at that," she said. "But perhaps the earl will—" "Why should he?" said Norah, smiling. "I am no relation of his, dear Lady Ferndale. And, indeed, we don't want any of the money!" and she glanced shyly at Cyril, who hastened to corroborate.

"We don't want a penny, I assure you, Lady Ferndale," he said. "The earl may keep it all for what we care; eh, Norah? All I want is Norah."

Lady Ferndale smiled. "He seems a very bold young man, dear," she whispered to Norah.

"And we have come to ask you if you think we could be married in four days?" Lady Ferndale almost jumped.

"It is impossible!" murmured Norah. "Tell him so!"

"Good gracious me, why do you want to get married so quickly?" exclaimed Lady Ferndale.

"He will not give me the reason," said Norah, blushing.

"Because I can't," said Cyril, almost bluntly. "But I'll tell you what I will do. I will tell Lady Ferndale, and if she agrees with me that the reason is good enough, will you consent?"

"As I'm sure she will not—yes," said Norah.

"Very well, then," said Lady Ferndale, very much amused and puzzled. "Now, you go upstairs—of course you'll remain with us. I'm going to send to that hotel for your luggage directly—and Mr. Burne shall persuade me, if he can, that there is any rhyme or reason in his absurd proposal."

Norah left the room, and Cyril sprang the truth upon Lady Ferndale as if it had been a bombshell.

"You see, Lady Ferndale," he said, with a half smile, "I'm Lord Arrowdale, and I naturally want to marry Norah before she knows who I am."

Lady Ferndale did jump this time.

"You—you are—?" Then she burst out laughing. "Well, of all the stupid people, I have been the stupidest. I told Norah the first time I saw you—you remember the day she and I were driving together—I told her that I was certain I had seen your face before; and so I had, or something very like it, in the portrait gallery at the Court! And so you are the new earl! And you have been hiding it from her, and from all of us, all this time! And it's to you all this money of the poor girl's will go!"

"Just for a day or two," he said, with a smile. "I am going to make it over as a deed of gift to her, of course."

"Of course!" said Lady Ferndale. "And what you are afraid of is—"

"That Norah's pride, if she learns who and what I am, will be aroused, and she may put all sorts of obstacles in the way of our marriage. And I can't run even the slightest risk of that, Lady Ferndale," he said, with a shake of the head. "So, if you'll please to regard me as Cyril Burne, the not altogether unsuccessful artist, and let her continue to so regard me, I think she will marry me out of hand."

"Well, I think she will," admitted Lady Ferndale, with a naive smile. "But," she said, with sudden gravity, "have you thought of what the world will say when it hears that you and she have married so soon after the death of the late earl, your uncle, and her supposed father? Have you thought of that, Mr. Burne?"

"No, I haven't," he said, quietly and coolly. "You see, since we met, yesterday, and—and were reconciled, I have

not had time to think of anything or anybody, but herself; but if you'll stand by me and get her to consent, I don't care one brass farthing what the world says," and as he confronted Lady Ferndale, his face lit up with a smile which won that lady's heart over to his side in a moment.

"You shall have her, Mr. Burne—Lord Arrowdale—oh, dear!"

"Mr. Burne, please!" he said, laughing warningly.

So it happened that when Norah came in, and going up to Lady Ferndale, said, with downcast face:

"Well, dear, have you explained to him how impossible it is?"

Lady Ferndale replied demurely: "Mr. Burne has convinced me that the marriage should take place within the week, dear, and I've promised him it shall" and to Norah's little cry of dismay she vouchsafed nothing but a laugh.

It was useless for Norah to attempt to argue or protest. She was one against three, for Jack, to whom she appealed to help her fight against Lady Ferndale and Cyril, basely deserted her and went over to the enemy, and at last Norah gave in, only stipulating that the wedding should be as quiet as it could legally be.

"We'll be married in the coal cellar and swear the clergyman to secrecy, if you like," said Cyril. "As for me, I can dispense with bridesmaids and best man—no, I can't, I must have Jack; but I'll let the cake and the cards go."

"And I must have the cake," said Lady Ferndale. "And now, Mr. Burne, is Norah and I will have to work really hard for the next few days, I shall be glad if you will go down to your club, and stay there as much as you can. Stop, though," she added, suddenly, as if something had occurred to her; "now I think of it, Norah will have to do some shopping, and if you will promise to bring her back to dinner, you shall go with her. I'll give you till dinner time."

A more delightful proposal for both of the infatuated young persons she could not have made, and very soon they had gone off in one of Norah's beloved hansoms.

(To be continued).

COUNTESS OF ABERDEEN'S SLAVES.

Interesting Incident in Her Wedding Tour in Egypt.

The Countess of Aberdeen, who is President of the Women's National Liberal Federation, and wife to the new Lord-Lieutenant of Ireland, began her active life as a reformer when on her honeymoon.

She was twenty years old when she married the Earl of Aberdeen, who is ten years her senior. Part of their wedding tour was through Egypt, where the happy pair met General Gordon, and from him heard so much about the slave traffic that they resolved to make war against it immediately.

They noticed four youths who were being exhibited for sale, and invited their owner to bring them on board their launch. The dealer, thinking the couple intended purchasing his human merchandise, gleefully did so, whereupon on the earl, pointing to the British flag flying over his boat, exclaimed:

"These boys are free. I claim them in the name of the Queen!"

His lordship steadfastly refused purchase-money, and Lady Aberdeen adopted the four youths, as well as a boy who had been imprisoned for being a Christian. Thus it happened that the young Countess, still a mere girl, returned from her honeymoon with five adopted sons! Three have since died, but two have lived to enjoy a good education under the direction of their noble foster-parents.

MEGAPHONE USED AT FUNERAL.

Ceremonies at Cremation of Cambodia's Dusky Sovereign.

A picturesque account of the funeral ceremonial over the late King Norodom of Cambodia, at Phnom Pen, the capital of Cambodia, has been received in Paris

THEY MADE THIS COUPLE HAPPY.

DODD'S KIDNEY PILLS DOING GOOD WORK AROUND PORT ARTHUR.

Mr. Dick Souvey and Wife Both Had Kidney Troubles and the Great Canadian Kidney Remedy Cured Them.

Port Arthur, Ont., Mar. 12.—(Special).—That Dodd's Kidney Pills cure the Kidney ills of men and women alike has been proved time and again in this neighborhood, but it is only occasionally they get a chance to do double work in the same house. This has happened in the case of Mr. and Mrs. Dick Souvey, a farmer and his wife, living about seven miles from here. In an interview Mr. Souvey said:

"My wife and myself have used Dodd's Kidney Pills, and have found them a big benefit to our health. We had a Grippe two winters and were exposed to much frost and cold. Our sleep was broken on account of urinary troubles, and pain in the kidneys. We each took six boxes of Dodd's Kidney Pills and enjoy good health."

EXCITING HONEYMOONS

COUPLES' DARING TRIP THROUGH CENTRAL ASIA.

Spent Their Honeymoon in Port Arthur —With Napoleon's Grand Army.

Count de Lesdain, of the French Legation at Peking, has with his bride just completed a daring honeymoon trip through Central Asia. From Peking the couple travelled north to the great Gobi Desert—discovering on their way two buried cities—where they came upon a new lake. They then made for the sources of the Yangtze-kiang River, enduring many hardships and nearly perishing in an upland mud plateau, 19,800 feet above the sea's level. At one period they were fifty days without encountering another human being. They ultimately reached Darjeeling by way of Tibet.

It was on his wedding-day that Lieutenant Nevelsky received orders to proceed to Port Arthur, where he was appointed adjutant to General Stoessel, and served under him throughout the siege. His wife, who obtained permission to accompany him, spent her honeymoon in doing invaluable work in the hospitals of the beleaguered fortress, where, with Mme. Stoessel, she labored night and day in nursing the wounded and

FEVER-STRICKEN SOLDIERS.

Another honeymoon undertaken in somewhat similar, though even more perilous, circumstances was that of the young bride of Count Alesio, an Italian noble who had attached himself to the fortunes of the Great Napoleon. This girl, for she was but eighteen, immediately after her marriage joined the Grand Army with her husband, and accompanied him throughout the disastrous Russian Campaign, where she shared with him all the privations and horrors of the retreat.

It is now about two years since Mr. and Mrs. Bradley, of Nova Scotia, arrived at Plymouth, England, having spent an enjoyable, if very exciting, honeymoon on board a small decked sailing-boat, in which they crossed the Atlantic. Rough weather was experienced during the trip, but their little craft behaved admirably, and the couple were delighted with the success of their novel wedding-tour.

THE success of pastry depends upon the flour. Bread and pastry must be more than merely appetising; they must be wholesome, digestible, nourishing.

The flour depends upon the wheat and the way it is milled.

Royal Household Flour

is made from spring wheat only. It is milled by the newest and best machinery. It is purified by electricity.

Use it and you get bread not only light, crisp and appetising, but also wholesome, digestible and nourishing.

You will better your baking by buying Ogilvie's Royal Household Flour from your grocer.

A picturesque account of the funeral ceremonial over the late King Norodom of Cambodia, at Phnom Penh, the capital of Cambodia, has been received in Paris by mail.

The body, enclosed in a large wooden urn, was paraded through the capital, surrounded by an escort of 5,000 Cambodian warriors, and military honors were accorded by the French troops.

Meantime the new King, Sisowate, and all his priests remained flat on their faces for three hours before the immense funeral pyre which had been prepared.

After the procession the urn was placed on the pyre, and Sisowate set fire to several pans of perfumed alcohol placed around the urn. Fagots of sandalwood had been supplied to all the European and native notables who were present, and with these they fed the flames.

When the urn caught fire King Sisowate began to pray in a loud voice, and the prayer was echoed vigorously by the priests, the woman of the palace and the mandarins. The official mourners gave voice to a long-drawn wail, which was uttered through large megaphones. The pyre burned for twenty-four hours.

SPOILED IT.

Diner (who has been struggling with a steak)—Look here, waiter, you'll have to bring me something else. I can't tackle this.

Waiter—I'm sorry, sir, but I can't take it back; you've bent it!

SEED TIME

The experienced farmer has learned that some grains require far different soil than others; some crops need different handling than others. He knows that a great deal depends upon right planting at the right time, and that the soil must be kept enriched. No use of complaining in summer about a mistake made in the spring. Decide before the seed is planted.

The best time to remedy wasting conditions in the human body is before the evil is too deep rooted. At the first evidence of loss of flesh

Scott's Emulsion

should be taken immediately. There is nothing that will repair wasted tissue more quickly or replace lost flesh more abundantly than Scott's Emulsion. It nourishes and builds up the body when ordinary foods absolutely fail.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

of the success of their novel wedding-tour.

On more than one occasion has a balloon been selected as the locale for a honeymoon. A well-known English general passed the first hours of his married life travelling through space with his newly-wedded wife, while M. Camille Flammarion, the celebrated French astronomer, entered the car of a balloon with his wife immediately after the marriage ceremony, and was borne aloft on

AN AERIAL WEDDING-TRIP.

Six years back an eccentric couple from Orleans, France, spent their honeymoon on the summit of Mont Blanc. After battling for hours with a terrific snowstorm they gained the mountain's loftiest peak, where, in the presence of the guides, they embraced and swore eternal fidelity. On their return to Chamounix, after three days' absence, an enthusiastic reception awaited them. A band playing martial music came forth to meet them, a big gun boomed in their honor, and in the evening there was a display of fireworks.

Eccentric, perhaps, rather than adventurous, was the honeymoon conceived by a young Californian couple named Beyer, who passed the week following their marriage amid the branches of a gigantic tree, where they had erected an extempore shelter. To this they ascended by means of a ladder, which was, at their request, afterwards removed, and not returned until, at the expiration of seven days, it was required for their descent. A week's honeymoon, too, was once spent by a newly-wedded pair named Kolesy in the Dobschau ice-cave, a vast cavern whereof the roof, walls, and floor are thickly coated with ice. Although plentifully supplied with rugs, blankets, and other warm coverings, their experience was not one they would have cared to repeat.

FRAUGHT WITH EXCITEMENT.

Although of a different kind, was the wedding journey just undertaken by one George Frances, when on the way with his bride to see his father in Chicago. Having no money for his railway fare he secreted himself in his wife's big dressing-case, the lady herself travelling in a comfortable sleeper with the key of her trunk in her pocket-book. When near Omaha, however, a porter, while checking the luggage, heard a noise proceeding from the case, and, suspecting the presence of somebody within, called out, "Do you want a drink?" Noises indicative of an affirmative reply resulted in the trunk's being opened and the release of Frances, too stiff to walk and quite exhausted.

UNMISTAKABLE SYMPTOMS.

Mr. Tyle-Phist—Jagway was trying to borrow money from me a little while ago. He seemed to be drunk.

Mr. Ardax—If he was trying to borrow money from you he wasn't drunk. He was crazy.

THE EDITOR.

Explains How to Keep up Mental and Physical Vigor.

A New Jersey editor writes: "A long indulgence in improper food brought on a condition of nervous dyspepsia, nearly three years ago, so severe that I had to quit work entirely. I put myself on a strict regimen of Grape-Nuts food, with plenty of outdoor exercise and in a few months found my stomach so far restored that the process of digestion gave me pleasure instead of distress.

"It also built up my strength so that I was able to resume my business, which is onerous, as I not only edit my own paper but also do a great deal of 'outside' writing.

"I find that the Grape-Nuts diet enables me to write with greater vigor than ever before, and without the feeling of brain-fog with which I used to be troubled. As to bodily vigor—I can and do walk miles every day without fatigue—a few squares used to weary me before I began to live on Grape-Nuts! Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pkgs.

DOCTORS ON STRIKE.

Death Rate in Lower Austria Rises—Chemists and Druggists Aid.

The strike of the parish doctors in lower Austria has been followed by an alarming outbreak of scarlet fever and measles. Inasmuch as the doctors refuse to do more than report the new cases to the Government, the death-rate has been very high and is rapidly growing.

The parish doctors declare that the fee of four cents allowed by the Government for each case of infectious disease is insufficient. A detailed diagnosis has to be made to the authorities in each case, and the doctors declare that they are frequently out of pocket in consequence.

They firmly refuse to treat any cases until better pay is promised. The Government threatens them with dismissal, but private doctors have promised to decline to take their places if called upon by the authorities.

Inspired by the doctors' strike, the chemists' and druggists' assistants at Abbazia are refusing to fill prescriptions unless given better pay.

NEEDN'T WORRY.

When Births Decline, Says an Expert, So Do Deaths; Things Even Up.

The birth rate gives impartial evidence of the social condition of a country, and a declining birth rate marks the growing well being of its people, says the Nineteenth Century. The birth rate does not indicate with even approximate accuracy the growth of population. The birth rate declines with the death rate.

However great the birth rate of an old settled country may be, the natural increase of population—that is, the difference between births and deaths—does not, on a ten years average, exceed fifteen per 1,000 of population.

It is very remarkable that the birth rate all over Europe culminated in 1876, and, except in Russia, has declined more or less continuously ever since. In twelve of the fifteen countries of Europe (Russia not included) the birth rate culminated in the year 1876, and also to within a fraction in the other three.

In that year the birth rate varied (per 1,000 of the population) from 26.2 in France to 46.3 in Hungary, while the natural increase of population—the difference between the births and deaths—varied only from 2.6 in France to 15.4 in England. In Hungary, which had the highest birth rate (46.3), the natural increase was only 9.3, showing how unsafe it is to estimate the growth of population by the births alone.

The close interdependence of the birth rate and the death rate is very clearly shown by comparing the births and deaths when the birth rate was highest and again when it was lowest. In 1876 the birth rate in the fifteen European countries averaged 35.3 per 1,000, and the death rate 23.7 per 1,000. The average natural increase was thus 11.6 per 1,000.

In 1903 the average births had fallen to 29.8, and the deaths to 18.4, making the average increase of population 11.4 per 1,000. Thus while the birth rate fell 15½ per cent., the natural increase declined only 1½ per cent.

Love at first sight may require the services of an oculist after a second look.

TACTFUL QUAKER.

Some time ago there lived a gentleman of indolent habits who spent his time visiting among his friends. After wearing out his welcome in his own neighborhood he thought he would visit an old Quaker friend some twenty miles distant.

On his arrival he was cordially received by the Quaker, who, thinking the visitor had taken much pains to come so far to see him, treated him with a great deal of attention and politeness for several days.

As the visitor showed no signs of leaving the Quaker became uneasy, but bore it with patience until the eighth day, when he said to him:—

"My friend, I am afraid that will never come again."

"Oh yes, I shall," said the visitor. "I have enjoyed my visit very much and shall certainly come again."

"But," said the Quaker, "if thee will never leave, how can thee come again?"

FOR SALE—JUST ARRIVED AND FOR SALE 24 Imported Clyde-dale stallions, and hackneys: farm 2½ miles from end of street car line.—O. SORBY, Guelph, Ont.

Where Fortunes Grow.

Greatest Trucking District of the South. Lands cheap and climate ideal. Send for descriptive booklet, free.—F. L. MERRITT, Citizens' Bank Building, Norfolk, Va.

STARR'S MAGIC RHEUMATIC CURE Guaranteed to cure Rheumatism, Acute, Chronic, Inflammatory or Neuralgic, Sciatic, Lumbago, and all Kidney troubles; removes Uric Acid from the system, gives immediate relief, Don't suffer, but send for a bottle at once. Osborne Remedy Co., 175 Yonge St., Toronto, Canada. \$1.00 per bottle.

YOUR OVERCOATS

and faded Suits would look better dyed. If an agent of ours in your town, write direct Montreal, Box 158

RHEUMATISM

in any form and cold perspiring feet positively cured within 30 days, by our newly patented Magnetic Discs or money promptly refunded. Mailed anywhere \$1.00. Write for descriptive booklet. Agents wanted. **MAGNETIC RHEUMATISM CURE CO.,** Sherbrooke, Quebec, Canada

APPLE TREES.

Before buying write us, or see our agent near you, for prices. We have the largest stock of fruit trees to be found in Canada. We pay the freight.

Brown Brothers Company,
Nurserymen, Limited,
Brown's Nurseries, Ont.

Western Canada Land Co

HEAD OFFICE, 38 NINTH STREET,
P. O. BOX 38. **Brandon, Man.**

Improved farms and unimproved wheat and ranch lands, wholesale and retail, in Manitoba, Saskatchewan, Alberta and fruit lands in Southern Okanagan Valley, B. C.

Wheat lands on Saskatchewan Plains at \$7.10 per acre, easy terms till June 1st to make selections, the finest wheat lands in the world.

Homesteads located. Selections made. Write or call for any information desired.

SCORES PERISH IN TRAIN WRECK

An Awful Head-On Collision In a Colorado Gorge.

A despatch from Pueblo, Col., says: Some two score lives were crushed out early on Friday in a head-on collision of two passenger trains near Adobe, Col., on the Denver & Rio Grande Railroad, and more than a score of the victims were incinerated beyond identification by a fire that destroyed the wrecked coaches. Many others were injured, but all probably will recover. The wreck was due to undelivered orders, heavy mountain grades, a blinding snowstorm, a sharp curve and the slippery condition of the rail. Only the locomotive, baggage and day coaches were wrecked, the sleeping cars escaping almost unscathed.

Many of the dead were homeseekers bound for the Northwest. The three crushed locomotives set fire to the splintered coaches, and it was hours before all the bodies were recovered, the flames being so hot that rescuers could not approach the debris until the fuel burned out.

It was a wild, stormy night in the mountain canons when the two heavy trains met. Blinding snow darkened the rocky gorges, and speed was not high. The baggage car of the westbound train broke in two, and the three coaches were squeezed together. The baggage car, the mail car, and a coach of the eastbound train buckled.

A SHEET OF FLAME.

Hardly had the notice of the wreck ceased, when the gas, with which the train was lit, ignited, and a sheet of fire ran through the shattered cars. In the forward coach of the westbound train every seat was occupied by passengers, most of whom were homeseekers. Many foreigners were among them, and in their terror they succumbed, without attempting to reach safety, being roasted alive. The cooler ones, seeing their danger, rushed for the windows and doors, and, with the aid of the passengers in the rear of the train and those members of the train crew who were unhurt, reached the open air. Many were injured by the rough handling they received or by flying glass.

One man in the first coach of No. 3 had managed to raise a window, and had forced his body half way to freedom when he became lodged in the window. He fought fiercely for life, but each movement only wedged him the more tightly, till the flames swept over him. He cried out: "For God's sake, and for the sake of my baby, shoot me." The onlookers, prevented from approaching the scene because of the intense heat, could do nothing to relieve the man's sufferings. Finally a timber from the roof of the car fell on his head, killing him.

Communication was opened with the Pueblo office of the railroad from Portland, a mile from the wreck, and a relief train at once was despatched to the scene. The injured were placed in the sleeping cars and brought to Pueblo, with the passengers of the eastbound

train who were unhurt. Another relief train came from Florence to take away the injured portion of the east-bound train.

ORDER NOT DELIVERED.

The Utah and California express, west-bound, left Pueblo an hour and a half late, with orders to meet the Colorado and New Mexico express, eastbound, at Florence. This order was changed, and the westbound train was directed to pass the eastbound train at Beaver, about 12 miles east of Florence. The order should have been delivered to the train crew at Swallow, but for some reason the operator there neglected to deliver the order. In the meantime the eastbound train had received its orders, and expected to meet the westbound train at Beaver. No other orders intervened to prevent the wreck.

It is impossible to determine the exact number of dead on account of the incineration of many bodies.

One of the pathetic tragedies of the disaster was the wiping out of all but two of the family of Taylor Hewitt, of Lebo, Kan. Father, mother, daughter, grandchild, and the wives of the sons are missing. The two sons, A. Hewitt and W. L. Hewitt, are among the injured in the hospital here, each of them having leg fractures in addition to other injuries.

E. A. Hewitt said that he had a dream several months ago, in which his family were all killed. He said he saw, just as plainly as he later saw the real wreck, everything that took place after the collision.

NO WONDER THEY REBEL.

A despatch from St. Petersburg says: Lethal newspapers analyze the repressive measures of the Russian Government in the Baltic provinces from Dec. 14 to Feb. 14. The military hanged 18 persons and shot 621. Three hundred and twenty were killed in armed encounters and 251 were flogged. Ninety-seven farm houses, 22 town dwellings, four schools, two town halls and three club houses were burned.

WITH AN IRON HAND.

A despatch from Sukhum, Trans-Caucasia, says: The ruthless manner in which Gen. Alikhanoff has crushed the revolution in the Government of Kutais by razing towns, executing ringleaders of the movement and driving sympathizers with it to the mountains, has produced such resentment that acts of terror and the throwing of bombs at the troops are frequent. Gen. Alikhanoff has proclaimed and is enforcing martial law with terrible rigor and revolutionaries or other persons caught with arms are immediately shot.

A despatch from Warsaw says: An armed crowd on Sunday attacked the prison in Pakia Street, killed a warden, mortally wounded two others, and liberated a political prisoner named Zaleski.
